GENERAL INDEX 979

Quick Reference Index	1008
---------------------------------	------

THE WORLD ALMANAC AND BOOK OF FACTS 2011

Top Ten News Topics of 2010

1. Republicans Take House, Win Big in State Races. Capitalizing on voter discontent with the economy, congressional Democrats, and Pres. Barack Obama, the Republican Party won control of the U.S. House of Representatives in midterm elections Nov. 2. The party picked up at least 60 seats—enough to make John Boehner (R, OH) the next speaker of the House, replacing Nancy Pelosi (D, CA). In the Senate, Republicans gained six seats but fell short of a majority and failed to defeat the highest-ranking Democrat, majority leader Harry Reid of Nevada, in a close race. Energized by the Tea Party movement and other conservative activists, the GOP made historic gains of at least nine state governorships and more than 675 seats in state legislatures. Analysts estimated that total campaign spending by candidates, political parties, and interest groups would reach nearly \$4 bil, a new record for a nonpresidential election year.

2. Economic Recovery Stalls. The dominant election issue was the sputtering U.S. economy, with the housing market sluggish, job growth weak, unemployment at 9.6%, and federal budget deficits soaring above \$1 tril annually. In the first quarter of 2010, 11.5% of homeowners were in default on mortgage loans, and foreclosures had reached record levels. Criticized for sloppy handling of mortgage defaults, leading lenders temporarily suspended foreclosures in Oct. The Federal Reserve Nov. 3 announced fresh steps to accelerate the recovery, which the Fed called “disappointingly slow.” The major economic bright spots were on Wall Street, where stock indexes rebounded to their highest levels in two years.

3. U.S. Winds Down in Iraq, Surges in Afghanistan. Pres. Obama declared Aug. 31 that the U.S. combat mission in Iraq had ended. More than 4,400 U.S. service members had lost their lives during Operation Iraqi Freedom, and nearly 32,000 U.S. troops had been wounded in action. Operation New Dawn began Sept. 1 with some 50,000 remaining U.S. military personnel primarily responsible for training Iraqi forces. In Afghanistan, meanwhile, U.S. troop strength had nearly tripled since Obama took office, reaching 100,000 by summer 2010. More than 600 coalition forces were killed in Operation Enduring Freedom Jan.-Oct. 2010, the highest annual total since the war began. On June 23, Obama named Gen. David Petraeus commander of U.S. and allied troops in Afghanistan, replacing Gen. Stanley McChrystal, who was forced to resign after *Rolling Stone* magazine published disparaging comments McChrystal and his staff had made about the Obama administration. Both Iraq (Mar. 7) and Afghanistan (Sept. 18) held parliamentary elections, but as of Nov., Iraqi leaders still had not agreed on a new government, and Afghan balloting was marred by violence and vote buying.

4. Blowout in Gulf of Mexico Causes Huge Oil Spill. Nearly five years after Hurricane Katrina and subsequent New Orleans levee failures devastated the U.S. Gulf Coast, the region suffered another economic and environmental disaster beginning Apr. 20, when a gas explosion and fire killed 11 people on the *Deepwater Horizon*, an exploratory drilling platform in the Gulf of Mexico. When the rig sank, oil began gushing from ruptured pipes. British oil giant BP, which managed the project, was unable to stop the leak for nearly three months. By the time it was halted July 15, up to 5 mil barrels of oil had polluted the Gulf and coastal areas, threatening wildlife in wetland habitats, fouling fishing grounds, and depositing sticky tar balls on beaches from Florida to Texas. BP agreed to provide up to \$20 bil to the independent Gulf Coast Claims Facility to compensate victims.

5. Earthquake Devastates Haiti. The poorest country in the Western Hemisphere experienced catastrophic damage Jan. 12 when a 7.0-magnitude earthquake struck near Port-au-Prince, Haiti. An official assessment in late Mar. put the death toll at more than 220,000, with at least 300,000 more people injured. Destruction was widespread, reconstruction was slow, and at least 1.3 mil people were still living in temporary shelters in the Port-au-Prince area in late Oct., when cholera broke out, killing hundreds and deepening Haiti’s misery. The United Nations estimated that the disaster cost Haiti \$7.8 bil—or 20% more than the country’s gross domestic product in 2009.

6. Pakistan Floods Leave 8 Mil Homeless. Torrential monsoon rains beginning in late July and continuing into Aug. inundated nearly one-fifth of the country, leaving 8 mil people homeless and significantly affecting at least 12.5 mil more; by mid-Sept. the confirmed death toll had risen above 1,750. More than 1.8 mil houses were destroyed, and damage to transportation infrastructure and agricultural resources was widespread. Relief efforts were led by the Pakistani military, which diverted thousands of troops from anti-insurgent activities; at the same time, Islamic extremist groups, which provided food, shelter, and medical aid to flood victims, reportedly used the opportunity to gain recruits.

7. Congress Enacts Comprehensive Health Law. In late Mar., after many months of controversy and complex legislative maneuvering, Pres. Obama signed the Patient Protection and Affordable Care Act, the most ambitious effort to remake the U.S. health care financing system since the passage of Medicare and Medicaid in 1965. The legislation sought to curb insurance industry abuses and extend health insurance coverage to some 32 mil Americans over a 10-year period. Scheduled to become fully operational by 2014, the system would be financed through tax increases on upper-income individuals and would mandate that most U.S. citizens and legal residents purchase health insurance or pay a penalty. Opponents, who derided the plan as “Obamacare,” pledged to seek its repeal, and challenged the constitutionality of the individual mandate provision in the courts.

8. Debt Crisis Forces European Budget Cutbacks. The European Union’s common currency, or euro, weathered its worst crisis in more than a decade when the International Monetary Fund and the 16 European countries that comprise the eurozone agreed May 2 on a \$146 bil loan package to prevent Greece from defaulting on its debts. In return, Greek leaders pledged to implement an austerity program that would slash the country’s annual budget deficits. A week later, European finance ministers reached agreement on a \$955 bil emergency stabilization program to keep the crisis from spreading to other countries with debt problems, notably Spain and Portugal. Elected in the UK in May, the government led by Conservative Prime Min. David Cameron dealt with Britain’s rising debt Oct. 20 by announcing spending cuts of nearly \$130 bil over a four-year period. In France, Pres. Nicolas Sarkozy pushed forward with a plan to cut pension costs by raising the retirement age; opponents staged mass demonstrations in Sept. and Oct., blocking fuel depots, disrupting road and rail traffic, and clashing with police.

9. Kagan Joins Supreme Court. Following the announcement Apr. 9 that Associate Justice John Paul Stevens was retiring from the U.S. Supreme Court, Pres. Obama on May 10 nominated Solicitor Gen. Elena Kagan to replace him. Confirmed by the Senate Aug. 5, she joined Associate Justices Ruth Bader Ginsburg and Sonia Sotomayor—the first time three women have served simultaneously on the court. Major decisions during the 2009-10 term included a Jan. 21 ruling in *Citizens United v. Federal Election Commission*, which eased restrictions on campaign contributions by companies, unions, and nonprofit advocacy groups; and a June 28 decision in *McDonald v. Chicago* affirming that state and local laws may not abrogate the 2nd Amendment right to keep and bear arms.

10. Winter Olympics, World Cup Showcase International Athletes. More than 2,600 registered athletes from 82 nations competed in the XXI Olympic Winter Games, held Feb. 12-28 in and around Vancouver, British Columbia. Canada, the host country, led in gold medals with 14, while the U.S. led in the overall medal count with 37 (9 gold, 15 silver, 13 bronze). On July 11 in Johannesburg, South Africa, Spain’s national soccer team won its first FIFA World Cup title, defeating the Netherlands in overtime, 1-0. The month-long World Cup championship round—dominated by the deafening drone of plastic horns known as vuvuzelas—was the first played on African soil.

THE WORLD AT A GLANCE

Number Ones

Most-visited **social networking website** Facebook.com, 141.6 million unique visitors in June 2010 (p. 373)

Most-used **search engine** Google, 10.3 billion searches by 181.4 million unique visitors in June 2010 (p. 373)

Top U.S. state by domestic **traveler spending**. California, \$99.4 billion in 2008 (p. 97)

Airline that carried the most passengers Delta, 108.6 million in 2009 (p. 98)

Busiest **U.S. airport** by passenger traffic Hartsfield-Jackson Airport (Atlanta, GA), 88.0 million passengers in 2009 (p. 98)

Top-selling **light truck** in the U.S. Ford F-Series, 392,112 sold in 2009 (84,357 fewer than in 2008) (p. 92)

Top-selling **passenger car** in the U.S. Toyota Camry, 356,824 sold in 2009 (79,793 fewer than in 2008) (p. 92)

Most popular **compact/sports car color** in the U.S. Silver, 19% of 2009 model year compact/sports cars (p. 92)

Most popular **light truck color** in the U.S. White/white pearl, 26% of 2009 model year trucks (p. 92)

Most popular **luxury car color** in the U.S. Black/black effect, 35% of 2009 model year luxury cars (p. 92)

Largest U.S. **bank company** Bank of America, \$2.4 trillion in assets in 2010 (p. 70)

Fastest **roller coaster** in the world. Kingda Ka, 128 mph (Six Flags Great Adventure, Jackson, NJ) (p. 99)

Nation hosting the most **refugees**. Pakistan, 1.8 million, mostly from Afghanistan, in 2008 (p. 736)

Biggest U.S. **defense contractor**. Lockheed Martin Corp., \$17.2 billion in contracts in 2009 (p. 142)

Nation with largest **crude oil reserves**. Saudi Arabia, 266.7 billion barrels (U.S. reserves, 21.3 billion barrels) (p. 123)

U.S. state with highest **crude oil production**. Texas, 403.8 million barrels in 2009 (p. 122)

U.S. state with highest **energy consumption per capita**. Wyoming, 1.0 billion Btu per capita in 2008 (p. 122)

Nation most dependent on **nuclear energy** Lithuania, 76.2% of electricity was nuclear-generated in 2009 (p. 125)

Surprising Facts

In 2010, there were 98,985 U.S. military personnel stationed afloat around the world, more than were stationed in any one foreign country, including Iraq or Afghanistan. (p. 138)	China surpassed the U.S. as the country with the most Internet users in 2008; by 2009, China had 310.9 million Internet users—more than the entire U.S. population—and the U.S. had 244.8 million. (p. 372)
Digital music sales increased from \$183.4 million in 2004 to more than \$2.0 billion in 2009. Sales of compact discs totaled \$4.2 billion in 2009, less than half of the value of CD sales in 2004 . (p. 262)	The U.S. produces 15% of the world's total energy , but consumes around 21% of it. (p. 121)
In 2008, 23.9% of Americans smoked cigarettes , down significantly from 38.7% of Americans in 1985. Yet Americans spent \$87.9 billion on tobacco products in 2009—twice the \$41.0 billion they spent in 1990. (pp. 59, 154)	Americans paid an average of 22.4% of their total income in income tax and Social Security payments in 2009 (down from 24.7% in 2008); Belgians paid 41.5%. (p. 735)
The U.S. spent \$7,285 per capita on health care in 2007, far more than any other country. France was closest to the U.S., spending \$4,627 per capita on health. (p. 150)	If all circulating U.S. dollars and coins were equally distributed among the nation's population, in 2010 every American would receive \$3,051 . (p. 65)
	The rate of delivery by cesarean section in the U.S. increased 54% between 1996 and 2007 (from 20.7% of live births to 31.8%). (p. 173)

America: By the Numbers

88.5%: high school graduation rate of Vermont, the highest in the U.S. (p. 393)

52.0%: high school graduation rate of Nevada, the lowest in the U.S. (p. 393)

28.1: median age at first marriage for U.S. men in 2009 (the highest it has ever been). (p. 172)

25.9: median age at first marriage for U.S. women in 2009 (the highest it has ever been). (p. 172)

47: average total hours of television viewed per week by U.S. women over age 55. (p. 263)

42: average total hours of television viewed per week by U.S. men over age 55. (p. 263)

25: average total hours of television viewed per week by young adults between the ages of 12 and 17. (p. 263)

19.0: average total hours U.S. Internet users spent online per week in 2009. (p. 374)

78%: percentage of U.S. Internet users who checked their e-mail at least once daily in 2009. (p. 374)

91%: percentage of U.S. households with at least one cell phone in 2010. (p. 375)

\$32,184: median income for U.S. men in 2009. (p. 56)

\$20,957: median income for U.S. women in 2009. (p. 56)

26.1%: percentage of the population of Texas without health insurance in 2009, higher than any other U.S. state. (p. 150)

25.4%: percentage of U.S. deaths in 2009 caused by heart disease, the leading cause of death. (p. 178)

67.4%: percentage of U.S. population that was overweight or obese between 2005 and 2008. (p. 170)

1,000%: change in U.S. annual per capita consumption of fresh broccoli since 1970. (p. 104)

–18%: change in U.S. annual per capita consumption of red meat since 1970. (p. 105)

Money in America (pp. 52-83)

Amount of money that Americans put in savings in 2005: \$127.7 bil in 2009: \$655.3 bil
Percent of disposable income that Americans put in savings in 2005: 1.4% in 2009: 5.9%
Revolving consumer credit outstanding from commercial banks in 2008: \$362.4 bil

Personal expenditures, 2000-09 (p. 59)		Spending on selected food products, 2009-10 (p. 81)

New Era in Space

The year 2011 marks the 30th anniversary of the space shuttle's role as the heavy lifter of the U.S. civilian space program. It will also, according to plans, see the spacecraft's retirement. U.S. access to space will continue, but will rely on commercial as well as government-run operations. Meanwhile, other countries will continue with their own manned and unmanned ventures.

Bush's Vision for Space Exploration

Since Americans last set foot on the moon in 1972, U.S.-manned space missions had been limited to low Earth orbit. Pres. George W. Bush called for a new space strategy in 2004 involving manned missions into deep space—something far beyond the capabilities of the aging shuttle fleet.

Bush envisioned a return to the moon by 2020 followed by visits to more remote destinations. The National Aeronautics and Space Administration (NASA) accordingly began development on a project dubbed Constellation, involving powerful rocket boosters and a crew-carrying spacecraft called *Orion* for deep-space missions. The space shuttle program was slated to end in 2010. Thereafter, transportation to the International Space Station (ISS) would be handled by spacecraft launched by other countries and by private transportation services.

Obama's Policy Shift

In early 2010, with the Constellation project running behind schedule and costs mounting, Pres. Barack Obama proposed replacing it with a new space agenda whereby private industry, aided by NASA, would play an increased role in providing access to low Earth orbit. NASA would focus its development efforts upon deep-space exploration, including design of a "heavy-lift" launch vehicle (HLV) by 2015 capable of lifting into orbit the equipment needed to mount a deep-space expedition.

According to this plan, spacecraft for deep-space missions would be available by 2025. Bypassing the moon, Obama proposed that an asteroid be the destination of the first manned deep-space mission, with a mission to Mars to follow. Meanwhile, he called for the ISS, slated for shutdown in 2015, to remain in operation until at least 2020.

Congress approved the new plan, which Obama signed into law Oct. 11, in an amended form. The legislation mandated that work on the *Orion* continue and that work done on the Constellation project be used to begin development of the new HLV. The legislation also added a second mission to the space shuttle's remaining schedule. The launch date of *Endeavour*, which had been assigned to make the shuttle program's final flight, had already been pushed into early 2011, largely because of problems with a key piece of equipment it was to deliver to the ISS. This added mission would be carried out by *Atlantis*, which would fly to the ISS around midyear.

After the Shuttles Retire

As part of a budget authorization bill, NASA was allotted a total of \$58 bil for fiscal years 2011-13, but how much it actually receives will depend on annual allocation bills. Whatever the pace of NASA's efforts, the year 2011 almost definitely marks the end of the shuttle program. When NASA spacecraft go out of service, they ordinarily become the property of the Smithsonian Institution's Air and Space Museum. The Air and Space Museum already has the first shuttle on display at its Steven F. Udvar-Hazy Center in Chantilly, VA. This craft, the *Enterprise*, was used for testing the orbiter within Earth's atmosphere.

Russia's *Soyuz* spacecraft and *Progress* freighters will continue to carry people and supplies to and from the ISS. The European Space Agency (ESA) and Japan have been developing larger unmanned nonreusable craft. The ESA sent its first "space truck," or Automated Transfer Vehicle, to the station in 2008, and planned a second mission in 2011. Once the space station no longer needs to accommodate NASA shuttles' altitude limitations, an ESA space truck is expected to be used to push the ISS into a higher orbit. Japan's H-II Transfer Vehicle made its first flight to the station in 2009 and was expected to make a second in 2011.

Private Space Ventures

Expectations are that private companies, under contract with NASA, will eventually fly to the ISS. The well-established Orbital Sciences has already built and launched a large number of satellites. The first test flight for the company's *Cygnus* unmanned cargo craft, to be carried aloft by the company's new Taurus II rocket, is slated for 2011. Elon Musk, a cofounder of PayPal and Tesla Motors, set up Space Exploration Technologies

(SpaceX) in 2002. SpaceX's Falcon 9 rocket made its maiden flight in June 2010, successfully placing an object in orbit. The Falcon 9 will be the launch vehicle for the company's unmanned cargo carrier *Dragon* spacecraft. SpaceX envisions *Dragon* will eventually transport people as well. Other companies working on "space taxis" capable of reaching the ISS or other low-Earth orbit include aerospace giant Boeing, which aims for its *Crew Space Transportation-100* spacecraft to be operational by 2015, and Sierra Nevada Corporation, with its competing *Dream Chaser* space plane.

Some private companies are working on projects that don't involve the ISS at all. Bigelow Aerospace, founded by hotel magnate Robert Bigelow in 1999, is developing inflatable space stations called Sundancer and BA-330. Bigelow launched small prototypes, Genesis I and Genesis II, into orbit in 2006 and 2007. The company has proposed using inflatable technology to build a moon base.

Some companies want to offer suborbital flights to tourists who would like to get a taste of space. Virgin Galactic, which hopes to be first, is charging \$200,000 a ride. Its craft are based on Scaled Composite's *SpaceShipOne*, which in 2004 became the first privately built vehicle to reach space (an altitude 62 mi or 100 km above Earth's surface, as commonly defined). The craft accommodates six passengers and two crew members and launches from a carrier plane in flight. *Enterprise*, Virgin Galactic's first spaceship of this type, successfully completed its initial solo test, gliding to Earth from the carrier plane in Oct. 2010.

Elsewhere in the World

Progress and *Soyuz* spacecraft and the ESA and Japanese transporters are not the only non-U.S. craft likely to be used to keep the ISS in operation. Russia is working on a manned replacement for the *Soyuz*. If all goes well, this craft, usually referred to as the Prospective Piloted Transport System (PPS), might receive its first manned launch by 2018. It would be carried aloft by a launch vehicle, known as the Rus-M, which is also under development.

So far, China is the only country besides Russia and the U.S. to use its own spacecraft to carry people into space. It plans to start putting together a space station in 2011 when the first module, called *Tiangong-1* (Chinese for "Heavenly Palace") is scheduled to be placed in orbit. Two more modules are to follow between 2013 and 2016, with construction on the station expected to be finished by 2022. China is also planning a manned mission to the Moon.

In June 2010, six men (three from Russia, two from Europe, and one from China) began simulating a round-trip mission to Mars. They were to spend 18 months in a sealed facility at a Russian medical institute. The experiment aims to gain insight into humans' ability to cope with interplanetary flight. The facility lacks windows, and the simulators' only contact with the outside world is via e-mail.

Unmanned Space Exploration

Even as the era of crewed space missions dominated by the space shuttle came to an end, space agencies around the world continued programs of unmanned interplanetary exploration. In 2011, for example, the U.S. planned to send GRAIL (Gravity Recovery and Interior Laboratory) to the Moon, Juno to the planet Jupiter, and the Mars Science Laboratory rover, also known as Curiosity, to Mars. Missions on the docket include another Moon mission, LADEE (Lunar Atmosphere and Dust Environment Explorer) in 2012, and MAVEN (Mars Atmosphere and Volatile Evolution) in 2013.

Notable Russian launches expected in 2011 and 2012 include Phobos-Grunt and Luna-Glob. Phobos-Grunt will study the Martian moon Phobos and bring soil samples back to Earth. Slated to piggyback on the mission are China's Mars orbiter *Yinghuo-1* ("Firefly-1") and the first lander in Finland's MetNet system for studying the Martian atmosphere. The mission Luna-Glob, to Earth's moon, will include a lander and orbiter. China's *Chang'e-3*, scheduled for 2013, will aim to place a rover on the Moon's surface. Bepi-Colombo, a joint ESA-Japan project to put two spacecraft into orbit around the planet Mercury, is expected to launch by 2014.

Health Care Reform, 2010

On Mar. 23, 2010, Pres. Barack Obama signed a sweeping health-care reform measure into law that would extend medical insurance to an estimated 32 mil uninsured people. The legislation—the Patient Protection and Affordable Care Act (PPACA)—had been in the works for over a year, amid heated debate and controversy. Enactment of the components of PPACA will provide health insurance for almost all Americans. Most of its major provisions—including implementation of the individual mandate and the opening of the health care exchanges—will not be applied until 2014. But several provisions took effect on Sept. 23, 2010: insurers are banned from dropping sick and costly customers based on technical mistakes on applications; they are also required to offer coverage to children under 26 on their parents’ policies.

The Congressional Budget Office (CBO) Mar. 18 released a report, which projected that the final reform package would cost \$940 bil over 10 years and reduce the budget deficit by \$138 bil during the same period. The CBO said the bill would reduce the deficit a further \$1.2 tril in the decade following the first 10-year period.

The reform bill was passed without a single Republican vote, though many liberal Democrats assailed the reform effort, arguing that it included too much conciliation to the health insurance industry and needed a public option to be effective. The law was projected to still leave some 23 mil people in the U.S., one-third of whom were undocumented immigrants, without insurance in 2019. Several state attorneys general have announced that they are mounting legal challenges to the reform plan on the grounds that the individual mandate is unconstitutional.

Key Provisions of Health Care Reform

Cost-control measures. The PPACA contains several provisions designed to bring national medical costs down. Insurers will be required to spend at least 80% of customers’ premiums on providing health care or on improving overall health care quality. The legislation also creates a panel to study Medicare spending and attempt to find ways to reduce waste and fraud in the system.

Employer mandates. The law fines companies with more than 50 employees \$3,000 a year for each full-time employee requiring a government subsidy to purchase health insurance. Companies with fewer than 50 employees will be exempt from such penalties.

Excise insurance tax. The PPACA includes a tax on health care plans whose cost exceeds \$8,500 for individuals and \$23,000 for families. More commonly known as the “Cadillac tax,” the tax is intended to motivate people to opt for cheaper health care plans. Implementation of the tax has been delayed until 2018.

Federal subsidies. The PPACA includes federal subsidies to help individuals lacking health insurance from their employers to purchase it on their own. The new law provides subsidies covering at least 90% of the costs of insurance for individuals and families with incomes between 100% and 150% of the federal poverty level. Subsidies decrease as incomes increase; families earning more than 400% of the poverty level would get no subsidy.

Health insurance exchanges. One of the PPACA’s key components is the creation of health care insurance exchanges, which would allow people to compare various health care plans from private insurers and choose the one that is most affordable and convenient for them.

Individual mandates. The PPACA requires almost all U.S. citizens and legal residents to carry health insurance coverage, the rationale being that overall health care costs go down when everyone, regardless of health, pays into the insurance system. Annual fines for not having insurance would start in 2014 with a ceiling of \$95 or 1% of taxable annual income, whichever was greater, and peak in 2016 at \$695 or 2.5% of income. Individuals are exempt from the fine if the lowest-cost health care plan exceeds 8% of their income.

Medicaid expansion. The PPACA expands Medicaid coverage to all individuals under the age of 65 whose annual income is up to 133% of the federal poverty level, which would add about 16 mil people to its rolls. The federal poverty level for a family of four is currently \$22,050 per year, making a family of four earning less than \$29,326 eligible for Medicaid under the new health care reform law.

Private insurance regulations. The PPACA will install a series of new regulations that private insurers must follow if they wish to be listed on the health care exchanges, which would give them access to millions of potential customers. Insurers will be barred from denying individuals coverage due to preexisting conditions and from dropping covered individuals once they get sick, or for any reason other than fraud.

ELECTION 2010

Republicans Take Control of House and Gain in Senate

In midterm elections Nov. 2, 2010, Republicans picked up at least 60 seats in the House of Representatives, the most gained by either party since 1948, and well beyond the 39 the party needed for a majority. The turnover dealt a strong blow to the administration of Democratic Pres. Barack Obama and put committee chairmanships and leadership positions in Republican hands. House minority leader John Boehner (R, OH) became the presumed Speaker of the House. A number of veteran and moderate Democrats were voted out of office.

In the Senate, Republicans fell short of the 10-seat gain needed for a majority, with Majority Leader Harry Reid (D, NV) fending off a challenge from Tea Party-backed candidate Sharron Angle (R). The GOP picked up six Democratic seats, including Pres. Obama's former seat in Illinois, as well as those at stake in Arkansas, Indiana, North Dakota, Pennsylvania, and Wisconsin, with one state, Alaska, left to be decided in the weeks following the election.

The division of power between a Republican House and Democratic Senate and White House created challenges for both parties and increased chances for gridlock. Congress appeared more polarized, with fewer moderate Blue Dog Democrats and more Tea Party-allied Republicans who had campaigned against Democratic policies, notably the health care reform legislation passed in Mar. 2010. In a press conference on Nov. 3, Pres. Obama admitted he had received a "shellacking" and said he did not want to relitigate past disputes but would "work harder at building consensus."

Republicans also gained in state governorships, especially in the Midwest, where they won in Iowa, Kansas, Michigan, Ohio, and Wisconsin. In addition, the GOP claimed control of at least 55 of the nation's 99 state legislative chambers, up from 36. Most state legislatures will be authorized to redraw congressional districts in accordance with 2010 census results, and most governors have veto power over these plans.

The Political Climate

The weak economy left Democrats particularly vulnerable in 2010. Obama had come to office in Jan. 2009 amid high hopes. However, despite a \$787 bil stimulus measure, passed by Congress in Feb. 2009, job recovery was anemic. The unemployment rate rose above 10% in Oct-Dec. 2009 and remained static at just under 10% through most of 2010. Home foreclosures continued at a rapid rate, especially in Sunbelt states.

A Gallup poll, among others, showed that the economy was the public's number-one concern overall in Oct. It ranked consistently above health care and far above the war in Afghanistan, a topic seldom brought up by candidates of either party. Democrats blamed the continued economic downturn on Bush administration policies and claimed that the stimulus and other measures—criticized by Republicans as costly and counterproductive (and by progressives as too unambitious)—kept the economy from sinking into depression.

Obama's approval ratings had already fallen below 50% in Jan. 2010 when Democrats received a big jolt: a little known Republican state senator, Scott Brown, won a special election for the seat long held by the late Sen. Ted Kennedy (D) in heavily Democratic Massachusetts. A lackluster campaign by state Atty. Gen. Martha Coakley (D) was partly to blame, while Brown's campaign emphasized the candidate's populism and independence rather than his party label. His message of fiscal responsibility and promise to vote against the health care bill then pending in Congress also seemed to resonate. Brown gave the Republican Senate minority their 41st vote, which could prevent Democrats from overriding Republican filibusters.

Big Money

The nonpartisan Center for Responsive Politics (CRP) estimated that total spending on the 2010 congressional elections would approach \$4 bil, more than \$1 bil more than was spent on the 2006 midterms. Most of the money flowed from three sources: individual House and Senate campaigns, national political parties, and outside interest groups. Out of an estimated \$3.2 bil raised by mid-Oct., about \$1.7 bil came from the campaigns, \$1.1 bil from the parties, and over \$400 mil from outside groups. The CRP estimated that Democrats and Republicans were raising similar amounts of money from the campaigns and parties combined, but that Republicans were getting more money from special interest groups, such as the U.S. Chamber of Commerce, with pro-Republican groups heavily outspending Democratic special interests.

Special interest groups were reaping benefits from a Jan. 2010 Supreme Court ruling in *Citizens United v. Federal Election Commission*. On free speech grounds, the controversial 5-4 decision overturned some key campaign finance restrictions and allowed corporations, labor unions, and other interest groups to use their own funds to finance campaign ads (though not to contribute directly to individual campaigns).

The Tea Party

Brown received support from the Tea Party movement, as would many other candidates in the 2010 general election. The loosely organized populist coalition emerged in early 2009 as an outlet for anger over the government bailouts of financial institutions and the economic stimulus package, and gathered strength through social networking, rallies, and protests. The Tea Party tended to unite around fiscal issues and belief in the overreach of the federal government, but many of its activists were also social conservatives. A CBS/*NY Times* poll found in Apr. that around 18% of Americans supported the Tea Party movement; of these, 50-60% were Republicans, with most of the rest calling themselves independents. More than six months later, 21% of voters said they had "strong support" for the Tea Party, and another 19% had "some support," according to AP exit polls on election day.

Tea Party-backed candidates saw mixed results in the 2010 general election. In Florida, Marco Rubio (R), a 39-year-old former speaker of the state House, won the day for the Tea Party with 49% of the vote in a three-way race. Rubio defeated Rep. Kendrick Meek (D) and sitting Gov. Charlie Crist, a moderate Republican who had supported the economic stimulus bill and ran as an independent after dropping in Republican polls. The son of Cuban exiles, Rubio enjoyed Tea Party support thanks to his emphasis on fiscal restraint and limited government in a state that was still troubled by the economic downturn and foreclosure crisis.

In Kentucky, ophthalmologist Rand Paul (R), a Tea Party favorite, easily outpolled state Atty. Gen. Jack Conway (D) in Nov. Like his father, U.S. Rep. Ron Paul (R, TX), Rand Paul campaigned as a libertarian who believes in radically reduced government. He came under fire briefly for expressing reservations about the 1964 Civil Rights Act, which he said should not apply to private businesses. Conway's controversial attack ad in Oct., bringing up a Rand Paul college incident supposedly implying worship of "Aqua Buddha," may have backfired with voters, the majority of whom called the negative ad inappropriate in a late Oct. poll.

But while the Tea Party movement served to fire up the GOP base in some states, in others the Tea Party seemed to drag Republicans too far away from the center to attract independent voters. Some moderate candidates fell in Republican primaries to candidates with less experience who enjoyed Tea Party support. In Delaware's Senate GOP primary in Sept., Tea Party favorite Christine O'Donnell, a political neophyte endorsed by former Vice Pres. nominee Sarah Palin, eliminated Rep. and former Gov. Mike Castle, who had been widely favored to win the seat. O'Donnell's candidacy quickly boosted the lagging poll numbers for county executive Chris Coons (D). Lacking political experience and with rhetoric well to the right of blue-state Delaware, O'Donnell lost in Nov. by a wide margin.

A Tea Party-backed outsider also saw narrow defeat in the Nevada race between Sen. Harry Reid (D) and former state Assemblywoman Sharron Angle (R). The state had the highest unemployment and foreclosure rates in the nation, and Reid, always a lackluster campaigner, had become unpopular. He was saved with the help of strong Hispanic and union support—and

a belief by many voters that Angle’s views were too extreme, particularly her stance on immigration and past comments that indicated her desire to phase out Social Security entitlements. In Alaska, Joe Miller, a little-known attorney also endorsed by Sarah Palin, won the Aug. GOP primary defeating incumbent Sen. Lisa Murkowski. But Murkowski launched a write-in bid and, based on preliminary returns, was running ahead of both Miller and Scott McAdams, the Democratic candidate.

Senate Results

In other key Senate races, conservative former Rep. Pat Toomey (R), in Pennsylvania, edged out Rep. Joe Sestak (D), who had beaten the Republican-turned-Democrat incumbent, Arlen Specter, in a May primary. In Ohio, Rep. Rob Portman (R), a Bush administration budget director and trade ambassador, easily defeated Lt. Gov. Lee Fisher (D) in a contest where they traded blame for Ohio’s heavy job losses. In an acrimonious Illinois race, U.S. Rep. Mark Kirk (R) narrowly outpolled state treasurer Alexi Giannoulias (D) to win the U.S. Senate seat formerly held by Obama. In Arkansas, incumbent Sen. Blanche Lincoln, a moderate Democrat, lost to conservative U.S. Rep. John Boozman (R). In Louisiana, incumbent Sen. David Vitter (R) won despite a 2007 scandal involving prostitution.

Democrats claimed a big victory in California, where veteran Sen. Barbara Boxer (D) defeated former Hewlett-Packard CEO Carly Fiorina (R). Connecticut state Atty. Gen. Richard Blumenthal (D) held his ground against former World Wrestling Entertainment CEO Linda McMahon (R). In West Virginia, popular Gov. Joe Manchin (D) defeated industrialist John Raese (R) to gain the seat long held by the late Sen. Robert Byrd (D). Manchin, who had distanced himself from the Obama administration, had the endorsement of the National Rifle Association. A widely noted campaign ad showed him shooting a rifle at the cap-and-trade bill.

Governors’ Races

In Ohio, incumbent Gov. Ted Strickland (D), weighed down by the loss of nearly 400,000 jobs during his term, was defeated by former Rep. John Kasich (R), despite intensive rallying efforts by Pres. Obama and other top Democrats. Among other GOP winners, Nikki Haley was elected the first woman governor of South Carolina and first Indian-American woman governor in the U.S.; District Attorney Susana Martinez was elected the first woman governor of New Mexico and first female Hispanic governor in the U.S. In Florida, health care executive Rick Scott (R) narrowly defeated state CFO Alex Sink (D) to win the governorship.

In California, however, Meg Whitman (R), a billionaire former CEO of eBay, lost to former Gov. Jerry Brown, a longtime veteran of public office in the state, despite having poured at least \$140 mil of her own money into the race. The CEO label did not help Whitman, nor did controversy over her treatment of a former housekeeper who was an illegal immigrant. In Rhode Island, former Sen. Lincoln Chafee, a liberal Republican who had endorsed Pres. Obama in 2008, ran as an independent and won; Obama had pointedly declined to endorse Chafee’s Democratic opponent.

Ballot Issues

There were some 160 statewide ballot measures in Nov. 2010. California’s Proposition 19 probably got the widest attention. It would have made California the first state to legalize (and tax) the sale of marijuana for recreational use. But voters turned it down. They also rejected a proposal to suspend curbs on greenhouse gas emissions provided under California’s 2006 climate change law.

Most ballot measures had to do with budgets and taxes. Washington voters vetoed a proposed state income tax that would apply only to high-income earners. Indiana, Louisiana, and Montana voters approved measures to reduce or limit property taxes.

Among other initiatives, Colorado voters rejected a proposed state constitutional amendment classifying a fetus as a person. Arizona, South Carolina, South Dakota, and Utah voters approved measures safeguarding the secret ballot in union organizing elections. Illinois voters approved a mechanism for recall of governors. Missouri passed an initiative requiring more humane treatment of dogs by breeders. Oklahoma approved measures to make English the state’s “common language” and to prohibit judges from considering international or Islamic law, called sharia, when making decisions.

Balance of Power, 2010

	Senate		House		Governors	
	Before	After	Before	After	Before	After
Dem.	57	51	255	187	26	17
Rep.	41	46	178	239	24	29
Ind.	2	2	0	0	0	1

Note: Before the election, the House had two vacant seats, one previously held by a Democrat and one by a Republican. As of Nov. 5, 2010, there was one seat undecided in the Senate; nine seats undecided in the House, and three gubernatorial races undecided.

Public Trust in Government, 1972-2010

Source: Copyright © 2010 Gallup, Inc. All rights reserved.

Public trust in Congress, as measured by Gallup polls over time, has declined dramatically since 2005 and reached a record low in 2010. Trust in the executive and judicial branches went up in 2009 but fell in 2010.

Election Results, 2010

Preliminary results as of Nov. 3, 2010.

Members of the 112th Congress: The Senate

Dem., 51; Rep., 46; Ind., 1; Ind. Dem., 1; Undecided, 1. Total 100. Boldface denotes the 2010 election winner.
* = Incumbent. Third-party or independent candidates receiving fewer than 10,000 votes are not listed.

Results were pending in Alaska; they are listed in *italic* as of Nov. 5, 2010. The winning tally went to the “Total write-in” category, necessitating a close count of the ballots. Incumbent Sen. Lisa Murkowski began a write-in campaign after losing the Republican primary in 2010.

Terms are for 6 years and end Jan. 3 of the year preceding the senator’s name in the following table. Annual salary, \$174,000; President Pro Tempore, Majority Leader, and Minority Leader, \$193,400. To be eligible for the Senate, one must be at least 30 years old, a U.S. citizen for at least 9 years, and a resident of the state from which chosen. The address is U.S. Senate, Washington DC 20510; telephone, (202) 224-3121; www.senate.gov

(1) Jan. 3, unless otherwise noted. (2) Special election to fill seat vacated by Vice-Pres. Joseph Biden Jr. (D), Jan. 20, 2009. (3) Special election held Jan. 19, 2010, to fill seat vacated by death of Edward M. Kennedy, Aug. 25, 2009. (4) Appointed to fill seat vacated by Trent Lott (R), Dec. 31, 2007; he won a special election to keep the seat Nov. 4, 2008. (5) Special election to fill seat vacated by Hillary Rodham Clinton (D), who was appointed Sec. of State, Jan. 21, 2009. (6) Special election to fill seat vacated by death of Robert Byrd, June 28, 2010. (7) Appointed to fill seat vacated by death of Craig Thomas, June 4, 2007; he won a special election to keep the seat Nov. 4, 2008.

Members of the 112th Congress: The House of Representatives

Dem., 187; Rep., 239; Undecided, 9. Total 435. Boldface denotes the 2010 election winner. * = Incumbent. Third-party or independent candidates receiving fewer than 10,000 votes are not listed. Results in pending races listed in *italic*.

The Republican Party, which held a minority going into biennial elections Nov. 2, 2010, won 239 seats (as of Nov. 5) for a net gain of 60 seats. 218 seats were needed to hold a majority in the 435-seat House.

Terms are for 2 years ending Jan. 3, 2013. Annual salary, \$174,000; Majority Leader and Minority Leader, \$196,400; Speaker of the House, \$223,500. To be eligible for membership, a person must be at least 25 years of age, a U.S. citizen for at least 7 years, and a resident of the state from which chosen.

The address is U.S. House of Representatives, Washington, DC 20515; telephone, (202) 224-3121; www.house.gov

(1) The resident commissioner of Puerto Rico is the only member of the House of Representatives who serves a four-year term.

State Governors

Of the 50 state governors, 29 are Republicans, 17 are Democrats, and 1 is Independent, with results pending in three states (Connecticut, Minnesota, and Vermont); pending results are listed in *italic*. Terms are for 4 years, with the exception of 2-year terms for governors of New Hampshire and Vermont. Governors for states not holding elections in Nov. 2010 are shown for reference; month and year in parentheses is end of current term. * = Incumbent. Third-party or independent candidates receiving fewer than 10,000 votes are not listed.

D = Democrat; **R** = Republican; **Amer. Const.** = American Constitution; **Amer. Ind.** = American Independent Party; **CP** = Constitution Party; **DFL** = Dem.-Farmer-Labor; **I** = Independent; **IP** = Independence Party; **LB** = Libertarian; **Unaff.** = Unaffiliated.

CHRONOLOGY OF EVENTS

Reported Month by Month, Nov. 1, 2009, to Oct. 31, 2010

November 2009

National

Republicans Win Governorships in New Jersey, Virginia; Other Election Results—In a slim slate of off-year elections, Republicans picked up governorships Nov. 3 in two states that had voted for Pres. Barack Obama (D) a year earlier. In New Jersey, former federal prosecutor Chris Christie (R) unseated incumbent Gov. Jon Corzine (D), a wealthy former Goldman Sachs executive who had used more than \$25 mil of his own money to outspend Christie by a margin of about 2-to-1 during the campaign. In Virginia, veteran state legislator Creigh Deeds (D) lost in a landslide to former state Atty. Gen. Bob McDonnell (R), a social conservative who wooed moderates and independents by pledging to focus on “jobs, jobs, jobs” to boost the state economy.

In special elections for two vacant House seats, California Lt. Gov. John Garamendi (D) won in a heavily Democratic district near San Francisco, and Bill Owens (D), a lawyer, prevailed in a Republican-leaning district in upstate New York. The New York contest had drawn nationwide attention when Dede Scozzafava (R), whose liberal views on homosexuality and abortion had been criticized by conservatives, withdrew from the race Oct. 31 and endorsed Owens, who went on to defeat Conservative Party candidate Doug Hoffman by fewer than 3,600 votes.

Billionaire Michael Bloomberg (Ind.) spent about \$102 mil of his own money—approximately \$183 per vote—to win a 3rd term as mayor of New York City. In other municipal races, Mayor Thomas Menino (D) was reelected to a 5th term in Boston, MA; former pro basketball star Dave Bing (D), who had won a special mayoralty election in May 2009, earned his first full term in Detroit, MI; and the nation’s youngest big-city mayor, Luke Ravenstahl (D), 29, was elected to his first full term in Pittsburgh, PA. In state referendums, voters in Maine repealed a same-sex marriage law, while Washington voters upheld an expansion of domestic partnership rights exercised by same-sex couples. After a Nov. 3 mayoral vote in Houston, TX, produced no clear winner, city controller Annise Parker (D), an advocate for homosexual rights, won a runoff election Dec. 12, becoming the first lesbian mayor of a major U.S. city.

Unemployment Rate Hits 10.2% as Nation Struggles to Emerge from Recession—The federal Bureau of Labor Statistics reported Nov. 6 that the U.S. unemployment rate had risen to 10.2% in Oct. 2009, the first time the jobless rate crossed the 10% mark since 1983. The combined rate of unemployment and underemployment—a broader measure of economic hardship that includes part-time workers seeking full-time jobs—climbed to 17.5%, or more than one of every 6 workers. Also on Nov. 6, Pres. Obama signed into law a measure providing for a 20-week extension of unemployment benefits in hard-pressed states and renewing for 6 months an \$8,000 tax credit for first-time home buyers. The measure had sailed through Congress, gaining final passage by a 98-0 vote in the Senate Nov. 4, and clearing the House of Representatives, 403-12, the following day.

After a two-day meeting, Federal Reserve policymakers indicated Nov. 4 that economic conditions were improving but “likely to remain weak for a time,” and that the Fed was prepared to continue its policy of keeping interest rates very low. Surveys released late in the month concluded that state tax revenues had declined sharply during Jan.-Sept. 2009, and that 23% of all U.S. homeowners were “underwater” during the 3rd quarter of 2009, owing more on their mortgages than their properties were worth. As the U.S. dollar sagged, gold traded at historic highs approaching \$1,200 an ounce.

Wall Street’s recovery continued to outpace Main Street’s. The Dow Jones Industrial Average enjoyed its 5th straight monthly gain, rising 6.5% to close Nov. 30 at 10,344.84. The S&P 500 was up 5.7% to 1,095.63, and the Nasdaq Composite Index gained 4.9% to close at 2,144.60.

13 Killed in Fort Hood Shooting Rampage—U.S. military authorities filed charges Nov. 12 against Army psychia-

trist, Maj. Nidal Malik Hasan, accusing him of premeditated murder in the shooting deaths of 13 people Nov. 5 at Fort Hood, TX. The victims included 4 commissioned officers, 8 enlisted soldiers, and 1 civilian, a physician’s assistant. At least 30 other people were wounded in the attack, which took place at a crowded facility where soldiers preparing for or returning from overseas deployment were waiting to see doctors. Hasan sustained 4 gunshot wounds before he was taken into custody, leaving him paralyzed from the waist down.

Born in Arlington, VA, to Palestinian immigrant parents, Hasan was a devout Muslim who opposed the U.S.-led wars in Afghanistan and Iraq; he had been scheduled to deploy to Afghanistan Nov. 28, along with several other units of mental health professionals. Investigators initially declined to identify a possible motive for the killings, but increasingly focused on contacts between Hasan and Anwar al-Awlaki, a radical, U.S.-born Muslim cleric based in Yemen. A Pentagon report released Jan. 15, 2010, recommended that the military improve its methods for identifying and dealing with members who “may commit violent acts or become radicalized.” A hearing to determine whether there was enough evidence to court-martial Hasan began Oct. 12, 2010.

Guantánamo Prison to Remain Open Beyond Deadline—In an interview Nov. 18 with Fox News, Pres. Obama confirmed that he would be unable to fulfill his pledge to shut down the U.S. military prison at Guantánamo Bay, Cuba, within a year of taking office. White House Counsel Greg Craig, who was responsible for the Jan. 2009 executive orders calling for a ban on torture and the closure of the Guantánamo detention facility, had announced his resignation Nov. 13; 11 days later, the Defense Dept. stated that Phillip Carter, a deputy assistant secretary in charge of shutting down the prison, had also resigned.

Controversy continued to rage, meanwhile, over the handling of some 215 remaining Guantánamo detainees, of whom about 90 had already been cleared for release as soon as countries could be found to accept them. On Nov. 13, Atty. Gen. Eric Holder announced that Khalid Sheikh Mohammed, the alleged mastermind of the attacks of Sept. 11, 2001, would be tried along with 4 accused co-conspirators at a federal civilian courthouse in lower Manhattan. Opposition to the location mounted, and in Jan. 2010 the White House told the Justice Dept. to look for alternative venues after New York City Mayor Michael Bloomberg rescinded his support for the plan.

Party Crashers Breach White House Security—The Obama administration’s first formal state dinner, held Nov. 24 to honor Indian Prime Min. Manmohan Singh, turned into a major embarrassment when it became known that a Virginia couple, Tareq and Michaela Salahis, who were not invited to the event, had entered the White House grounds and posed for pictures with top White House officials, including the president. The Salahis publicized the exploit on their Facebook page that night by posting pictures of themselves with Vice Pres. Joe Biden and Chief of Staff Rahm Emanuel; three days later, the White House released a photo of them that had been taken at the event with Pres. Obama. On Dec. 3, Secret Service Director Mark Sullivan told a congressional panel that the Salahis had gotten past three security checkpoints because agents had failed to follow proper procedures.

International

Belgian Chosen as European Union President—Meeting in Brussels Nov. 19, leaders of the 27 European Union member nations selected Prime Min. Herman Van Rompuy of Belgium as the first full-time president of the European Council, the EU’s principal policymaking body. The conferees also elevated Baroness Catherine Ashton of the UK from EU trade commissioner to high representative for foreign affairs and security policy. Both the presidential and foreign policy posts were established under the Lisbon Treaty, a new framework for EU governance that went into effect Dec. 1.

Gunmen Massacre 57 in the Philippines—On Nov. 23 a militia controlled by the powerful Ampatuan clan intercepted a convoy of supporters of a rival clan leader, Esmael (Toto) Mangudadatu, as they sought to file papers registering his candidacy for governor of the southern Philippine province of Maguindanao. The gunmen (among whom were local police officials) slaughtered 21 women, including Mangudadatu's wife and two sisters, and 36 men. Many of the female victims were sexually assaulted and mutilated; at least 30 of those killed were journalists accompanying the convoy. Mangudadatu, who was not part of the convoy, said he had asked his wife and female relatives to file the election papers for him because he believed the Ampatuans would adhere to tradition and not harm the women.

The violence shocked the nation and shook the government of Pres. Gloria Macapagal Arroyo, which had long cultivated the Ampatuans as allies. A state of emergency was declared in Maguindanao Nov. 24, and martial law was imposed Dec. 4-12; by Dec. 18 the Ampatuan clan leaders had been arrested, and ultimately some 200 suspects were charged. Mangudadatu remained a candidate in the provincial election, which was scheduled for May 10, 2010.

Dubai Debt Crisis Rattles International Markets—European and Asian financial exchanges plummeted after Dubai—one of 7 city-states comprising the United Arab Emirates—announced Nov. 25 that Dubai World, a state-controlled investment company, would seek a 6-month moratorium on repayment of its \$59 bil debt. Renowned for its high-flying economy and ambitious construction projects, Dubai had been battered in 2008-09 by a steep drop in real-estate prices. Fears that Dubai's financial problems might spread to other Persian Gulf countries and imperil major debt holders were abated with the announcement Dec. 1 that Dubai World was moving to restructure \$26 bil in obligations, and the disclosure Dec. 14 that another UAE city-state, Abu Dhabi, would bail out Dubai with a \$10 bil loan. On Jan. 4, 2010, Dubai went ahead with ceremonies formally opening the world's tallest building, the Burj Khalifa. The 2,717-ft (828-m) skyscraper had been known during construction as the Burj Dubai, but had been renamed to honor Sheikh Khalifa bin Zaid an-Nahayan, who was both the president of the UAE and the emir of Abu Dhabi.

New Presidents Elected in Honduras, Uruguay—Voters in two Latin American countries chose new presidents Nov. 29. In Honduras, National Party candidate Porfirio (Pepe) Lobo, a conservative landowner, defeated his Liberal Party rival Elvin Santos 57% to 38%. The election marked a turning point in the constitutional crisis that had begun in June 2009 when the Honduran military ousted leftist Pres. Manuel Zelaya, the victor over Lobo in the Nov. 2005 presidential election. After the Honduran Congress passed an amnesty law Jan. 26, 2010, covering both Zelaya and those who had deposed him, Lobo was sworn in as president Jan. 27, and Zelaya was granted safe passage to exile in the Dominican Republic.

In a presidential runoff election in Uruguay, José (Pepe) Mujica, a former guerrilla running as the candidate of the ruling center-left Broad Front coalition, defeated former Pres. Luis Lacalle, the center-right National Party nominee, by a margin of 53% to 43% of valid votes cast. Mujica, who had fallen short of a majority in the first round of balloting Oct. 2009, reassured voters by emphasizing his centrist credentials and distancing himself from Venezuelan Pres. Hugo Chávez.

General

Yankees Win World Series—Playing their first season in a new Yankee Stadium, the New York Yankees captured their 27th baseball championship Nov. 4, dethroning the defending champion Philadelphia Phillies by 4 games to 2. World Series MVP Hideki Matsui, the Yankees' designated hitter, batted in a record-tying 6 runs to seal New York's 7-3 home victory in Game 6.

Zenyatta Takes Breeders' Cup Classic—With a thrilling stretch run, Zenyatta became the first female horse to win the Breeders' Cup Classic, held Nov. 7 at Santa Anita Park in Arcadia, CA. Ridden by Mike Smith, the undefeated Zenyatta outdistanced a field of 11 males, including 2009

Kentucky Derby winner Mine That Bird and Belmont Stakes victor Summer Bird, to score her 14th consecutive first-place finish.

"Significant Amount" of Water Found on the Moon—Researchers at the National Aeronautics and Space Administration (NASA) confirmed Nov. 13 that analysis of data collected by the Lunar CRater Observation and Sensing Satellite mission, known as LCROSS, had revealed a "significant amount" of frozen water on the lunar surface. The water was detected in a plume of debris raised in Oct. 2009 when NASA deliberately crashed a spacecraft and its booster rocket into a permanently shadowed region of Cabeus crater, near the Moon's south pole. Scientists hope that the lunar ice, which may be billions of years old, can provide clues to the Moon's history and might be mined on future missions as a source of drinkable water, breathable oxygen, and hydrogen- and oxygen-based rocket fuel.

Pacquiao Captures 7th World Boxing Title—Filipino fighter Manny Pacquiao became the first boxer to win 7 world boxing titles in 7 different weight classes when he defeated Miguel Cotto of Puerto Rico, Nov. 14, at the MGM Grand Garden Arena in Las Vegas, NV. The 30-year-old Pacquiao, who won his first world title as a flyweight in 1998, scored a technical knockout over Cotto in the 12th round of their World Boxing Organization welterweight championship bout.

December 2009

National

Big Banks Repay TARP Funds; Bernanke to Remain Fed Chairman—Treasury Dept. officials estimated Dec. 6 that the long-term cost of bailouts to ailing firms under the Troubled Asset Relief Program (TARP) would be smaller than expected. Of more than \$370 bil in loans made to ailing companies through TARP, the Treasury expected to recover all but \$42 bil. The revised figure was nearly \$300 bil less than the \$341 bil cost projection made by the White House in Aug. 2009. A year-end assessment issued Dec. 9 by the independent Congressional Oversight Panel concluded that TARP, which had been enacted in Oct. 2008 to stabilize the tottering financial system, could "be credited with stopping an economic panic." Among the largest bank recipients of TARP lifelines, JPMorgan Chase paid back \$25 bil in June 2009, and Bank of America (\$45 bil), Wells Fargo (\$25 bil), and Citigroup (\$20 bil) followed suit in Dec. The repayments freed the banks from heightened government oversight—including some restrictions on executive pay—that had accompanied the federal bailouts.

Federal Reserve Chairman Ben Bernanke, an architect of TARP, was named Person of the Year by *Time* magazine Dec. 16. One day later the Senate Banking Committee voted, 16-7, to approve Pres. Barack Obama's nomination of Bernanke to serve a 2nd 4-year term atop the Fed. The full Senate gave its assent Jan. 28, 2010, by a vote of 70-30, a tepid endorsement that reflected the continued unpopularity of the bank bailouts at a time of high unemployment.

Health Measure Clears Senate Hurdle—In a rare Christmas Eve session, the U.S. Senate Dec. 24 approved a landmark health care bill on a party-line vote of 60-39. No Republicans voted for the measure, which differed in significant respects from the bill that passed the House of Representatives Nov. 7, 220-215, with only one Republican voting in favor. Over a 10-year period, the Senate version would extend health insurance coverage to 31 mil uninsured persons, expand the Medicaid rolls (for low-income people) by 15 mil, and subsidize private health-insurance coverage for low- and middle-income Americans. Insurance companies would be barred from excluding people with preexisting medical conditions, rescinding coverage for those who become sick or disabled, or imposing annual or lifetime caps on benefit payments.

Both the Senate and House bills required most U.S. citizens and legal residents to purchase health insurance. The bills diverged in their estimated 10-year cost (\$1.1 tril for the House version, \$871 bil for the Senate) and funding mechanisms. The House bill provided for the establishment of a new government-run insurance plan (the "public option")

to compete with private insurers, while the Senate instead embraced a system of state-managed insurance exchanges. Both measures barred federal funding for abortions, although the language in the House version was more restrictive.

Republicans in both chambers vowed continued opposition to the legislation, which was a high priority for Pres. Obama and which would greatly expand the federal role in overseeing the nation's health insurers and providers.

Stock Indexes End Year on Upswing—While the housing market continued to slump and the nationwide unemployment rate hovered at 10%, U.S. stock exchanges completed their best year since 2003. The Dow Jones Industrial Average closed Dec. 31 at 10,428.05, up 18.8% since the end of 2008 and a 59.3% rebound from the Dow's 2009 low point in early Mar. The Nasdaq Composite Index finished at 2,269.15, for a one-year increase of 43.9%, and the S&P 500 reached 1,115.10, a 23.4% gain for the 12-month period.

International

U.S. Revises Afghanistan Plan; Other War Developments—In a nationally televised speech Dec. 1 at the U.S. Military Academy in West Point, NY, Pres. Obama announced a temporary surge of 30,000 additional troops to Afghanistan, with a drawdown of U.S. forces to begin within 18 months. "Afghanistan is not lost, but for several years it has moved backwards," said Obama, who pledged to bring the 8-year-old war to a "successful conclusion." When fully deployed, the reinforcements would raise total U.S. troop strength in Afghanistan to about 100,000. On Dec. 2, NATO Sec. Gen. Anders Fogh Rasmussen said he expected U.S. coalition partners to provide at least 5,000 troops to augment the 38,000 they had already committed. A report issued Dec. 14 by the Congressional Research Service forecast that the number of U.S. Dept. of Defense contract workers providing support services in Afghanistan, which stood at 104,100 in Sept. 2009, would rise to between 130,000 and 160,000 as the troop surge took effect.

Forward Operating Base Chapman, a U.S. Central Intelligence Agency outpost in Khost, near Afghanistan's eastern border with Pakistan, was the scene Dec. 30 of the deadliest attack against the CIA in more than two decades. Humam Khalil Abu Mulal al-Balawi, a Jordanian physician and jihadist who was recruited as a CIA informant but was actually a double agent, blew himself up while meeting with high-level intelligence personnel, killing 7 Americans and a Jordanian officer. The Afghan Taliban, the Pakistani Taliban, and al-Qaeda all claimed responsibility for the attack, which Balawi—posthumously shown in a video on Al-Jazeera satellite television—said was in retaliation for the U.S. missile strike in Aug. 2009 that killed Pakistani Taliban leader Baitullah Mehsud. CIA officers stationed at the Chapman base reportedly had been involved in targeting drone attacks against Islamic militants operating in Pakistan.

Speaking Dec. 10 in Oslo, Norway, where he accepted the Nobel Peace Prize, Pres. Obama noted that he was "Commander-in-Chief of a nation in the midst of two wars." He defended the U.S.-led military action in Afghanistan as a just war and described the U.S.-led war in Iraq as "winding down." On Dec. 21, Obama signed a \$636 bil defense appropriations measure that included \$128 bil for U.S. military operations in Afghanistan and Iraq during the 2010 fiscal year.

According to year-end statistics compiled by the website iCasualties.org, U.S. military fatalities in Iraq in 2009 declined to a low of 149, with a cumulative total of 4,370 U.S. troop deaths since the start of Operation Iraqi Freedom (2003-09); about 112,000 U.S. troops were stationed in Iraq at the end of the year. U.S. casualties in Afghanistan reached an annual high of 317 in 2009, with a cumulative total of 947 since the war began; 108 British service members and 96 other coalition troops lost their lives on the Afghan battlefield in Operation Enduring Freedom in 2009.

Mogadishu Blast Kills 4 Somali Government Ministers—A suicide bomber disguised as a veiled Muslim woman blew himself up at a medical school graduation ceremony Dec. 3 in Mogadishu, Somalia, killing at least 22 people and striking a blow at a transitional government

backed by the U.S., UN, and African Union. The victims included Health Min. Qamar Aden Ali, Education Min. Ahmed Abdulahi Waayeel, and Higher Education Min. Ibrahim Hassan Addow, along with journalists, teachers, and medical students; a 4th cabinet member, Sports Min. Saleban Olad Roble, died of his wounds in a hospital. Somali officials blamed the attack on al-Shabaab, an insurgent Islamist group aligned with al-Qaeda, and identified the suicide bomber as Abdulrahman Ahmed Haji, a 26-year-old Danish citizen of Somali ancestry.

The lack of an effective central government in Somalia contributed to the growth of piracy in the region. Data released Jan. 14, 2010, by the International Maritime Bureau indicated that of 406 instances of piracy reported worldwide in 2009, 217 were carried out by Somali pirates, who hijacked 47 vessels and took 867 crew members hostage.

156 Die in Russian Nightclub Fire—Previously cited for fire safety violations, the Lame Horse nightclub in Perm, Russia, went up in flames in the early morning hours of Dec. 5 as indoor pyrotechnics ignited a ceiling decorated with dry twigs. Fire, thick smoke, and a stampede of patrons rushing for the lone exit killed more than 100 that night; the death toll mounted to 156 during the next 3 months, as hospitalized burn victims succumbed to their injuries.

Climate Change Conference Fails to Set Binding Goals—Meeting Dec. 7-18 in Copenhagen, Denmark, representatives of 193 countries were unable to reach agreement on a treaty that would mandate cuts in emissions of the greenhouse gases that climate scientists have identified as the prime cause of global warming. Instead, the conferees approved a Copenhagen Accord that endorsed an agreement reached a day earlier by 5 major countries—Brazil, China, India, South Africa, and the U.S.—establishing a system under which nations would monitor and report their own progress toward nonbinding emissions reduction targets. Under the accord, conferees pledged to hold the rise in global average temperatures to less than 2° C (3.6° F) above preindustrial levels, and to establish a fund under which industrialized countries would collectively contribute \$10 bil annually during 2010-12 to help developing countries deal with the consequences of climate change. Analyses released Jan. 2010 by the National Aeronautics and Space Administration (NASA) showed that the 2000-09 decade was the warmest since modern temperature measurements began.

Italian Leader Assaulted in Milan—A 42-year-old man with a history of mental illness assaulted Italian Prime Min. Silvio Berlusconi Dec. 13 with a heavy statuette, sending him to the hospital with a fractured nose, broken teeth, and other facial injuries. The assailant, Massimo Tartaglia, attacked the billionaire media mogul and political leader with a miniature model of Milan Cathedral, after Berlusconi had finished addressing a rally of his supporters in Milan. Long a controversial figure, the prime minister had recently been accused of having Mafia ties, which he denied. On June 29, 2010, after a psychiatric evaluation, Tartaglia was declared unfit to stand trial.

Christmas Day Airplane Bomb Plot Foiled Over Detroit—Alarmed by popping sounds, smoke, and fire as their Airbus A330 began its final descent just before noon Dec. 25 into Detroit, MI, passengers and crew on board Northwest Airlines Flight 253 thwarted an apparent attempt by a 23-year-old Nigerian man to blow up the aircraft by igniting explosives hidden in his underwear. The would-be bomber, Umar Farouk Abdulmutallab, had purchased his \$2,831 plane ticket for cash in Accra, Ghana, and had flown from Lagos, Nigeria, to Amsterdam's Schiphol Airport; there he transferred to the Detroit-bound transatlantic flight, which carried 279 passengers and 11 crew members. The explosive device failed to detonate but instead caught fire, burning Abdulmutallab, who was taken into custody after the aircraft landed safely. A 6-count indictment issued by a federal grand jury Jan. 6, 2010, charged him with attempted use of a weapon of mass destruction and attempted murder. Abdulmutallab, who was reportedly cooperating with U.S. authorities, acknowledged having received terror training and explosive materials from al-Qaeda in Yemen.

After the arrest, investigators focused on why the alleged “underwear bomber” had not received greater scrutiny. Abdulmutallab’s father, wealthy Nigerian banker Alhaji Umaru Mutallab, had met with Nigerian and U.S. officials in Oct. and Nov. and warned them that his son had become a radical Islamist and might be preparing to carry out a suicide mission. Abdulmutallab’s name was added to a U.S. database of persons with possible terrorist connections, but his multiple-year tourist visa was not revoked nor was he added to the no-fly list.

General

NFL Shifts Policy on Concussions—As evidence mounted linking chronic head trauma with much higher than normal rates of early-onset dementia and other brain disorders among pro football players, the National Football League announced Dec. 2 that it would toughen its guidelines on how teams must deal with head-related injuries. The revamped NFL rules required that players who display signs of concussion such as memory loss, poor balance, or neurological impairment during a game or practice must be removed from play, held out of action for at least one day, and evaluated both by a team physician and by an independent expert. Before they can return to competition, such players must be “fully asymptomatic, both at rest and after exertion.” The NFL, which had long denied any link between players’ on-field head injuries and long-term mental problems, subsequently agreed to make an unrestricted gift of \$1 mil to the Boston Univ. School of Medicine to support research into sports-related brain trauma.

Ingram Wins Heisman Trophy—Sophomore tailback Mark Ingram, who rushed for 1,542 yards in leading top-ranked Alabama to a 13-0 regular-season record, on Dec. 12 became the first member of the Crimson Tide to receive the Heisman Trophy, which honors the nation’s most outstanding college football player. Ingram defeated Stanford running back Toby Gerhart by just 28 points (1,304-1,276) in the Heisman balloting, the closest finish in the award’s 75-year history.

Woods Admits Marital Infidelity, Puts Golf Career on Hold—Battered by tabloid stories portraying him as a serial adulterer, Tiger Woods acknowledged his “infidelity” on his website Dec. 11 and declared that he would take “an indefinite break from professional golf.” The international celebrity’s carefully crafted public image had rapidly unraveled after the *National Enquirer* alleged Nov. 25 that the golfer had carried on an affair with a nightclub hostess. Two days later, in an unexplained accident at about 2:25 AM, Woods crashed his Cadillac Escalade SUV into a fire hydrant and tree close to his home in Windermere, FL. Summoned by a 911 emergency call, police found Woods on the ground, with his wife, Swedish-born Elin Nordegren Woods, nearby. She told police she had smashed in the SUV’s back windows with a golf club to free him from the wreck. Woods, lightly injured, was charged with reckless driving, but the notoriety surrounding the crash triggered multiple press reports in which other women claimed to have had affairs with him.

A transformative presence on the pro golf tour since the late 1990s, Woods won more than \$11.2 mil in prize money in 2009 and reportedly earned about \$90 mil annually in major sponsorship deals. The scandal led several high-profile sponsors to cut their ties with him, including Gatorade, AT&T, and the consulting firm Accenture, while other major companies took steps to limit his role in their marketing. On Feb. 19, 2010, after a 45-day stay in a rehabilitation center where he apparently received treatment for sex addiction, he made his first public appearance since the accident, admitting: “I was unfaithful. I had affairs. I cheated.”

January 2010

National

Loss of U.S. Senate Seat from Massachusetts Jolts Democrats—In a special election Jan. 19 to fill the U.S. Senate seat vacated by the death of Sen. Edward M. (Ted) Kennedy in Aug. 2009, little-known state senator Scott Brown (R) defeated Massachusetts Atty. Gen. Martha Coakley, 52% to 47%. Massachusetts had given Barack Obama one of his

biggest majorities in the 2008 presidential election, and the loss of the so-called “Kennedy seat”—held first by John F. Kennedy, from 1953 to 1960, and then by his brother Edward, from 1962 to 2009—stunned state and national Democratic leaders. Brown, who had campaigned as a populist in a pickup truck, benefited from the support of the conservative Tea Party movement as well as the GOP organization; he scored heavily among independents, who make up more than half of all registered voters in the state. He was sworn in Feb. 4, becoming the Senate’s 41st Republican member—enough votes, if Republicans were united, to sustain a filibuster and block parts of the Democrats’ legislative agenda.

The Brown victory underlined the president’s sagging job approval rating, which had fallen below 50% in Gallup polling. The Massachusetts setback also raised Democrats’ fears that rising anti-incumbent sentiment might erase their Senate and House majorities in the upcoming midterm elections. Two Democratic incumbents, 5-term Sen. Chris Dodd (CT) and 3-term Sen. Byron Dorgan (ND), announced Jan. 5-6 that they would not seek reelection in Nov. 2010.

Supreme Court Overturns Limits on Corporate Campaign Spending—A far-reaching ruling by the U.S. Supreme Court Jan. 21 held that corporations had a First Amendment right to spend their own general treasury funds to influence the outcome of candidate elections. Writing for a 5-4 majority in *Citizens United v. Federal Election Commission*, Associate Justice Anthony Kennedy declared, “The Government may regulate corporate political speech through disclaimer and disclosure requirements, but it may not suppress that speech altogether.” The decision applied to so-called independent expenditures by corporations, and did not overturn the ban on direct corporate contributions to political candidates.

The case upended several Supreme Court precedents and voided a major portion of the Bipartisan Campaign Reform Act (2002), commonly known as McCain-Feingold for its principal Senate sponsors, John McCain (R, AZ) and Russ Feingold (D, WI). The ruling, which covered election spending by labor unions and nonprofit advocacy groups as well as by for-profit companies, was expected to lead to challenges against similar campaign finance laws in some two dozen states. Pres. Obama criticized the decision, calling it “a green light to a new stampede of special interest money in our politics.”

Obama Delivers State of the Union Address, Pledges to End “Don’t Ask, Don’t Tell”—Speaking to a joint session of Congress Jan. 27, Pres. Obama defended his administration’s handling of the economy during his first year in office, promised to appoint a bipartisan panel to recommend ways to cut the annual budget deficit and national debt, and said that starting in 2011, he was prepared to impose a 3-year spending freeze on many discretionary government programs (but not on programs affecting national security, Medicare, Medicaid, and Social Security). He urged Congress to press ahead on a jobs bill, health care, financial reform, and energy policy, and he reminded Democrats that, despite recent electoral setbacks, “we still have the largest majority in decades, and the people expect us to solve some problems, not run for the hills.”

In his State of the Union speech, Obama also vowed to end the “Don’t Ask, Don’t Tell” policy that forbids homosexuals from serving openly in the U.S. armed forces. In testimony to the Senate Armed Services Committee Feb. 2, Navy Adm. Mike Mullen became the first sitting chairman of the Joint Chiefs of Staff to endorse repealing the policy, and Defense Sec. Robert Gates said the Pentagon would develop a plan for complying with Obama’s directive. Three weeks later, however, in separate appearances before the House Armed Services Committee, Gen. George W. Casey Jr. and Gen. Norton A. Schwartz—the chiefs of staff, respectively, of the Army and Air Force—urged a slow approach, noting that the armed forces had already been stressed by prolonged wars in Afghanistan and Iraq.

Economic Rebound Continues, but Jobs Picture Remains Bleak—Preliminary data released Jan. 29 by the Commerce Dept. indicated that the U.S. gross domestic product (GDP) increased by 5.7% during Oct.-Dec. 2009.

The quarterly GDP growth rate was the fastest in 6 years. Positive corporate news included a return to profitability by the Ford Motor Co. after three years of losses; the company reported Jan. 28 that it had earned \$2.7 bil in 2009.

News on the employment front was less encouraging. The Obama administration announced Jan. 12 that the \$787 bil economic stimulus measure enacted in Feb. 2009 had saved or created 1.5 mil-2 mil jobs. Nevertheless, the economy lost a net total of nearly 4 mil jobs during the year. The Bureau of Labor Statistics reported Feb. 5 that although the nationwide unemployment rate in Jan. dipped from 10.0% to 9.7%, the U.S. lost another 20,000 jobs.

Stocks pulled back from their 2009 joyride. The Dow Jones Industrial Average closed Jan. 29 at 10,067.33, a one-month decline of 3.5%. The S&P 500 was down 3.7% to 1,073.87, and the Nasdaq Composite Index dropped 5.4% to 2,147.35.

International

Haiti Earthquake Kills More Than 220,000—Haiti, the poorest country in the Western Hemisphere, suffered catastrophic damage Jan. 12 when an earthquake measuring 7.0 on the open-ended Richter scale struck at 4:53 PM local time, about 15 mi WSW of Port-au-Prince, the national capital. An official assessment issued in late Mar. by the Haitian government and international aid agencies estimated the nationwide death toll at more than 220,000, with at least 300,000 more people injured. The UN headquarters in Port-au-Prince collapsed, killing nearly 100 peacekeepers, including the head of the mission, Tunisian diplomat Hédi Annabi. Monsignor Joseph Serge Miot, archbishop of Port-au-Prince, was killed when the city's Roman Catholic cathedral collapsed.

About 100,000 homes were completely destroyed, and nearly 200,000 were damaged; as of late Mar., about 1.3 mil people were still living in temporary shelters in the Port-au-Prince area, and another 500,000 had fled the capital region to find refuge elsewhere. The initial quake, which lasted 35 seconds and was followed by dozens of powerful aftershocks, left more than 1,300 schools and at least 50 hospitals and health centers unusable. The disaster worsened the plight of Haiti's "orphans," estimated at 380,000 even before the quake; vulnerable to trafficking and other forms of abuse, many of these children had been sent to orphanages by parents who were too poor to raise them.

With the Presidential Palace, Parliament, and other administrative centers in ruins, Haiti lacked a functioning government for weeks after the quake. As supplies of food and fresh water ran short, rescue and relief attempts were hampered by blocked roads, a damaged port, and crippled electrical and telecommunications systems. Many nations and international aid groups offered assistance, including the U.S., which deployed some 22,000 troops in Haiti at the peak of the emergency aid operation.

The United Nations estimated that the disaster cost Haiti \$7.8 bil—or 20% more than the country's entire gross domestic product in 2009. An international donor conference Mar. 31 produced pledges of \$5.3 bil in aid over an 18-month period, of which the U.S. would provide \$1.15 bil. Sec. of State Hillary Clinton had a major role in the proceedings, as did her husband, former Pres. Bill Clinton, who had been serving since May 2009 as UN special envoy to Haiti and who was named by the UN Feb. 3 to coordinate international relief efforts there.

Chinese Hackers Said to Target Google, Other U.S. Firms—Internet search giant Google Jan. 12 accused hackers based in China of launching sophisticated cyberattacks aimed at stealing some of the firm's computer code and gaining access to Gmail accounts used by Chinese human rights activists. The attacks, which apparently exploited a vulnerability in Microsoft's Internet Explorer browser, also targeted at least 30 other firms, many of them based in California's high-tech Silicon Valley. On Feb. 3 the *Washington Post* reported that Google had sought help from the U.S. National Security Agency in pinpointing the source of the attacks and shoring up Google's electronic defenses. According to a Feb. 18 account in the *New York Times*, the attacks were traced to computers at 2 Chinese educational

institutions, Shanghai Jiao Tong Univ. and the Lanxiang Vocational School.

Hamas Leader Assassinated in Dubai—Senior Hamas commander Mahmoud al-Mabhouh was found dead in his Dubai hotel room Jan. 20, a day after the Syrian-based militant entered the United Arab Emirates (UAE). Suspicion immediately fell on Israel's Mossad spy agency, which blamed Mabhouh, a founder of Hamas's military wing, for the kidnapping and killing of 2 Israeli soldiers in 1989; the Israelis also accused him more recently of smuggling arms from Iran to Hamas fighters in Gaza. Dubai police reported that an assassination squad as large as 32 people, many wearing wigs and fake beards, drugged and suffocated Mabhouh before fleeing Dubai under forged European and Australian passports. Israel did not admit any involvement in the assassination, but some in the international community denounced Israel for participating in the forging of passports from their countries. Britain expelled an Israeli diplomat in Mar., and Australia did likewise in May.

French Court Clears Villepin of Smearing Sarkozy—A criminal trial in which former French Prime Min. Dominique de Villepin was accused of conspiring to tarnish the reputation of a political rival, Pres. Nicolas Sarkozy, ended Jan. 28 with Villepin's acquittal. A Paris court absolved Villepin of any wrongdoing, but 3 other men—former aerospace executive Jean-Louis Gergorin, computer expert Imad Lahoud, and accountant Florian Bourges—were found guilty of forging and circulating false documents purporting to show that Sarkozy and others had received kickbacks from international arms sales. The scandal, known as Clearstream (after the name of the Luxembourg financial institution on whose accounts list Sarkozy's forged name appeared), had arisen in 2004, when Villepin and Sarkozy were vying to succeed Pres. Jacques Chirac. Prosecutors said Jan. 29 they would seek to retry Villepin, who accused Sarkozy of pursuing a personal vendetta against him.

"Chemical Ali" Hanged; Other Iraq, Pakistan, Afghanistan War Developments—Iraqi authorities Jan. 25 executed former Def. Min. Ali Hassan al-Majid, also known as "Chemical Ali," 8 days after he received a death sentence for ordering the 1988 poison gas attack that killed more than 5,000 Kurds in the town of Halabja. Captured by coalition forces in Aug. 2003, Majid had also received death sentences in 2007, 2008, and 2009 for atrocities committed against Kurds and Shiites during the 1980s and '90s, while his cousin Saddam Hussein ruled Iraq, but those sentences had not been carried out. On the day of Majid's hanging, suicide bombers struck three Baghdad hotels popular with foreigners, killing 36 people and injuring more than 70 others. U.S. troop casualties in Iraq numbered 5 during the month.

In Pakistan, nearly 100 people were killed and 40 injured Jan. 1 when a suicide bomber drove a truck carrying 550 lb of explosives into a crowd watching a volleyball game at Shah Hassan Khel, a village in NW Frontier Province. The bombing was viewed as an act of retaliation against the villagers, who in 2009 had formed a militia to fight the Pakistani Taliban.

A UN report released Jan. 13 concluded that 2,412 civilians had been killed in Afghanistan in 2009, a 14% increase over the previous year. The report blamed attacks by the Afghan Taliban and other insurgents for about two-thirds of the deaths, and operations by U.S. and NATO forces for about one-fourth. (The remaining civilian casualties could not be attributed to either side.) Coalition military casualties in Jan. totaled 43, of whom 30 were U.S. service members, according to iCasualties.org.

General

Alabama Captures Collegiate Football Title—Propelled by a punishing defense and a relentless ground attack, Alabama outlasted Texas, 37-21, in the Bowl Championship Series (BCS) title game played Jan. 7 at the Rose Bowl in Pasadena, CA. Heisman Trophy winner Mark Ingram, who ran for 116 yards and 2 touchdowns on 22 carries, was named offensive MVP for the Crimson Tide, which finished the season with a 14-0 record. The BCS title was the 2nd for Alabama head coach Nick Saban, who had won with Louisiana State Univ. (LSU) in 2003.

Leno Moves Back to Late-Night TV Slot—NBC triggered an embarrassing spat involving two of its best-known comedians when it confirmed Jan. 10 that it would shift Jay Leno from his weeknight 10 PM (Eastern) time slot to the late-night spot occupied by Conan O'Brien, who had succeeded Leno as *Tonight Show* host in June 2009. NBC had launched the prime-time *Jay Leno Show* with great fanfare in Sept. 2009, substituting Leno's hour-long variety program for the pricier network dramas that usually aired in the 10 PM time period. Critics savaged the new Leno show, and ratings sagged for Leno, O'Brien, and the nightly news programs that local NBC affiliates sandwiched between the two comics.

To make room for Leno at 11:35 PM, NBC proposed pushing O'Brien's nightly start time back to 12:05 AM, but O'Brien refused, charging NBC with breach of contract. The dispute dragged on for nearly 2 weeks until NBC agreed to pay \$32.5 mil to O'Brien and about \$12 mil to his staff. O'Brien hosted his final *Tonight Show* Jan. 22, earning his highest ratings since he took over the program, and signed a deal Apr. 9 with the TBS cable network to host a new late-night program starting Nov. 2010.

Avatar Sets Box-Office Records—After winning Best Director and Best Drama honors at the Golden Globe Awards Jan. 17, James Cameron's science-fiction epic *Avatar* crossed the \$2 bil mark in worldwide gross box-office revenues Jan. 31. The technically innovative film, which was released in mid-Dec. 2009 and cost well over \$300 mil to make and promote, earned more than \$2.2 bil by Feb. 7, surpassing the all-time U.S. and worldwide box-office marks established by Cameron's previous blockbuster, *Titanic* (1997). Revenues for *Avatar* were boosted by the premium prices charged by theater owners when showing the film in 3-D and IMAX formats.

Top Grammy Honors Go to Beyoncé, Swift—R&B superstar Beyoncé Knowles took home 6 statuettes and country-pop sensation Taylor Swift won 4 at Grammy Award ceremonies in Los Angeles Jan. 31. Beyoncé's "Single Ladies (Put a Ring on It)" won as Song of the Year, and Swift's best-selling *Fearless* won for Album of the Year. The award for Record of the Year went to Kings of Leon for their arena-rock hit "Use Somebody."

Williams, Federer Win at Australian Open—American Serena Williams captured her 5th Australian Open singles crown and 12th Grand Slam singles title at Melbourne Jan. 30, defeating Justine Henin of Belgium, 6-4, 3-6, 6-2. Henin, unranked and unseeded, was playing in her 2nd tournament since emerging from a 20-month retirement. In the men's championship Jan. 31, Swiss master Roger Federer dominated Andy Murray of Scotland, 6-3, 6-4, 7-6 (11), to take his 4th Australian Open and 16th Grand Slam singles title.

February 2010

National

White House Unveils \$3.8 Tril Budget; Debt Ceiling Raised—On Feb. 1 the Obama administration released a 10-year spending plan calling for outlays of \$3.834 tril, revenues of \$2.567 tril, and a deficit of \$1.267 tril during the 2011 fiscal year (beginning Oct. 1, 2010). Major spending categories in the fiscal 2011 budget included national security, \$895 bil; Social Security, \$730 bil; Medicare, \$491 bil; Medicaid, \$297 bil; and net interest, \$251 bil. Although annual deficits were projected to decrease to \$706 bil by 2014, they were expected to begin rising again in 2015 and to reach \$1 tril in 2020, when net interest on the accumulated debt would exceed \$840 bil annually.

On Feb. 12, Obama signed legislation raising the statutory public debt ceiling from \$12.394 tril to \$14.294 tril. The White House Budget projected that by fiscal year 2020, the public debt would reach \$18.573 tril, or 77% of the nation's annual gross domestic product, a higher percentage than at any time since 1950. Acknowledging that the current debt trend would "saddle every child in America with an intolerable burden," Obama Feb. 18 signed an executive order creating the bipartisan National Commission on Fiscal

Responsibility and Reform, headed by Erskine Bowles (D), who had served as chief of staff in the Clinton White House, and former Sen. Alan Simpson (R, WY).

Pentagon Tests Airborne Laser Missile-Defense System—The Missile Defense Agency of the U.S. Dept. of Defense announced that, in a Feb. 11 test over the Pacific Ocean, an airborne jumbo jet equipped with a high-powered laser gun had succeeded for the first time in shooting down a liquid-fueled, short-range ballistic missile traveling at 4,000 mph. The agency disclosed that in another test an hour later the Airborne Laser Test Bed (ALTB) engaged but failed to destroy its missile target, reportedly because of a "beam misalignment." Agency officials subsequently told *Aviation Week* that the ALTB system had also been successfully tested Feb. 3 against a less sophisticated solid-fueled rocket.

Zazi Pleads Guilty in Terror Case—Arrested Sept. 2009 for plotting to make homemade bombs from chemicals purchased at beauty salons, Najibullah Zazi pleaded guilty to terrorism charges Feb. 22. Zazi, a legal U.S. resident who was born in Afghanistan and raised in Pakistan, admitted that he had returned to Pakistan in 2008 intending to join the Taliban but had been recruited there by al-Qaeda operatives, who wanted him to carry out a "martyrdom operation" on American soil. The former shuttle bus driver told a federal judge in Brooklyn, NY, that he had planned to use the bombs in a suicide attack against the New York City subway system.

Toyota Executives Apologize for Auto Defects—Testifying before Congress Feb. 23-24, executives of Japan-based Toyota Motor Corp. and its U.S. subsidiary, Toyota Motor Sales U.S.A., apologized for manufacturing and design defects that had led to the recall of more than 8 mil vehicles, of which 6 mil had been purchased in the U.S. In prepared remarks before the House Committee on Oversight and Government Reform, Akio Toyoda—grandson of company founder Kiichiro Toyoda and the firm's president since June 2009—admitted that in recent years Toyota's priorities had become "confused" and that the auto manufacturer had pursued sales growth at the expense of quality and safety.

The recent recalls stemmed from an Aug. 2009 accident in which off-duty California Highway Patrol Officer Mark Saylor and 3 members of his family were killed near San Diego when their 2009 Lexus ES 350 sedan, manufactured by Toyota, began accelerating uncontrollably and crashed after reaching speeds of more than 100 mph. Toyota initially blamed faulty floor mats for interfering with gas pedals, but as further reports of uncontrolled acceleration accumulated, the company recalled millions of vehicles to have their gas pedals replaced with redesigned units. The product defects, and Toyota's clumsy handling of them, subjected the firm to a torrent of unfavorable publicity and to dozens of class-action lawsuits. Toyota's share of the U.S. market dipped in Feb., but sales rebounded in Mar., boosted by incentives averaging \$2,242 on each vehicle sold. The following month the company agreed to pay a \$16.4 mil civil penalty for failing to notify federal safety officials promptly about its vehicles' gas pedal problems. Meanwhile, the company and federal regulators continued to investigate whether other defects might be responsible for the runaway vehicles.

Toyota was not the only auto firm to face product safety issues. On Feb. 10, Honda, Japan's 2nd-largest automaker, recalled 438,000 vehicles because of defective airbags. On Mar. 2, General Motors said it would recall 1.3 mil small cars to fix a power-steering problem linked to 14 crashes.

Top New York Democrats Hit by Ethics Charges—New York Gov. David Paterson (D) abandoned his bid for a full term Feb. 26 after the *New York Times* published allegations that he had improperly intervened in a domestic violence case involving a senior aide and close friend, David W. Johnson. The *Times* report alleged that Paterson and state police had pressured Johnson's longtime female companion to drop an assault charge against him. Paterson, who had become governor in Mar. 2008 after Eliot Spitzer (D) was ensnared in a prostitution scandal, pledged to remain in office through the end of 2010. On Mar. 11, New York Atty. Gen. Andrew Cuomo (D) appointed an independent coun-

sel to investigate the charges against Paterson. Cuomo, the son of former 3-term Gov. Mario Cuomo (D), was already preparing to challenge Paterson when the scandal broke, and he formally declared his own candidacy for governor May 22.

Another well-known Democrat, Rep. Charles Rangel, chairman of the House Ways and Means Committee—and, like Paterson, one of New York's most prominent African American politicians—was cited Feb. 25 by the House Committee on Standards of Official Conduct (generally known as the Ethics Committee) for violating congressional travel restrictions by participating in corporate-financed trips to the Caribbean. Rangel, who was also under investigation for fundraising, income tax, and real-estate investment irregularities, gave up his gavel Mar. 3 and was succeeded by Rep. Sander Levin (D, MI). On July 29 the Ethics Committee charged Rangel with 13 specific violations of House rules and federal statutes. In an emotional speech Aug. 10 from the well of the House, Rangel insisted he was innocent and refused to resign.

Consumer Confidence Sags, as Recovery Remains Weak—The Conference Board reported Feb. 23 that its Consumer Confidence Index (based on a survey of 5,000 U.S. households) showed a one-month drop from 56.5 to 46.0, its lowest level since Apr. 2009. The nationwide unemployment rate in Feb. held steady at 9.7%, but the economy continued to lose jobs, and a Gallup survey released Feb. 23 found that 19.9% of the U.S. workforce was jobless or underemployed. New home sales remained sluggish, and an audit of Federal Housing Administration-backed mortgages showed that by Dec. 2009 more than 9% of borrowers had missed at least 3 monthly payments.

The picture was brighter on Wall Street, where stocks had their best month since Nov. 2009. The Dow Jones Industrial Average closed Feb. 26 at 10,325.26 for a one-month gain of 2.6%. The Nasdaq Composite Index was up 4.2%, finishing at 2,238.26, and the S&P 500 rose 2.9% to 1,104.49.

International

Pro-Russian Candidate Wins Ukraine Presidency—Viktor Yanukovich, the pro-Russian politician whose tainted victory in a Nov. 2004 presidential vote triggered Ukraine's "orange revolution," regained the presidency Feb. 7, defeating Prime Min. Yulia Tymoshenko in a runoff election by a margin of about 49% to 45% (most of the remaining votes were cast "against all"). Yanukovich had led Tymoshenko by 35% to 25% after the first round of presidential voting Jan. 17, as incumbent Pres. Viktor Yushchenko finished 5th with only about 5% of the total vote. Tymoshenko initially disputed the runoff result but dropped her challenge Feb. 20, and Yanukovich was inaugurated 5 days later. Tymoshenko's parliamentary coalition collapsed, and after the legislature passed a vote of no-confidence Mar. 3 she stepped down as prime min. and became opposition leader. Pres. Yanukovich's Party of Regions then put together a new coalition government Mar. 11 with the Russian-born Mykola Azarov as prime min.

The political developments sparked a rapid improvement in Ukraine's relations with Russia. Meeting Apr. 21 in the Ukrainian city of Kharkiv, Pres. Yanukovich and Russian Pres. Dmitri Medvedev announced an agreement under which Russia would retain a Crimean base for its Black Sea fleet for another 25 years, and Ukraine would receive a 30% discount on the price of Russian natural gas. In June a Russian state-controlled bank extended a \$2 bil loan to bolster Ukraine's stumbling economy.

Coup Ousts Tandja in Niger—A military junta led by squadron chief Salou Djibo and calling itself the Supreme Council for the Restoration of Democracy took power in Niger Feb. 18, after a 4-hour gun battle in Niamey, the national capital, in which 10 people were killed and Pres. Mamadou Tandja was captured. The coup ended a political standoff that had begun in 2009 when Tandja, in office since 1999, dissolved parliament and Niger's constitutional court after they sought to block his efforts to run for a 3rd 5-year term. On Feb. 22 the junta designated former Communications Min. Mahamadou Danda, a civilian, to become prime min.; a 20-member transitional government, including

5 soldiers and 5 women, was installed Mar. 1, but no date for elections was set. Although landlocked Niger remains one of the poorest countries in Africa, the nation's uranium and oil deposits have made it a prime target for foreign influence and investment, especially from China.

Earthquake Rocks Central Chile—One of the most powerful earthquakes ever recorded struck Feb. 27 at 3:34 AM local time off the coast of central Chile, about 70 mi NE of Concepción, Chile's second-largest city. Measuring 8.8 on the Richter scale, the quake was centered beneath the Pacific Ocean, some 21.7 mi underground, and triggered tsunamis that washed over coastal Chilean villages and were observed throughout the Pacific region. Precise measurements taken before and after the disaster confirmed that the quake had shifted the entire city of Concepción about 10 ft westward and the national capital, Santiago, about 11 in. in the same direction.

Considerable confusion surrounded initial estimates of the quake damage. On Mar. 2, outgoing Pres. Michelle Bachelet stated that the death toll had risen to 795; two days later, however, the official estimate was lowered to 279. A Chilean government report in mid-May put the number of confirmed dead at 521, with another 56 people still missing. Property damage was estimated at up to \$30 bil, with some 400,000 homes destroyed or badly damaged.

During the two months following the quake, more than 300 aftershocks measuring 5.0 or greater were recorded. A strong aftershock was felt in the port city of Valparaíso Mar. 11 as dignitaries gathered there for the inauguration of Bachelet's presidential successor, Sebastián Piñera, a billionaire businessman. The conservative Piñera had defeated former Pres. Eduardo Frei, the candidate of Chile's ruling center-left coalition, 51.6% to 48.4% in a presidential runoff election Jan. 17.

Coalition Launches Offensive in Afghanistan's Helmand Province; Other War News—About 15,000 coalition troops, including forces from the U.S., other NATO countries, and the Afghan government, launched a major offensive Feb. 13 targeting the town of Marja and other Taliban strongholds in Helmand Province, S Afghanistan. The operation, called Moshtarak (the Dari word for "together"), was the largest such offensive since the Afghan war began in 2001. U.S. commanders viewed Marja as a key test of the "government-in-a-box" strategy, under which a previously assembled team of Afghan police and civilian officials would replace a Taliban-controlled local administration almost overnight.

A coalition government in the Netherlands collapsed Feb. 20 when the principal parties failed to reach agreement on the continued deployment of some 2,000 Dutch troops with NATO forces in Afghanistan; new Dutch elections were scheduled for June with the complete withdrawal of Dutch troops from Afghanistan a central issue. A NATO missile strike Feb. 21 in the S Afghan province of Uruzgan killed at least 27 civilians. In Pakistan, meanwhile, American and Pakistani intelligence agents captured several high-ranking Afghan Taliban leaders, including military commander Mullah Abdul Ghani Baradar.

In Iraq, 54 people were killed and 109 injured Feb. 1 when a female suicide bomber hiding an explosive vest beneath her black *abaya* (cloak) blew herself up among a crowd of Shiite Muslim pilgrims in NE Baghdad. U.S. troop fatalities during the month totaled 5 in Iraq and 32 in and around Afghanistan.

General

Saints Beat Colts in Super Bowl—The New Orleans Saints Feb. 7 won the first Super Bowl in their 43-year franchise history, defeating the Indianapolis Colts, 31-17, at the recently renamed Sun Life Stadium in Miami Gardens, FL. (The stadium, home of the pro football Miami Dolphins, has had 7 names since 1987.) The Super Bowl XLIV matchup, which featured two of the league's elite quarterbacks, the Colts' Peyton Manning and the Saints' Drew Brees (the game MVP), attracted an average U.S. TV audience of 106.5 mil people, eclipsing the previous record set by the *M*A*S*H* finale in 1983.

Shuttle *Endeavour* Delivers Space Station's Last Major Sections—Touching down Feb. 21 at the Kennedy Space Center in Florida, the space shuttle *Endeavour* completed a successful 14-day mission to the International Space Station (ISS). The shuttle's 6-member crew, led by Comm. George Zamka, delivered and installed the Tranquility life-support module and a seven-windowed cupola for use in controlling the station's exterior robotics. Installation of the components, both supplied by the European Space Agency, made the ISS more than 98% complete.

XXI Winter Olympics Held in Vancouver, Canada—More than 2,600 athletes from more than 80 countries competed in the XXI Olympic Winter Games hosted Feb. 12-28 by Vancouver, British Columbia. Canada, the host country, led in gold medals with 14, including final-round victories in ice hockey over the U.S. women's team, 2-0, and the U.S. men's squad, 3-2. The U.S. led in the overall medal count with 37 (9 gold, 15 silver, 13 bronze), followed by Germany with 30 (10-13-7), and Canada with 26 (14-7-5). Norway, which finished 4th in the total medal count with 23 (9-8-6), had 2 of the leading individual medalists, cross-country skiers Marit Bjørgen (3-1-1) and Petter Northug (2-1-1). Other standout performers included South Korea's Kim Yu Na, the gold medalist in women's figure skating, and short-track speed skater Apolo Ohno, whose 8 career medals (including a silver and 2 bronzes in 2010) were the most ever for a U.S. athlete at the Winter Olympics.

The Vancouver competition was clouded by the death of a 21-year-old Georgian luger, Nodar Kumaritashvili, who crashed in an opening-day training run when he lost control of his sled as he entered the final bend of the Whistler Sliding Centre track at nearly 90 mph. Although designers had anticipated speeds of 87.5 mph when the track was opened in 2007, lugers in test events and training runs had gone as fast as 96 mph. International luge officials denied that the track was unsafe but nevertheless reconfigured the Olympic course after Kumaritashvili's death to reduce speeds and lessen the risk of further injuries.

Vancouver also hosted the Paralympic Games, Mar. 12-21, in which 44 countries were represented by more than 500 athletes with disabilities. The Russian team finished first with 38 medals (12 gold, 16 silver, 10 bronze), followed by Germany with 24 (13-5-6), Canada with 19 (10-5-4), Ukraine with 19 (5-8-6), and the U.S. with 13 (4-5-4).

March 2010

National

Landmark Health Care Measure Becomes Law—Pres. Barack Obama on Mar. 23 signed the Patient Protection and Affordable Care Act, the most ambitious effort to remake the U.S. health care system since the passage of Medicare and Medicaid in 1965. The bill Obama signed closely resembled the measure that passed the U.S. Senate Dec. 24, 2009, by a vote of 60-39, against united Republican opposition. The legislation would extend health insurance to some 32 mil Americans over a 10-year period, at a cost estimated at \$938 bil; because of tax increases and Medicare savings, however, the Congressional Budget Office estimated Mar. 20 that the law would reduce projected federal budget deficits by \$143 bil over the same period.

In its first year, the new law would bar insurance companies from rescinding coverage when people get sick, imposing lifetime limits on coverage, and denying coverage to children with preexisting conditions; individual and group policies would be required to extend coverage to dependent children up to age 26, and Medicare recipients who had reached the "doughnut hole" in prescription drug coverage would receive a \$250 rebate. Starting in 2013, individuals earning more than \$200,000 (or families earning over \$250,000) annually would pay an additional 0.9% in Medicare payroll tax, and individuals and families at similar income levels would be subject to a new 3.8% levy on dividends, interest, and other forms of unearned income. By 2014 most of the new system would become operational, with most U.S. citizens and legal residents required to obtain health insurance, and state-based insurance exchanges established to provide qualified plans at competitive rates to individuals and small businesses.

The president's year-long effort to restructure the nation's health-care financing was nearly derailed in Jan. 2010, when the election of Scott Brown (R, MA) as the Senate's 41st Republican cost the Democrats their filibuster-proof voting majority. But Obama decided to push forward, promoting his agenda at a public question-and-answer session with House Republican lawmakers Jan. 29 in Baltimore, MD, and at a health-care summit with congressional leaders Feb. 25 at Blair House in Washington, DC. Because the Senate could no longer be counted on to pass a substantially revised health-reform bill through regular procedures, Democratic leaders devised a complex legislative strategy to guide the legislation to final passage. On Mar. 21 the House voted, 219-212, to approve the Senate bill, with no Republicans voting in favor; later that same day, again without GOP support, the House passed, 220-211, a so-called reconciliation bill. The reconciliation bill headed to the Senate, where rules required only a simple majority vote to pass the legislation and did not allow a Republican filibuster. By a 56-43 vote on Mar. 25 the Senate then approved an amended version of the reconciliation measure, and the House promptly followed suit by a 220-207 margin. The reconciliation bill, signed by Obama Mar. 30, included provisions that revamped aid to higher education by expanding the Pell Grant program and phasing out the role of banks and other private lending institutions in providing federally guaranteed student loans.

Both inside and outside the halls of Congress, debate over the health legislation was fierce. A last-minute stumbling block to House passage was concern expressed by a group of anti-abortion Democrats, led by Rep. Bart Stupak (MI), that language in the Senate version did not go far enough in barring indirect federal subsidies for abortion. (Under the Hyde Amendment, Congress since 1976 has regularly banned federal money for abortion except in cases of rape or incest, or when the pregnant woman's life is in danger.) When Obama agreed to sign an executive order reiterating the barriers to federal abortion funding, Stupak and his allies provided the winning margin for health reform in the House. After the measure became law, House Majority Leader Steny Hoyer (D, MD) said about 10 Democrats had received death threats or had their homes or offices vandalized; the following day, House Republican Whip Eric Cantor (VA), a prominent opponent of the bill, said he also had received threats. Facing rising opposition in his home district, Stupak announced Apr. 9 that he would not run for a 10th House term in Nov. 2010.

Same-Sex Marriage Legal in Nation's Capital—The Religious Freedom and Civil Marriage Equality Amendment Act came into force Mar. 3, legalizing same-sex marriage in Washington, DC. The City Council passed the measure Dec. 15, 2009, by an 11-2 vote, and Mayor Adrian Fenty signed it 3 days later. Opponents of same-sex marriage failed in efforts to block the legislation in Congress, and U.S. Supreme Court Chief Justice John Roberts refused Mar. 2 to grant a temporary stay to prevent the law from coming into force. The District of Columbia joined 5 states—Connecticut, Iowa, Massachusetts, New Hampshire, and Vermont—in extending full marriage equality to same-sex couples.

New York Congressman Quits in Harassment Scandal—Freshman Rep. Eric Massa (D, NY) announced Mar. 5 that he would quit Congress effective Mar. 8 after he was accused of sexually harassing a male aide. Massa had first said Mar. 3 that he would not run for reelection, citing a "cancer recurrence scare" as the main reason for his decision. Four days later, in a radio interview, he accused Democratic Party leaders, including White House Chief of Staff Rahm Emanuel (whom Massa called the "son of the devil's spawn") of forcing him out because of his opposition to the health care bill. On Mar. 10 the *Washington Post* reported that Massa had been under investigation for allegedly groping at least 2 aides and harassing young male staffers in other ways.

Terror Cases Focus Attention on Homegrown Threat—David Coleman Headley, a U.S. citizen known until 2006 as Daoud Gilani, pleaded guilty in Chicago Mar. 18 to 12 terrorism-related charges. The American-born Headley, whose father was a Pakistani diplomat, acknowledged in his

plea agreement that he had assisted in planning the Nov. 2008 attacks that killed more than 160 people in Mumbai, India, and that he had helped plot an attack on a Danish newspaper that in 2005 had published cartoon images of the prophet Muhammad. Arrested in Chicago on Oct. 3, 2009, Headley agreed to cooperate with U.S. authorities in exchange for promises by prosecutors not to seek the death penalty or extradite him overseas.

Also on Mar. 18, Colleen R. LaRose, known on the Internet as “JihadJane,” appeared in federal court in Philadelphia to plead not guilty to charges that she had sought to raise funds for terrorist groups and recruit others to carry out jihadist strikes in Europe and Asia. Her targets allegedly included a Swedish artist, Lars Vilks, who had depicted Muhammad with the body of a dog. Federal officials alleged that LaRose, a white Pennsylvania woman with blue eyes and blond hair, had boasted to other jihadists that because of her appearance she could travel anywhere without attracting suspicion. LaRose had been in federal custody since her arrest in Philadelphia on Oct. 16, 2009.

On Mar. 17, authorities in Pakistan filed terrorism charges against five young American Muslims from Northern Virginia: Waqar Khan and Umar Farooq, both of Pakistani ancestry; Aman Hassan Yemer and Ahmed Minni, both of Ethiopian descent; and Ramy Zamzam, of Egyptian heritage. The men were convicted June 24 in Sargodha, Pakistan, and sentenced to 10 years in prison.

These and other cases—including the Nov. 2009 shootings that left 13 people dead in Fort Hood, TX—were specifically cited by Obama administration officials as they introduced a revamped national security strategy on May 27. The revised strategy for the first time explicitly recognized the threat posed by homegrown terrorists influenced by al-Qaeda and other extremist organizations and ideologies.

Community Organizing Group ACORN Disbands—The nonprofit Association of Community Organizations for Reform Now (ACORN) announced Mar. 22 that it would disband because of declining revenues. The Census Bureau and Internal Revenue Service had terminated their partnerships with ACORN, and Congress had barred federal funding for the group after conservative activists released videos in Sept. 2009 that purportedly showed ACORN employees offering advice on how to operate a prostitution business involving underage, illegal immigrants. Early in 2010, several large ACORN affiliates, including those in New York and California, broke off from the national group and reorganized under different names.

The nation’s largest community organizing body, with some 400,000 members in 105 U.S. cities, ACORN had long been targeted by conservatives, who accused it of voter registration fraud and other illicit practices. A preliminary report released June 14 by the Government Accountability Office found no evidence that ACORN had mishandled \$40 mil in grants provided by nine federal agencies during the fiscal years 2005-09.

Stocks, Jobs Make Gains—Major stock indexes increased for the 4th consecutive quarter, with the Dow Jones Industrial Average closing Mar. 31 at 10,856.63, up 5.1% for the month and 4.1% since the end of Dec. 2009. The Nasdaq Composite Index (2,397.96) rose 7.1% for the month and 5.7% for the quarter, and the S&P 500 (1,169.43) registered a monthly gain of 5.9% and a quarterly increase of 4.9%.

Pres. Obama signed Mar. 18 the Hiring Incentives to Restore Employment (HIRE) Act. The job-stimulus measure provided \$17.5 bil in tax cuts and other employer incentives and shifted \$20 bil to the Highway Trust Fund to boost spending on transit programs. The federal Bureau of Labor Statistics reported Apr. 2 that the economy had added 162,000 jobs in Mar., the largest monthly increase in 3 years; about 48,000 of the new hires were temporary workers for the 2010 Census. The nationwide jobless rate remained stuck at 9.7%, and the average duration of unemployment was more than 30 weeks.

International

Iraq Holds Parliamentary Elections; Obama Travels to Afghanistan—An estimated 62% of eligible voters par-

ticipated in Iraqi parliamentary balloting Mar. 7, with some 6,200 candidates from 86 political groups competing for 325 seats. Turnout was over 75% in three predominantly Kurdish provinces but only 53% in Baghdad, where insurgent attacks left at least 38 people dead. The national elections (Iraq’s second since the ouster of Saddam Hussein) were notable for the participation of Sunni Muslims, many of whom had boycotted the Dec. 2005 vote. According to final results released Mar. 26 by Iraq’s Independent High Electoral Commission, the leading group with 91 seats was the Iraqiya coalition headed by former Prime Min. Iyad Allawi, a Shiite who had campaigned as a secularist to win widespread Sunni support. Prime Min. Nouri al-Maliki’s Shiite-oriented State of Law coalition came in second with 89 seats, followed by the Iraqi National Alliance (a Shiite group that included the radical cleric Moqtada al-Sadr) with 70 seats, and the Kurdistan Alliance with 43. On the day the results were announced, two bombings at a crowded market in Khalis, Diyala Province, about 50 mi north of Baghdad, killed at least 59 people and injured more than 70. U.S. military fatalities in Iraq numbered 7 during the month.

Pres. Obama made a trip to Afghanistan Mar. 28, his first since he took office in Jan. 2009. During the 6-hour visit, which was not announced in advance, he addressed U.S. troops at Bagram Air Base and met in Kabul with Afghan Pres. Hamid Karzai, reportedly pressing him to crack down on corruption. Complicating U.S. relations with the Kabul government was the role of Pres. Karzai’s brother, Ahmed Wali Karzai, a powerful figure in the strategic Kandahar region, whom many Western and Afghan officials suspected of electoral fraud, drug trafficking, money laundering, and shadowy dealings with both the Taliban and the U.S. Central Intelligence Agency. Growing pressure from the West has led Pres. Karzai to turn elsewhere for support; in Mar., he traveled to Beijing to strengthen economic ties with China, and he met in Kabul and Tehran with Pres. Mahmoud Ahmadinejad, at a time when the U.S. was seeking to intensify the Iranian leader’s diplomatic isolation. According to the website iCasualties.org, 85 U.S. service members died in Afghanistan during the first three months of 2010, more than double the number during the comparable period of 2009.

Israel Approves Settlement Expansion During Biden Visit—Only hours after U.S. Vice Pres. Joe Biden arrived in Jerusalem to confer with Prime Min. Benjamin Netanyahu and help launch Israeli-Palestinian “proximity talks,” the Israeli government announced plans Mar. 9 to move ahead with construction of 1,600 homes in Ramat Shlomo, a Jewish settlement in mostly Arab East Jerusalem. The timing of the announcement, by Israel’s Interior Ministry (controlled by the right-wing Shas party), reportedly came as a surprise to Netanyahu; at U.S. insistence, he had previously agreed to suspend settlement construction in much of the West Bank, although not in East Jerusalem. Biden condemned the planned construction as a hindrance to peace, as did UN and European leaders and Palestinian negotiators. Israeli officials apologized for the ill-timed disclosure and denied that it had been meant as an affront to Biden, but they defended the substance of the Ramat Shlomo decision, which was strongly supported by the right-wing parties essential to Netanyahu’s governing coalition. Two weeks later, Netanyahu visited Washington, DC, and received an unusually frosty reception during a Mar. 23 meeting with Pres. Obama at the White House.

Blast Sinks South Korean Warship—A mysterious explosion on the evening of Mar. 26 split and sank the South Korean Navy warship *Cheonan*, killing 46 of the 104 sailors on board. At the time of the blast, the 1,200-ton corvette was on patrol in the Yellow Sea near South Korea’s Baengnyeong Island, in a maritime border region that had been the site of hostile encounters between North and South Korea. On May 20 a team of military and civilian probers from South Korea, the U.S., the UK, Australia, and Sweden formally concluded that the *Cheonan* had been torpedoed by a North Korean submarine; at a nationally televised news conference, investigators displayed what they described as North Korean torpedo fragments recovered from the disaster site. Five days later, South Korean Pres. Lee Myung Bak designated North

Korea as an “archenemy,” curtailed trade and investment ties with the Pyongyang regime, and referred the dispute to the UN Security Council. North Korea, which denied any role in the *Cheonan* sinking and called the investigators’ report a “fabrication,” retaliated by suspending nearly all communications with the South.

Suicide Bombings in Moscow Subway Kill 40—Female suicide bombers struck 2 Moscow subway stations during the morning rush hour of Mar. 29, killing 40 people and injuring dozens more. Russian authorities later identified the bombers as Dzhanet Abdullayeva, the 17-year-old widow of Umalat Magomedov, a militant Islamist from Dagestan who had been killed by Russian security officers in Dec. 2009; and Maryam Sharipova, a 28-year-old computer teacher from Dagestan. The first blast, carried out by Sharipova, took place just before 8 AM at the Lubyanka metro station, beneath the headquarters of the Russia’s Federal Security Service, which had recently conducted counterinsurgency operations against Islamic separatists in Dagestan and other N Caucasus republics; the second attack, executed by Abdullayeva, came 40 minutes later, at the Park Kultury metro stop, also in the heart of Moscow. In a video released Mar. 31, jihadist leader Doku Umarov claimed responsibility for orchestrating the attacks. Suicide bombings in Kizlyar, Dagestan, claimed 12 lives that same day.

General

Hurt Locker Takes Best Picture Oscar—Kathryn Bigelow became the first woman ever to win the Academy Award as Best Director Mar. 7, as her Iraq war drama, *The Hurt Locker*, took home 6 Oscars, including Best Picture. The sci-fi blockbuster *Avatar*, directed by Bigelow’s former husband James Cameron, won 3 awards, for cinematography, art direction, and visual effects. Top acting honors went to Sandra Bullock, for her leading role in *The Blind Side*, and Jeff Bridges for his portrayal of a down-and-out country singer in *Crazy Heart*. Pixar’s *Up* won the Oscar for animated feature, and *The Secret in Their Eyes* (*El Secreto de Sus Ojos*), an Argentinian murder mystery, earned the prize for foreign-language film.

American Rower Is Youngest to Make Solo Atlantic Crossing—Katie Spotz, 22, became the youngest person and first American to complete a solo journey across the Atlantic Ocean Mar. 14, when her specially designed 19-ft wooden rowboat landed at Georgetown, Guyana, on the N coast of South America. The endurance athlete from Mentor, OH, rowed 8-10 hours per day during her 2,817-mi voyage, which began Jan. 3 at Dakar, Senegal, on the W coast of Africa. The trip, which took about 2 years to plan and equip, was intended to support Blue Planet Run, a San Francisco-based nonprofit foundation that funds safe drinking water projects worldwide.

Large Hadron Collider Experiments Shatter Energy Records—The world’s most powerful subatomic particle accelerator, the Large Hadron Collider (LHC), operated by the European Center for Nuclear Research (CERN), reached a milestone Mar. 30, sending two proton beams crashing into each other with a combined energy of 7 tril electron volts (TeV). The LHC, a 17-mi loop located beneath the Swiss-French border, had failed shortly after launch in Sept. 2008, but after 14 months of repairs, it had been restarted in Nov. 2009 and had quickly eclipsed particle acceleration records previously held by Fermilab’s Tevatron in Batavia, IL. The 7-TeV collision marked the start of an advanced physics research program of 18-24 months, after which the atom smasher would be raised to its maximum operating energy of 14 TeV.

April 2010

National

Blowout in Gulf of Mexico Kills 11, Unleashes Catastrophic Oil Spill—One of the worst environmental disasters in U.S. history began on the night of Apr. 20 when a gas explosion and fire engulfed the *Deepwater Horizon*, an exploratory drilling platform about 50 mi off the coast of Venice, LA, in the Gulf of Mexico. As oil rig workers were engaged in sealing off the exploratory Macondo well, which had been drilling in water a mile deep, a sudden rush of oil, natural gas, and seawater surged upward through the drill pipes. Eleven of the 126 people on board the rig were killed; the remaining 115 escaped the fiery wreckage, but burned for 2 days before

sinking into the Gulf. Four firms were principally involved in the drilling: British oil giant BP, based in London, which managed the project and was the major owner of the Macondo well, containing about 50 mil barrels of oil; its U.S. partner, Texas-based Anadarko Petroleum, which owned 25% of the Macondo project; a Swiss-U.S. firm, Transocean, the world’s largest offshore drilling operator, which owned the *Deepwater Horizon* platform; and the oilfield services company Halliburton, the contractor tasked with cementing the well shut. With billions of dollars in potential liabilities at stake, executives of each firm blamed the others for the failures of multiple safety procedures designed to prevent such a disaster.

When the rig sank, oil began gushing from the ruptured pipes. Initial calculations put the leak at 1,000 barrels a day, but by Apr. 28 the U.S. Coast Guard had increased its estimate to 5,000 barrels a day. On June 10, a federal panel raised its estimate of the daily flow rate to 25,000-30,000 barrels, equivalent to nearly 1.3 mil gallons per day. With BP unable to plug the leak—and thousands of skimming and boom-deploying vessels unable to stem the oily tide—a toxic mix of petroleum and chemical dispersants spread toward shore, threatening wildlife in sensitive wetland habitats, fouling fishing grounds, and depositing sticky tar balls on beaches of Gulf Coast tourist towns from Texas to Florida.

The Gulf disaster posed a test of leadership for Pres. Barack Obama (D), who on Mar. 31 had proposed opening large areas of the Atlantic, eastern Gulf, and Alaska coastlines to new oil and gas drilling, and who had defended his proposal Apr. 2 in Charlotte, NC, by saying “oil rigs today generally don’t cause spills.” In late May, after oil from the Macondo well had been spewing into the Gulf for more than a month, the Obama administration replaced the head of the Minerals Management Service (MMS), the agency that oversees offshore drilling. On May 28 the Interior Dept. and MMS imposed a 6-month moratorium on deepwater exploratory drilling in the Gulf, but the drilling ban was overturned June 22 by U.S. District Judge Martin L.C. Feldman. Meanwhile, the administration stepped up pressure on BP to stop the leak, clean up the spill, and pay for damages to the Gulf Coast economy.

29 Die in West Virginia Mine Blast—In the worst U.S. coal-mining disaster in 40 years, a huge explosion Apr. 5 killed 29 miners working about 1,000 ft underground in the Upper Big Branch mine at Montcoal, Raleigh Co., WV. The mine, owned by a subsidiary of Massey Energy Co., based in Richmond, VA, had been repeatedly cited for safety violations, including high levels of explosive methane gas, which federal investigators targeted as the likely cause of the blast. Pres. Obama delivered the eulogy at a memorial service Apr. 25 at the Beckley-Raleigh County Convention Center.

Testifying May 24 before members of the House Education and Labor Committee, Stanley “Goose” Stewart, a miner who was working at Upper Big Branch on the day of the explosion, described the mine as a “ticking time bomb” because of ventilation problems in the two months prior to the accident. Analysts also focused on lax oversight by the federal Mine Safety and Health Administration.

Stevens Announces Supreme Court Retirement—Eleven days before celebrating his 90th birthday, U.S. Supreme Court Associate Justice John Paul Stevens announced Apr. 9 that he would leave when the current term ended in June. Stevens, the current court’s oldest and longest-serving justice, was a Chicago native and a World War II veteran who earned his legal reputation as an antitrust specialist and a foe of judicial corruption. He owed his career as a judge to two Republican presidents—Richard Nixon, who appointed him to the appellate bench in 1970, and Gerald Ford, who elevated him to the Supreme Court in 1975—and he entered the court as a moderate replacement for liberal icon William O. Douglas. Over time, however, as the Court’s political center gravitated rightward, Stevens emerged as a leader of the liberal bloc, casting key votes on abortion, affirmative action, executive power, criminal rights, and the death penalty. His retirement, which had been anticipated for months, offered Pres. Obama the opportunity to name a second Supreme Court justice.

Obama Lays Out Goals for U.S. Space Program—Speaking Apr. 15 at the Kennedy Space Center in Florida, Pres. Obama redefined the nation’s long-term goals for human spaceflight, outlining plans for the National Aeronautics and

Space Administration (NASA) to send crewed missions to an asteroid by 2025 and to Mars by the mid-2030s. The president pledged to increase NASA's budget by \$6 bil over the next 5 years, with much of the new funding allocated for development of a heavy-lift rocket for deep-space missions. With NASA's space shuttle program expected to end in 2011, Obama said the U.S. would encourage private companies to develop vehicles to ferry crews and supplies to the International Space Station. He defended his decision to terminate a Bush administration program to return astronauts to the Moon by 2020. In another departure from the policies of the preceding administration, the White House declared June 28 that the U.S. would "consider proposals and concepts for arms control measures" that would limit the development and deployment of space weapons.

Arizona Enacts Tough Immigration Law—The Arizona state legislature passed Apr. 19 and Gov. Jan Brewer (R) signed Apr. 23 the Support Our Law Enforcement and Safe Neighborhoods Act, a measure requiring local governments and police to crack down on illegal immigration. The law made it a state crime to be in the U.S. illegally; authorized police to arrest without warrant anyone whom they reasonably suspect of being an illegal immigrant; required police to verify with federal authorities the immigration status of persons whom they arrest; and empowered Arizona residents to sue local officials or agencies suspected of failing to enforce federal immigration laws to the fullest extent. Answering critics who complained that the measures would encourage racial profiling against Hispanics, Brewer Apr. 30 signed House Bill 2162 modifying the conditions under which police were permitted to detain and question suspects whose immigrant status was in doubt.

Controversy over the state's tough immigration stance reflected the sensitivity of the issue in Arizona, which borders Mexico, has a large Hispanic population, and was estimated by the federal Dept. of Homeland Security to harbor 460,000 illegal immigrants as of Jan. 2009. Pres. Obama on Apr. 23 called the Arizona law "misguided" and said it would "undermine basic notions of fairness that we cherish as Americans." Three days later, Mexican Pres. Felipe Calderón said the law opened the door to "intolerance, hate, discrimination, and abuse in law enforcement." Claiming that the state had improperly preempted federal authority in immigration matters, the Justice Dept. filed suit July 6 to prevent the legislation from taking effect as scheduled on July 29. Other opposition groups, representing law-enforcement officers, municipalities, clergy, nonprofit organizations, civil rights and immigrants' rights activists, launched their own suits and called for an economic boycott of the state.

Growth Indicators Push Dow Above 11,000—In its *World Economic Outlook* issued Apr. 21, the International Monetary Fund (IMF) concluded that the global recovery from recession was "proceeding better than expected" and forecast U.S. economic growth of 3.1% for 2010. Echoing the IMF analysis, the Federal Reserve reported Apr. 28 that U.S. economic activity "has continued to strengthen and . . . the labor market is beginning to improve." Data released Apr. 30 by the U.S. Commerce Dept. showed that the U.S. economy had expanded by 3.2% during the first quarter of 2010, with consumer spending increasing at an annual rate of 3.6%. The positive news helped push the Dow Jones Industrial average above 11,000 for the first time since Sept. 2008. The Dow closed Apr. 30 at 11,008.61, for a one-month gain of 1.4%. The Nasdaq Composite Index finished at 2,461.19 (a one-month increase of 2.6%), and the S&P 500 closed at 1,186.69 (up 1.5%).

International

Political, Ethnic Clashes Accompany Kyrgyzstan Coup—Opposition parties ousted Kyrgyzstan Pres. Kurmanbek Bakiyev Apr. 7 after clashes between protesters and government security forces in the Central Asian nation left at least 85 people dead. Bakiyev had come to power in 2005 at the head of the pro-democracy "tulip revolution," but his regime had grown increasingly autocratic, and Kyrgyzstan's ailing economy had fueled popular discontent. Angered by rising utility prices, protesters Apr. 6 seized government buildings in the western city of Talas. Bakiyev retaliated by having opposition leaders arrested, but police using rubber bullets, tear gas, and live ammunition were unable to suppress mass protests in the capital city of Bishkek the following day.

In the ensuing chaos, the opposition leaders were freed, and Bakiyev was forced to flee to southern Kyrgyzstan, from where he subsequently received safe passage to Kazakhstan and asylum in Belarus. The violence led the U.S. temporarily to cut back operations at the Manas air base in northern Kyrgyzstan, an important transit center for the movement of U.S. and NATO forces to and from Afghanistan.

Following Bakiyev's ouster, an interim government led by former Foreign Min. Roza Otunbayeva was unable to consolidate control over the south and accused Bakiyev of inciting unrest there. Clashes in mid-June between majority Kyrgyz and minority Uzbeks in the southern cities of Osh and Jalalabad claimed up to 2,000 lives and led at least 75,000 ethnic Uzbeks to seek temporary safety in neighboring Uzbekistan. Despite the violence, the Otunbayeva government pressed forward with a June 27 referendum on a new constitution, which received overwhelming approval. Otunbayeva was sworn in July 3 as transitional president, with national elections scheduled for Oct. 2011.

Russia, U.S. Sign Nuclear Arms Reduction Pact—Meeting Apr. 8 in Prague, capital of the Czech Republic, Pres. Obama and Russian Pres. Dmitri Medvedev signed an arms control accord known as the New Strategic Arms Reduction Treaty (New START). Under the agreement—a successor to START I, which expired Dec. 5, 2009, and to the Strategic Offensive Reductions Treaty (SORT) of 2002, which was still in force—the U.S. and Russia each pledged to reduce their deployed nuclear warheads to 1,550 over a 7-year period, down from the 2,200 agreed to under SORT. Each side also agreed to cut to 700 the number of deployed delivery vehicles, including intercontinental ballistic missiles, submarine-launched ballistic missiles, and heavy bombers. Before it could take effect, New START would need to be ratified by the Duma (the lower house of the Russian parliament) and the U.S. Senate, which received the treaty May 13. That same day, to assuage concerns that the agreement might weaken U.S. defenses, Obama outlined a program under which the U.S. would spend \$180 bil over a 10-year period to modernize its existing nuclear arsenal and develop new bombers and missiles.

In another arms-related initiative, the Obama administration issued a revamped nuclear strategy Apr. 6, strengthening U.S. efforts against nuclear terrorism and global nuclear proliferation. Under the revised strategy, the U.S. promised not to use (or threaten to use) nuclear weapons against nonnuclear nations that complied with the Nuclear Non-Proliferation Treaty, even if they used biological or chemical weapons against the U.S. The strategy would continue to allow the U.S. to use nuclear weapons against Iran or North Korea, which Pres. Obama called "outliers." On Apr. 12-13 in Washington, DC, Obama hosted an international summit conference on nuclear security, at which participants made a nonbinding pledge to secure all vulnerable nuclear materials within 4 years.

Plane Crash Kills Polish President—Pres. Lech Kaczyński, his wife Maria, and 94 other passengers and crew died Apr. 10 when their plane crashed while attempting to land at a fog-bound military airport near Smolensk, in W Russia. Among many senior officials killed in the crash were Sławomir Skrzypek, the president of Poland's national bank; Aleksander Szczygło, head of the National Security Bureau; the chiefs of the army, navy, and air force; and more than a dozen members of parliament. The top-level delegation had departed from Warsaw to participate in ceremonies marking the 70th anniversary of the Katyn massacre, in which some 22,000 Polish prisoners were slaughtered in Apr. 1940 on orders from Soviet dictator Joseph Stalin. Russian Pres. Dmitri Medvedev traveled to Kraków to attend the Apr. 18 funeral for Kaczyński and his wife, but several Western leaders—including U.S. Pres. Barack Obama—canceled plans to journey to Kraków because ash from an Iceland volcano had made European flying conditions unsafe.

Under Poland's constitution, the position of acting president was filled by Parliament Speaker Bronisław Komorowski, a member of the Civic Platform party and an ally of Prime Min. Donald Tusk. In the first round of presidential elections June 20, Komorowski led former Prime Min. Jarosław Kaczyński, the twin brother of the late president, by a margin of 42% to 37%. The moderate Komorowski beat his right-wing nationalist opponent 53% to 47% in a July 4 runoff vote.

Iceland Volcano Eruption Cripples European Air Traffic—A major eruption Apr. 14 of the Eyjafjallajökull volcano, located about 75 mi west of Iceland's capital city of Reykjavík, spewed vast quantities of ash into the atmosphere above much of Europe, disrupting air traffic for nearly a week. The thick ash cloud drastically reduced visibility, and because aviation officials feared that silicate particles in the ash might cause jet engines to fail, airports throughout N and W Europe were shut down and many westbound transatlantic flights were canceled. According to the International Air Transport Association (IATA), an industry trade group, closures and cancellations Apr. 15-20 affected about 10 mil passengers and 100,000 flights. The IATA estimated that airline companies lost \$1.8 bil during this period and other sporadic Eyjafjallajökull eruptions.

Earthquake Hits Northwest China—An earthquake Apr. 14 killed at least 2,200 people in Yushu County, Qinghai Province, in NW China. Chinese authorities measured the quake at 7.1 on the open-ended Richter scale, while the U.S. Geological Survey recorded a magnitude of 6.9. More than 100,000 people were left homeless by the quake, which had its epicenter in the town of Gyegu, where ethnic Tibetans predominate.

Bashir Retains Power in Sudan Election—Sudan's National Electoral Commission announced Apr. 26 that incumbent Pres. Omar Hassan Ahmad al-Bashir had won reelection Apr. 11-15 with 68% of the vote. The runner-up, with 22%, was Yassir Arman, candidate of southern Sudan's leading party, the Sudan People's Liberation Movement (SPLM). The SPLM had withdrawn Arman's candidacy Mar. 31, accusing Bashir of rigging the vote, but his name had remained on the ballot. Western governments regarded Bashir as a war criminal, and in Mar. 2009 the International Criminal Court (ICC) in The Hague, Netherlands, had issued a warrant for his arrest, holding him responsible for crimes against humanity in the Darfur region of western Sudan. Observers from the African Union and the Arab League—which have refused to cooperate with ICC extradition requests—declared the 2010 vote free and fair, but a report by the U.S.-based Carter Center, headed by former Pres. Jimmy Carter, described the voting as “highly chaotic, non-transparent, and vulnerable to electoral manipulation.” On July 12, 2010, the ICC issued another warrant for Bashir's arrest on genocide charges, marking the first time the ICC had ever formally accused a sitting head of state of genocide. In voting for president of the semi-autonomous region of southern Sudan, SPLM leader Salva Kiir Mayardit was reelected with 93% of the vote; under a 2005 peace agreement between the government and SPLM rebels that ended a civil war between north and south, Kiir also serves as first vice-president in Sudan's national government. A referendum on independence for south Sudan (which holds most of the country's oil resources) is scheduled for Jan. 2011.

Top Insurgent Leaders Killed in Iraq; Other War News—U.S. and Iraqi officials reported Apr. 19 that a joint operation in Tikrit the previous day had killed two powerful jihadists: the Egyptian-born Abu Ayyub al-Masri, the leader of the insurgent group al-Qaeda in Iraq, and Abu Omar al-Baghdadi, who headed the Islamic State of Iraq, an umbrella group that includes al-Qaeda in Iraq. Other insurgents were also killed or arrested, and the operation reportedly resulted in the seizure of computers and documents showing contacts between al-Qaeda in Iraq and Osama bin Laden, leader of the international al-Qaeda terror network.

In other Iraq war developments, a wave of insurgent attacks Apr. 3-6 in and around Baghdad, including several suicide bombings at foreign diplomatic missions, left at least 90 people dead and hundreds injured. Another series of bomb blasts in Baghdad Apr. 23 killed at least 58 people. U.S. military fatalities in Iraq numbered 8 during the month.

In Afghanistan, 20 U.S. service members and 14 other coalition troops lost their lives during the month in Operation Enduring Freedom. Afghanistan's Interior Ministry reported May 2 that 173 civilians had been killed and 380 injured between Mar. 21 and Apr. 21; the death toll was 33% higher than the same period a year earlier. Most of the casualties were attributed to suicide bombings and improvised explosive devices, or roadside bombs.

General

Duke Wins Men's College Basketball Crown; UConn Repeats as Women's Champion—Duke beat Butler, 61-59, in a thrilling title game Apr. 5 that earned Blue Devils' coach Mike Krzyzewski his 4th NCAA men's basketball championship in 20 years. Butler's loss disappointed a hometown crowd at Lucas Oil Stadium in Indianapolis, IN, and ended the Bulldogs' 25-game winning streak, which included NCAA tournament upsets over Syracuse, Kansas State, and Michigan State. In the women's bracket Apr. 6, the Univ. of Connecticut, coached by Geno Auriemma, came from behind to defeat Stanford, 53-47, at the Alamodome in San Antonio, TX. Star forward Maya Moore led UConn with 23 points, as the Huskies won their 78th straight game and completed their second consecutive undefeated season.

Mickelson Wins Masters Golf Tournament—Shooting a sizzling final-round 67, Phil Mickelson captured his third Masters championship Apr. 11 at Augusta (GA) National Golf Club. Mickelson, a previous winner in 2004 and 2006, finished with a 16-under-par total of 272, beating England's Lee Westwood by 3 strokes. Returning to competition after a sex scandal sidelined his career, Tiger Woods, a four-time Masters winner, finished in a tie for 4th, 5 strokes behind Mickelson.

May 2010 National

Attempted Car Bombing Targets New York's Times Square—Tipped off by street vendors about smoke coming from a Nissan Pathfinder SUV, New York City police evacuated crowds of tourists and theatergoers in Times Square on a busy Saturday evening, May 1, before dismantling a crude car bomb. The vehicle, which had been rigged with explosive materials and a triggering device, was traced to Faisal Shahzad, a 30-year-old Pakistani-American. Shahzad, a naturalized U.S. citizen, was arrested May 3 after he had boarded a jet that was scheduled to fly to Dubai, United Arab Emirates.

Questioned by police, Shahzad said he had received bomb training in Pakistan and about \$15,000 by the Pakistani Taliban to carry out the attack. He drew inspiration from Anwar al-Awlaki, a radical Yemeni-American cleric who has been linked to several other attacks against the U.S. (According to reports Apr. 6-7 in the *New York Times* and *Washington Post*, the Obama administration had specifically approved targeted efforts to assassinate Awlaki.) Indicted June 17 on 10 felony counts of terrorism and related crimes, Shahzad pleaded guilty to all charges in a Manhattan federal courtroom 4 days later; he was sentenced to life in prison Oct. 5.

Record Rains Flood Nashville—Storms and floods from a violent weather system in early May killed at least 21 people in Tennessee, 6 in Mississippi, and 4 in Kentucky. The Middle Tennessee region was especially hard hit, with Nashville receiving record rainfall of 13.57 in. during May 1-2; the Cumberland River, which flows through downtown Nashville, crested May 3 at 11.9 ft above flood stage. Flooding in the city damaged more than 11,000 structures, including such musical landmarks as the Grand Ole Opry House and the Country Music Hall of Fame and Museum. Property damage to the city was estimated in mid-May at more than \$1.9 bil.

Kagan Nominated to Supreme Court—Pres. Barack Obama on May 10 nominated Elena Kagan to replace retiring John Paul Stevens as associate justice of the U.S. Supreme Court. Kagan, who had an extensive academic and policy résumé but no prior judicial experience, had been serving in the Justice Dept. since Mar. 2009 as U.S. solicitor general, overseeing federal litigation before the nation's highest court.

Born in New York City in 1960, Kagan grew up on Manhattan's Upper West Side. After completing her studies at Princeton Univ. (AB, 1981), Worcester Coll., Oxford Univ. (MPhil, 1983), and Harvard Law School (JD, 1986), she clerked for Supreme Court Justice Thurgood Marshall (1987-88); held a professorship (1991-97) at the Univ. of Chicago Law School, where Obama was one of her faculty colleagues; and worked in the Clinton White House as associate counsel (1995-96) and domestic policy adviser (1997-99). She

resumed her teaching career at Harvard in 1999 and became the first female dean of the law school in 2003. The following year, because the U.S. military's "Don't Ask, Don't Tell" policy prevented homosexuals from serving openly in the U.S. armed forces, she acted to limit military recruiting on the law school campus.

Insurgents Upset Establishment Candidates in Party Primaries—In a closely watched Democratic primary election in Pennsylvania May 18, Rep. Joe Sestak defeated 5-term Sen. Arlen Specter, a longtime Republican who had switched parties in 2009 and had the support of Pres. Obama and the state Democratic establishment. That same night, Rand Paul, an ophthalmologist and political novice, swamped Kentucky Sec. of State Trey Grayson in a Republican primary for the U.S. Senate seat being vacated by retiring Sen. Jim Bunning (R, KY). Paul, the son of Rep. Ron Paul (R, TX), had embraced the Tea Party protest movement, while Grayson had the endorsement of Senate leader Mitch McConnell (R, KY). In a Democratic primary in Arkansas, Lt. Gov. Bill Halter, an insurgent backed by organized labor and liberal groups, held 2-term incumbent Sen. Blanche Lincoln below 50% in the first round of balloting, but she outpolled Halter in a June 8 runoff.

Indiana Congressman Confesses Affair, Quits House—Rep. Mark Souder (R, IN), an 8-term congressman who had recently survived a tough primary challenge, disclosed May 18 that he would resign from the House within 3 days. Souder, married since 1974, admitted that he had carried on a long-term affair with a married female staffer.

Stocks Have Worst May in 60 Years—Worries about European debt problems and the uncertain pace of the U.S. economic recovery sent the Dow Jones Industrial Average plummeting 7.9% for the month, the worst May stock performance since 1940. The Dow closed May 28 at 10,136.63, the S&P 500 finished the month at 1,089.41 (down 8.2%), and the Nasdaq Composite Index ended at 2,257.04 (a drop of 8.3%). Investors endured a harrowing afternoon May 6 when a computerized selloff order by a Kansas-based investment firm propelled the markets into a precipitous "flash crash," with a 5-minute drop of about 1,000 points followed by a 20-minute gain of about 500.

International

Greece Gets \$146 Bil Bailout from Eurozone Countries, IMF—The European common currency, or euro, weathered its worst crisis in more than a decade when the International Monetary Fund (IMF) and the 16 European countries that comprise the eurozone agreed May 2 on a 110 bil euro (\$146 bil) loan package to prevent Greece from defaulting on its debts. Eurozone member nations promised to lend Greece 80 bil euros over a 3-year period, and the IMF agreed to provide the remaining 30 bil euros. In return, Greek leaders pledged to implement an austerity program that would slash the annual budget deficit from 13.6% of the country's gross domestic product in 2009 to 8.1% of GDP in 2010 and to less than 3% by the end of 2014; large labor unions vehemently opposed the plan, which gained approval from the Greek parliament May 6. Four days later, European finance ministers reached agreement on a 750 bil euro (\$955 bil) emergency stabilization program that would provide funds from EU member countries and the IMF to prevent the crisis from spreading to other countries with debt problems, notably Spain and Portugal.

Nigerian Pres. Yar'Adua Dies; Goodluck Jonathan Sworn In—After prolonged illness, Nigerian Pres. Umaru Yar'Adua died May 5 in Abuja, the capital of Africa's most populous country. Vice-Pres. Goodluck Jonathan, a southern Christian who had served as acting president while Yar'Adua, a northern Muslim, was treated for heart and kidney problems, was sworn in as head of state May 6. Jonathan's succession to the presidency ended a period of instability that had been marked by political infighting and ethnic violence, including clashes Mar. 7 in which hundreds of people, mainly Christians, were killed in villages near the central Nigerian city of Jos.

Cameron Becomes Prime Minister After British Elections—In parliamentary elections May 6, British voters rejected the Labour Party, which had governed the UK for

the previous 13 years. Final results tabulated May 27 (after a delayed election in one constituency) showed that the Conservatives, led by David Cameron, had won 307 of 650 seats in the House of Commons, for a net gain of 97 seats; Labour, under Prime Min. Gordon Brown, had taken 258 seats, for a net loss of 91; and the Liberal Democrats, led by Nick Clegg, had finished third with 57 seats, for a net loss of 5.

With Parliament "hung"—that is, with no party holding a majority—the Conservatives and Liberal Democrats agreed to form Britain's first coalition government since World War II. Brown resigned on May 11, as the 43-year-old Cameron became the nation's youngest prime minister in almost 200 years. Clegg, also 43, entered the government as deputy prime minister, having secured a Tory pledge to allow a parliamentary vote and popular referendum on changes to Britain's political system. Electoral reform was a key issue for Liberal Democrats, who had won a 23% share of the popular vote but only 9% of the seats in the House of Commons, while both the Conservative and Labour parties had parliamentary representation that far exceeded their vote shares.

Conservatives and Liberal Democrats agreed on the need to deal with public sector deficits, which had grown under Labour and surged during the recent recession. The Cameron-Clegg government June 22 introduced an emergency budget calling for tax increases, spending cuts of 25% over a 4-year period for most government departments, and a 2-year wage freeze for all but the lowest-paid public employees.

Aquino Wins Presidency in Philippines—Campaigning on his famous family name and a vow to clean up corruption, Benigno (NoyNoy) Aquino III defeated former Pres. Joseph Estrada to win a presidential election May 10 in the Philippines. Aquino is the son of former Pres. Corazon Aquino, who died in 2009, and pro-democracy leader Benigno Aquino Jr., who was assassinated in 1983. According to the final tally issued June 8, he won 42% of the vote, followed by Estrada with 26%. Aquino was sworn in June 30 as the Philippines' 15th president.

Wave of School Killings Hits China—In the village of Lincheng, SW Shaanxi Province, in central China, a middle-aged landlord wielding a meat cleaver entered Shengshui Temple Kindergarten May 12 and slaughtered 7 children, a teacher, and the teacher's mother before killing himself. The attacker, Wu Huanming, reportedly had quarreled with the teacher over whether the kindergarten could continue to occupy his property after the school's lease ran out in Apr. The crime was the latest of 5 school attacks, all involving middle-aged men, that had left at least 17 people dead and nearly 100 others wounded since late Mar., prompting schools throughout China to beef up security.

Violent Clashes Shake Thailand; Emergency Rule Enforced—A crackdown May 14-19 by Thai security forces in Bangkok against "Red Shirt" protesters loyal to former Prime Min. Thaksin Shinawatra left at least 54 people dead and some 470 injured. The crisis began Feb. 26 when Thailand's Supreme Court ordered the seizure of about \$1.4 bil of Thaksin's family fortune, ruling that Thaksin, who was ousted by a military coup in 2006, had abused his powers as prime minister to enrich his telecommunications business. The Red Shirts staged mass rallies in Bangkok, and on Apr. 7 a group of Red Shirt demonstrators stormed the parliament building, leading the government to impose emergency rule in the capital.

After the Red Shirts began to build a fortified compound spreading outward from Rajaprasong, an intersection in the heart of Bangkok's business district, Prime Min. Abhisit Vejjajiva on May 3 made a nationally televised address in which he proposed early elections and other steps toward national reconciliation, but Red Shirt hard-liners balked at the deal. On May 13, Maj. Gen. Khatiya Sawasdipol, a renegade officer popularly known as Seh Daeng ("Commander Red"), was fatally shot while giving an interview to a Western reporter. The government declared a state of emergency in 15 provinces on May 13, and the following day launched a 6-day assault that resulted in the takeover of Rajaprasong. Thailand's parliament June 2 rejected an opposition-sponsored vote of no-confidence against Prime Min. Abhisit. Legislators July 6 passed a 3-month extension of emergency rule, which by then included Bangkok and 18 of the nation's 76 provinces.

U.S. Deaths in Afghanistan Pass 1,000 Mark; Other War News—The cumulative U.S. death toll in Afghanistan passed 1,000 in May. Coalition fatalities in Operation Enduring Freedom numbered 51 during the month, of whom 34 were U.S. service members. In neighboring Pakistan, Taliban insurgents staged coordinated attacks May 28 at two mosques in Lahore, killing 93 members of the minority Ahmadi sect and injuring more than 100 others. A statement posted on the Internet by al-Qaeda May 31 acknowledged the death of Mustafa Abu al-Yazid, a senior member of the international terror network. Pakistani intelligence officials said Yazid (also known as Saeed al-Masri) had been killed more than a week earlier by a U.S. missile strike in the North Waziristan region.

U.S. military activities in Iraq continued to wind down, with only 6 service members killed. On May 27, Vice-Pres. Joe Biden said that scheduled withdrawals would cut the U.S. troop presence in Iraq to 50,000 by summer, when the number of U.S. troops in Afghanistan would approach 100,000.

Israeli Commandos Attack Gaza Aid Flotilla—Enforcing a blockade imposed by Israel after Hamas militants took control of the Gaza Strip in 2007, Israeli commandos on May 31 intercepted a flotilla of 6 vessels carrying about 10,000 tons of humanitarian aid and some 700 pro-Palestinian activists from more than 30 countries. Israeli forces boarded 5 of the vessels in international waters without bloodshed, but on one boat—the *Mavi Marmara*, a former passenger ferry owned by the Turkish-based Foundation for Human Rights and Freedoms and Humanitarian Relief (IHH)—the commandos met resistance, and the Israelis killed 9 activists, including 8 Turks and 1 Turkish-American. The vessels and their passengers were taken to the Israeli port of Ashdod; all the detained passengers were deported by June 3, and the UN agreed in mid-June to deliver the confiscated cargo to Gaza. International reaction to the raid was negative, especially in Turkey, a longtime Israeli ally whose Islamic government had supported the aid flotilla. Israel intercepted another aid vessel, the *Rachel Corrie*, on June 5, but eased some restrictions on the flow of goods to Gaza 2 weeks later.

General

Super Saver Wins Kentucky Derby; Lookin at Lucky Takes Preakness Stakes—On a sloppy track May 1 at Churchill Downs in Louisville, KY, jockey Calvin Borel won his 3rd Kentucky Derby in 4 years, riding Super Saver to a 2 1/2-length victory. Lookin at Lucky, the Derby favorite who finished a disappointing 6th in that race, came back May 15 to capture the Preakness Stakes at Pimlico in Baltimore, MD. The Preakness win was the first Triple Crown victory for the 25-year-old Mexican-born jockey Martin Garcia.

Ochoa Retires from Women's Pro Golf Tour—After 158 consecutive weeks as the world's top-ranked female pro golfer, Lorena Ochoa retired from the Ladies Professional Golf Association (LPGA) tour May 2, finishing 6th at the Tres Marias Championship at Tres Marias Golf Club in Morelia, Mexico. The Mexican-born Ochoa, a regular on the tour since 2003, had amassed 27 LPGA tournament victories and career winnings of nearly \$15 mil. Ochoa, 28, had announced her planned retirement Apr. 23.

Braden, Halladay Hurl Perfect Games—Oakland Athletics left-hander Dallas Braden pitched the 19th perfect game in major-league baseball history May 9, leading the A's to a 4-0 victory over the visiting Tampa Bay Rays. The 20th perfect game came on May 29, as Philadelphia Phillies ace Roy Halladay blanked the Florida Marlins 1-0 at Sun Life Stadium in Miami Gardens, FL. Only 4 days later, in Detroit, MI, the Tigers' Armando Galarraga retired the first 26 Cleveland Indians he faced, but had to settle for a 3-0 complete-game shutout when a blown call by first-base umpire Jim Joyce allowed the 27th batter, Jason Donald, to reach base safely. Joyce graciously apologized to Galarraga, saying "I just cost that kid a perfect game."

Artworks Stolen from Paris Museum—Paintings by Picasso, Matisse, Braque, Léger, and Modigliani were reported missing on the morning of May 20 from the permanent collection of the Museum of Modern Art in Paris. The stolen works were valued at about \$124 mil by museum authorities. Surveillance cameras had spotted a black-clad, hooded intruder breaking into the museum overnight, but no alarm had

sounded, and night guards said they had no inkling of the theft until they noticed a broken window that morning. A "technical malfunction" in the museum's alarm system had been reported 7 weeks earlier but had not been properly repaired.

First "Synthetic Cell" Created—A team of researchers led by genomics pioneer and entrepreneur J. Craig Venter announced May 20 that it had created a "synthetic cell" capable of replicating itself. Scientists began by producing a computerized map of genetic instructions for the simple bacterium *Mycoplasma mycoides*. They then reprogrammed the genetic sequence (in part by inserting distinctive "watermark" patterns that included the researchers' names), partitioned the code into some 1,100 sections, turned each piece of code into a chemically synthesized DNA fragment, assembled the chemical fragments into a complete genome, and then transplanted the synthesized genome into specially prepared recipient cells. Venter's firm Synthetic Genomics has signed a \$600 mil contract with Exxon Mobil to make biofuels from algae. Researchers also hope to develop new sources of edible oils, flu vaccines, chemicals, plastics, and other commercial products.

DeWyze Tops "American Idol"—Lee DeWyze, a former paint store employee turned pop singer, outpolled Crystal Bowersox May 26 to win the 9th season of TV's *American Idol*. The season marked the final year as talent judge for Simon Cowell, the British music industry executive whose caustic comments and prickly personality had been an ingredient in the show's success since its 2002 debut. In late July, TV talk-show host Ellen DeGeneres revealed on her website that, after only one season, she too had decided to leave the show.

Franchitti Captures Indianapolis 500—Dario Franchitti won his second career Indianapolis 500 auto race May 30 at Indianapolis Motor Speedway. The Scottish driver (also an Indy 500 winner in 2007) led for 155 of the first 199 laps; he then held on for the final lap, as a crash between two other cars produced a caution flag that enabled him to ease across the finish line with only 1.6 gal of fuel left. Franchitti's victory allowed Chip Ganassi Racing to become the first car owner ever to win the Indy 500 and Daytona 500 in the same year. On Feb. 14, Jamie McMurray had been behind the wheel of a Ganassi-owned Chevrolet when he won NASCAR's premier stock-car race at Daytona Beach, FL.

June 2010 National

Tea Party Candidates Gain in Republican Primaries—Sharron Angle and Nikki Haley, favorites of the conservative Tea Party protest movement, defeated their establishment rivals in Republican primaries. In Nevada on June 8, Angle outpolled better-financed opponents to win the right to face Senate Majority Leader Harry Reid (D) in the Nov. 2 general election. In South Carolina, Haley, the daughter of Sikh immigrants, benefited from endorsements by former South Carolina first lady Jenny Sanford (R) and former Alaska Gov. Sarah Palin (R), as she overcame allegations of sexual impropriety to lead the first round of primary voting June 8 and dominate a runoff election two weeks later. Establishment candidates fared better in the GOP primary June 8 in California, where former Hewlett-Packard chief executive Carly Fiorina won the party's designation to face 3-term incumbent Sen. Barbara Boxer (D), and former eBay CEO Meg Whitman won the Republican nomination in the governor's race against Jerry Brown, a 2-term former governor who had served since 2007 as California's attorney general.

Supreme Court Affirms Gun Rights; Other Major Actions—In the final public session of its 2009-10 term, the U.S. Supreme Court June 28 held that the constitutional right to keep and bear arms is a fundamental liberty that may not be abrogated by state or local law. Extending the Court's ruling in *District of Columbia v. Heller* (2008), which applied only to federal laws and federal jurisdictions, a 5-4 majority in *McDonald v. Chicago* ordered lower courts to determine whether local ordinances banning the possession of handguns in Chicago and Oak Park, IL, violated the Constitution's 2nd Amendment. Wayne LaPierre, executive vice president of the National Rifle Association, hailed the decision as "a great moment in American history." But Associate Justice John Paul Stevens warned that the decision could

mire the federal courts in “an avalanche of litigation,” as gun-rights advocates sought to overturn local gun-control laws throughout the U.S. That same day, the U.S. Senate began confirmation hearings on Pres. Barack Obama’s nomination of Elena Kagan to replace the retiring Stevens.

Also on June 28, the Court unanimously upheld the constitutionality of the Sarbanes-Oxley Act (2002), which tightened auditing standards for publicly traded companies, although a 5-4 majority found fault with restrictions Congress had imposed on the executive branch’s authority to remove members of an accounting oversight board created by the law. In another 5-4 ruling on June 28, the Court held that a campus religious group that receives financial support from a public university may not discriminate against homosexuals or others who do not fully comply with its “statement of faith.”

Other important rulings had been announced earlier in the month. On June 1, a 5-4 majority in *Berghuis v. Thompkins* eased restrictions on police that had been imposed under the landmark *Miranda* case (1966), holding that police interrogations may lawfully proceed when suspects do not clearly and unambiguously claim their “Miranda rights” to remain silent and consult a lawyer. On June 17 the Court ruled 9-0 in *City of Ontario (CA) v. Quon* that supervisors had the right to examine text messages sent by public employees while on the job and using their employer’s paging system. In a test of the nation’s antiterrorism statutes, a 6-3 majority on June 21 upheld the constitutionality of a law making it a crime to provide “material support” to a foreign terrorist organization, even when such support was directed at a purpose (such as conflict resolution) that might otherwise be considered benign. The decision, which displeased civil liberties advocates, represented a victory for the Obama administration, whose case before the Court had been argued by Kagan as U.S. solicitor general.

Sen. Byrd Dies—Sen. Robert Byrd (D, WV), 92, the longest-serving senator in U.S. history, died June 28 at Inova Fairfax Hospital in Falls Church, VA. Byrd was elected to the U.S. House of Representatives in 1952, despite revelations that he had been an active member of the Ku Klux Klan a decade earlier; in 1958, after 6 years in the House, he won the first of 9 consecutive Senate terms, setting records both for Senate tenure (more than 51 years) and for combined House and Senate service. A formidable legislative tactician, an expert on Senate lore, and a fierce defender of congressional prerogatives, he served as majority leader (1977-81, 1987-89) and minority leader (1981-87). As head of the Appropriations Committee (1989-2009), he used his position to pump billions of dollars in federal contracts to his home state, earning him the nickname the “prince of pork.” A conservative for much of his congressional career, he became a hero to liberals in the early 2000s when he forcefully opposed the war in Iraq. On July 16, West Virginia Gov. Joe Manchin III (D) appointed his former general counsel Carte Goodwin (D) to fill Byrd’s Senate seat; 4 days later, Manchin said he would run for the seat in the special election scheduled for Nov. 2.

Weak Employment Fuels Doubts About Recovery—Reversing a 3-month upswing, the Conference Board reported June 29 that its Consumer Confidence Index, based on a survey of 5,000 U.S. households, had plunged from 62.7 in May to 52.9 in June. Labor Dept. data released June 4 showed that U.S. payrolls had increased by 431,000 in May, but that total was less than many economists had predicted. Employment figures for June, issued on July 2, showed a net loss of 125,000 jobs as weak hiring in the private sector failed to offset terminations of temporary government jobs related to the 2010 Census; the overall unemployment rate in June was 9.5%.

Weighing heavily on Wall Street were international and domestic uncertainties, including European governments’ mounting debt problems and the continuing impact of the *Deepwater Horizon* disaster, which since Apr. had gushed millions of gallons of oil into the Gulf of Mexico. On June 16, after a meeting at the White House, BP executives agreed to set aside \$20 bil to compensate victims of the oil spill, with the cost being offset by a suspension of dividends to BP shareholders. By June 25, shares of BP stock fell to a 14-year low, with the loss in share value exceeding \$100 bil. On July 5, BP announced that the firm had already paid more than

\$3 bil to cover cleanup costs and other claims, in addition to the \$20 bil compensation fund. The Dow Jones Industrial Average closed June 30 at 9,774.02, a drop of 10% during the 2nd quarter of 2010. The S&P 500 ended the quarter at 1,030.71, down 11.9%, and the Nasdaq Composite Index finished at 2,109.24, for a quarterly decline of 12%.

International

Kan Replaces Hatoyama as Prime Minister of Japan—

After polls showed his public support had fallen below 20%, Yukio Hatoyama announced his resignation June 2, becoming the 4th Japanese prime minister in under 4 years to step down after serving a year or less in office. Hatoyama, who had swept into power when the Democratic Party of Japan (DPJ) won parliamentary elections in Aug. 2009, failed to fulfill campaign pledges to reform the nation’s political system, revitalize the economy, and remove U.S. Marine Corps Air Station Futenma from Okinawa; instead, while visiting the island May 23 he said he had reluctantly accepted a U.S. plan to relocate the airbase within the Okinawa region, a decision that infuriated local leaders. On June 4 former Finance Min. Naoto Kan was elected to succeed Hatoyama as DPJ leader and head of government; he took office 4 days later. The DPJ fared poorly in midterm elections July 11 for the upper house of Japan’s parliament, winning only 44 of the 121 contested seats. It retained a commanding majority in the lower house, which determines Japan’s party in power.

Drug Violence Intensifies in Mexico—Gun battles and massacres claimed hundreds of lives in Mexico June 10-15, as drug-related violence continued to escalate. The mass killings included the slaughter June 10 of 19 people by some two dozen gunmen at a drug and alcohol rehabilitation center in the city of Chihuahua; the ambush and murder June 14 of at least 12 federal police officers in the western state of Michoacán; and a gang fight June 14 in a Mazatlán jail that left at least 28 inmates dead. In an article published June 14, Mexican Pres. Felipe Calderón blamed Mexico’s drug crime problems on U.S. demand for drugs: “It is as if our neighbor were the biggest drug addict in the world.” From Dec. 2006 (when Calderón launched a military crackdown on Mexico’s powerful drug cartels) to Aug. 2010, more than 28,000 people died in drug-related violence.

Concerned about the spread of drug crime from Mexico into the U.S., the Obama administration said May 25 that it would deploy 1,200 National Guard troops and request an additional \$500 mil to beef up border security. U.S. government officials revealed June 10 that over a 22-month period U.S. law enforcement agents in 19 states had arrested more than 2,200 people suspected of having ties to Mexican drug cartels.

Santos Wins Colombian Presidency—Former Defense Min. Juan Manuel Santos, nominee of the ruling Social Party of National Unity (also known as the U Party), defeated Green Party candidate Antanas Mockus, the former mayor of Bogotá, 69% to 28% in a presidential runoff election June 20. The conservative Santos, a close ally of incumbent Pres. Álvaro Uribe Vélez and a supporter of Uribe’s crackdown on Marxist rebels, had led Mockus 47% to 22% in the first round of presidential balloting May 30. Santos took office Aug. 7, pledging to create jobs, boost foreign investment, and repair relations with leftist governments in neighboring Venezuela and Ecuador.

Alleged Drug Kingpin Arrested in Jamaica—Accused by the U.S. of drug and firearms trafficking, Christopher Coke, the alleged leader of Jamaica’s Shower Posse gang, surrendered peacefully to Jamaican authorities in Kingston June 22. Coke was closely allied with the ruling Jamaica Labour Party, and U.S. demands for his extradition had initially been rebuffed by Prime Min. Bruce Golding, whose Kingston constituency included the Shower Posse’s home base in Tivoli Gardens. Pressured by the U.S. and by his parliamentary critics, Golding reversed himself in mid-May and called for Coke’s arrest. Government security forces stormed Tivoli Gardens later that month, triggering violent clashes with gang members that left 76 people dead. After eluding police for five weeks, Coke—also known as Dudus—agreed to give himself up, waived an extradition trial, was flown to the U.S., and on June 25 entered a plea of not guilty in federal court in New York City.

McChrystal Forced Out as U.S. Commander in Afghanistan—Pres. Obama June 23 named Gen. David Petraeus as commander of U.S. and allied troops in Afghanistan, replacing Gen. Stanley McChrystal, who was forced to resign shortly after the publication by *Rolling Stone* magazine of disparaging comments about the Obama administration by McChrystal and his staff. The article, written by Michael Hastings, quoted an unnamed aide to McChrystal describing an early meeting on war strategy between the president and the general as “a 10-minute photo op.” “Obama clearly didn’t know anything about him, who he was ... He didn’t seem very engaged. The Boss was pretty disappointed.” Hastings also quoted McChrystal’s aides as calling National Security Advisor James L. Jones a “clown” and jokingly pronouncing Vice Pres. Biden’s name as “Bite Me.”

Gen. Petraeus—the architect of the 2007 surge strategy in Iraq—won unanimous Senate confirmation for the Afghan mission June 30 and formally took command in Kabul July 4. McChrystal retired from the military July 23. U.S. Marine Corps Gen. James Mattis, Obama’s choice to replace Petraeus as head of the U.S. Central Command (which oversees all U.S. military operations in the Middle East and Central Asia), was unanimously approved by the Senate Aug. 6.

In battlefield developments, 60 U.S. troops were killed in Afghanistan in June; fatalities for the U.S. and its coalition partners totaled a record high 103, double the number in May. Eight American service members were killed in Iraq in June, as U.S. troop strength there dropped from 92,000 in May to 85,000 in June and 65,000 in July.

Canada Hosts G-8, G-20 Summits—Leaders of the world’s major economies gathered June 25-27 in Ontario, Canada, for back-to-back conferences of the Group of 8 (G-8) and Group of 20 (G-20). Meeting in the town of Huntsville, about 135 mi north of Toronto, conferees of the G-8 (comprising Canada, France, Germany, Italy, Japan, Russia, UK, and the U.S.) agreed to spend \$5 bil over a 5-year period to improve maternal and child health in poor countries. The conference venue shifted to Toronto June 26 for the summit of the G-20 (which includes the G-8 plus other major economic powers such as Brazil, China, and India). The concluding agreement—a nonbinding pledge by G-20 member countries to halve their government budget deficits by 2013—represented an effort to bridge the gap between those leaders, chiefly in Europe and Canada, who saw an immediate need to slash government debt, and others, led by Pres. Obama, who believed that drastic budget cutting would threaten the world’s recovery from recession. Hundreds of protesters were arrested at the G-8 and G-20 meetings, which had aroused controversy within Canada because of security costs estimated at \$900 mil, or nearly 10 times what Pittsburgh, PA, spent on the 2009 G-20 summit.

General

Drosselmeyer Takes Belmont Stakes—The unheralded Drosselmeyer, a 13-1 long shot, captured the Belmont Stakes June 5 at Belmont Park in Elmont, NY. Winless in 12 previous Belmont Stakes races, jockey Mike Smith rode the 3-year-old chestnut colt to a 3/4-length victory over Fly Down in the third jewel of Thoroughbred racing’s Triple Crown.

Nadal, Schiavone Capture French Open Singles Titles—Returning to form after an injury-plagued 2009, Spanish clay-court master Rafael Nadal won his 5th French Open (Roland Garros) singles championship June 6, dominating Sweden’s Robin Soderling in straight sets, 6-4, 6-2, 6-4. The previous day, 17th-seeded Francesca Schiavone outfought Samantha Stosur of Australia, 6-4, 7-6 (2). Schiavone, 29, became the first Italian woman ever to win a Grand Slam singles event.

Chicago Blackhawks Win Stanley Cup—Patrick Kane’s overtime goal June 9 earned the Chicago Blackhawks their first National Hockey League championship since 1961. Playing on the Flyers’ home ice, Chicago beat Philadelphia, 4-3, in the 6th and deciding game of their best-of-7 Stanley Cup series. The Blackhawks’ 22-year-old Jonathan Toews, the youngest team captain in the NHL, won the Conn Smythe Trophy as playoff MVP.

Tony Awards Honor *Red*, *Memphis*, Hollywood Stars—The Broadway production of *Red*, a drama based on the life

of artist Mark Rothko, won 6 Tony Awards June 13, including Best Play, while *Memphis* took home top honors as Best Musical. In a nod to Hollywood, several performers more renowned for their film work took home Broadway acting awards, including Denzel Washington and Viola Davis (for their leading roles in the revival of August Wilson’s *Fences*), Scarlett Johansson (for her featured role in Arthur Miller’s *A View from the Bridge*), and Catherine Zeta-Jones (best actress in a musical for *A Little Night Music*).

Lakers Repeat as NBA Champions—For the second consecutive year, playoff MVP Kobe Bryant led the Los Angeles Lakers to an NBA championship, the 16th in franchise history. Trailing the Boston Celtics in the 3rd quarter of the 7-game-series finale, played June 17 at the Staples Center in Los Angeles, the Lakers erased a 13-point deficit and held on in the closing minutes to beat Boston, 83-79. The championship was Phil Jackson’s 11th as head coach and his 5th with the Lakers.

McDowell Is U.S. Open Golf Champion—Graeme McDowell shot a 3-over-par 74 in the 4th and final round to win the U.S. Open tournament June 20 at Pebble Beach Golf Links (CA). McDowell—the first golfer from Northern Ireland to win the championship and the first European to take the crown in 40 years—finished with an even-par 284, a stroke ahead of Gregory Havret of France. Dustin Johnson, a South Carolinian who led by 3 strokes after 54 holes, saw his hopes evaporate when he triple-bogeyed the 2nd hole and double-bogeyed the 3rd in the closing 18.

July 2010

National

BP Caps Runaway Oil Well in Gulf of Mexico—The London-based energy company BP announced July 15 that it had halted the flow of oil into the Gulf of Mexico from its runaway Macondo well. The catastrophic spill, which had begun Apr. 20 with a gas explosion and fire on the exploratory drilling platform *Deepwater Horizon*, had polluted the Gulf and coastal areas with up to 5 mil barrels of oil. Successful placement of a temporary cap on the well followed a series of failed containment strategies with colorful names such as “top kill” (pumping massive amounts of mud and cement into the well) and “junk shot” (attempting to clog the leak with pieces of debris). A more permanent seal known as “static kill” was completed Aug. 5 when BP used a relief well to pump cement into the Macondo well. On Sept. 19, Coast Guard Adm. Thad Allen declared that a “bottom kill” had left the well “effectively dead,” and no longer a danger to the Gulf.

After its earlier suspension of deepwater drilling in the Gulf of Mexico was overturned by the courts, the Obama administration imposed a revised moratorium July 12. The moratorium, which found favor with environmentalists but was unpopular with industry and political leaders and Gulf Coast residents, was lifted three months later. On Aug. 23 the independent Gulf Coast Claims Facility, funded with \$20 bil from BP and administered by Kenneth R. Feinberg, took over responsibility for settling damage claims filed by individuals and businesses harmed by the *Deepwater Horizon* disaster.

Obama Administration Apologizes for Ousting Sherrod—The U.S. Dept. of Agriculture wasted little time demanding the resignation July 19 of USDA employee Shirley Sherrod, only hours after a heavily edited video clip surfaced in which the Georgia-based rural development officer, an African-American, appeared to admit that in 1986 she had given short shrift to a white farmer. The statement was excerpted out of context from a speech Sherrod had given at a Mar. 27 banquet of the NAACP, which had recently condemned allegedly racist statements by Tea Party activists.

The controversy turned upside-down July 20 when publication of the full video revealed that despite her initial hesitation, Sherrod had decided to help the white farmer, Roger Spooner, who appeared on national television to thank her for saving his farm. With Sherrod exonerated, the NAACP (which had hastily criticized her, based on the initial incorrect reports), Agriculture Sec. Tom Vilsack, and Pres. Barack Obama all offered their apologies. On July 29 she said she planned to sue Andrew Breitbart, the right-wing blogger who

first posted the edited video on his website. Sherrod met with Vilsack Aug. 24 but declined to return to the USDA.

Financial Reform Law Enacted; Other Economic Developments—Pres. Obama signed into law July 21 a measure aimed at strengthening federal regulation of financial markets, curbing mortgage and investment abuses, and preventing a recurrence of the crisis that had convulsed the nation's financial system in 2008. The legislation was officially known as the Dodd-Frank Wall Street Reform and Consumer Protection Act in honor of Democrats Sen. Chris Dodd (CT) and Rep. Barney Frank (MA), who had shepherded the measure through Congress. The law had cleared the House June 30, by a vote of 237-192, and the Senate July 15, by a 60-39 margin. Also on July 15, investment giant Goldman Sachs agreed to pay \$550 mil to settle a civil fraud lawsuit brought by the Securities and Exchange Commission alleging the firm had duped investors into buying risky subprime mortgage-backed securities that Goldman's own traders were betting against.

The Dodd-Frank measure established the Consumer Financial Protection Bureau to shield borrowers against misleading marketing of mortgages, credit cards, and other loan products; empowered the government to take over large financial firms whose impending failure threatened the broader financial system; expanded government oversight of the complex securities known as derivatives; and imposed the so-called Volcker rule (named for Obama adviser Paul A. Volcker, a former chairman of the Federal Reserve) to limit speculative trading by banks.

On July 23 the White House forecast that annual federal budget deficits would top \$1.4 tril in both 2010 and 2011. A week later, the Commerce Dept. reported that the U.S. gross domestic product grew at an annual rate of 2.4% during the 2nd quarter of 2010, down from 3.7% in the 1st quarter; revised figures issued Aug. 27 estimated 2nd-quarter GDP growth at an even more anemic 1.6%. The unemployment rate held steady at 9.5%, but private-sector job creation was weaker than expected. Reports of robust 2nd-quarter profits by blue-chip companies helped boost the Dow Jones Industrial Average to a July 30 close of 10,465.94, up 7.1% for the month. The S&P 500 (1,101.60) and Nasdaq Composite Index (2,254.70) each gained 6.9% in July.

International

French Court Finds Noriega Guilty of Money Laundering—Convicted July 7 of funneling about \$3 mil of Colombian drug money into French bank accounts while he ruled Panama from 1983 to 1989, Manuel Antonio Noriega was sentenced by a Paris court to 7 years in prison. The decision culminated a long legal battle that had begun after the U.S. indicted its former ally in Feb. 1988. U.S. forces invaded Panama in Dec. 1989, and took the former dictator into custody in Jan. 1990. Declared a prisoner of war, Noriega was found guilty of drug trafficking and racketeering charges in Miami, FL, in 1992 and was sentenced to 40 years in prison (later reduced to 17 for good behavior). A French court convicted him in absentia in 1999, while Noriega was serving his Florida prison sentence, and when that sentence was about to expire, French authorities sought his extradition for retrial in France. Confined to a U.S. prison while the case proceeded, Noriega appealed all the way to the U.S. Supreme Court, which refused to intervene, and the former dictator was transferred to French custody Apr. 26.

Russia, U.S. Swap Spies—On July 9, in a scene reminiscent of the Cold War, 10 people recently arrested in the U.S. as Russian agents were allowed to return to Russia, in exchange for 4 Russian prisoners who had been convicted of having contact with Western intelligence agencies. The spy swap, which took place in Vienna, Austria, followed the exposure of a Russian espionage ring that had allegedly been operating in the U.S. for more than a decade. Working under deep cover as ordinary Americans, the Russian agents (many of whom had taken non-Russian-sounding names) had been instructed to gather information and recruit more spies. They had communicated using invisible ink, special computer software, coded data embedded in Internet photos, and other forms of spy craft, but U.S. investigators did not believe the agents had

ever transmitted classified information to their handlers. One day before their expulsion from the U.S., the 10 had pleaded guilty in federal court to conspiring to serve as unlawful foreign agents. An 11th alleged agent, arrested in Cyprus June 29 as he sought to board a flight to Budapest, Hungary, disappeared a day later, after he was released on bail.

Vatican Toughens Church Laws Against Sexual Abuse—Seeking to quell the ongoing scandal over pedophile priests, Vatican officials announced July 15 that Pope Benedict XVI had approved revisions in the way the Catholic Church deals with sexual abuses by church officials. Under the revamped rules, the Congregation for the Doctrine of the Faith—the church office that oversees the handling of sex-abuse cases—was authorized to defrock abusive priests without a lengthy ecclesiastical trial. Non-clergy were allowed to serve as judges and lawyers on church tribunals dealing with abuse cases; the statute of limitations was doubled from 10 years to 20; possession and distribution of child pornography were defined as “grave crimes” under church law; and penalties for abusive treatment of developmentally disabled adults were made equal to those for abuse of minors. In a move that drew protests from women's rights advocates, the Vatican also added to the list of grave crimes the attempted ordination of women.

The church had been battered since late 2009 by revelations of abusive behavior by Catholic clergy in Ireland, Belgium, Brazil, Germany, Austria, the Netherlands, and other countries. While serving as the archbishop of Munich and Freising (1977-81), then-Cardinal Joseph Ratzinger, approved the transfer of a German priest who had sexually abused boys. Ratzinger was named prefect of the Congregation for the Doctrine of the Faith in 1981, which did not take over responsibility for investigating sexual abuse cases until 2001.

Secret Afghan War Documents Published by WikiLeaks—More than 75,000 previously unreleased Afghan war documents, many of them classified, appeared July 25 on a website run by WikiLeaks, an international organization that promises whistleblowers the opportunity to “post documents anonymously and untraceably.” The organization had shared the documents with the *New York Times*, the German magazine *Der Spiegel*, and London's *Guardian* newspaper, all of which published articles on the WikiLeaks disclosures that same day. The leaked documents, covering the 2004-09 period, contained evidence of aid provided by Pakistan's ISI security agency to the Taliban and other Afghan insurgent groups. Other documents cast light on Afghan government corruption, reliability problems with the Predator and Reaper drone aircraft used by coalition forces, and violence against Afghan civilians by coalition troops.

Although WikiLeaks refused to name the source of the documents, U.S. probes reportedly focused on Pfc. Bradley Manning, an Army intelligence analyst who had been arrested May 26 in connection with earlier WikiLeaks disclosures. An investigation of WikiLeaks founder Julian Assange took an unexpected turn when Swedish prosecutors filed a rape charge against him Aug. 20, then rescinded it a day later, only to reopen the rape case Sept. 1.

Developments on the ground in Afghanistan were not encouraging. Operation Enduring Freedom claimed the lives of 65 U.S. service members in July, the highest single monthly toll since the war began. The U.S. suffered 4 military casualties in Iraq during the same month.

Khmer Rouge War Criminal Convicted in Cambodia—The UN-sponsored war crimes tribunal in Cambodia reached its 1st major verdict July 26, convicting a former prison warden who oversaw the torture and killing in 1975-79 of more than 14,000 inmates at the Tuol Sleng detention camp in Phnom Penh. The warden, Kaing Guek Eav, commonly known as Duch, received a prison sentence of 35 years, minus 16 years for time served. Four top officials of the Khmer Rouge regime that ruled Cambodia during the late 1970s were indicted Sept. 16, including former Pres. Khieu Samphan and former Foreign Min. and Deputy Prime Min. Ieng Sary. An estimated 1.7 mil people died under Khmer Rouge rule.

Floods in Pakistan Leave 8 Mil Homeless—Torrential monsoon rains beginning in late July and continuing into Aug. struck Pakistan with devastating force. An initial UN assessment Aug. 1 in the worst-hit region, Khyber Pakhtunkhwa

(formerly known as the North-West Frontier Province), estimated that nearly 800 people had died and more than 1 mil were in need of emergency assistance; by mid-Sept. the confirmed death toll nationwide had risen to 1,752, with 1,086 of the victims in Khyber Pakhtunkhwa. At peak, floods covered nearly a fifth of the country, leaving 8 mil people homeless and significantly affecting at least 12.5 mil more. Over 1.8 mil houses were destroyed, and damage to transportation infrastructure and agricultural resources was extensive.

General

Williams, Nadal Take Wimbledon Titles; Isner Wins Marathon Match—Serena Williams crushed Vera Zvonareva of Russia, 6-3, 6-2, in the Wimbledon women's singles championship July 3 at the All England Lawn Tennis Club. The victory (her 2nd consecutive Wimbledon singles crown and her 4th since 2002) earned Williams her 13th Grand Slam singles title. The following day, Rafael Nadal of Spain overwhelmed Czech challenger Tomas Berdych in straight sets, 6-3, 7-5, 6-4, to win his 2nd Wimbledon and 8th Grand Slam championship.

The tournament's most extraordinary match was a 3-day thriller, concluded June 24 after two postponements because of darkness, in which John Isner outlasted Nicolas Mahut of France, 6-4, 3-6, 6-7(9), 7-6(3), 70-68. The marathon 1st-round contest shattered multiple pro tennis records, including total time (11 hours, 5 minutes) and number of games (183); the 5th set alone took more than 8 hours.

James Signs with Miami Heat—With unprecedented fanfare, LeBron James, the National Basketball Association's MVP in 2009 and 2010, announced in a nationally televised broadcast July 8 that he would end his 7-season stint with the Cleveland Cavaliers to join the Miami Heat. "King James," a free agent who had been courted by at least 5 other NBA teams, accepted a 6-year contract worth \$110 mil. In other 6-year deals, the Heat also signed free agent power forward Chris Bosh for \$110 mil and retained guard Dwyane Wade for \$107 mil. All three players reportedly took less than they might have earned on other teams in order to play together for Miami.

Spain Triumphs in World Cup Soccer—Spain's national soccer team won its 1st FIFA World Cup title July 11 in Johannesburg, South Africa, defeating the Netherlands 1-0 on an overtime goal by Andrés Iniesta. The gold-medal match climaxed a month-long championship round that was the first played on African soil. Notable throughout the tournament were a series of embarrassing referee errors and the deafening drone of vuvuzelas, the plastic trumpets blown nonstop by South African soccer fans.

Switzerland Frees Filmmaker Roman Polanski—Citing uncertainties about his trial 33 years earlier on sex-abuse charges in California, Swiss authorities July 12 rejected a U.S. request to extradite Academy Award-winning film director Roman Polanski. The internationally famous filmmaker had been held in Switzerland since Sept. 2009 on charges stemming from the 1977 rape of a 13-year-old girl. Polanski's most recent film, the political thriller *The Ghost Writer*, had won the Silver Bear for Best Director at the Berlin International Film Festival Feb. 20.

Oosthuizen Captures British Open—Louis Oosthuizen of South Africa shot a 7-under par 65 in the 1st round, then held on for the next three days to win the British Open golf championship July 18 in St. Andrews, Scotland. Oosthuizen finished the 72-hole tournament with a 16-under-par total of 272, beating England's Lee Westwood by 7 strokes.

Contador Finishes 1st at Tour de France, as Doping Controversy Continues—On July 25 in Paris, for the 3rd time in 4 years, Spanish cyclist Alberto Contador was declared the winner of the Tour de France. But on Sept. 29 and Oct. 4, tests of Contador's urine during the race came back positive for banned substances. The 2010 Tour took place as U.S. investigators intensified their probe into whether 7-time Tour de France winner Lance Armstrong, Contador's rival and former teammate, had relied on performance-enhancing drugs and other banned techniques to gain unfair advantage. Competing in what he said was his final Tour, Armstrong (who has repeatedly denied any wrongdoing) finished in 23rd place, more than 39 minutes behind Contador.

August 2010

National

Same-Sex Marriage Ban Overturned in California—U.S. District Chief Judge Vaughn R. Walker ruled Aug. 4 in San Francisco that a California ballot measure barring same-sex marriage violated the federal constitution. The initiative, known as Proposition 8, had been approved by state voters in Nov. 2008 and upheld by the California Supreme Court in May 2009. Judge Walker disappointed gay-rights advocates by immediately staying his own ruling, pending appeal. A federal appellate panel extended the stay Aug. 16, with a full hearing scheduled to begin in early Dec.

Kagan Joins Supreme Court—In Aug. 7 ceremonies, U.S. Chief Justice John Roberts administered the constitutional and judicial oaths of office to Elena Kagan, swearing her in as associate justice of the Supreme Court. Along with Associate Justices Ruth Bader Ginsburg and Sonia Sotomayor, Kagan's membership marked the first time three women have served simultaneously as Supreme Court justices. Kagan received the approval of the Senate Judiciary Committee July 20 by a 13-6 margin, with Sen. Lindsey Graham (SC) the lone Republican voting in her favor. On Aug. 5 the Senate confirmed her, 63-37, with support from 56 Democrats, 5 Republicans, and 2 independents. Because she had served 14 months as the Obama administration's solicitor general, entrusted with supervising federal government litigation before the Supreme Court, she recused herself from 25 of the first 51 cases the Court accepted for its 2010-11 term.

550 Mil Eggs Recalled in Salmonella Outbreak—After public health officials traced cases of salmonella to one of the nation's leading egg producers, Wright County Egg of Galt, IA, the firm announced recalls Aug. 13-18 of 380 mil eggs that had been marketed since May under multiple brand names. On Aug. 19 another Iowa egg producer, Hillandale Farms, initiated the recall of 170 mil eggs, bringing the total to 550 mil. Wright County Egg was controlled by the DeCoster family, which also had close ties to the Hillandale operation. Press reports noted that DeCoster-owned egg farms had a long history of labor, immigration, environmental, and health problems, including a fine of \$34,675 in June for animal cruelty at a Maine production facility.

Blagojevich Convicted of Lying to Federal Agents—A federal jury in Chicago Aug. 17 found former Illinois Gov. Rod Blagojevich (D) guilty on one felony count of making false statements to the FBI. The jury, which deliberated for 14 days, deadlocked on the remaining 23 counts, including the charge that the governor had tried to sell the U.S. Senate seat vacated by Barack Obama after his election as president in Nov. 2008. U.S. Attorney Patrick J. Fitzgerald pledged to retry Blagojevich, who had been impeached and removed from office in Jan. 2009.

Fed Pledges Steps to Spur Faltering Recovery—Addressing a conference of world economic policymakers Aug. 27 at Jackson Hole, WY, Federal Reserve Chairman Ben Bernanke acknowledged that "the pace of recovery in output and employment has slowed somewhat in recent months." He outlined several options the Fed might take to promote economic expansion, of which the most likely was the purchase of long-term U.S. government debt, a move that would exert downward pressure on long-term interest rates and stimulate borrowing. In an assessment of the economy published Aug. 10, the Federal Open Market Committee, a Fed policymaking body, had cited high unemployment, sluggish income growth, a weak housing market, and tight credit as factors holding back the recovery. The Federal Deposit Insurance Corp. reported Aug. 31 that during the Apr.-June period its "problem list" of banks at risk of failure had grown from 775 to 829, the highest number since 1993. By Oct. 15 the FDIC had taken over 132 failed banks, compared with 140 for the whole of 2009.

The Dow Jones Industrial Average had its worst Aug. performance in 9 years, closing Aug. 31 at 10,014.72, for a one-month drop of 4.3%. The S&P 500 sagged 4.7% to 1,049.33, and the Nasdaq Composite Index plunged 6.2% to 2,114.03.

International

Chile Mine Cave-In Leads to Record-Setting Rescue—

A cave-in Aug. 5 at the San José gold and copper mine near Copiapó, in northern Chile, left 33 men trapped nearly 2,300 ft underground. Finding refuge in a small emergency shelter that had water and ventilation, the men shared meager food rations for 17 days until they made contact with rescue workers who had drilled a narrow borehole through the rock. Emergency crews then used the bore to send food and other supplies to the miners and to relay video images and messages back to the surface—a remote location in the Atacama Desert where Pres. Sebastián Piñera had staked the prestige of his government on the success of the rescue effort.

To extricate the trapped men, engineers drilled a 28-in. diameter shaft to the miners' chamber and lowered an emergency escape capsule, dubbed *Fénix 2*, into the hole. More than 1 bil people watched on television worldwide Oct. 12-13 as the capsule, painted in Chile's national colors of red, white, and blue, worked round-the-clock to shuttle all 33 workers to safety.

Gillard Retains Power in Australia—Federal elections in Australia Aug. 21 produced the first “hung” parliament in 70 years, with neither the governing Labor Party nor the center-right Liberal-National alliance winning a majority. With support from the lone Greens representative and two independents, Labor leader Julia Gillard cobbled together a minority government Sept. 7, leaving the Liberals' Tony Abbott as leader of the opposition. Gillard, who had served as deputy to Prime Min. Kevin Rudd, supplanted him as Labor leader and became Australia's first female prime minister June 24, after a succession of policy blunders eroded Rudd's standing with his party and the public at large. Rudd became foreign minister in the new cabinet that was sworn in Sept. 14 along with Gillard.

Russia Aids Startup of Iranian Nuclear Plant—With Russian assistance, Iran began loading fuel rods Aug. 21 into the Bushehr nuclear reactor. Construction of the 1,000-megawatt facility on Iran's southwest coast was begun by a German firm in 1975, before the Islamic revolution; the long-delayed project was completed by Russia under a contract signed in 1995. The UN, which had strengthened sanctions against Iran in June, and the U.S., which had toughened its own sanctions against the Iranian regime in July, reacted mildly to the startup of the Bushehr plant, which was expected to supply electricity for civilian purposes. At the same time, Iran pushed forward with its nuclear enrichment program, which could produce uranium suitable for use in nuclear weapons. Iranian officials said July 11 that the country planned a sixfold increase in its stockpile of 20% enriched uranium within 14 months. Iran's nuclear effort was disrupted in Sept. when the Bushehr plant and other industrial control systems were infected with the Stuxnet computer worm, the origin of which is still unknown.

Somali Insurgents Expand Terror Campaign—Four Somali legislators and at least 29 other people were killed Aug. 24 when members of Al Shabab, a radical Islamist group allied with al-Qaeda, attacked the Hotel Muna in the Somali capital city of Mogadishu. The attack was part of an offensive by Al Shabab jihadists against a Somali transitional government that has been supported by the UN, the U.S., and an African Union force (AMISON) comprising troops from Uganda, Burundi, and other countries. On July 11, Al Shabab had orchestrated a series of suicide bombings in Kampala, Uganda, that killed 76 people as they watched the World Cup soccer championship on outdoor video screens.

Al Shabab has also turned to Islamists in the U.S., many of them from Somali communities, as a source of fighters and funding. On Aug. 4, FBI agents in Chicago arrested the U.S.-born Shaker Masri and accused him of plotting to carry out a suicide bombing in Somalia. The following day, indictments unsealed in Minnesota, Alabama, and California charged 14 people with aiding Al Shabab.

U.S. Declares End to Iraqi Combat Mission—In an address from the White House Aug. 31, Pres. Obama declared that the U.S. combat mission in Iraq had ended. More than 4,400 U.S. service members had lost their lives since Operation Iraqi Freedom began with the U.S.-led invasion of Iraq in Mar. 2003, and nearly 32,000 U.S. troops had been wounded in action. The Congressional Research Service estimated that by the end of the 2011 fiscal year the U.S. will have spent

more than \$800 bil on the conflict, in which 100,000 Iraqis have also been killed.

Vice Pres. Joe Biden arrived in Baghdad Aug. 30 to oversee the transition to Operation New Dawn, which began Sept. 1 with some 50,000 remaining U.S. troops primarily tasked with training Iraqi forces. The security challenges still facing Iraq had been demonstrated the previous week, when insurgents associated with al-Qaeda in Iraq claimed responsibility for a series of suicide bombings and other attacks that killed at least 56 people in 13 cities and towns. In talks with Iraqi leaders, Biden warned of the “frustration” caused by their inability to form a new government in the nearly 6 months that had passed since parliamentary elections.

General

Rodriguez Hits 600th Homer; Clemens Indicted in Steroid Case—

New York Yankees 3rd baseman Alex Rodriguez hit his 600th regular-season home run Aug. 4, driving a 2-run shot over the centerfield fence at Yankee Stadium. The homer, which came in the 1st inning off Toronto Blue Jays pitcher Shaun Marcum, made the 35-year-old Rodriguez the youngest player to reach the 600 mark. Other members of baseball's “600 club” include Barry Bonds (762), Hank Aaron (755), Babe Ruth (714), Willie Mays (660), Ken Griffey Jr. (630), and Sammy Sosa (609).

In Feb. 2009, Rodriguez admitted using performance-enhancing drugs while he played for the Texas Rangers during 2001-03 but claimed he had stopped using them by the time he joined the Yankees in 2004. Another all-time baseball great, pitcher Roger Clemens, was indicted Aug. 19 on charges of lying to a congressional committee when he denied in testimony Feb. 2008 that he had used steroids or human growth hormone. Clemens entered a plea of not guilty Aug. 30. His trial was set to begin Apr. 2011, two weeks after former slugger Barry Bonds was expected to face trial on steroid-related charges of perjury and obstruction of justice.

Kaymer Takes PGA Golf Title—Martin Kaymer won the 92nd PGA Championship Aug. 15, defeating Bubba Watson in a 3-hole playoff at Whistling Straits in Kohler, WI. Kaymer and Watson tied at 11-under-par 277 at the end of regulation play, then tied again at the end of the first 2 holes of the playoff. Kaymer bogeyed the 3rd hole but Watson double-bogeyed, falling 1 stroke short. Leading as he started the 72nd and final hole of regulation play, Dustin Johnson had seen his chances vanish when a technical violation on a bunker shot cost him a 2-stroke penalty.

September 2010

National

Mosque, Koran Controversies Expose Divergent Views of Islam—

An ABC News/*Washington Post* poll released Sept. 8 found that 49% of Americans held an unfavorable opinion of Islam. The results represented the most negative U.S. public view of Islam in the 9 years the pollsters had been asking the question. The survey followed weeks of controversy over a private developer's plan to build an Islamic center several blocks from the site of the World Trade Center that was destroyed by radical Islamist terrorists on Sept. 11, 2001. Many opponents of the Islamic center acknowledged that its construction was constitutionally protected but claimed it was disrespectful to the people who had died on Sept. 11.

Controversy also surrounded a plan by Terry Jones, the pastor of a small Pentecostal church in Gainesville, FL, to burn copies of the Koran, Islam's central religious text, on Sept. 11. The proposed Koran burning, publicized over the Internet, sparked protests in several Islamic countries and was denounced by Gen. David Petraeus, who warned Sept. 7 it could endanger troops in Afghanistan, and by Pres. Barack Obama, who said Sept. 9 that it was “completely contrary to our values as Americans.” Following a direct appeal from Defense Sec. Robert Gates, Jones said on TV Sept. 11 that his church would not burn any Korans.

Judge Rules Against Military's “Don't Ask, Don't Tell” Policy—

Federal Judge Virginia A. Phillips held Sept. 9 that the “Don't Ask, Don't Tell” (DADT) policy that prevented homosexuals from serving openly in the U.S. armed forces was unconstitutional. The California judge followed up her decision in *Log Cabin Republicans v. U.S.* with an Oct. 12

order barring the military from enforcing DADT. The Obama administration—which supported an end to DADT but favored a legislative approach—appealed the order, which was stayed by a federal appellate panel Oct. 20. During the intervening week, military recruiters had been instructed to accept openly gay recruits. After the stay was imposed, Defense Sec. Robert Gates issued a directive making it much more difficult to discharge openly gay service members. Republicans in the Senate blocked a congressional attempt to overturn DADT Sept. 21.

Tea Party Favorites Make Further Gains—Candidates backed by the Tea Party movement continued to make headway in Republican Party primaries. In GOP contests Sept. 14, Christine O'Donnell upset 9-term U.S. Rep. Mike Castle in the race for U.S. senator from Delaware, and self-financed candidate Carl Paladino defeated former U.S. Rep. Rick Lazio for the gubernatorial nomination in New York. The national and state Republican establishment had backed Castle as the party's best hope to capture the seat formerly held by Vice Pres. Joe Biden (D). On Sept. 17, incumbent Sen. Lisa Murkowski (R, AK), who had lost her primary election Aug. 24 to Joe Miller, rejected what she described as Miller's "extremist views" and declared that she would run as a write-in candidate in the general election.

Experts Say Recession Has Ended, But Economic Pain Remains—The Business Cycle Dating Committee of the National Bureau of Economic Research announced Sept. 20 that the recession that began Dec. 2007 had ended in June 2009. During that 18-month downturn—the longest recession since World War II—jobs on nonfarm payrolls shrank by more than 5%. Although some indicators continued to show that the economy was recovering, unemployment remained high at 9.6% for the month. To boost job creation, Pres. Obama proposed in a Labor Day speech Sept. 6 a \$50 bil increase in federal spending on roads, rails, and runways. The Census Bureau reported Sept. 16 that the number of Americans living below the poverty line (\$10,830 in pretax cash income for a single adult, \$22,050 for a family of 4) had risen to 44 mil by the end of 2009. The share of residents living in poverty (14.3%) was the highest in 15 years.

With analysts forecasting that Democrats in Congress were likely to pay a steep electoral price for the economy's shaky performance, the Obama administration continued to reshape its economic team. On Sept. 10 the White House named Austan Goolsbee to replace the departing Christina Romer as head of the Council of Economic Advisers. Eleven days later the Obama administration revealed that another key economic aide, Lawrence Summers, would return to Harvard Univ. after the midterm elections Nov. 2. Obama had tapped Clinton-era budget director, Jack Lew, to succeed Peter Orszag as head of the Office of Management and Budget in July.

The mood was more euphoric on Wall Street, where stocks had their best Sept. since 1939. The Dow Jones Industrial Average closed Sept. 30 at 10,788.05, a gain of 7.7% for the month. The S&P finished at 1,141.20, for an increase of 8.8%, and the Nasdaq Composite Index soared 12% to 2,368.62. In international commodities trading, gold sold at over \$1,300 an ounce for the first time Sept. 28.

Congress Adjourns After Passing Stopgap Funding Measure—With the 2010 fiscal year ending and midterm elections less than five weeks away, Congress adjourned in the early morning hours of Sept. 30. Just before members left Washington, DC, to campaign in their home districts, the Senate and House passed the Continuing Appropriations Act 2011, by votes of 69-30 and 228-194, respectively. The stopgap spending measure, which provided funds to keep the government running through Dec. 3, was quickly signed by Pres. Obama. Earlier, Congress had approved the Small Business Jobs and Credit Act of 2010, which established a \$30 bil loan fund and provided \$12 bil in tax breaks to aid small businesses. The Senate passed the measure Sept. 16, by a vote of 61-38; the House (which had initially passed the bill June 17) concurred with Senate changes Sept. 23, by a margin of 237-187; and Pres. Obama signed it into law Sept. 27.

At the time of adjournment, Congress had passed no regular appropriations measures for the 2011 fiscal year. Legislators had also deadlocked over whether Americans earning more than \$250,000 should continue to receive the tax cuts passed in 2001 under Pres. George W. Bush, which were due to expire at the end of 2010.

International

Earthquake Rocks Christchurch, New Zealand—An earthquake measuring 7.0 on the open-ended Richter scale shook New Zealand's South Island Sept. 4. The quake was centered about 30 mi west of Christchurch, the South Island's largest urban area; about 100,000 houses in the city were damaged, with 500 requiring demolition. Some 100 people were treated for injuries, and property losses were estimated at \$2.7 bil or more.

Spain Dismisses Truce Pledge by Basque Separatist Group ETA—Spanish authorities reacted coolly to a Sept. 5 announcement by the Basque separatist organization Euzkadi Ta Askatasuna (ETA), that it had ceased armed attacks against the Spanish government. Violence by ETA, which the European Union classifies as a terrorist organization, has claimed more than 800 lives since 1968, and previous cease-fires had been broken. "I don't trust this one bit," said Alfredo Pérez Rubalcaba, Spain's interior minister, noting that ETA members had not pledged to lay down their arms. The Basque group had suffered multiple setbacks in 2010, including the arrest in northern France Feb. 28 of ETA guerrilla leader Ibon Gogiascoechea Arronategui.

French Government Faces Criticism Over Roma, Burqas, Pensions—By a margin of 246-1 (with most opposition legislators abstaining), the French Senate voted Sept. 14 to ban the burqa, niqab, and other face-hiding clothing worn by some Muslim women. The measure, which had passed the National Assembly in July, was strongly favored by Pres. Nicolas Sarkozy, who had called the burqa "a sign of enslavement and debasement." The legislation, which was scheduled to take effect within 6 months if approved by France's Constitutional Council, drew complaints from Islamic groups, who viewed it as an attempt to stigmatize the nation's 6 mil Muslims.

Sarkozy was already facing international criticism over his policy of shutting Roma (Gypsy) encampments and expelling thousands of Roma to Romania and Bulgaria. On Sept. 14, European Union Justice Commissioner Viviane Reding called the French expulsions "a disgrace." Meanwhile, union members, students, and others launched mass demonstrations to protest the Sarkozy government's plan to reform the pension system by raising the minimum retirement age from 60 to 62 and the age when workers qualify for a full pension from 65 to 67. The National Assembly approved the pension measure Sept. 15, by a vote of 329-233. The Senate debated the legislation in Oct. as strikers blocked fuel depots, disrupted road and rail traffic, and clashed with police.

Violence, Vote-Buying Mar Afghanistan Election—About 2,500 candidates competed for 249 parliamentary seats in national elections in Afghanistan Sept. 18. Taliban insurgents claimed responsibility for some 150 separate attacks, which were blamed for at least 15 deaths. Following reports of rampant vote-buying and other irregularities, Afghanistan's Independent Election Commission announced Oct. 20 that it had invalidated 1.3 mil of the 5.6 mil votes cast. Corruption also cast its shadow over the nation's financial system, when reports that the Kabul Bank had lost up to \$300 mil led to a panic in early Sept. among depositors, including 300,000 government employees. The nation's central bank intervened to prevent the collapse of the private financial institution, in which Pres. Hamid Karzai's brother Mahmoud was a major shareholder. In military developments during the month, 57 coalition troops lost their lives, of whom 42 were from the U.S. Coalition casualties in Iraq numbered 7, all from the U.S.

Shootout Follows Standoff Between Ecuadoran President and Police—A Sept. 30 meeting between striking police officers and Ecuadoran Pres. Rafael Correa escalated into a violent confrontation in which 5 people were killed and hundreds more were wounded. Correa had gone to a police barracks to meet with officers who were angry at a new law that cut wages and benefits. Physically threatened and exposed to tear gas, Correa sought treatment at a nearby hospital. Disgruntled police surrounded the building, holding Correa captive for more than 10 hours. In a battle broadcast live on television, 500 government troops freed the president after storming the hospital and exchanging fire with the police. Police chief Freddy Martinez resigned the following day.

General

Clijsters Takes U.S. Open Title, as Nadal Caps Career Grand Slam—Kim Clijsters of Belgium needed only 59 minutes to dispatch Russia's Vera Zvonareva, 6-2, 6-1, to win the U.S. Open women's singles championship Sept. 11 at Arthur Ashe Stadium in Flushing, NY. The victory earned Clijsters her 3rd U.S. Open singles title and her 2nd in consecutive years. Two days later, in a rain-delayed men's final, Rafael Nadal of Spain bested Serbian-born Novak Djokovic, 6-4, 5-7, 6-4, 6-2. The U.S. Open title—Nadal's first—gave him career victories in all 4 of the tennis world's most prestigious Grand Slam tournaments.

U.S. Teams Win World Basketball Championships—Led by tournament MVP Kevin Durant, the U.S. men's team won the FIBA international basketball title Sept. 12 over Turkey, 81-64, at the Sinan Erdem Dome in Istanbul. The young U.S. squad, coached by Duke Univ.'s Mike Krzyzewski, took home the nation's first FIBA gold medal since 1994. In the women's final Oct. 3, a U.S. team coached by Geno Auriemma of the Univ. of Connecticut captured the world title by defeating the Czech Republic, 89-69, at Karlovy Vary, Czech Republic.

Bush Surrenders Heisman Trophy—Running back Reggie Bush, a college star at the Univ. of Southern California (USC), gave up the Heisman Trophy awarded to him in 2005 as the nation's outstanding college football player. Bush's Sept. 14 forfeiture followed the National Collegiate Athletic Association's June 10 decision to penalize USC for hundreds of thousands of dollars in gifts improperly given to Bush and his family, among other violations. The NCAA stripped USC of 14 victories in which Bush had played during 2004 and 2005, including the Trojans' Bowl Championship Series title win in Jan. 2005. The Heisman trustees announced Sept. 15 that the 2005 award would be left vacant.

U.S., Europe Limit Use of Diabetes Drug Avandia—European and American regulators Sept. 23 imposed strict limits on Avandia after the widely used diabetes drug was linked to elevated risk of heart attack, stroke, or heart failure. The European Medicines Agency required use of Avandia to be phased out within a few months. In the U.S., the Food and Drug Administration allowed people already taking Avandia to continue to do so, but required doctors to warn patients of the cardiovascular risks and to certify, before writing new prescriptions, that all other diabetes drugs had been tried without success. The FDA estimated that about 600,000 people in the U.S. with type 2 diabetes were using Avandia to control their blood sugar. In a settlement Oct. 26 with the U.S. Justice Department, a subsidiary of GlaxoSmithKline, the maker of Avandia, agreed to pay \$750 mil in civil and criminal penalties for multiple quality defects in drugs manufactured at a pharmaceutical plant in Puerto Rico.

October 2010

National

Election Campaign Shatters Spending Records—Political ads crowded the airwaves during the last full month of campaigning before midterm elections Nov. 2. With all 435 seats in the House of Representatives, 37 of 100 seats in the Senate, 37 state governorships, more than 6,100 state legislative seats, and 160 ballot questions to be decided, the nonpartisan Center for Responsive Politics (CRP) estimated Oct. 27 that candidates, political parties, and interest groups would spend a combined total of nearly \$4 bil by the time the campaign ended. That total—a record for a nonpresidential election year—was about \$1 bil more than was spent in 2006. CRP calculated that, as of late Oct., Republicans had raised \$1.64 bil and Democrats \$1.59 bil. Corporations, labor unions, and nonprofit advocacy organizations had poured hundreds of millions of dollars into the campaign following the Jan. 21 ruling by the Supreme Court in the *Citizens United* case that eased limits on political fundraising and spending by outside groups. As of Election Day morning, four conservative-leaning organizations—the U.S. Chamber of Commerce (\$34.9 mil), American Action Network (\$26.6 mil), American Crossroads (\$21.5 mil), and Crossroads Grassroots Policy Strategies (\$17.1 mil)—topped the CRP list of spending by outside groups, followed by two liberal-

leaning labor unions, the Service Employees International Union (\$15.7 mil) and American Federation of State, County and Municipal Employees (\$12.4 mil).

Courts Rule on Challenges to Health Care Law—Efforts to overturn a key provision of the landmark Patient Protection and Affordable Care Act, passed by Congress and signed by Pres. Barack Obama in Mar., met a mixed reception in federal courts. In Michigan, U.S. District Court Judge George Steeh Oct. 7 upheld the measure and rejected claims that Congress lacked constitutional authority to require individuals to purchase health insurance or pay a tax penalty. In Florida a week later, however, U.S. District Judge Roger Vinson allowed a suit brought against the health care law by officials in 20 states to go forward. "The power that the individual mandate seeks to harness is simply without prior precedent," he wrote. On Aug. 3, Missouri had become the first state where voters approved a measure aimed at nullifying the health insurance purchase requirement; the referendum, known as Proposition C, passed with a 71% majority. Legal analysts expected the Supreme Court to rule on the constitutionality of the individual mandate before the provision was scheduled to take effect in 2014.

Emanuel, Jones Leave White House Posts—Approaching the halfway point of his presidential term, Barack Obama announced Oct. 1 that Rahm Emanuel had resigned his powerful position as White House chief of staff. Emanuel planned to run for mayor of Chicago. Senior Advisor Pete Rouse, who had headed Obama's Senate staff, was named as Emanuel's interim successor. A week later, Obama replaced his national security adviser, Gen. James L. Jones, with Jones's civilian deputy, Thomas E. Donilon, a Democratic insider with extensive policymaking experience. According to Bob Woodward, author of the recently published *Obama's Wars*, Jones had privately called the president's top political aides "the water bugs" and other derisive terms. Woodward also reported that Defense Sec. Robert Gates had warned that appointing Donilon as national security adviser would be a "disaster." In an interview with the *New York Times*, Gates acknowledged that he and Donilon had clashed during the administration's 2009 review of military policy in Afghanistan and Pakistan. But Gates said the two men had since met privately to clear the air and "things ever since have been fine."

TARP Winds Down as Controversy Over Bailouts Persists; Other Economic Developments—Launched during the 2008 financial crisis, the Troubled Asset Relief Program reached the 2-year mark Oct. 3, the date on which its authority to make new financial commitments expired. In a report issued Oct. 5, the Treasury Dept.'s Office of Financial Stability estimated that TARP, originally authorized at \$700 bil, would end up costing taxpayers \$51 bil or less. As of Sept. 30, \$388 bil in TARP funds had been spent, including \$245 bil to bail out banks, \$80 bil to rescue failing auto companies, and \$48 bil to prop up the insurance giant American International Group (AIG). About \$204 bil in TARP money had already been repaid by recipients, and taxpayers had earned \$30 bil in interest. Critics insisted the Obama administration's balance sheet was far too optimistic; on Oct. 25 the special inspector general for TARP, Neil M. Barofsky, complained that the Treasury Dept. had shifted its customary accounting methods in order to conceal another \$40 bil in likely losses on the AIG bailout. Meanwhile, taxpayers continued to foot the bill for the federal bailout of the mortgage-financing enterprises commonly known as Fannie Mae and Freddie Mac. Projections released Oct. 21 by the Federal Housing Finance Agency indicated that the two enterprises, which had already drawn \$148 bil from the Treasury, would need additional draws of between \$73 bil and \$215 bil to remain solvent through Dec. 2013.

With inflation low, the Social Security Admin. announced Oct. 15 that in 2011 more than 58 mil recipients of monthly Social Security and Supplemental Security Income benefits would not receive an automatic cost of living adjustment, or COLA; the announcement marked the second consecutive year without a COLA. The Commerce Dept. reported Oct. 29 that the nation's economy had grown at an annual rate of 2% during July-Sept., a pace too sluggish to make much headway against a Sept. unemployment rate of 9.6%.

Expectations that the Federal Reserve would soon intervene to boost the economy helped propel stock prices upward. The Dow Jones Industrial Average closed Oct. 29 at 11,118.49, a gain of 6.6% since the year began, and the index's best Oct. in four years. The S&P 500 finished at 1,183.26, for a 10-month increase of 6.1%; during the same period, the Nasdaq Composite Index rose 10.5% to close at 2,507.41.

International

Religious Violence in Iraq, Corruption in Afghanistan Dim Hopes for War Efforts—Seven months after parliamentary elections, Iraq remained without a functioning government. Incumbent Prime Min. Nouri al-Maliki secured the backing Oct. 1 of a Shiite coalition, including followers of anti-American cleric Moqtada al-Sadr, but he still lacked sufficient broad-based support to form a governing majority. Political instability, coupled with a reduction in the U.S. presence, contributed to heightened religious tensions. In the worst violence against Christians since the 2003 war began, Islamic extremists commandeered a Catholic church, Our Lady of Salvation, in Baghdad's Karradah neighborhood; at least 58 people, including 5 attackers, died in the ensuing carnage, much of which occurred when the hostage takers detonated suicide vests. Militants launched a wave of car bomb attacks Nov. 2 in Shiite neighborhoods in Baghdad, killing at least 110 people.

Meanwhile, the WikiLeaks website, which in July had posted more than 75,000 previously undisclosed documents about the war in Afghanistan, on Oct. 22 released a trove of nearly 400,000 hitherto secret documents covering the Iraq conflict from Jan. 2004 through Dec. 2009. The war logs, advance copies of which were provided to the *New York Times* and other media organizations for validation and research, provided fresh evidence concerning civilian casualties, mistreatment of prisoners by Iraq's army and police, U.S. reliance on private contractors, and Iranian military assistance to Shiite combatants. On Oct. 26 the Iraqi High Tribunal, responsible for judging war crimes committed under Saddam Hussein, handed down a death sentence against Tariq Aziz, who had served as Hussein's foreign minister and deputy prime minister. Two U.S. service members were killed in Iraq during the month.

In Afghanistan, U.S. and Afghan forces launched an offensive against insurgents in the Taliban stronghold of Kandahar Province, even as reports emerged of possible high-level peace negotiations between Taliban representatives and the government of Pres. Hamid Karzai. The chronic problem of corruption among Afghan leaders resurfaced Oct. 23 when the *New York Times* reported that Karzai's chief of staff, Umar Daudzai, in Aug. on Karzai's personal plane had met with Iranian ambassador Feda Hussein Maliki, who handed him a large plastic bag filled with cash. Responding to reporters' questions Oct. 25, Karzai defended the cash payments, saying they were "done by various friendly countries to help the presidential office." Coalition fatalities during the month included 50 from the U.S. and 15 from other countries.

Rousseff Wins Brazilian Presidency—Workers' Party candidate Dilma Rousseff, the handpicked choice of departing Pres. Luiz Inácio Lula da Silva, led the first round of presidential balloting Oct. 3 with 47% of the vote and defeated José Serra of the Brazilian Social Democratic Party, 56% to 44%, in a runoff election Oct. 31. Born into an upper middle-class family in 1947, Rousseff joined a Marxist resistance group in the late 1960s while the military ruled Brazil. Arrested in 1970 and tortured by the military regime, she pursued a career in economics after her release in 1973. After joining the Workers Party in 2001, she served Pres. Lula's administration as energy minister, 2003-05, and then as his chief of staff. Her victory was seen largely as an endorsement of Lula's 8 years as president, during which (according to Brazilian government data) some 24 mil people rose from dire poverty and 31 mil entered the middle class. Lula, who had an approval rating over 80%, was constitutionally barred from seeking a third presidential term. Upon taking office Jan. 1, 2011, Rousseff would become Brazil's first female president.

British Government Outlines Steep Spending Cuts—Facing huge budget deficits, Britain's Conservative-led government announced spending reductions Oct. 20 of approximately \$130 bil over a 4-year period. "Today's the day when Britain steps back from the brink, when we confront the bills from a decade of debt," declared Chancellor of the Exchequer George Osborne in a speech to Parliament. Under Osborne's plan, the official retirement age for men would rise from 65 to 66 by 2020, and 490,000 public-sector jobs would be eliminated by 2015. The Treasury chief also proposed reductions in welfare spending, unemployment benefits, law enforcement, central government grants to local governments, and financial support for the royal household. A strategic defense and security review unveiled Oct. 19 by Prime Min. David Cameron had envisaged an 8% reduction in defense spending over a 4-year period, with a loss of 42,000 armed-forces jobs by 2015.

Prime Minister of Barbados Dies—Prime Min. David Thompson of the Caribbean nation of Barbados succumbed to pancreatic cancer Oct. 23 at the age of 48. Thompson had become the youngest elected head of government in the history of Barbados when his Democratic Labor Party won parliamentary elections in Jan. 2008. He was succeeded in office by his deputy prime minister and attorney general, Freundel Stuart, who had run the government while Thompson received chemotherapy.

Volcanic Eruptions, Tsunami Strike Indonesia—Nearly 500 people died from two disasters, some 750 mi apart, that hit Indonesia Oct. 25. A 7.7-magnitude earthquake in the Mentawai Islands, off the western coast of Sumatra, triggered a tsunami that slammed into coastal villages, killing at least 425 people and leaving another 15,000 homeless. That same day, Mt. Merapi, an active volcano near Yogyakarta in central Java, began a series of major eruptions that claimed at least 38 lives and forced the evacuation of 75,000 people.

Authorities Foil Yemen-Based Bomb Plot—Acting on a tip Oct. 28 from Saudi Arabia's intelligence chief, Prince Muhammad bin Nayef, authorities in the UK and UAE confiscated packages containing printer cartridges that had been filled with a powerful explosive and rigged as bombs. Both air cargo shipments had originated in Yemen and were addressed to Chicago-area destinations. One suspicious package, sent via the United Parcel Service, was found at East Midlands Airport, about 115 mi northwest of London; another had already traveled via Qatari passenger aircraft from Yemen's capital, Sana'a, to Doha, Qatar, and then Dubai, where it was intercepted. The U.S., UK, France, and Germany suspended cargo shipments from Yemen, where the terrorist group al-Qaeda in the Arabian Peninsula (AQAP) maintains an active presence. The U.S. and Yemeni governments had stepped up military pressure against AQAP in 2010, and the Obama administration had reportedly targeted radical Yemeni-American cleric Anwar al-Awlaki for assassination.

General

Halladay Hurls Playoff No-Hitter—Making his post-season debut, Phillies right-hander Roy Halladay blanked the hard-hitting Cincinnati Reds, 4-0, in a division playoff game Oct. 6 at Citizens Bank Park in Philadelphia. Halladay allowed just one base runner (on a 5th-inning walk to Cincinnati outfielder Jay Bruce) and struck out eight in pitching only the second no-hit, no-run game in major-league baseball playoff history, and the first since NY Yankee Don Larsen's perfect game in the 1956 World Series. Halladay, who pitched a perfect game against the Florida Marlins May 29, 2010, became the fifth pitcher in major-league history to throw two no-hitters in the same season.

China Builds World's Fastest Supercomputer—At a conference Oct. 28 in Beijing, China unveiled the Tianhe-1A supercomputer, capable of a sustained performance of 2.507 petaflops, 40% higher than the previous mark set by the Jaguar system at Oak Ridge National Laboratory in Oak Ridge, TN. (One petaflop equals one quadrillion calculations per second.) Built by China's National University of Defense Technology and housed at the National Supercomputing Center in Tianjin, the Tianhe-1A combines 7,168 Nvidia Tesla graphics processing chips with 14,336 Intel Xeon microprocessors.

OBITUARIES

Nov. 1, 2009-Oct. 31, 2010

A

Albrecht, Theo, 88, German businessman who built the Aldi chain of supermarkets into a global empire; Essen, Germany, July 24, 2010.

Anderson, Alex, 90, cartoonist who created the characters Rocky the Flying Squirrel, Bullwinkle, and Dudley Do-Right; Carmel, CA, Oct. 22, 2010.

Aranne, Ike (born Yitzhak Aronowicz), 86, Polish-born captain of the ship *Exodus 1947*, which unsuccessfully tried to dock in British-occupied Palestine with Jewish refugees on July 11, 1947; Hadera, Israel, Dec. 23, 2009.

Auchincloss, Louis, 92, author of fiction and nonfiction about aristocratic New Yorkers best known for the novel *The Rector of Justin* (1964); New York, NY, Jan. 26, 2010.

B

Bacon, James, 96, reporter and syndicated columnist who chronicled Hollywood for six decades; Northridge, CA, Sept. 18, 2010.

Bainbridge, (Dame) Beryl, 77, British author best known for her 18 darkly-humorous novels; London, Eng., UK, July 2, 2010.

Baker, Vernon, 90, one of 7 black soldiers awarded the Medal of Honor for heroism during World War II by Pres. Bill Clinton in 1997; St. Maries, ID, July 13, 2010.

Ballantine, Carl, 92, comedic actor best known for his role as Lester Gruber on the TV series *McHale's Navy*; Hollywood, CA, Nov. 3, 2009.

Barry, Gene, 90, actor best known for his starring role in the classic *War of the Worlds* film (1953); Woodland Hills, CA, Dec. 9, 2009.

Bell, Glen, Jr., 86, businessman who founded the Taco Bell fast-food chain; Rancho Santa Fe, CA, Jan. 16, 2010.

Billingsley, Barbara, 94, TV and film actress best known for her role as June Cleaver on *Leave It to Beaver* (1957-63); Santa Monica, CA, Oct. 16, 2010.

Blanda, George, 83, NFL Hall of Fame quarterback and kicker who, during a 26-season career—the longest in pro football history—scored 2,002 points, the record at the time of his retirement; Alameda, CA, Sept. 27, 2010.

Bohlen, Jim, 84, engineer instrumental in the creation of the environmental organization Greenpeace; Comox, BC, Can., July 5, 2010.

Bol, Manute, 47, Sudanese-born center who was a 7 ft, 6 in.-tall shot-blocker on four NBA teams; Charlottesville, VA, June 19, 2010.

Bosley, Tom, 83, actor best known for portraying Howard Cunningham on *Happy Days* (1974-84); Tony award winner for his lead role in *Fiorello!* (1959-61); Rancho Mirage, CA, Oct. 19, 2010.

Bourgeois, Louise, 98, French-born sculptor inspired by feminism and psychoanalysis; New York, NY, May 31, 2010.

Boyle, Robert F., 100, production designer who created memorable scenes in *North by Northwest* (1959) and *The Birds* (1963); Los Angeles, CA, Aug. 1, 2010.

Brookshier, Tom, 78, defensive back who helped lead the Philadelphia Eagles to the NFL championship (1960); later became a football broadcaster; Wynnewood, PA, Jan. 29, 2010.

Brown, David, 93, journalist turned Hollywood film producer; managing editor of *Cosmopolitan* before wife Helen Gurley Brown; produced *The Sting* (1973), *Jaws* (1975), and *Cocoon* (1985); New York, NY, Feb. 1, 2010.

Brown, Himan, 99, producer and director of classic radio dramas, notably *Inner Sanctum Mysteries* (1941-52) and *CBS Radio Mystery Theater* (1974-82); New York, NY, June 4, 2010.

Burke, Solomon, (born James Solomon McDonald), 70, soul singer best known for the song "Everybody Needs Someone to Love"; Rock and Roll Hall of Fame inductee (2001); Amsterdam, Netherlands, Oct. 10, 2010.

Byrd, Robert, 92, U.S. senator (D, WV) since Jan. 1959, making him the longest-serving senator; repudiated his brief membership in the Ku Klux Klan and became a civil rights advocate; won billions of dollars in federal monies for his impoverished home state; Fairfax, VA, June 28, 2010.

C

Cannell, Stephen J., 69, producer and writer who created nearly 20 TV series, including *The Rockford Files* and *The A-Team*; Pasadena, CA, Sept. 30, 2010.

Carmichael, Ian, 89, British actor known for films such as *Private's Progress* (1956) and *I'm All Right Jack* (1959) and for TV roles such as P. G. Wodehouse's bumbling Bertie Wooster; Grosmont, Eng., UK, Feb. 5, 2010.

Carpenter, Liz, 89, journalist who served as press secretary to Lady Bird Johnson (1963-69); Austin, TX, Mar. 20, 2010.

Carter, Dixie, 70, actress best known for her role as Julia Sugarbaker in the TV sitcom *Designing Women* (1986-93); Houston, TX, Apr. 10, 2010.

Chabrol, Claude, 80, French film director in the New Wave film movement; among his most acclaimed films were *La Femme Infidèle (The Unfaithful Wife)* (1969) and *Le Boucher (The Butcher)* (1970); Paris, France, Sept. 12, 2010.

Clancy, Liam, 74, Irish singer who helped popularize Irish folk music as a member of U.S.-based quartet the Clancy Brothers; Cork, Ireland, Dec. 4, 2009.

Clokey, Art (born Arthur Charles Farrington), 88, animator who created the green clay character Gumby; Los Osos, CA, Jan. 8, 2010.

Coleman, Gary, 42, diminutive actor who starred in the TV sitcom *Diff'rent Strokes* (1978-86) then endured personal and financial difficulties; kidney disease stunted his growth (full height: 4 ft, 8 in.); Provo, UT, May 28, 2010.

Conrad, Paul, 86, political cartoonist who won 3 Pulitzer Prizes (1964, 1971, 1984) for skewering politicians; Rancho Palos Verdes, CA, Sept. 4, 2010.

Cooley, Earl, 98, one of the first two U.S. Forest Service "smoke jumpers" to parachute into a forest fire in 1940; Missoula, MT, Nov. 9, 2009.

Coryell, Don, 85, pro-football coach with St. Louis Cardinals (1973-77) and San Diego Chargers (1978-86); La Mesa, CA, July 1, 2010.

Cuellar, Mike, 72, Cuban-born pitcher whose screwball helped the Baltimore Orioles win 3 consecutive American League pennants; won Cy Young Award (1969); Orlando, FL, Apr. 2, 2010.

Culp, Robert, 79, actor best known for his role as a secret agent in the TV comedy-adventure series *I Spy* (1965-68); Los Angeles, CA, Mar. 24, 2010.

Curtis, Tony (born Bernard Schwartz), 85, classically handsome actor known for dramatic and comedic roles in films such as *The Defiant Ones* (1958) and *Some Like It Hot* (1959); Henderson, NV, Sept. 29, 2010.

D

Davis, Willie, 69, centerfielder who played most of his career with the L.A. Dodgers; his 31-game hitting streak (1969) is still a team record; Burbank, CA, Mar. 9, 2010.

Dean, Jimmy, 81, country singer, TV personality, and sausage maker; music career peaked with chart-topping song "Big Bad John" (1961); founded the Jimmy Dean Meat Co. (1969), becoming its TV pitchman; Varina, VA, June 13, 2010.

Dio, Ronnie James (born Ronald James Padavona), 67, lead singer with heavy metal bands Rainbow (1975-79), Black Sabbath (1979-82), and his own group, Dio; Los Angeles, CA, May 16, 2010.

The 111th Congress convened Jan. 6, 2009, with both chambers under Democratic control. At the start of the term, the 435 members of the House of Representatives comprised 256 Democrats and 178 Republicans, with 1 vacancy. Of the 100 members of the Senate, 55 were Democrats, 41 were Republicans, and 2 were independents who caucused with the Democrats; the 2 remaining seats were vacant. A record 95 women were serving in Congress, of whom 78 (including 3 nonvoting delegates) were in the House and 17 in the Senate. The House had 41 African American members (including 2 nonvoting delegates), 28 Hispanics (including 1 nonvoting delegate), 9 Americans of Asian, Native Hawaiian, or Pacific Islander heritage (including 2 nonvoting delegates), and 1 American Indian. Among Senate members were 3 Hispanics and 2 Asian Pacific Americans; the lone African American senator in the 110th Congress, Barack Obama (D, IL), resigned following his election as president in Nov. 2008. Roland Burris (D, IL), also an African American, took over his seat Jan. 15, 2009.

Leadership. Nancy Pelosi (D, CA), the highest-ranking woman in Congressional history, retained her office as speaker of the House when the 111th Congress convened. Other leading House members were Majority Leader Steny Hoyer (D, MD), Minority Leader John Boehner (R, OH), Majority Whip James Clyburn (D, SC), and Minority Whip Eric Cantor (R, VA). The all-time longest continuously serving member of the House was John Dingell (D, MI), in office since 1955.

The top-ranking members of the Senate were Majority Leader Harry Reid (D, NV), Minority Leader Mitch McConnell (R, KY), Majority Whip Richard Durbin (D, IL), and Minority Whip Jon Kyl (R, AZ). Robert Byrd (D, WV), president pro tempore of the Senate, had set records both for Senate tenure (more than 51 years) and for combined House and Senate service by the time of his death June 28, 2010, at the age of 92. Byrd's successor as president pro tempore was 8-term Sen. Daniel Inouye (D, HI). Edward M. "Ted" Kennedy (D, MA) died in office Aug. 25, 2009, at the age of 77, after serving more than 46 years in the Senate.

Ethics. Freshman Rep. Eric Massa (D, NY) resigned his seat Mar. 8, 2010, after he was accused of sexually harassing a male aide. Rep. Mark Souder (R, IN), an 8-term congressman, left office May 21, 2010, after admitting that he had carried on an extramarital affair with a female staffer.

Rep. Charles Rangel (D, NY) surrendered his chairmanship of the House Ways and Means Committee Mar. 3, 2010, after he was cited by the House Ethics Committee for violating congressional travel restrictions. On July 29, the committee charged Rangel with 13 specific violations of House rules and federal statutes. In documents released Aug. 9, 2010, the committee alleged that Rep. Maxine Waters (D, CA) had violated House rules by allowing her chief of staff (who was also her grandson) to extend "special favors" to a failing bank in which her husband held an at-risk investment worth about \$200,000.

Unfinished Business. Shortly before adjourning Sept. 30, 2010, for the midterm election campaign, Congress passed a stopgap measure—the Continuing Appropriations Act, 2011—that provided funds to keep the government running through Dec. 3. At the time of adjournment, Congress had passed no regular appropriations measures for the 2011 fiscal year. Legislators had also been unable to agree on major energy legislation or on whether to renew the so-called Bush tax cuts, which were passed in 2001 and 2003 under Pres. George W. Bush and were due to expire at the end of 2010.

For Further Information. Following is a summary of major actions taken by the 111th Congress through Oct. 31, 2010. Measures that have become law are identified by their Public Law (PL) number. Detailed legislative information can be accessed via the Internet at thomas.loc.gov.

Major Actions of Congress, 2009

Equal Pay. Lilly Ledbetter Fair Pay Act; makes it easier for women and minorities to challenge workplace pay discrimination. Passed by the Senate Jan. 22, 61-36; passed by the House Jan. 27, 250-177; signed by Pres. Obama Jan. 29 (PL 111-2).

Economic Stimulus. American Recovery and Reinvestment Act; \$787 bil stimulus measure provides \$212 bil in tax cuts and \$575 bil in new federal spending, including \$100 bil for education, \$87 bil for Medicaid, \$61 bil for transportation and housing infrastructure, \$45 bil for energy conservation and alternative energy, and \$39 bil for unemployment insurance benefits and job training; raises the national debt ceiling to \$12.1 tril. Passed by the House Feb. 13, 246-183; passed by the Senate Feb. 13, 60-38; signed by Pres. Obama Feb. 17 (PL 111-5).

National Service. Serve America Act; expands the number of AmeriCorps community service volunteers from 75,000 to 250,000. Passed by the House Mar. 18, 321-105; passed by the Senate Mar. 26, 79-19; final votes by the House on resolving differences Mar. 31, 275-149; signed by Pres. Obama Apr. 21 (PL 111-13).

Credit Cards. Credit Card Accountability, Responsibility, and Disclosure (CARD) Act; limits ability of credit card issuers to hike interest rates and impose fees on cardholders. Passed by the House Apr. 30, 357-70; passed by the Senate (as amended) May 19, 90-5; final votes by the House on resolving differences May 20; signed by Pres. Obama May 22 (PL 111-24).

Sotomayor Confirmation. Senate acts on Pres. Barack Obama's May 26 nomination of Sonia Sotomayor to replace retiring Supreme Court Associate Justice David Souter. Confirmed by the Senate Aug. 6, 68-31.

Defense, War Funding, Hate Crimes. National Defense Authorization Act for 2010 fiscal year; appropriates \$550 bil for Pentagon operations, provides \$130 bil for Iraq and Afghanistan wars, and makes it a federal crime to assault someone based on sexual orientation or gender identity. Passed by the House Oct. 8, 281-146; passed by the Senate Oct. 22, 68-29; signed by Pres. Obama Oct. 28 (PL 111-84).

Major Actions of Congress, 2010

National Debt. Raises statutory debt limit to \$14.3 tril. Passed by the Senate Jan. 28, 60-39; passed by the House Feb. 4, 233-187; signed by Pres. Obama Feb. 12 (PL 111-139).

Health Care. Patient Protection and Affordable Care Act; extends health insurance to some 32 mil Americans over a 10-year period; bars insurers from revoking coverage when people get sick or denying coverage for preexisting conditions; as of 2014, mandates that most U.S. citizens and legal residents obtain health insurance. Passed by the Senate Dec. 24, 60-39; final vote by the House on resolving differences Mar. 21, 219-212; signed by Pres. Obama Mar. 23 (PL 111-148).

Financial Reform. Dodd-Frank Wall Street Reform and Consumer Protection Act; establishes Consumer Financial Protection Bureau, expands federal oversight of derivative securities, limits speculative trading by banks, and expands federal authority to take over very large financial firms verging on collapse. Passed by the House June 30, 237-192; passed by the Senate July 15, 60-39; signed by Pres. Obama July 21 (PL 111-203).

War Funding. Supplemental appropriations provide \$59 bil for troop surge in Afghanistan and other programs, raising cumulative spending on Afghanistan and Iraq wars to more than \$1 tril since 2001. Passed by the House Mar. 24, 239-175; passed by the Senate (as amended) May 27, 67-28; final vote by the House on resolving differences July 22, 308-114; signed by Pres. Obama July 29 (PL 111-212).

Kagan Confirmation. Senate acts on Pres. Barack Obama's May 10 nomination of Elena Kagan to replace retiring Supreme Court Associate Justice John Paul Stevens. Confirmed by the Senate Aug. 5, 63-37.

Aid for Small Businesses. Small Business Jobs Act; establishes a \$30 bil loan fund and provides \$12 bil in tax incentives. Passed by the House June 17, 241-182; passed by the Senate (as amended) Sept. 16, 61-38; final vote by the House on resolving differences Sept. 23, 237-187; signed by Pres. Obama Sept. 27 (PL 111-240).

U.S. Supreme Court, 2009-10

The U.S. Supreme Court’s 2009-10 term began Oct. 5, 2009, and concluded June 28, 2010, for its summer recess. The justices decided 87 cases (73 of which carried signed opinions), an increase from 79 in the 2008-09 term and 71 in 2007-08. The court issued 17 rulings (20%) by a 5-4 majority, a decline from 23 (29%) in 2008-09.

Membership. Chief Justice John G. Roberts Jr. presided over his fifth full term on the court. The eight associate justices, by order of seniority, were John Paul Stevens, Antonin Scalia, Anthony M. Kennedy, Clarence Thomas, Ruth Bader Ginsburg, Stephen G. Breyer, Samuel A. Alito Jr., and Sonia Sotomayor, who served her first term as David H. Souter’s replacement. See also the historical listing of justices on p. 503. Justice Stevens announced Apr. 9, 2010, in a letter to Pres. Barack Obama, that he would retire at the end of the term after 34 years on the court; Pres. Obama nominated Solicitor General Elena Kagan May 10, 2010, to fill his vacated seat. Following confirmation hearings, Kagan was confirmed in the Senate by a 63-37 vote Aug. 5, 2010, as the 112th justice and fourth woman ever to serve on the Supreme Court; she was sworn in by Chief Justice Roberts Aug. 7, 2010.

In 2009-10, Roberts, Scalia, Thomas, and Alito tended to vote together as a conservative bloc, while Stevens, Ginsburg, Breyer, and Sotomayor comprised the court’s liberal wing. Kennedy was often the swing vote on key 5-4 rulings. Chief Justice Roberts and Justice Kennedy were in the majority 91% of the time.

Following are summaries of major decisions issued during the 2009-10 term. Detailed information on Supreme Court activities and opinions may be accessed at www.supremecourtus.gov. A more extensive archive of recent and historic rulings is available through Cornell Law School’s Legal Information Institute: www.law.cornell.edu/supct

Notable Supreme Court Decisions, 2009-10

Note: The columns on the right provide information on how each justice voted. Shading indicates a justice who was part of the majority. MO = justice authored majority opinion; CO = justice authored concurring opinion; DO = justice authored dissenting opinion. CD in part = justice authored opinion containing both concurring and dissenting opinions.

Business

In *Skilling v. United States* and *Black v. United States*, the Supreme Court June 24, 2010, ruled unanimously that a 1988 law used to prosecute corruption suspects was unconstitutionally vague. Known as the “honest services” law, the statute had been used to prosecute business leaders and politicians.

Stevens	Ginsburg	Breyer	Sotomayor	Kennedy	Scalia	Thomas	Alito	Roberts
	MO		CD in part	CO	CO		CO	

Campaign Finance

The court Jan. 21, 2010, ruled 5-4 that a federal law barring corporations from using their general treasury funds to finance campaign advertisements was unconstitutional. The sweeping decision in *Citizens United v. Federal Election Commission* overturned two Supreme Court precedents, struck down provisions of two federal laws, and cast doubt on the validity of dozens of state laws aimed at minimizing corporate influence in electoral politics.

CD in part				MO	CO	CD in part		CO
------------	--	--	--	----	----	------------	--	----

Capital Punishment

In a 5-4 vote, the court ruled May 17, 2010, in *Graham v. Florida* that juveniles who had committed nonhomicide crimes could not be sentenced to life without parole, deeming the practice a violation of the Eighth Amendment’s ban on “cruel and unusual punishment.”

Defendants’ Rights

The court June 1, 2010, ruled 5-4 that suspects must explicitly evoke their right to remain silent if they wanted to protect themselves from self-incrimination during a police interrogation. The decision, *Berghuis v. Thompkins*, circumscribed suspect protections that had been established by the 1966 case *Miranda v. Arizona*.

The court Feb. 24, 2010, ruled in *Maryland v. Shatzer* that police could resume an interrogation of a suspect 14 days after the suspect had requested the presence of a lawyer under his Miranda rights.

In *United States v. Comstock*, the court May 17, 2010, ruled 7-2 that the federal government could continue to detain “mentally ill, sexually dangerous” convicts after they had completed their prison terms.

			DO	MO

Gun Rights

The court June 28, 2010, ruled 5-4 that state and local gun control laws must conform to the Second Amendment, which protected an individual’s right to bear arms. The case, *McDonald v. Chicago*, expanded on the individual gun ownership protections first established in the 2008 case *District of Columbia v. Heller*.

DO		DO			CO	CO	MO	
----	--	----	--	--	----	----	----	--

Terrorism

The court June 21, 2010, ruled 6-3 in *Holder v. Humanitarian Law Project* that provisions in the 2001 USA PATRIOT Act made it illegal to knowingly offer nonviolent assistance, including advice about peaceful resistance and petitioning the United Nations, to groups on the U.S. government’s list of terrorist groups.

		DO						MO
--	--	----	--	--	--	--	--	----

Religion

In *Christian Legal Society v. Martinez*, the court June 28, 2010, ruled 5-4 that a public school had not violated the Constitution by refusing to officially recognize a Christian student group that limited the membership of homosexuals.

The court Apr. 28, 2010, in a 5-4 decision in *Salazar v. Buono*, overturned a lower court ruling that had forbidden the federal government from transferring ownership of a World War I memorial in the Mojave National Preserve to private hands. The memorial consisted of a cross, and critics said its presence on federal land violated the First Amendment.

Notable Quotes, 2010

National News

"If we ignore history, we're doomed to bail it out again."

—Phil Angelides, chair of the bipartisan Financial Crisis Inquiry Commission, Jan. 13, opening hearings into the 2008 financial crisis.

"It was a classic case of everyone getting caught napping."

—Obama adviser David Axelrod, on Republican Scott Brown's upset victory over Democrat Martha Coakley in a Jan. 19 special election to replace the late Sen. Ted Kennedy (D, MA).

"I didn't choose to tackle this issue to get some legislative victory under my belt. And by now, it should be fairly obvious that I didn't take on health care because it was good politics."

—Pres. Barack Obama, in his State of the Union address, Jan. 27.

"I think that it would be absurd to not consider what it is that I can potentially do to help our country."

—Sarah Palin, former Alaska governor and 2008 Republican vice-presidential candidate, on her possibly seeking the presidency in 2012; in an interview broadcast Feb. 7 on Fox News.

"I'm reminded of that every day."

—Sen. John McCain (R, AZ), during a televised health-care-reform summit Feb. 25, in response to Pres. Obama's admonishment that "We're not campaigning anymore. The election is over."

"I was also going to give a graduation speech in Arizona this weekend, but with my accent I was afraid they would try to deport me."

—Gov. Arnold Schwarzenegger (R, CA), making light of Arizona's controversial new immigration law, May 10, in a commencement speech at Emory University.

"I hear comments sometimes that large oil companies are greedy companies or don't care, but that is not the case with BP. We care about the small people."

—BP chairman Carl-Henric Svanberg, June 16, during efforts to contain and clean up the massive Gulf of Mexico oil spill that began Apr. 20. He later apologized for using the phrase "small people."

"It's like picking a team when you really don't want to root for either team."

—College student Kristin Johnson on the U.S.'s two major political parties, reported in a *New York Times* story, Sept. 3.

"The real battlefield, the real battle we must wage together today, is not between Muslims and non-Muslims, but it is between moderates of all faith traditions against the extremists of all the faith traditions. We must not let the extremists, whatever their faith, whatever their political persuasion, hijack the discourse and hijack the media."

—Imam Feisal Abdul Rauf, Sept. 13, speaking of his controversial plan to build an Islamic cultural center and mosque near the World Trade Center site in Manhattan.

"I dabbled into witchcraft—I never joined a coven. But I did, I did ... I dabbled into witchcraft. I hung around people who were doing these things ... We went to a movie and then had a midnight picnic on a Satanic altar."

—Delaware Republican senatorial candidate Christine O'Donnell, in a tape recorded in 1999 for an unaired program, aired Sept. 17 by TV comedian/pundit Bill Maher.

War and Terrorism

"We dodged a bullet, but just barely."

—Pres. Barack Obama Jan. 5, on lapses that allowed a would-be terrorist to attempt to detonate a bomb aboard a Detroit-bound airliner on Christmas in 2009.

"While he may have terroristic tendencies at home, he does not have those on a plane."

—Photojournalist Najlah Feanny Hicks, on her 8-year-old son's inclusion on the government's terrorist watch list, in a *New York Times* story published Jan. 14.

"It ought to go with a healthy dose of thanks to George Bush."

—Former Vice Pres. Dick Cheney, Feb. 14 on ABC's *This Week*, countering Joe Biden's assertion that the Obama administration deserved credit for ending the war in Iraq.

"It's been a while."

—CIA Director Leon Panetta, answering question about when the U.S. last "had good intelligence" on whereabouts of al-Qaeda leader Osama bin Laden; June 27 on ABC's *This Week*.

"I have stories on all of you, photos of many, and I know a *Rolling Stone* reporter."

—Gen. Stanley McChrystal, former commander of U.S. and NATO forces in Afghanistan, at his July 23 retirement ceremony, joking about the *Rolling Stone* article that helped bring his 34-year military career to a close.

"Through this remarkable chapter in the history of the United States and Iraq, we have met our responsibility. Now, it's time to turn the page."

—Pres. Obama, Aug. 31, announcing that all U.S. combat units were now withdrawn from Iraq.

Around the World

"It's like trying to find a needle in a haystack, and each day the needles are disappearing."

—Rescue worker Steven Chin, Jan. 21, on continuing efforts to find survivors in the rubble after an earthquake hit southern Haiti Jan. 12.

"The greatest persecution of the church doesn't come from enemies on the outside but is born from the sin within the church."

—Pope Benedict XVI, May 11, speaking to reporters about the widespread sexual-abuse scandal in the Roman Catholic Church.

"I'm way too old to party this much, but you have to make an exception for something that took us 80 years to win."

—Soccer fan Gonzalo Fernandez, 61, celebrating Spain's July 11 World Cup win over the Netherlands.

"Pakistan is facing a slow-motion tsunami."

—Sec. Gen. Ban Ki-moon, addressing a special session of the UN General Assembly, Aug. 19, as summer floods left millions of Pakistanis homeless.

"You won't be left alone, nor have you been alone a single moment."

—Chilean Pres. Sebastián Piñera, Aug. 24, speaking on an intercom to 33 miners trapped a half-mile underground.

"It's like asking us to go naked."

—Oumeima Naceri, a young Muslim woman, speaking about legislation in France that would ban the wearing of face-concealing garments in public; the measure passed Sept. 14.

People

"When I was a little boy, I remember watching *The Tonight Show with Johnny Carson* and thinking, 'Someday, I'm going to host that show for 7 months.'"

—Conan O'Brien, in his monologue as *Tonight Show* host, Jan. 12; he quit the show after 7 months rather than agree to go on air a half-hour later so the time slot could go to Jay Leno.

"All I've ever wanted was to be able to just go to my own school's prom with my girlfriend."

—Constance McMillan, after her Fulton, MO, high school prom was cancelled Mar. 10, because she wanted to bring her girlfriend as her date and wear a tuxedo.

"Ain't nobody selling records unless you Susan Boyle."

—Rapper T-Pain, complaining that album sales were so sluggish he was not going to release new ones, in an interview with MTV reported June 16.

"I heard people say Larry didn't understand Lady Gaga. Who understands Lady Gaga?"

—Comic Bill Maher, June 29, disputing the idea that Larry King's just-announced plan to retire as host of *Larry King Live* was overdue.

"For 20 years, I thought about it. But you never think you're going to do it."

—Former flight attendant Steven Slater, after making headlines Aug. 9 for suddenly quitting his job and sliding down the plane's emergency chute onto the tarmac.

Offbeat News Stories, 2010

A Very Modest Proposal

Every state has a laundry list of state symbols—such as flowers, songs, and birds—that are considered emblematic. Wisconsin already has a state dance (polka), beverage (milk), and grain (corn). This year, they almost added the first state microbe in the nation.

On Apr. 15, 2010, the Wisconsin Assembly passed a bill naming *Lactococcus lactis* the official state microbe. Wisconsin is the nation's largest producer of cheese, and *Lactococcus lactis* is an important part of the cheese-making process. The bacterium converts the lactose in milk into lactic acid, which makes the milk curdle, forming curds that are used to make cheese. Without *Lactococcus lactis*, there would be no cheddar, no Colby, no cottage cheese—small wonder that the Assembly passed the measure, 56-41. But the Wisconsin Senate was not convinced, letting the bill die without a vote, so the microbes will have to wait for their time in the spotlight.

What the L?

What's in a name? Employees at the Chilean mint may have been asking that question after a spelling error was discovered on more than a million of the country's 50-peso coins: instead of CHILE, the coins read CHIIE. The error remained largely unnoticed until the *El Mercurio* newspaper broke the story in Dec. 2009.

The engraver explained that he had accidentally rubbed out the bottom of the "L" while fixing a different problem in 2008, and that he had no idea of the error until a coin collector brought it to the mint's attention in Oct. 2009. This was only one of several recent problems at the mint, and a number of employees—including the engraver—lost their jobs. While several sellers on eBay were billing this as a "rare coin" with an outrageous markup, they're actually all too common, and worth only the 10-cent face value.

To the Emergency Chute!

When flight attendant Steven Slater left his plane and his job via the escape chute on Aug. 9, it seemed to fulfill the fantasies of every American who'd dreamed of dramatically quitting a thankless job. According to officials, Slater claimed that a passenger on the flight from Pittsburgh to New York argued with him about luggage in the overhead bin, which hit him in the head during the argument. Slater requested an apology after the plane touched down, and the passenger cursed at him. Over the public address system, Slater cursed the passenger and announced that 20 years as a flight attendant were enough. He then deployed the emergency chute, grabbed a couple of beers from the galley, and slid down the chute. The police picked him up at home later that day and charged him with criminal mischief, reckless endangerment, and criminal trespass. He faced up to seven years in prison.

This story made Slater a folk hero, but whether the story is true remains an open question: police sources claimed that no passengers corroborated Slater's story, but at least two passengers publicly questioned those sources' claims. As of Nov. 2010, Slater had resigned from his job and accepted a plea agreement that included counseling and the cost of replacing the emergency chute.

Is the Hold Music by Usher?

Feel the need to unburden your soul, but don't have time to go to church? A new French service, *Le Fil du Seigneur* (Line to the Lord), offers help for busy would-be confessors. For 0.34 euro (48 cents) per minute, you can confess to an automated service, and 40% of that goes to charity. Most French people are nominally Catholic, but the vast majority doesn't attend church regularly. Camille Hautier, who set up the line in Feb. 2010 at the beginning of Lent, felt that offering a phone service on which people could confess and pray—in a broad, non-sacramental sense—might help put people back in touch with their religious roots. In its first week, the service picked up 300 calls. The service advised callers it was only an aid for prayer and meditation and could not offer absolution of serious or mortal sins. Nevertheless, the Conference of French Bishops issued a statement of disapproval, saying that it was "utterly unacceptable to allow confusion over the notion of confession," a sacrament that requires an actual priest.

License to Shill

Advertising is everywhere: on TV, radio, and the Internet. Billboards line roads, and ads appear on the sides of buses and buildings. It sometimes seems as if every possible empty place to put an ad has been exploited. Guess again.

The California Senate voted 25-0 on May 28 to investigate the possibility of a digital license plate that could display advertising when a car is parked or stopped for at least four seconds. The license number would be displayed as usual when cars were in motion but would be moved to the corner of the plate when ads were shown. California faced a \$19 billion deficit and thought this could be a lucrative source of revenue. Lawmakers touted other possible benefits, including using the plate to display Amber alerts and emergency traffic updates. In theory, drivers would get to choose which ads, if any, to display.

Octopus Calls the World Cup

Would you go to an octopus for gambling tips? A lot of people did that during this year's World Cup matches. On 8 occasions, Paul, the "Psychic Octopus" who lived at an aquarium in Oberhausen, Germany, was presented with two boxes, each with a tasty mussel inside. Each box was labeled with a country's flag. Paul was said to favor whichever team whose box he chose first. He correctly predicted all 7 of Germany's games, including 2 losses, then forecast that Spain would beat the Netherlands in the final match, played on July 11. The odds of getting 8 predictions right by random chance are 1 in 256. Iranian president Mahmoud Ahmadinejad held up the octopus as an example of "Western propaganda and superstition." Paul was only one of many animals whose psychic abilities were tested during the tournament. The Netherlands had a rival octopus, Pauline; Mani the parakeet made picks in Singapore. But neither politicians nor statisticians are likely to be paid much attention when they get in the way of a good story about a psychic octopus.

Cell Phones Save the Day

A bus driver was supposed to arrive around 9 AM on May 19 to take middle-school students in Little Ferry, NJ, on a trip to the Six Flags Great Adventure amusement park. Unfortunately, she showed up at 7:45, when 30 students were waiting for the bus to their high school in Ridgefield Park. They got onboard, the driver drove off, and the students quickly realized that she was going the wrong way.

Once they figured out what was going on, the students tried to convince the driver that they weren't supposed to be going anywhere near Great Adventure—about 110 miles away—but she wouldn't listen to them. They called parents and school officials, but the driver refused to take the phone since it's illegal to talk on a cell phone while driving in New Jersey. Eventually, the school called the state police, which caught up with the bus. An officer boarded and redirected the bus back to the high school. Parents and school officials were particularly upset that the driver had left on a field trip without an adult chaperone being present.

The Day Is Saved!

On Apr. 29, Electron Boy saved the day in Seattle. It started with a phone call from Spider-Man, who told his fellow crime-fighter that the evil Dr. Dark and Blackout Boy had trapped the entire Seattle Sounders soccer team. Electron Boy took off in a DeLorean sports car, driven by Moonshine Maiden and escorted by more than 20 police motorcycles on highways that had been shut down to speed his passage. By the end of the day, Electron Boy had freed the Sounders, saved an imprisoned electrical worker, and helped the police arrest the two supervillains at Seattle's Space Needle.

Don't let him know we told you this, but Electron Boy's secret identity is Erik Martin. He's a 13-year-old boy with cancer who always wanted to be a superhero, and the Make-A-Wish Foundation was determined to grant that wish. They pulled it off with the help of the Sounders, the Seattle police department, and hundreds of volunteers. Edgar Hansen and Jake Anderson of TV's *Deadliest Catch* played the villains. Erik called it "the best day of my life."

Historical Anniversaries, 2011

1911 – 100 Years Ago

The **Triangle Shirtwaist Co.** garment factory catches fire in New York Mar. 25; 146 mostly female workers die due to locked exits and inadequate fire safety measures.

In an antitrust case, the U.S. Supreme Court rules May 15 that **Standard Oil Co.** must be dissolved.

Amid revolutionary uprising in Mexico, Pres. **Porfirio Diaz resigns** May 25, ending more than 30 years in power.

Calbraith P. Rodgers is the **first to cross the United States by plane**, traveling from New York to Pasadena, CA, Sept. 17–Nov. 5, with a total flying time of 82 hours and 4 minutes.

Flooding on the Chang-Jiang (Yangtze) River in China kills an estimated 100,000 people in Sept.

Revolutionary soldiers—many of them followers of Sun Yat-sen—attack the governor general's office in Wuchang, China, Oct. 10, marking the **beginning of the Chinese revolution** and the end of the Ch'ing (Manchu) dynasty.

Art. Leonardo da Vinci's *Mona Lisa* is stolen from the Louvre. Marc Chagall's *I and the Village*; Henri Matisse's *L'atelier Rouge* [*The Red Studio*]; Pablo Picasso's *Still Life with a Bottle of Rum*; Egon Schiele's *Girl with Black Hair*.

Film. First film adaptation of *Anna Karenina*; Sarah Bernhardt in *La dame aux camélias* [*The Lady of the Camellias*].

1961 – 50 Years Ago

Congolese nationalist leader Patrice **Lumumba is assassinated** in Zaire Jan. 17.

43-year-old John F. **Kennedy is inaugurated** Jan. 20 as the youngest and first Catholic president.

Pres. Kennedy Mar. 13 announces the **Alliance for Progress**, a foreign-aid program to develop the economies of Latin American nations and combat communist influence.

Citizens of Washington, DC, are granted the right to vote in presidential elections with the ratification of the **23rd Amendment** Mar. 29.

Soviet cosmonaut Yuri Gagarin becomes the **first man in space** Apr. 12, orbiting Earth once on the *Vostok 1*; U.S. astronaut Alan B. Shepard Jr., aboard a *Mercury* capsule, becomes **first American in space** May 5.

A U.S.-directed invasion of Cuba's **Bay of Pigs** by Cuban exiles unsuccessfully attempts Apr. 17–19 to overthrow the regime of Prem. Fidel Castro.

South Africa withdraws from the British Commonwealth over member criticism of its **apartheid policies** and becomes an independent republic May 31.

Construction begins on the **Berlin Wall** Aug. 13 to block further East German exodus to the West.

Anti-segregation **"Freedom Rides"** protesting discrimination in transportation travel throughout the South in May and are met with violent opposition; hundreds of protesters are arrested.

Pres. Kennedy orders the first U.S. **combat detachment to Vietnam** late in the year.

Adolf **Eichmann**, considered the chief architect of the Nazi's "Final Solution," is convicted and **sentenced to death** in Jerusalem for war crimes Dec. 15.

Art. Christo and Jeanne-Claude create their first public "wrapped" work in Cologne, Germany. George Brecht's *Repository*; Jasper Johns's *Map*.

Film. Blake Edwards's *Breakfast at Tiffany's* starring Audrey Hepburn and George Peppard; Rodgers and Hammerstein's *Flower Drum Song*; *The Hustler* starring Paul Newman and Jackie Gleason; Stanley Kramer's *Judgment at Nuremberg* starring Burt Lancaster, Spencer Tracy, and Richard Widmark; Elia Kazan's *Splendor in the Grass* starring Warren Beatty and Natalie Wood; Akira Kurosawa's

Literature. *The Secret Garden* by Frances Hodgson Burnett; *Jennie Gerhardt* by Theodore Dreiser; *South Sea Tales* by Jack London; *Mother* by Kathleen Norris; *Ethan Frome* by Edith Wharton; *The Winning of Barbara Worth* by Harold Bell Wright.

Music. Richard Strauss's *Der Rosenkavalier*.

Nonfiction. *Principles of Scientific Management* by Frederick Taylor; *My Larger Education* by Booker T. Washington.

Pop music. Irving Berlin's "Alexander's Ragtime Band"; "Oh You Beautiful Doll" by A. Seymour Brown and Nathaniel Ayer; Harry Lauder's "Roamin' in the Gloamin'".

Science and technology. Marie Curie is awarded the Nobel Prize in Chemistry. IBM is formed as Computing-Tabulating-Recording Corp. Ernest Rutherford pioneers the planetary model of the atom. H. Kamerlingh Onnes develops theory on superconductivity of metals.

Sports. First Indianapolis 500 race is held May 30.

Theater. *Around the World, Bought and Paid For*, *Kismet*, *The Pink Lady*.

Miscellaneous. The Yale Peruvian Expedition of 1911 rediscovers Machu Picchu in Peru. The Carnegie Corporation is founded with initial endowment of \$125 million.

Yojimbo. *West Side Story* is released and goes on to win 10 Academy Awards.

Literature. Roald Dahl's *James and the Giant Peach*; Joseph Heller's *Catch-22*; Norton Juster's *The Phantom Tollbooth*; J. D. Salinger's *Franny and Zooey*; Muriel Spark's *The Prime of Miss Jean Brodie*; John Steinbeck's *The Winter of Our Discontent*. Grove Press publishes Henry Miller's *Tropic of Cancer* in the U.S., leading to landmark obscenity trial.

Music. Dmitri Shostakovich's *Symphony No. 12 (The Year of 1917)*; Robert Ward's *The Crucible*. Luciano Pavarotti begins his professional career in Puccini's *La Bohème*.

Nonfiction. Jane Jacobs's *The Death and Life of Great American Cities*; Webster's *Third New International Dictionary*.

Pop music. Bob Dylan debuts in Greenwich Village. Patsy Cline's "I Fall to Pieces"; Jimmy Dean's "Big Bad John"; Judy Garland's *Judy at Carnegie Hall*; Ben E. King's "Stand by Me"; Etta James's "At Last"; Bobby Lewis's "Tossin' and Turnin'"; Henry Mancini's "Moon River"; The Marcells' "Blue Moon"; Del Shannon's "Runaway".

Science and technology. Before a joint session of Congress, Pres. Kennedy commits the U.S. to putting a man on the moon before the end of the decade.

Sports. *Wide World of Sports* debuts on ABC. Roger Maris hits 61st home run, setting new single-season record; instant replay used during football games on ABC.

Television. Federal Communications Commission Chair Newton Minow calls television a "vast wasteland." *Gunsmoke* and *Wagon Train* are highest-rated shows. *The Dick Van Dyke Show*, *Mister Ed*, and *The Mike Douglas Show* debut.

Theater. Harold Pinter's *The Caretaker*; *How to Succeed in Business Without Really Trying*; *A Man for All Seasons*; Eugene Ionesco's *The Rhinoceros*; *Mary, Mary*.

Miscellaneous. The Peace Corps is created by an executive order of Pres. Kennedy.

1986 – 25 Years Ago

The space shuttle **Challenger explodes** 73 seconds after liftoff Jan. 28, killing 6 astronauts and “Teacher in Space” Christa McAuliffe.

Haiti’s President-for-Life Jean Claude Duvalier, a.k.a. **Baby Doc**, flees Feb. 7, ending the Duvalier family’s 28-year dictatorship.

“**People Power**” protests and international pressure oust Philippine Pres. Ferdinand Marcos, ending his 20-year rule and inaugurating Corazon Aquino Feb. 25.

Charging Libyan leader **Muammar al-Qaddafi** with ordering a Berlin dance club bombing that killed three, including an American serviceman Apr. 5, Pres. Ronald Reagan orders air strikes Apr. 14 on “**terrorist-related targets**” in Libya.

In the worst nuclear accident in history, **explosions and fire at the Chernobyl**, Ukraine nuclear power plant Apr. 26 leave thousands dead or disabled; radioactive material spreads throughout Europe.

More than 1,700 people are killed Aug. 21 when poisonous carbon-dioxide gas erupts from **Lake Nyos** in Cameroon.

Pres. Reagan’s Supreme Court nominations—**William Rehnquist** as chief justice and **Antonin Scalia** as associate justice—are confirmed Sept. 17.

Pres. Reagan Oct. 22 signs into law a sweeping **tax code overhaul**, lowering maximum tax rates for individuals and corporations.

The **Iran-Contra affair** begins to come to light Nov. 25 as Pres. Reagan confirms that the proceeds of covert arms deals with Iran were diverted to weapons for Contra rebels in Nicaragua.

Congress overrides Pres. Reagan’s veto and places **economic sanctions on South Africa** Oct. 2.

Art. *From Courbet to Cezanne: A New 19th Century* displays 130 works from the Musée D’Orsay at the Brooklyn Museum; Keith Haring’s “Crack is Wack” mural in New York City; Andrew Wyeth’s 247-item “Helga” series is revealed.

Film. James Cameron’s *Aliens* starring Sigourney Weaver; David Lynch’s *Blue Velvet*; Martin Scorsese’s *The Color of Money* starring Paul Newman; John Hughes’s *Ferris Bueller’s Day Off*; Woody Allen’s *Hannah and Her Sisters*; Jim Henson’s *Labyrinth* starring David Bowie and

Jennifer Connelly; *Lucas* starring Corey Haim; Francis Ford Coppola’s *Peggy Sue Got Married* starring Kathleen Turner; Oliver Stone’s *Platoon*; *Pretty in Pink* starring Molly Ringwald; *A Room With a View*; Alex Cox’s *Sid and Nancy*; Rob Reiner’s *Stand by Me*; Tony Scott’s *Top Gun* starring Tom Cruise and Val Kilmer.

Literature. Robert Penn Warren named America’s poet laureate by the Library of Congress. *The Old Devils* by Kingsley Amis; *Maus: A Survivor’s Tale, Part I* by Art Spiegelman; *A Summons to Memphis* by Peter Taylor.

Music. *The Flight into Egypt* by John Harbison.

Nonfiction. *Voyagers to the West* by Bernard Bailyn; *Fatherhood* by Bill Cosby; *Arctic Dreams* by Barry Lopez; *Bearing the Cross: Martin Luther King Jr. and the Southern Christian Leadership Conference* by David J. Garrow.

Pop music. First artists are inducted into Rock and Roll Hall of Fame; Dolly Parton’s “Dollywood” theme park opens. The Bangles’ “Walk Like an Egyptian,” Elvis Costello’s *King of America*; Falco’s “Rock Me Amadeus”; Whitney Houston’s “Greatest Love of All”; Madonna’s “Papa Don’t Preach”; Pet Shop Boys’ “West End Girls”; Prince’s “Kiss”; Run-DMC’s *Raising Hell*; Paul Simon’s *Graceland*; The Smiths’ *The Queen Is Dead*; Sonic Youth’s *EVOL*.

Science and technology. AZT is the first medication to show promise treating AIDS. Study shows vast depletion of ozone layer over Antarctica. Halley’s Comet reappears.

Sports. Greg LeMond becomes first American to win Tour de France. 20-year-old Mike Tyson KO’s Trevor Berbick to become youngest heavyweight champion in history.

Television. Oprah Winfrey’s syndicated talk-show begins broadcasting; *Designing Women*, *L.A. Law*, *Pee-wee’s Playhouse* debut.

Theater. *I’m Not Rappaport* wins Tony for Best Play.

Miscellaneous. Martin Luther King Day is observed as a federal holiday for the first time Jan. 20. Media reporting of a crack cocaine “epidemic” reaches fever pitch. “Hands Across America” event raises funds for hunger and homeless charities. 100th birthday celebration for Statue of Liberty.

WORLD ALMANAC EDITORS’ PICKS
2010 Time Capsule

The editors of *The World Almanac* have selected the following items as representative of the year 2010:

1. A copy of the Patient Protection and Affordable Care Act, the controversial health-care bill signed by Pres. Barack Obama Mar. 23, 2010.
2. Apple’s iPad tablet computer, released in Apr. 2010, loaded with the year’s hit movies and TV shows, including *Avatar*, which smashed box-office records in early 2010 to become the top-grossing movie of all time.
3. Video replay of umpire Jim Joyce’s blown call that cost Detroit Tigers pitcher Armando Gallaraga a perfect game June 2, 2010.
4. A vuvuzela, one of the thousands of plastic horns that droned incessantly in the South African stadiums hosting the World Cup soccer tournament June-July 2010.
5. The *Rolling Stone* article containing comments about the Obama administration and NATO allies made by Afghanistan commander Gen. Stanley McChrystal and his staff, which cost the general his job June 23, 2010, when Pres. Obama accepted his resignation.
6. Vial of ash from the Eyjafjallajökull volcano that erupted Apr. 14, 2010, in Iceland, disrupting air traffic and stranding millions of travelers throughout Europe.
7. A tar ball retrieved from a Gulf shore beach during the three-month spill that followed the Apr. 20, 2010, blowout of the Deepwater Horizon drilling rig.
8. A 2010 Census form, which 72% of Americans had filled out and returned by mail as of Apr. 28, 2010.
9. Much-lampooned campaign video released Oct. 4, 2010, by Christine O’Donnell, the Republican nominee for the U.S. Senate from Delaware, which begins with O’Donnell saying, “I’m not a witch... I’m you.”
10. The *Fénix 2* capsule that rescued 33 Chilean miners from their underground captivity Oct. 13, 2010, after more than two months of confinement following a cave-in.

ECONOMICS

Index of Leading Economic Indicators

Source: The Conference Board

The index of leading economic indicators is used to project the U.S. economy’s performance. The index is made up of 10 measurements of economic activity that tend to change direction in advance of the overall economy. The index has predicted economic downturns from 8 to 20 months in advance and recoveries from 1 to 10 months in advance; however, it can be inconsistent, and has occasionally shown “false signals” of recessions. The following components make up the Leading Economic Index:

- Average weekly hours of production workers in manufacturing
- Average weekly initial claims for unemployment insurance, state programs
- Manufacturers’ new orders for consumer goods and materials, adjusted for inflation
- Vendor performance (slower deliveries diffusion index)
- Stock prices, 500 common stocks
- Manufacturers’ new orders, nondefense capital goods industries, adjusted for inflation
- New private housing units authorized by local building permits
- Money supply: M-2, adjusted for inflation
- Interest rate spread, 10-yr Treasury bonds less federal funds
- Consumer expectations (researched by Univ. of Michigan)

Consumer Price Index

The Consumer Price Index (CPI) is a measure of the change in prices over time of one or more kinds of basic consumer goods and services.

From Jan. 1978, the Bureau of Labor Statistics began publishing CPIs for two population groups: (1) a CPI for all urban consumers (CPI-U), which covers about 87% of the total population; and (2) a CPI for urban wage earners and clerical workers (CPI-W), which covers about 32% of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, retirees, and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels; transportation fares; charges for doctors' and dentists' services; drug prices; and prices of other goods and services bought for day-to-day living. The index currently measures price changes from a designated reference period, 1982-84, which equals 100.0. Use of this reference period began in Jan. 1988.

(1) Figures may not add up to totals because of rounding and incomplete enumeration. (2) National income is the aggregate of labor and property earnings that arise in the production of goods and services. It is the sum of employee compensation, proprietors' income, rental income, adjusted corporate profits, and net interest. It measures the total factor costs of goods and services produced by the economy. Income is measured before deduction of taxes. Total national income figures include adjustments not itemized.

Distribution of U.S. Total Personal Income, 1930-2009

Source: Bureau of Economic Analysis, U.S. Dept. of Commerce; in billions of current dollars; as of Aug. 27, 2010

Year	Personal income	Personal taxes and nontax payments	Disposable personal income	Personal outlays	Personal savings As % of disposable income
1930	\$76.1	\$1.6	\$74.6	\$71.6	\$2.9 4.0%
1940	78.4	1.7	76.8	72.4	4.3 5.7
1950	228.0	18.9	209.9	195.0	14.9 7.1
1960	411.3	46.1	365.2	338.9	26.3 7.2
1970	838.6	103.1	735.5	666.1	69.4 9.4
1980	2,301.5	298.9	2,002.7	1,806.4	196.3 9.8
1990	4,846.7	592.7	4,254.0	3,977.3	276.7 6.5
1995	6,200.9	743.9	5,457.0	5,170.8	286.3 5.2
2000	8,559.7	1,232.3	7,327.2	7,114.1	213.1 2.9
2001	8,883.3	1,234.8	7,648.5	7,443.5	204.9 2.7
2002	9,060.1	1,050.4	8,009.7	7,727.5	282.2 3.5
2003	9,378.1	1,000.3	8,377.8	8,088.0	289.8 3.5
2004	9,937.2	1,047.8	8,889.4	8,585.7	303.7 3.4
2005	10,485.9	1,208.6	9,277.3	9,149.6	127.7 1.4
2006	11,268.1	1,352.4	9,915.7	9,680.7	235.0 2.4
2007	11,912.3	1,488.7	10,423.6	10,208.9	214.7 2.1
2008	12,391.1	1,438.2	10,952.9	10,505.0	447.9 4.1
2009	12,174.9	1,140.0	11,034.9	10,379.6	655.3 5.9

Note: Personal income minus taxes/nontax payments = disposable income; disposable income minus outlays = savings. Figures may not add up to totals because of rounding.

Poverty Rate

Source: U.S. Census Bureau, U.S. Dept. of Commerce

The poverty rate is the proportion of the population whose income falls below the government’s official poverty level, and is adjusted each year for inflation. The national poverty rate was 14.3% in 2009, statistically higher than the 2008 rate of 13.2%, and above the 2000 rate of 11.3%. The percentage of people below the poverty line in 2009 was the highest in 15 years. About 43.6 mil people in the U.S. were in poverty in 2009, up from 39.8 mil in 2008. In 2009, 20.7% of children and 8.9% of people aged 65 and older were defined as poor.

NA = Not available. (1) Percentage of total U.S. population in each category who fell below poverty level and are enumerated here. For example, of all persons in families in 2006, 10.6%, or 25,915,000, were poor. (2) Data are for one race only. The Census Bureau revised race categories in 2002; 2006 figures are not directly comparable with previous years.

Persons in Poverty, by State, 2004-09

United States Mint

Source: United States Mint, U.S. Dept. of the Treasury

The United States Mint was created on Apr. 2, 1792, by an act of Congress, which established the U.S. national coinage system. In 1799 the mint became an independent agency reporting directly to the president. It was made a statutory bureau of the Treasury Department in 1873, with a director appointed by the president. The mint manufactures and ships all U.S. coins for circulation to Federal Reserve banks and branches, which in turn issue coins to the public and business community through depository institutions. The mint also safeguards the Treasury Department’s stored gold and silver, as well as other monetary assets.

The composition of dimes, quarters, and half dollars, traditionally produced from silver, was changed by the Coinage Act of 1965, which mandated that these coins from then on be minted from a cupronickel-clad alloy and reduced the silver content of the half dollar to 40%. In 1970, legislative action mandated that the half dollar and a dollar coin be minted from the same alloy.

Mint headquarters are in Washington, DC. Mint production facilities are in Philadelphia, Denver, San Francisco, and West Point, NY. In addition, the mint is responsible for the U.S. Bullion Depository at Fort Knox, KY.

The mint offers free public tours and operates sales centers at the U.S. mints in Denver and Philadelphia. Further information

is available from the U.S. Mint, Customer Care Center, 801 9th St. NW, Washington, DC 20220; (800) USA-MINT. **Website:** www.usmint.gov

History of the dollar coin: The Eisenhower dollar was minted 1971 through 1978, when legislation called for the minting of the smaller Susan B. Anthony dollar coin. The Anthony dollar, minted through 1981, marked the first time that a woman other than a mythical figure appeared on a generally circulated U.S. coin. It was replaced in 2000 by the Golden Dollar Coin. Golden in color, with a smooth edge and wide border, the obverse depicts Sacagawea (a Shoshone woman who helped guide explorers Lewis and Clark) and her infant son. The reverse shows an American eagle and 17 stars, one for each of the states at the time of the Lewis and Clark expedition. In 2007, the mint began issuing a series of Golden Dollar Coins featuring U.S. presidents. Each includes the president’s name, likeness, and years of service. Four will be issued each year in the order in which the presidents served. Presidents serving non-consecutive terms (Grover Cleveland) will be honored twice. According to the current schedule, coins will be minted through 2016 and only presidents deceased more than two years will be honored. The reverse features the Statue of Liberty. The mint mark, “e Pluribus Unum,” and “In God We Trust,” are edge-incused.

New Circulating and Commemorative Coins

Source: United States Mint, U.S. Dept. of the Treasury

In 2010, the U.S. Mint began its America the Beautiful quarters program, an initiative to honor 56 national parks and other sites in each state, the District of Columbia, and outlying U.S. territories. Five new reverse designs will appear on the quarter-dollar each year, 2010-21, issued in the order in which the featured site was first established as a national park or site. The 2010 America the Beautiful quarters were released in the following order: Hot Springs National Park, AR; Yellowstone National Park, WY; Yosemite National Park, CA; Grand Canyon National Park, AZ; and Mt. Hood National Forest, OR. The 2011 America the Beautiful quarters will be released in the following order: Gettysburg Military National Park, PA; Glacier National Park, AK; Olympic National Park, WA; Vicksburg Military National Park, MS; Chickasaw National Recreation Area Site, OK.

The mint produced congressionally authorized commemorative coins from 1892 to 1954, and again since 1982. Through 2010, Congress has authorized 50 commemorative coin programs. Recent congressionally authorized coins are the 2007 Jamestown 400th Anniversary gold \$5 and silver \$1; the 2007 Little Rock Central High School Desegregation silver \$1; the 2008 American Bald Eagle Recovery and National Emblem gold \$5, silver \$1, and clad half dollar; the 2009 Louis Braille Bicentennial-Braille Literacy silver \$1; the 2009 Lincoln Penny Series; 2010 American Veterans Disabled for Life silver \$1; the 2010 Boy Scouts of America Centennial silver \$1; and the 2011 Medal of Honor gold \$5 and silver \$1.

Bureau of Engraving and Printing

Source: Bureau of Engraving and Printing, U.S. Dept. of the Treasury

The Bureau of Engraving and Printing manufactures the financial and other securities of the United States. It designs and prints a variety of products, including Federal Reserve notes (bills in various denominations), Treasury securities, identification cards, naturalization certificates, and other special security documents. Denominations of the various types of printings produced by the bureau range from a 1/5-cent wine stamp to a \$100,000,000 International Monetary Fund special note. Among its products are all hand-engraved invitations issued by the White House.

The first general circulation of paper money by the federal government dates back to 1861, prior to the establishment of the bureau, when, to finance the Civil War, Congress authorized the U.S. Treasury to issue non-interest-bearing demand notes, nicknamed “greenbacks” because of their color. A portrait of Pres. Abraham Lincoln appeared on the face of the first \$10 notes. By 1862, the design of U.S. currency incorporated fine-line engraving, intricate geometric lathe work patterns, a Treasury seal, and engraved signatures to aid in counterfeit

deterrence. All U.S. currency issued since 1861 remain valid and redeemable at full face value.

The Bureau of Engraving and Printing began operations by 1862, originally separating and sealing bank notes that were printed by private companies. In 1877, the bureau became the sole producer of U.S. currency. In 1894, it also began producing postage stamps. On June 10, 2005, the bureau printed its last stamps, a roll of 37-cent flag stamps; stamps are now produced by private printers.

The Federal Reserve Act of 1913 created the Federal Reserve as the nation’s central bank, and provided for currency called Federal Reserve notes. The first notes, issued the following year, were \$10 notes bearing a portrait of Pres. Andrew Jackson. In 1929, the look of U.S. currency was standardized. The national motto, “In God We Trust,” was added to paper money in 1957.

The Bureau of Engraving and Printing currently operates two facilities, one in Washington, DC, opened in 1914, and one in Fort Worth, TX, which began operations in 1991.

Denominations of U.S. Currency

Since 1969 the largest denomination of U.S. currency that has been issued is the \$100 bill. As larger-denomination bills reach the Federal Reserve Bank, they are removed from circulation. Because some discontinued currency is expected to be in the hands of holders for many years, the description of the various denominations below is continued.

Amt.	Portrait	Embellishment on back	Amt.	Portrait	Embellishment on back
\$1	Washington	Great Seal of U.S.	\$500	McKinley	Ornate denominational marking
2	Jefferson	Signers of Declaration	1,000	Cleveland	Ornate denominational marking
5	Lincoln	Lincoln Memorial	5,000	Madison	Washington Resigning as Army Commander
10	Hamilton	U.S. Treasury	10,000	Salmon Chase	Embarkation of the Pilgrims
20	Jackson	White House	100,000*	Wilson	Ornate denominational marking
50	Grant	U.S. Capitol			
100	Franklin	Independence Hall			

*For use only in transactions between Federal Reserve System and Treasury Department.

Portraits on U.S. Treasury Bills, Bonds, Notes, and Savings Bonds

The U.S. Treasury discontinued issuing treasury bill, bond, and note certificates in 1986. Since then, all issues of marketable treasury securities have been available only in book-entry form, although some certificates remain in circulation.

Denomination	EE savings bonds	Treasury bills	Treasury bonds	Treasury notes
\$50	Washington		Jefferson	
75	Adams			
100	Jefferson		Jackson	
200	Madison			
500	Hamilton		Washington	
1,000	B. Franklin	H. McCulloch	Lincoln	Lincoln
5,000	P. Revere	J. G. Carlisle	Monroe	Monroe
10,000	J. Wilson	J. Sherman	Cleveland	Cleveland
50,000	C. Glass			
100,000		A. Gallatin	Grant	Grant
1,000,000		O. Wolcott	T. Roosevelt	T. Roosevelt
100,000,000				Madison
500,000,000				McKinley

U.S. Currency Designs

The U.S. Dept. of the Treasury, the Board of Governors of the Federal Reserve System, and the U.S. Secret Service unveiled a new design for the \$100 note Apr. 21, 2010. A number of new security and anti-counterfeiting features are included in the redesign, which was initially scheduled for release in Feb. 2011 (a delay was announced Oct. 1, 2010). Upon the issue date of the new currency, older \$100 notes will remain legal tender and do not need to be exchanged for new currency.

New security features incorporated in the redesigned \$100 note include a blue 3-D security ribbon and the image of a bell in an inkwell on the front of the note. The security ribbon contains images of bells and numeral “100”s that change from one to the other as the note is tilted. The bell in the copper-colored inkwell changes color from copper to green when the note is tilted. Three security features were retained from the 1996 design: the watermark portrait of Benjamin Franklin, the security thread, and the color-changing “100” numeral.

In addition to the inkwell, phrases from the Declaration of Independence and an image of the quill used to sign it appear to the right of the Franklin portrait. The back of the note features a new illustration of the rear of Independence Hall. The Franklin portrait and Independence Hall illustrations are both larger than on the older design and are no longer encapsulated in oval frames.

The new \$100 bill is considered the last denomination of the major currency redesign that the Treasury launched in 2003: on Oct. 9, 2003, the U.S. Treasury introduced a new \$20 note, using background colors for the first time since 1905. The notes have a security thread running vertically up one side, with “USA TWENTY” and a small U.S. flag; the thread glows green under UV light. Other security features include color-shifting ink in the number “20” in the lower right corner on the note’s face. A new \$50 note with similar security features was released Sept. 28, 2004, followed by a \$10 note on Mar. 2, 2006, and a \$5 note Mar. 13, 2008.

Website: www.newmoney.gov

The U.S. \$1 Bill

Plate position: Shows where on the 32-note plate this bill was printed.

Serial number
Each bill has its own.

Federal Reserve District Number: Shows which district issued the bill.

Federal Reserve District Seal: The name of the Federal Reserve Bank that issued the bill is printed in the seal. The letter tells you quickly where the bill is from. Here are the letter codes for the 12 Federal Reserve Districts:

- A: Boston
- B: New York
- C: Philadelphia
- D: Cleveland
- E: Richmond
- F: Atlanta
- G: Chicago
- H: St. Louis
- I: Minneapolis
- J: Kansas City
- K: Dallas
- L: San Francisco

Treasurer of the U.S. signature

Series indicator
(year note’s design was first used)

Secretary of the Treasury signature

The Treasury Department seal: The balancing scales represent justice. The pointed stripe across the middle has 13 stars for the original 13 colonies. The key represents authority.

Plate serial number
Shows which printing plate was used for the face of the bill.

Reverse of the Great Seal of the United States: The pyramid symbolizes something that endures for ages. The eye, known as the “Eye of Providence,” probably comes from an ancient Egyptian symbol. The pyramid has 13 levels; at its base are the Roman numerals for 1776, the year of American independence. “Annuet Coeptis” is Latin for “God has favored our undertaking.” “Novus Ordo Seclorum” is Latin for “a new order of the ages.” Both phrases are from the works of the Roman poet Virgil.

Plate serial number
Shows which plate was used for the back.

Front of the Great Seal of the United States: The bald eagle is the national bird. The shield has 13 stripes for the 13 original colonies. The eagle holds 13 arrows (symbol of war) and an olive branch (symbol of peace). Above the eagle is the motto “E Pluribus Unum,” Latin for “out of many, one,” and a constellation of 13 stars.

Federal Deposit Insurance Corporation (FDIC)

The Federal Deposit Insurance Corporation (FDIC) is the independent deposit insurance agency created by Congress to maintain stability and public confidence in the nation’s banking system. In its unique role as deposit insurer of banks and savings associations, and in cooperation with other federal and state regulatory agencies, the FDIC seeks to promote the safety and soundness of insured depository institutions in the U.S. financial system by identifying, monitoring, and addressing risks to the deposit insurance funds. The FDIC aims to promote public understanding and sound public policies by providing financial and economic information and analyses. It seeks to minimize disruptive effects from the failure of banks and savings associations, and to ensure fairness in the sale of financial products and the provision of financial services.

To maintain its insurance funds, the FDIC assesses depository institutions insurance premiums four times a year (quarterly). The amount of the premium is based on the institution’s balance of insured deposits for the preceding quarter and the institution’s risk to the insurance fund. In 2009, Congress permanently increased the limit that the Corporation may borrow from the U.S. Treasury from \$30 bil to \$100 bil, and temporarily raised this borrowing limit to \$500 bil through the end of 2010. The FDIC’s Bank Insurance Fund and the Savings Association Insurance Fund were merged Mar. 31, 2006, to form the Deposit Insurance Fund, which stood at -\$15.2 bil on June 30, 2010, significantly lower than the Oct. 7, 2008, level of \$45.2 bil; nevertheless, it is projected to have sufficient cash to resolve projected bank failures.

U.S. Banks, 1935-2009

Source: Federal Deposit Insurance Corp.; as of June 30, 2009

Comprises all FDIC-insured commercial and savings banks, including savings and loan institutions (S&Ls).

Federal Reserve System

The Federal Reserve System is the central bank for the U.S. The system was established on Dec. 23, 1913, originally to give the country an elastic currency, provide facilities for discounting commercial paper, and improve the supervision of banking. Since then, the system’s responsibilities have been broadened. Over the years, stability and growth of the economy, a high level of employment, stability in the purchasing power of the dollar, and reasonable balance in transactions with other countries have come to be recognized as primary objectives of governmental economic policy.

The Federal Reserve System consists of the Board of Governors, the 12 District Reserve Banks and their branch offices, and the Federal Open Market Committee. Several advisory councils help the board meet its varied responsibilities.

The hub of the system is the 7-member **Board of Governors** in Washington, DC. The members of the board are appointed by the president and confirmed by the Senate, to serve 14-year terms. The president also appoints the chairman and vice chairman of the board from among the board members for 4-year terms that may be renewed. As of Oct. 2010, the board members were: Ben S. Bernanke, chair; Janet L. Yellen, vice-chair; Kevin M. Warsh; Elizabeth A. Duke; Daniel K. Tarullo; and Sarah Bloom Raskin.

The 12 **District Reserve Banks** and their branch offices serve as the decentralized portion of the system, carrying out day-to-day operations such as circulating currency and coin and providing fiscal agency functions and payments mechanism services. The 12 are in Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas, and San Francisco.

The system’s principal function is monetary policy, which it controls using three tools: reserve requirements, the discount rate, and open market operations.

Uniform **reserve requirements**, set by the board, are applied to the transaction accounts and nonpersonal time deposits of all depository institutions. Responsibility for setting the **discount rate** (the interest rate at which depository institutions can borrow money from the Reserve Banks) is shared by the Board of Governors and the Reserve Banks. Changes in the discount rate are recommended by the individual boards of directors of the Reserve Banks and are subject to approval by the Board of Governors.

The most important tool of monetary policy is **open market operations** (the purchase and sale of government securities). Responsibility for influencing the cost and availability of money and credit through the purchase and sale of government securities lies with the **Federal Open Market Committee (FOMC)**, which is composed of the 7 members of the Board of Governors, the president of the Federal Reserve Bank of New York, and 4 other Federal Reserve Bank presidents, who each serve 1-year terms on a rotating basis. The committee bases its decisions on economic and financial developments and outlook, setting yearly growth objectives for key measures of money supply and credit. The decisions of the committee are carried out by the Domestic Trading Desk of the Federal Reserve Bank of New York.

A Federal Advisory Council meets with the Federal Reserve Board four times a year to discuss business and financial conditions, as well as to make recommendations.

Federal Reserve Board Primary and Secondary Credit Rate, 1980-2010

Prior to Jan. 9, 2003, the federal reserve set a single “discount rate,” the interest rate that member banks were charged when borrowing money through the Federal Reserve System. This adjustment credit rate was replaced with two rates, the primary credit rate and secondary credit rate. The primary credit rate (listed first) is available to banks in generally sound financial condition. The secondary credit (listed second) rate is given to banks that do not qualify for the primary credit rate. Both are extended for very short terms, usually overnight. On Aug. 17, 2007, this term was temporarily extended to 30 days. Under the new system, financially sound institutions are not required to exhaust all funds before borrowing from the Fed.

(1) On Feb. 18, 2002, the U.S. treasury discontinued the 30-year constant maturity yield and reintroduced it on Feb. 9, 2006; rates in the interim are for 20-year yields. (2) Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service with an original maturity of at least 20 years. Treasury discontinued yield index after Jan. 31, 2003. Rates thereafter are for Moody's seasoned Aaa corporate bonds as listed by Federal Reserve. (3) Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service; discontinued by Treasury Jan. 31, 2003; rates thereafter are from Bond Buyer Index of general obligation, 20-year-to-maturity, mixed quality state and local bonds.

U.S. Capital Gains Tax, 1960-2010

Source: George W. Smith IV, CPA, Partner, George W. Smith & Company, P.C.; as of Oct. 2010

The following shows changes in the maximum tax rate on net long-term capital gains for individuals since 1960.

Year	Max %	Year	Max %	Year	Max %	Year	Max %	Year	Max %	Year	Max %
1960	25.0	1972	35.0 ¹	1981	20.0	1988	33.0 ²	1997	20.0 ⁴	2001	20/18 ⁶
1970	29.5	1978	28.0	1987	28.0	1990	28.0 ³	1999	20.0 ⁵	2003	20/15 ⁷
1971	32.5										

(1) From 1972 to 1976, the interplay of minimum tax and maximum tax resulted in a marginal rate of 49.125%. (2) Statutory maximum of 28%, but "phase-out" notch increased marginal rate to 33%; interplay of all "phase-outs" could produce an effective marginal rate to 49.5%. (3) The Budget Act of 1990 increased the statutory rate to 31% and capped the marginal rate at 28%; effective marginal rates could exceed 34% because of the phase-out of personal exemptions and itemized deductions. (4) New rate was for those who, after July 28, 1997, sell capital assets held for more than 18 mos. (12 mos. for sales after Dec. 31, 1997). A 10% capital gains rate applied to individuals in the 15% income tax bracket. (Those who, after July 28, 1997, but before Jan. 1, 1998, sold capital assets held 12-18 mos. to be taxed at the old top rate of 28%. Those who sold capital assets after May 6, 1997, but before July 29, 1997, to be taxed at the 20% rate, so long as such assets were held for at least a year.) (5) The IRS Restructuring and Reform Act of 1998 repealed the more-than-18-mo. holding period for sales after Dec. 31, 1997. Beginning Jan. 1, 1998, capital assets needed only be held 12 mos. to have the 20%/10% capital gains rates apply. (6) For capital assets bought after Dec. 31, 2000, and held for more than 5 years, the 20% minimum capital gains rate was lowered to 18%. The 10% rate was lowered to 8%, regardless of when the assets were bought. This provision was repealed in 2003. (7) The maximum capital gains rate for capital assets held more than one year and sold on or after May 6, 2003, was decreased to 15%. The 10% bracket was reduced to 5%. The capital gains rate for the sale of collectibles such as antiques remained at 28%, and the sale of certain depreciable real estate was to be taxed at a maximum of 25%. A 0% rate replaced the 5% tax rate for tax years beginning after Dec. 31, 2007.

2010 Federal Corporate Tax Rates

Personal service corporations (used by incorporated professionals such as attorneys and doctors) pay a flat rate of 35%.

Taxable income amount	Tax rate	Taxable income amount	Tax rate
Not more than \$50,000.	15%	\$335,001 to \$10,000,000	34%
\$50,001 to \$75,000.	25%	\$10,000,001 to \$15,000,000.	35%
\$75,001 to \$100,000.	34%	\$15,000,001 to \$18,333,333.	38%
\$100,001 to \$335,000.	39%	More than \$18,333,333	35%

Economic and Financial Glossary

Source: Reviewed by William M. Gentry, Graduate School of Business, Columbia University

Annuity contract: An investment vehicle sold by insurance companies. Annuity buyers can elect to receive periodic payments for the rest of their lives. Annuities provide insurance against outliving one's wealth.

Arbitrage: A form of hedged investment meant to capture slight differences in the prices of two related securities—for example, buying gold in London and selling it at a higher price in New York.

Balanced budget: A budget is balanced when receipts equal expenditures. When receipts exceed expenditures, there is a **surplus**; when they fall short of expenditures, there is a **deficit**.

Balance of payments: The difference between all payments, for some categories of transactions, made to and from foreign countries over a set period of time. A favorable balance of payments exists when more payments are coming in than going out; an unfavorable balance of payments obtains when the reverse is true. Payments may include gold, the cost of merchandise and services, interest and dividend payments, money spent by travelers, and repayment of principal on loans.

Balance of trade (trade gap): The difference between exports and imports, in both actual funds and credit. A nation's balance of trade is favorable when exports exceed imports and unfavorable when the reverse is true.

Bear market: A market in which prices are falling.

Bearer bond: A bond issued in bearer form rather than being registered in a specific owner's name. Ownership is determined by possession.

Bond: A written promise, or IOU, by the issuer to repay a fixed amount of borrowed money on a specified date and generally to pay interest at regular intervals in the interim.

Bull market: A market in which prices are on the rise.

Capital gain (loss): An increase (decrease) in the market value of an asset over some period of time. For tax purposes, capital gains are typically calculated from when an asset is bought to when it is sold.

Commercial paper: An extremely short-term corporate IOU, generally due in 270 days or less.

Consumer price index (CPI): A statistical measure of the change in the price of consumer goods.

Convertible bond: A corporate bond (see below) that may be converted into a stated number of shares of common stock. Its price tends to fluctuate along with fluctuations in the price of the stock and with changes in interest rates.

Corporate bond: A bond issued by a corporation. The bond normally has a stated life and pays a fixed rate of interest. Considered safer than the common or preferred stock of the same company.

Cost of living: The cost of maintaining a standard of living measured in terms of purchased goods and services. Inflation typically measures changes in the cost of living.

Cost-of-living adjustments: Changes in promised payments, such as retirement benefits, to account for changes in the cost of living.

Credit crunch (liquidity crisis): A situation in which cash for lending is in short supply.

Debenture: An unsecured bond backed only by the general credit of the issuing corporation.

Deficit spending: Government spending in excess of revenues, generally financed with the sale of bonds. A deficit increases the government debt.

Deflation: A decrease in the level of prices.

Depression: A long period of economic decline marked by low prices, high unemployment, and many business failures.

Derivatives: Financial contracts, such as options, whose values are based on, or derived from, the price of an underlying financial asset or indicator such as a stock or an interest rate.

Devaluation: The official lowering of a nation's currency, decreasing its value in relation to foreign currencies.

Discount rate: The rate of interest set by the Federal Reserve that member banks are charged when borrowing money through the Federal Reserve System.

Disposable income: Income after taxes that is available to persons for spending and saving.

Diversification: Investing in more than one asset in order to reduce the riskiness of the overall asset portfolio. By holding more than one asset, losses on some assets may be offset by gains realized on other assets.

Dividend: Discretionary payment by a corporation to its shareholders, usually in the form of cash or stock shares.

Dow Jones Industrial Average: An index of stock market prices, based on the prices of 30 companies, 28 of which are on the New York Stock Exchange.

Econometrics: The use of statistical methods to study economic and financial data.

Federal Deposit Insurance Corp. (FDIC): A U.S. government-sponsored corporation that insures accounts in national banks and other qualified institutions against bank failures.

Federal Reserve System: The entire banking system of the U.S., incorporating 12 Federal Reserve banks (one in each of 12 Federal Reserve districts), 25 Federal Reserve branch banks, all national banks, and state-chartered commercial banks and trust companies that have been admitted to its membership. The governors of the system greatly influence the nation's monetary and credit policies.

Full employment: The economy is said to be at full employment when everyone who wishes to work at the going wage-rate for his or her type of labor is employed, save only for the small amount of unemployment due to the time it takes to switch from one job to another.

Futures: A futures contract is an agreement to buy or sell a specific amount of a commodity or financial instrument at a particular price at a set date in the future. For example, futures based on a stock index (such as the Dow Jones Industrial Average) are bets on the future price of that group of stocks.

Golden parachute: Provisions in contracts of some high-level executives guaranteeing substantial severance benefits if they lose their position in a corporate takeover.

Government bond: A bond issued by the U.S. Treasury, considered a safe investment. These are divided into 2 categories—marketable and not marketable. Savings bonds cannot be bought and sold once the original purchase is made. Marketable bonds fall into several categories. Treasury bills are short-term U.S. obligations, maturing in 3, 6, or 12 months. Treasury notes mature in up to 10 years. Treasury bonds mature in 10 to 30 years. Indexed bonds are adjusted for inflation.

Greenmail: A company buying back its own shares for more than the going market price to avoid a threatened hostile takeover.

Gross domestic product (GDP): The market value of all goods and services that have been bought for final use during a period of time. It became the official measure of the size of the U.S. economy in 1991, replacing gross national product (GNP), in use since 1941. GDP covers workers and capital employed within the nation's borders. GNP covers production by U.S. residents regardless of where it takes place. The switch aligned U.S. terminology with that of most other industrialized countries.

Hedge fund: A flexible investment fund for a limited number of large investors (the minimum investment is typically \$1 million). Hedge funds use a variety of investment techniques, including those forbidden to mutual funds, such as short-selling and heavy leveraging.

Hedging: Taking 2 positions whose gains and losses will offset each other if prices change, in order to limit risk.

Individual retirement account (IRA): A self-funded tax-advantaged retirement plan that allows employed individuals to contribute up to a maximum yearly sum. With a traditional IRA, individuals contribute pre-tax earnings and defer income taxes until retirement. With a Roth IRA, individuals contribute after-tax earnings but do not pay taxes on future withdrawals (the interest is never taxed). 401(k) plans are employer-sponsored plans similar to traditional IRAs, but having higher contribution limits.

Inflation: An increase in the level of prices.

Insider information: Important facts about the condition or plans of a corporation that have not been released to the general public.

Interest: The cost of borrowing money.

Investment bank: A financial institution that arranges the initial issuance of stocks and bonds and offers companies advice about acquisitions and divestitures.

Junk bonds: Bonds issued by companies with low credit ratings. They typically pay relatively high interest rates because of the fear of default.

Leading indicators: A series of 11 indicators from different segments of the economy used by the U.S. Commerce Department to predict when changes in the level of economic activity will occur.

Leverage: The extent to which a purchase was paid for with borrowed money. Amplifies the potential gain or loss for the purchaser.

Leveraged buyout (LBO): An acquisition of a company in which much of the purchase price is borrowed, with the debt to be repaid from future profits or by subsequently selling off company assets. A leveraged buyout is typically carried out by a small group of investors, often including incumbent management.

Liquid assets: Assets consisting of cash and/or items that are easily converted into cash.

Margin account: A brokerage account that allows a person to trade securities on credit. A **margin call** is a demand for more collateral on the account.

Money supply: The currency held by the public, plus checking accounts in commercial banks and savings institutions.

Mortgage-backed securities: Created when a bank, builder, or government agency gathers together a group of mortgages and then sells bonds to other institutions and the public. The investors receive their proportionate share of the interest payments on the loans as well as the principal payments. Usually, the mortgages in question are guaranteed by the government.

Municipal bond: Issued by governmental units such as states, cities, local taxing authorities, and other agencies. Interest is exempt from U.S.—and sometimes state and local—income tax. Municipal bond unit investment trusts offer a portfolio of many different municipal bonds chosen by professionals. The income is exempt from federal income taxes.

Mutual fund: A portfolio of professionally bought and managed financial assets in which you pool your money along with that of many other people. A share price is based on net asset value, or the value of all the investments owned by the funds, less any debt, and divided by the total number of shares. The major advantage, relative to investing individually in only a small number of stocks, is less risk—the holdings are spread out over many assets and if one or two do badly the remainder may shield you from the losses. Bond funds are mutual funds that deal in the bond market exclusively. Money market mutual funds buy in the so-called money market—institutions that need to borrow large sums of money for short terms. These funds often offer special checking account advantages.

National debt: The debt of the national government, as distinguished from the debts of political subdivisions of the nation and of private business and individuals.

National debt ceiling: Total borrowing limit set by Congress beyond which the U.S. national debt cannot rise. This limit is periodically raised by congressional vote.

Option: A type of contractual agreement between a buyer and a seller to buy or sell shares of a security. A **call** option contract gives the right to purchase shares of a specific stock at a stated price within a given period of time. A **put** option contract gives the buyer the right to sell shares of a specific stock at a stated price within a given period of time.

Per capita income: The total income of a group divided by the number of people in the group.

Prime interest rate: The rate charged by banks on short-term loans to large commercial customers with the highest credit rating.

Producer price index: A statistical measure of the change in the price of wholesale goods. It is reported for 3 different stages of the production chain: crude, intermediate, and finished goods.

Program trading: Trading techniques involving large numbers and large blocks of stocks, usually used in conjunction with computer programs. Techniques include index arbitrage, in which traders profit from price differences between stocks and futures contracts on stock indexes, and portfolio insurance, which is the use of stock-index futures to protect stock investors from potentially large losses when the market drops.

Public debt: The total of a nation's debts owed by state, local, and national government. Increases in this sum, reflected in public-sector deficits, indicate how much of the nation's spending is being financed by borrowing rather than by taxation.

Recession: A mild decrease in economic activity marked by a decline in real (inflation-adjusted) GDP, employment, and trade, usually lasting from 6 months to a year, and marked by widespread decline in many sectors of the economy.

Savings Association Insurance Fund (SAIF): Created in 1989 to insure accounts in savings and loan associations up to \$100,000.

Seasonal adjustment: Statistical changes made to compensate for regular fluctuations in data that are so great they tend to distort the statistics and make comparisons meaningless. For instance, seasonal adjustments are made for a slowdown in housing construction in midwinter and for the rise in farm income in the fall after summer crops are harvested.

Short-selling: Borrowing shares of stock from a brokerage firm and selling them, hoping to buy the shares back at a lower price, return them, and realize a profit from the decline in prices.

Stagnation: Economic slowdown in which there is little growth in the GDP, capital investment, and real income.

Stock: Common stocks are shares of ownership in a corporation. For publicly held firms, the stock typically trades on an exchange, such as the New York Stock Exchange; for closely held firms, the founders and managers own most of the stock. There can be wide swings in the prices of this kind of stock. Preferred stock is a type of stock on which a fixed dividend must be paid before holders of common stock are issued their share of the issuing corporation's earnings. Preferred stock is less risky than common stock. Convertible preferred stock can be converted into the common stock of the company that issued the preferred. Over-the-counter stock is not traded on the major or regional exchanges, but rather through dealers from whom you buy directly. Blue chip stocks are so called because they have been leading stocks for a long time. Growth stocks are from companies that reinvest their earnings, rather than pay dividends, with the expectation of future stock price appreciation.

Supply-side economics: A school of thinking about economic policy holding that lowering income tax rates will inevitably lead to enhanced economic growth and general revitalization of the economy.

Takeover: Acquisition of one company by another company or group by sale or merger. A friendly takeover occurs when the acquired company's management is agreeable to the merger; when management is opposed to the merger, it is a hostile takeover.

Tender offer: A public offer to buy a company's stock; usually priced at a premium above the market.

Zero coupon bond: A corporate or government bond that is issued at a deep discount from the maturity value and pays no interest during the life of the bond. It is redeemable at face value.

Minerals

Source: U.S. Geological Survey, U.S. Dept. of the Interior; as of mid-2010

Aluminum: The second most abundant metallic element in the Earth's crust. Bauxite is the main source of aluminum, and leading bauxite-producing countries are Australia, China, Brazil, India, and Guinea. Main uses in the U.S. are transportation (33%), packaging (26%), and construction (14%).

Chromium: Chromite is the mineral from which chromium is produced, and the leading chromite-producing countries are South Africa, India, Kazakhstan, and Turkey. The metallurgical industry uses about 95% of the chromite consumed in the world; the refractory and foundry industry, 3%; and the chemical industry, 2%.

Cobalt: Used in rechargeable batteries; superalloys for jet engines; cemented carbides for cutting tools; catalysts, ceramics, and other chemical applications; permanent magnets, tool steels, and other alloys. Congo (Kinshasa), Russia, China, Australia, Cuba, Zambia, and Canada lead the world in mine production of cobalt.

Construction aggregates: Construction sand and gravel and crushed stone are two of the most accessible natural resources in the world. Construction sand and gravel is produced in every U.S. state, and crushed stone is mined in every state except Delaware. They are used mostly in construction but also in agriculture, chemicals, and metallurgy and are produced worldwide.

Copper: Uses of copper and copper alloy products in the U.S. are in building construction (50%), electrical and electronic products (21%), transportation (11%), consumer and general products (10%), and industrial machinery and equipment (8%). The leading mine producers are Chile, Peru, the U.S. (mostly in Arizona, Utah, New Mexico, and Nevada), China, Australia, Russia, Indonesia, Zambia, and Canada.

Gold: Used in the U.S. in jewelry and the arts (72%), dentistry and other industrial applications (21%), and electrical and electronic components (7%). Leading mine producers are China, the U.S. (mined in most western states and Alaska), Australia, South Africa, Russia, and Peru.

Gypsum: Used in wallboard and plaster products, cement production, and agriculture. Leading producers are China, Iran, Spain, the U.S., and Thailand.

Iron ore: The source of primary iron for the world's iron and steel industries. Leading iron ore producers (in terms of iron content) are China, Australia, Brazil, and India.

Lead: China, Australia, the U.S. (mostly in Alaska and Missouri), Peru, Mexico, and India are the world's leading producers of lead concentrates. The major end use in the U.S. is in lead-acid storage batteries (88%). The U.S. produces 14% and consumes about 17% of the world's lead metal. Most U.S. lead production (91%) is recycled material, and 96% of lead-acid batteries (mostly automotive) are recycled.

Manganese: Essential to steel production. Leading mine producers are China, Australia, South Africa, Brazil, and India.

Nickel: Vital to the stainless steel industry; and used to make superalloys. Leading mine producers are Russia, Canada, Indonesia, Australia, New Caledonia, the Philippines, and Colombia.

Phosphate rock: Primary source of phosphorus used in fertilizers, animal feed supplements, chemicals, and food. Phosphorus is an essential element for plant and animal nutrition. China, the U.S., Morocco, Russia, Brazil, and Tunisia are the world's leading producers.

Platinum-group metals (PGMs): This group consists of 6 metals: platinum, palladium, rhodium, ruthenium, iridium, and

osmium. They commonly occur together in nature and are among the scarcest of the metallic elements. In the U.S., the automotive and chemical industries use PGMs mainly as catalysts. They also are consumed in electrical, electronics, glass, dental, and medical industries. Russia and South Africa are the world's leading mine producers.

Salt: Used in chemicals, highway deicing, chemicals, agriculture, food, and water treatment. Leading producers are China, the U.S., India, Peru, Germany, and Canada.

Silver: Used in decorative, industrial, and medical applications; coins; jewelry and silverware; and photography. Silver is mined in more than 50 countries, mainly as a byproduct from gold, copper, and lead-zinc mining. Alaska and Nevada are the leading U.S. silver-producing states. Peru, China, Mexico, Chile, and Australia lead the world in mine production.

Soda ash: A raw material for glass, chemicals, and detergents, it can be mined or produced synthetically. The world's leading producers of natural soda ash are the U.S., Kenya, and Botswana.

Sulfur: Used in agricultural chemicals, oil refining, metal mining, and many other industries. It is produced as a byproduct of oil refining, natural gas processing, and nonferrous metal smelting. Leading producers are the U.S., China, Russia, Canada, Germany, and Japan.

Titanium: Ilmenite and rutile are the major mineral sources of titanium. Titanium minerals are used to produce TiO₂ pigments (94%) and other uses (6%) including alloys, ceramics, chemicals, titanium metal, and welding rod coatings. Leading mine producers are Australia, South Africa, Canada, China, India, and Norway. U.S. mine production is in Florida and Virginia.

Zinc: Used as a protective coating on steel, as diecastings, as an alloying metal with copper to make brass, and as a component of chemical compounds in rubber and paints. Leading producers of zinc ores and concentrates by zinc content are China, Peru, Australia, Canada, the U.S. (in Alaska, Idaho, Missouri, and Tennessee), and India.

U.S. Reliance on Foreign Supplies of Minerals

Source: U.S. Geological Survey, U.S. Dept. of the Interior

Mineral	% imported in 2009	Major sources (2005-08)	Major uses
Arsenic (trioxide)	100%	China, Morocco, Belgium, Hong Kong	Wood preservatives, nonferrous alloys
Asbestos	100	Canada	Roofing products, gaskets, chloralkali industry
Bauxite & alumina	100	Jamaica, Brazil, Guinea, Australia	Aluminum production, refractories, abrasives, chemicals
Cesium	100	Canada	Drilling fluids, atomic clocks, DNA separation, infrared detectors, night vision devices
Fluorspar	100	China, Mexico, South Africa	Hydrofluoric acid, aluminum fluoride, steelmaking
Graphite (natural)	100	China, Mexico, Canada, Brazil	Refractories, batteries, foundry operations, lubricants, brake linings, steelmaking
Indium	100	China, Japan, Canada, Belgium	Coatings, electrical components, semiconductors, solders, alloys
Manganese	100	South Africa, Gabon, China, Australia	Iron & steelmaking, batteries, agricultural chemicals
Mica, sheet (natural)	100	China, Brazil, Belgium, India	Electronic and electrical components
Niobium	100	Brazil, Canada, Germany, Estonia	Steelmaking, superalloys
Quartz crystal (industrial)	100	China, Japan, Russia	Electronics components, optical applications
Rare earths	100	China, Japan, France, Russia	Catalysts, metallurgy, glass polishing, ceramics, phosphors, magnets
Rubidium	100	Canada	DNA separation, fiber optics, inorganic chemicals, lamps, night vision devices
Strontium	100	Mexico, Germany	Ferrite magnets, pyrotechnics
Tantalum	100	Australia, China, Brazil, Japan	Capacitors, superalloys, cemented carbide tools
Thallium	100	Russia, Germany, Netherlands	Medical imaging, radiation detection, superconductors, glass, alloys
Thorium	100	United Kingdom, France, Canada	High-temperature ceramics, catalysts, welding electrodes
Vanadium	100	Czech Republic, South Korea, Canada, Austria	Steelmaking, catalysts
Yttrium	100	China, Japan, France	Lamp & cathode ray tube phosphors, alloys
Gallium	99	Germany, Canada, China, Ukraine	Electronic components
Gemstones	99	Israel, India, Belgium, South Africa	Jewelry, carvings, gem & mineral collections
Antimony	93	China, Mexico, Belgium	Flame retardants, transportation, chemicals, ceramics & glass
Bismuth	90	Belgium, China, United Kingdom, Mexico	Alloys, solder, ammunition, metallurgy, pharmaceuticals, chemicals
Germanium	90	Belgium, China, Germany, Russia	Fiber and infrared optics, catalysts, electronic components, solar cells
Platinum	89	South Africa, Germany, United Kingdom, Canada	Catalysts, jewelry, dental & medical alloys
Barite	80	China, India	Oil & gas well drilling fluids, fillers & extenders, chemicals
Tin	80	Peru, Bolivia, China, Indonesia	Tinplate, chemicals, solder, alloys
Rhenium	79	Chile, Netherlands	Petroleum-reforming catalysts, superalloys
Diamond (industrial stone)	78	Botswana, South Africa, Namibia, India	Abrasives, stone cutting, highway repair & construction
Stone (dimension)	78	Brazil, Italy, China, Turkey	Construction, monuments
Zinc	76	Canada, Peru, Mexico, Ireland	Galvanizing, zinc-base alloys, brass & bronze
Cobalt	75	Norway, Russia, China, Canada	Superalloys, cemented carbides, magnetic alloys, chemicals
Potash	73	Canada, Belarus, Germany, Russia	Fertilizers, chemicals
Titanium mineral concentrates	73	South Africa, Australia, Canada, Ukraine	Pigment, titanium metal, welding rod coatings, chemicals, ceramics
Titanium (sponge)	67	Kazakhstan, Japan, China, Ukraine	High-strength alloys for aerospace and nonaerospace uses
Silver	63	Mexico, Canada, Peru, Chile	Industrial applications, photography, coins & medals, jewelry & silverware
Tungsten	63	China, Germany, Canada, Bolivia	Cemented carbides, electrical & electronic components, tool steels, alloys
Peat	60	Canada	Horticulture, absorbents, filter media

World Mineral Reserve Base, 2009

Source: U.S. Geological Survey, U.S. Dept. of the Interior; as of year-end 2009

Mineral	Reserve base ¹	Mineral	Reserve base ¹
Aluminum ²	27,000 mil metric tons	Nickel	71 mil metric tons
Cobalt	6.6 mil metric tons	Phosphate rock	16,000 mil metric tons
Copper	540 mil metric tons	Platinum-group metals	71,000 metric tons
Gold	47,000 metric tons	Silver	400,000 metric tons
Iron ore	160,000 mil metric tons	Soda ash (Natural)	24,000 mil metric tons
Lead	79 mil metric tons	Titanium (ilmenite/rutile) ³	730 mil metric tons
Manganese	540 mil metric tons	Zinc	200 mil metric tons

(1) Includes demonstrated resources that are currently economic. (2) Bauxite. (3) Titanium dioxide (TiO₂) content of titanium minerals (ilmenite and rutile).

Kentucky	578	143						

Note: Average premium = Premiums/exposure per house years. A house year is equal to 365 days of insured coverage for a single dwelling. The NAIC does not rank state average expenditures and does not endorse any conclusions drawn from this data. (1) Based on the HO-3 homeowner package policy for owner-occupied dwellings, 1 to 4 family units. Provides “all risks” coverage (except those specifically excluded in the policy) on buildings and broad named-peril coverage on personal property, and is the most common package written. (2) Based on the HO-4 renters insurance policy for tenants. Includes broad named-peril coverage for the personal property of tenants. (3) Data provided by the California Dept. of Insurance. (4) Excludes policies written by Citizens Property Insurance Corp., the state’s insurer of last resort, and are not directly comparable to other states. (5) The Texas Dept. of Insurance developed home insurance policy forms that are similar but not identical to the standard forms.

Trends in U.S. Foreign Trade, 1790-2009

Source: U.S. Census Bureau and U.S. Bureau of Economic Analysis, U.S. Dept. of Commerce
(in millions of dollars)

In 1790, U.S. exports and imports combined came to \$43 mil, and there was a \$3 mil trade deficit. The global recession caused U.S. exports and imports to fall from \$3.39 tril in 2008 to \$2.62 tril in 2009. The U.S. trade deficit—which had been climbing steadily since the last recorded surplus in 1975—also declined from \$816 bil to \$504 bil.

World Trade Organization (WTO)

The World Trade Organization is an international body that seeks to promote free trade by eliminating barriers to trade. Founded in 1995, the WTO had grown to 153 member countries as of Aug. 2010, with 31 others, including Russia and Vatican City, granted observer status. International intergovernmental organizations, such as the International Monetary Fund and the World Bank, may also be granted observer status. With the exception of Vatican City, observers must start accession negotiations within five years of becoming observers.

NA = Not available. **Note:** The euro, the European Union's single currency, replaced the national currencies in the EU nations shown above. Exchange rates have been in euros since 1999 for the following countries: Austria, Belgium, France, Germany, Ireland, Italy, Netherlands, Portugal, Spain. For Greece, exchange rates from 2001 on are in euros. (1) U.S. dollars per unit of national currency. (2) West Germany before 1991.

North American Free Trade Agreement (NAFTA)

NAFTA, a free trade pact between the U.S., Canada, and Mexico, took effect Jan. 1, 1994. Major provisions, which were fully implemented Jan. 1, 2008, are as follows:

- Agriculture:** With limited exceptions, tariffs on all agricultural products to be eliminated over 15 years. Domestic price-support systems may continue provided they do not distort trade.
- Automobiles:** At least 62.5% of an automobile's value must have been produced in North America for it to qualify for duty-free status. Tariffs to be phased out over 10 years.
- Disputes:** Special judges have jurisdiction to resolve disagreements within strict timetables.
- Energy:** Mexico bars foreign ownership of its oil fields but, as of 2004, U.S. and Canadian companies could bid on contracts offered by Mexico's state-owned oil and electricity monopolies.
- Environment:** The trade agreement cannot be used to overrule national and state environmental, health, or safety laws.
- Finance:** Limits on ownership of banks, insurance companies, and brokerages eliminated by Jan. 1, 2000.
- Immigration:** Restrictions on the movement of business executives and professionals eased.

- Jobs:** Barriers to limit Mexican migration to U.S. remain unaffected by NAFTA.
- Patent and copyright protection:** Mexico strengthened its laws providing protection to intellectual property and agreed to honor pharmaceutical patents for 20 years.
- Tariffs:** Tariffs on 10,000 customs goods are to be eliminated over 15 years. One-half of U.S. exports to Mexico were considered duty-free by 1999.
- Textiles:** A "rule of origin" provision requires most garments to be made from yarn and fabric that have been produced in North America. Most tariffs phased out by 1999.
- Trucking:** Trucks to have free access throughout the three countries by 1999, but the U.S. restricted Mexican trucks to a 20-mi comm. zone at the border. In 2001, an arbitration panel ruled the restrictions were in violation of NAFTA. In 2008, the U.S. House terminated a pilot program, begun in 2007, granting limited access to some Mexican trucks.

Central American Free Trade Agreement (CAFTA)

CAFTA (also known as CAFTA-DR) is a free trade agreement between the U.S. and Costa Rica, Dominican Republic, El Salvador, Guatemala, Honduras, and Nicaragua. The U.S. and El Salvador approved the agreement Mar. 1, 2006; Nicaragua joined a month later, and Guatemala entered into the accord July 1, 2006. The Dominican Republic approved CAFTA Mar. 1, 2007, and Costa Rica completed the treaty by signing on Jan. 1, 2009. Some highlights of the agreement:

- Agriculture:** Tariffs on 50% of U.S. farm goods eliminated; other goods deemed “sensitive”—including corn, milk, and potatoes—to have tariffs reduced to zero over 20 years. Sugar imports to the U.S. allowed to rise to 1.2% of annual U.S. production, up to 1.7% over 15 years.

Automobiles: Tariffs on autos and auto parts to be phased out over 5 years.

Environment and labor: Party nations agree to enforce local labor and environmental protections, although no mechanisms to monitor enforcement currently exist.

Intellectual property: Party nations agree to uphold international
- standards of trademark, copyright, and patent protection to which the U.S. is a signatory. This includes seizing pirated and counterfeit goods and prosecuting those who traffic in them.

Manufacturing: Tariffs eliminated on 80% of U.S. goods.

Market barriers: Barriers on services such as telecommunications, insurance, and financial services eliminated or reduced.

Pharmaceuticals: U.S. pharmaceuticals given 5-year patent protection from their date of introduction to CAFTA markets, regardless of date introduced in U.S.

Textiles and clothing: Elimination of duties on nearly all textiles and clothing instituted, retroactive to Jan. 1, 2004.

Sport Utility and Cross Utility Vehicle Sales in the U.S., 1988-2009

Source: Ward’s AutoInfoBank, Ward’s Automotive Group, Penton Media Inc.

In 1988, 960,852 sport utility vehicles (SUVs)—a term that includes cross utility vehicles, or crossovers, which are generally smaller and get better gas mileage than traditional SUVs—were sold in the U.S. That number accounted for slightly more than 6% of all light vehicles (i.e., cars, SUVs, minivans, vans, pickup trucks, and trucks under 14,000 lbs) sold that year.

Excluding cross utility vehicles, SUV sales slowed considerably beginning in the mid-2000s after years of consistent growth, with a 74.9% decrease between 2004 (2,781,457 sold) and 2009 (697,921 sold). Over that same period of time, crossover vehicle sales increased, up 22.5% from 1,906,953 sales in 2004 to 2,335,455 sales in 2009.

U.S. Light-Duty Vehicle Fuel Efficiency, 1975-2009

Source: Natl. Vehicle and Fuel Emissions Laboratory, Office of Transportation and Air Quality, U.S. Environmental Protection Agency

Cars and light-duty trucks (SUVs, minivans, passenger vans, and pickup trucks) showed significant fuel-efficiency improvements from 1975 through 1987, when the fuel economy for both reached a high of 22 miles per gallon (mpg). After 1987, the fuel economy value entered a long-term decline, reaching 19.3 mpg in 2004 before the trend reversed itself. Since 2005, fuel economy has increased. Most of this increase has been due to higher truck fuel economy.

In Dec. 2006, the EPA changed its method of calculating adjusted real-world fuel economy values due to changed driving habits, including more aggressive driving and increased air conditioning use, among other factors. Data from 1986 on were revised under this method. Comparing laboratory 55/45 fuel economy values, however, shows an all-time high was reached in 2009.

Sales of light-duty trucks, which in recent years have had an average fuel efficiency 5-7 mpg less than cars, accounted for only 19% of the market in 1975 but have been at about 50% since 2002. This increase has been a major factor in the leveling off in the fuel efficiency of the average light-duty vehicle. But technological innovations have helped to boost fuel efficiency in recent years.

Year ¹	Cars (mpg ²)	Light-duty trucks (mpg ²)	All light-duty vehicles (mpg ²)	Year ¹	Cars (mpg ²)	Light-duty trucks (mpg ²)	All light-duty vehicles (mpg ²)
1975	13.5	11.6	13.1	2001	23.0	16.7	19.6
1980	20.0	15.8	19.2	2002	23.1	16.7	19.4
1985	23.0	17.5	21.3	2003	23.2	16.9	19.6
1990	23.3	17.4	21.2	2004	23.1	16.7	19.3
1995	23.4	17.0	20.5	2005	23.5	17.2	19.9
1996	23.3	17.2	20.4	2006	23.3	17.5	20.1
1997	23.4	17.0	20.1	2007	24.1	17.7	20.6
1998	23.4	17.1	20.1	2008	24.3	18.2	21.0
1999	23.0	16.7	19.7	2009	24.5	18.4	21.1
2000	22.9	16.9	19.8				

(1) Because of changes in methodology, mpg figures before 1986 are not entirely comparable with later values. (2) Adjusted composite (city and highway fuel efficiency combined in a 55%/45% ratio) values reflecting real-world use.

Note: Most states have graduated licensing systems that phase in full driving privileges. During the learner's stage, driving generally is not permitted without adult supervision. In an intermediate stage, young licensees may be allowed to drive unsupervised only under certain conditions. (1) Min. age at which all restrictions may be lifted on private passenger car operation. (2) Applicants under a specified age (typically between 17 and 19) must complete driver education. Some states allow applicants to substitute home training, state-sponsored traffic school, or a number of hrs. of supervised driving for driver ed. (3) Learner's stage mandatory for all license applicants regardless of age. (4) Minimum age for an unrestricted driver's license may be lower if the applicant has completed driver education. Unsupervised driving in New York City prohibited for all drivers under 18. (5) Driver ed. required regardless of age. (6) P = officer may stop vehicle for violation (primary); S = officer may issue seat belt citation only when vehicle is stopped for another moving violation (secondary). (a) Primary enforcement for children under a specified age. (b) Secondary enforcement for rear seat occupants. (c) Primary enforcement for driver.

NA = Not available/not applicable. P = Officer may stop vehicle for violation (primary); S = officer may issue citation only when vehicle is stopped for another moving violation (secondary). (1) Drivers age 16 and 17 who have held an intermediate license for fewer than 6 months. (2) Drivers 21 and younger. (3) Primary for texting by all drivers and cell phone use by school bus drivers; secondary for cell phone use by young drivers. (4) Secondary for hands-free cell phone use by young drivers. (5) As of Jan. 2, 2011. (6) Drivers in construction and school speed zones. (7) Drivers younger than 18. (8) Primary for learner's permit and intermediate license holders; secondary for texting. (9) All learner's permit holders and all intermediate license holders are prohibited from driving while using a handheld cell phone, and all drivers younger than 18 are prohibited from using any cell phone. All drivers issued a first driver's license are prohibited from using a cell phone for one year. The cell phone ban is secondary for novice drivers age 18 and older. (10) Learner's permit and intermediate license holders. (11) Secondary; primary for texting. (12) Primary; secondary for texting. (13) Learner's permit holders, intermediate license holders, school bus drivers, and public transit drivers. (14) Drivers in school crossing zones. (15) Bus drivers when a passenger 17 and younger is present, intermediate license holders for first twelve months, and drivers in school crossing zones. (16) Secondary; primary for school bus drivers. (17) Drivers younger than 18 who hold either a learner's permit or an intermediate license.

Tourism Trends

World tourist arrivals increased by 6.4% between 2006 and 2007 and 2.0% between 2007 and 2008, according to the World Tourism Organization's (UNWTO) *Barometer* publication. The number of international tourist arrivals in 2009 was an estimated 880 mil, an decrease of 4.2% from the previous year. Worldwide tourism receipts, as measured in constant U.S. dollars, declined 5.7% from 2008 to 2009, to a value of \$852 bil. Europe as a region again commanded the largest share of international tourist arrivals (49%) and receipts (48%) in 2009. Asia and the Pacific posted the second-largest share in each category, with 21% of international tourist arrivals and 24% of receipts worldwide. With 140 mil arrivals, the Americas held a 16% share of the world total. Compared to 2008, Africa was the only region to show an increase in the number of international tourist arrivals (2.9%) in 2009.

Preliminary data for the first four months of 2010 indicated a growth of about 7% in international tourist arrivals, continuing the recovery trend that began in late 2009. Because of the gradually improving global economic situation, as well as the economic benefits of such events as the World Cup in South Africa, the World Exposition in Shanghai, and the Commonwealth Games in India, the UNWTO predicted a growth overall in 2010.

The International Air Transport Association (IATA) reported a 2.5% decrease in actual international passenger traffic (as measured in revenue passenger kilometers) in 2009 but an 6% increase for the first four months of 2010. The IATA forecasted a continued growth in the volume of passenger traffic in 2010. It expected an increase in the global airline industry's net profits in 2010. The price of fuel remains a challenge, having risen from 13% of airline operating costs in 2001 to 23% in 2009, although this is lower than the high of 33% from a year earlier. IATA forecasted that fuel will have accounted for 26% of operating costs in 2010.

Passports, Health Regulations, and Travel Warnings for Foreign Travel

Source: Bureau of Consular Affairs, U.S. Dept. of State; Centers for Disease Control and Prevention (CDC), U.S. Dept. of Health and Human Services; World Health Organization (WHO); Transportation Security Administration (TSA), U.S. Dept. of Homeland Security

Passports, Visas

Passports are issued by the Dept. of State to U.S. citizens and nationals to provide documentation for foreign travel. As of Aug. 2010, the fees for a new passport for persons ages 16 and over total \$135; provided certain criteria are met, passports can be renewed for \$110.

In July 2008, the U.S. government began issuing passport cards. Travelers arriving by land or sea from Canada, Mexico, the Caribbean (17 nations), and Bermuda may present a passport card to enter the U.S. Passport cards may not be used for air travel, however. The fees for a new passport card for persons ages 16 and over total \$55.

A U.S. passport is often sufficient for U.S. citizens to gain admission for a limited stay in another country. Some countries also require a visa before entering. Each country has its own specific guidelines concerning length and purpose of visit, among other considerations. Visitors may need to provide proof of sufficient funds for their intended stay, onward/return tickets, and/or at least 6 months remaining validity on their U.S. passports.

All persons traveling by air outside of the U.S. (excluding direct travel to and from a U.S. territory) are required to present a passport or other valid document upon reentering the U.S.

For up-to-date passport and international travel information, visit the Consular Affairs website (travel.state.gov) or call the National Passport Information Center at 1-877-4USA-PPT (1-877-487-2778).

Health Regulations

Under WHO regulations, first instituted in 1969, member countries agree to abide by resolutions meant to contain the spread of disease. For example, some countries require travelers to provide proof of vaccination against yellow fever before entering.

Detailed information can be found in *Health Information for International Travel*, or the “Yellow Book,” published every two years by the CDC. The book is written primarily for health care providers but may be of use to other travelers. The CDC also issues travel notices of outbreaks, health precautions, and health warnings. For current notices and more on travelers’ health, visit www.cdc.gov/travel.

WHO publishes a more technical guide, *International Travel and Health*, which can be found online at www.who.int/ith.

Travel Warnings and Alerts

The State Dept. issues travel warnings as recommendations that Americans avoid travel to certain countries. Long-term conditions in such countries may be dangerous or unstable; because of an embassy closure or limited personnel, the U.S. government’s ability to assist U.S. citizens is also reduced. As of Aug. 2010, travel warnings were in effect for the following countries: Afghanistan, Algeria, Burundi, Central African Republic, Chad, Colombia, Côte d’Ivoire, Dem. Rep. of the Congo, Eritrea, Georgia, Guinea, Haiti, Iran, Iraq, Israel (incl. West Bank and Gaza), Kenya, Lebanon, Mali, Mauritania, Mexico, Nepal, Niger, Nigeria, Pakistan, Philippines, Saudi Arabia, Somalia, Sudan, Uzbekistan, and Yemen.

The department issues travel alerts when it has concerns about short-term conditions—natural disasters, terrorist attacks, anniversaries of attacks, election-related demonstrations, and regional sporting events, among others—within a country or area. For the latest travel warnings and alerts, see travel.state.gov.

Summary of TSA Regulations

Airplane carry-ons. TSA promotes the “3-1-1” rule regarding carry-on items. Containers with liquids or gels may hold only 3.4 oz or less; these containers should be packed inside a single 1-quart, clear plastic, zip-top bag; and this 1 bag must be placed in a bin when going through security. Exceptions to the 3-1-1 rule include medication, baby formula and food, and breast milk. Travelers must declare any exceptions at security.

Security checkpoint identification. Adult travelers (18 years of age and over) must present a U.S. federal or state-issued photo ID. The ID must have name, date of birth, sex, expiration date, and a tamper-resistant feature. Acceptable documents: U.S. passport or passport card; foreign government-issued passport; state-issued drivers license; permanent resident card; or U.S. military ID, among others.

Screening process. Travelers may wear loose fitting or religious garments (incl. head coverings) through security. They may be subject to additional screening if clothing could potentially conceal prohibited items. Travelers may request a private area if selected for personal screening. In most cases, travelers will be screened by someone of the same gender.

Disability-related permitted carry-on items:

- Wheelchairs
- Crutches, canes, and walkers
- Personal supplemental oxygen
- Slate and stylus
- Medications and associated supplies
- Service animals

Permitted carry-on items:

- Safety razors (incl. disposable razors)
- Eye drops (amounts greater than 3.4 oz must be declared)
- Nail clippers, tweezers
- Blunt-tipped plastic or metal scissors
- Mobile phones
- Umbrellas (must be inspected at security)
- Common lighters
- Beverages (any size) purchased after security screening
- Musical instruments (one per traveler going through security, though some airlines prohibit musical instruments as carry-ons)

Prohibited carry-on items:

- Knives (except for plastic or round-bladed butter knives), incl. knives that are religious objects
- Baseball bats, golf clubs
- Flares
- Realistic firearm replicas
- Hammers, screwdrivers, wrenches, pliers, and other tools more than 7 in. in length
- Brass knuckles
- Lighter fluid
- Liquid bleach
- Spray paint
- Snow globes

For complete travel information, visit www.tsa.gov/travelers

U.S. Farms, Number and Average Size, 1940-2009

Source: National Agricultural Statistics Service, U.S. Dept. of Agriculture

The number of farms in the United States in 2009 was estimated at 2.2 million, about 90 fewer than in 2008. Total land in farms decreased 110,000 acres from 2008, to 919.8 million acres. The average farm size in 2009 was 418 acres, unchanged from the previous year. The continuing decline in the number of farms and land being farmed reflected consolidation in farming operations and the use of agricultural land for other purposes.

(1) Data are for fiscal years ending Sept. 30. All 2009 data are preliminary; all data subject to revision by the FNS. (2) Formerly known as the Food Stamp Program. Includes benefits and admin. expenses. (3) Provides benefits analogous to SNAP. (4) Data are 9-month averages (summer months excluded). (5) Costs are cash payments (federal reimbursements to states). (6) Includes food benefits, nutrition services and admin. funds, Farmers' Market Nutrition Program, infrastructure, breastfeeding promotion and peer counseling, program evaluation, and technical assistance. (7) Includes cash payments, commodity costs, and admin. expenditures. Similar services provided by Natl. School Lunch and Breakfast programs. (8) Includes cash payments, entitlement and bonus commodities, cash-in-lieu of commodities, sponsor admin. costs, start-up costs, and audits. (9) Costs are cash payments. (10) For years 2003 and on, program was administered by the Agency on Aging; Food and Nutrition Service costs limited to value of commodities distributed. (11) Includes commodity distribution costs and admin. expenses. (12) Includes summer camps. (13) Food made available to hunger relief orgs. such as food banks and soup kitchens. (14) Totals may not add because of rounding and administrative costs not shown.

Note: The Food Plans represent a nutritious diet at 4 different cost levels. The nutritional bases of the Food Plans are the 1997-2005 Dietary Reference Intakes, 2005 Dietary Guidelines for Americans, and 2005 MyPyramid food intake recommendations. In addition to cost, differences among plans are in specific foods and quantities of foods. Another basis of the Food Plans is that all meals and snacks are prepared at home. For specific foods and quantities of foods in the Food Plans, see *Thrifty Food Plan, 2006* and *The Low-Cost, Moderate-Cost, and Liberal Food Plans, 2007* from the source. All 4 food plans are based on 2001-02 data and updated to current dollars by using the Consumer Price Index for specific food items. (1) All costs are rounded to nearest 10 cents. (2) The costs given are for individuals in 4-person families. (3) Ten percent added for family size adjustment. (4) 4-person family is defined as couple, age 19-50 years, and two children.

(1) From 1970, includes milk cows and heifers that have calved. (2) As of Dec. 1 of preceding year.

Animal Products: Average Prices Received by U.S. Farmers, 1940-2009

Source: National Agricultural Statistics Service, U.S. Dept. of Agriculture

Figures below represent dollars per 100 lb for hogs, beef cattle, veal calves, sheep, lamb, and milk (wholesale); dollars per head for milk cows; cents per lb for chickens, broilers, turkeys, and wool; cents per dozen for eggs; weighted calendar year prices for livestock and livestock products other than wool. For 1943-63, wool prices were weighted on marketing year basis. The marketing year was changed in 1964 from a calendar year to a Dec.-Nov. basis for hogs, chickens, broilers, and eggs.

Crops: Average Prices Received by U.S. Farmers, 1940-2009

Source: National Agricultural Statistics Service, U.S. Dept. of Agriculture

Figures below represent cents per lb for cotton, apples, and peanuts; dollars per bushel for oats, wheat, corn, barley, and soybeans; dollars per 100 lb for rice, sorghum, and potatoes; dollars per ton for cottonseed and baled hay; weighted crop year prices. The marketing year is described as follows: apples, June-May; wheat, oats, barley, hay, and potatoes, July-June; cotton, rice, peanuts, and cottonseed, Aug.-July; soybeans, Sept.-Aug.; and corn and sorghum grain, Oct.-Sept.

(1) Other unemployment rates (1905-45), 14 years of age and older: 1905, 4.3; 1915, 8.5; 1925, 3.2; 1935, 20.3; 1936, 16.9; 1937, 14.3; 1938, 19.0; 1939, 17.2; 1945, 1.9. (2) Persons 14 years of age and older. (3) Beginning in 1990, data incorporate 1990 census-based population controls, adjusted for estimated undercount. (4) Beginning in 1994, not strictly comparable with prior years because of major redesign of the survey used. (5) From 1997 on, not strictly comparable with 1994-96 because of revisions in population controls used in household survey. (6) From 1999 on, not strictly comparable with earlier years because of further revisions in population controls used in household survey. (7) From 2000 on, not strictly comparable with earlier years because of revisions to the controls used in the survey.

Persons Not in the U.S. Labor Force, 2009

Source: Bureau of Labor Statistics, U.S. Dept. of Labor

The Labor Dept.'s unemployment rate, based on its household survey, shows the number of people out of work as a percentage of U.S. adults age 16 and older in the labor force. That rate excludes, however, the millions of adults considered not to be in the labor force. (in thousands)

	Total	Age			Sex	
		16 to 24 years	25 to 54 years	55 years and over	Men	Women
Total not in the labor force	81,659	16,207	21,823	43,629	32,013	49,646
Do not want a job now ¹	75,765	14,263	19,199	42,303	29,234	46,531
Want a job ¹	5,894	1,944	2,624	1,325	2,779	3,115
Did not search for work in previous year	3,075	960	1,241	874	1,344	1,731
Searched for work in previous year ²	2,818	983	1,383	452	1,435	1,384
Not available to work now	592	275	256	61	251	341
Available to work now	2,226	708	1,127	391	1,184	1,043
Reason not currently looking						
Discouragement over job prospects ³	778	200	427	151	485	293
Reasons other than discouragement	1,449	509	699	240	699	749
Family responsibilities	209	38	131	41	50	159
In school or training	306	234	65	7	163	144
Ill health or disability	136	19	68	49	70	66
Other ⁴	798	219	435	144	417	381

(1) Includes some persons who were not asked if they want a job. (2) Persons who had a job in the prior 12 months must have searched since the end of that job. (3) Includes believes no work available, could not find work, lacks necessary schooling or training, employer thinks too young or old, and other types of discrimination. (4) Includes those who did not actively look for work in the prior 4 weeks for such reasons as child care and transportation problems, as well as a small number for whom reason for nonparticipation was not ascertained.

U.S. Displaced Workers, 2010

Source: Bureau of Labor Statistics, U.S. Dept. of Labor

Percent distribution by reason of job loss

	Total (thous.)	Plant or company closed down or moved	Insufficient work	Position or shift abolished
Total, 20 years of age and over	6,938	30.6%	42.8%	26.6%
20 to 24 years	227	35.9	52.6	11.5
25 to 54 years	4,923	30.4	43.8	25.8
55 to 64 years	1,395	32.5	38.6	28.9
65 years and over	392	23.7	39.9	36.4
Men	4,183	29.8	47.9	22.3
Women	2,754	31.8	35.1	33.1
White	5,716	29.7	42.9	27.3
Black	761	33.9	41.7	24.4
Asian	294	34.0	44.4	21.6
Hispanic or Latino	993	32.4	57.0	10.6

Note: As of Jan. 2010. Displaced workers are persons 20 years or older who lost or left jobs they had held for at least 3 years. Workers in this table were displaced between Jan. 2007 and Dec. 2009. Hispanic/Latino persons may be of any race.

Projected Openings for Selected High-Paying Occupations, 2008-18

Source: Employment Projections Program, Bureau of Labor Statistics, U.S. Dept. of Labor

Job openings shown below represent the average number expected each year for workers in the U.S. who are entering these occupations for the first time.

Occupation	Annual avg. job openings ¹	Median annual earnings ²	Occupation	Annual avg. job openings ¹	Median annual earnings ²
Registered nurses	103,900	\$62,450	Sales representatives ⁴	45,790	\$51,330
Elementary school teachers ³	59,650	49,330	First-line retail superv. or mgrs.	45,010	35,310
Truck drivers, heavy and tractor-trailer	55,460	37,270	Exec. secretaries, admin. assistants	41,920	40,030
Postsecondary teachers	55,290	58,830	Secondary school teachers ³	41,240	51,180
Gen. and operations mgrs.	50,220	91,570	Lic. practical and voc. nurses	39,130	39,030
Accountants and auditors	49,750	59,430	Gen. maintenance and repair workers	35,750	33,710
First-line office superv. or mgrs.	48,900	45,790	Carpenters	32,540	38,940
Bookkeeping, accounting, & auditing clerks	46,040	32,510			

(1) As a result of growth and net replacement needs. (2) Median earnings are for 2008. (3) Except special and vocational education. (4) Wholesale and manufacturing, except technical and scientific products.

Top-Paying U.S. Counties by Average Weekly Wage, 2009

Source: Bureau of Labor Statistics, U.S. Dept. of Labor

County	Avg. weekly wage	% change 4th qtr., 2008-09	County	Avg. weekly wage	% change 4th qtr., 2008-09
New York, NY	\$1,878	1.1%	San Mateo, CA	\$1,477	2.6%
Santa Clara, CA	1,699	8.2	Morris, NJ	1,429	4.7
Washington, DC	1,614	2.7	Somerset, NJ	1,413	-6.2
Fairfield, CT	1,607	0.7	Alexandria City, VA	1,376	4.8
Arlington, VA	1,594	5.8	Middlesex, MA	1,344	3.5
Suffolk, MA	1,565	-0.3	Montgomery, MD	1,294	6.2
San Francisco, CA	1,539	3.1	Westchester, NY	1,288	4.4
Fairfax, VA	1,489	5.2	United States	942	2.5

Note: Figures shown are for 4th quarter, 2009. Horry County, SC, recorded the lowest average weekly earnings among the 334 largest counties, with an average weekly wage of \$584 in the 4th quarter of 2009. It was followed by: Hidalgo County, TX, and Cameron County, TX (\$598); Webb County, TX (\$619); Yakima County, WA (\$640); and San Juan, PR (\$653). The top 15 were derived from a list of the 334 largest U.S. counties, which comprise 71.4% of total covered workers. Data include all workers covered by state and federal unemployment insurance programs.

Jan. 1, 1976	2.30	46	2.20	2.00	July 24, 2009	7.25 ⁷	NA	7.25	7.25 ⁷

NA = Not applicable. (1) Applies to workers covered prior to 1961 amendments and, after Sept. 1965, to workers covered by 1961 amendments. Rates set by 1961 amendments were: Sept. 1961, \$1.00; Sept. 1964, \$1.15; and Sept. 1965, \$1.25. (2) Percent of gross average hourly earnings of production workers in manufacturing. (3) Applies to workers newly covered by amendments of 1966, 1974, and 1977, and Title IX of education amendments of 1972. (4) Included in coverage as of 1966, 1974, and 1977 amendments. (5) No change in rate. (6) Training wage for workers age 16-19 in first 6 months of first job: Apr. 1, 1990, \$3.35; Apr. 1, 1991, \$3.62. The training wage expired Mar. 31, 1993. (7) Under 1996 legislation, a subminimum training wage of \$4.25 an hour was established for employees under 20 years of age during their first 90 consecutive calendar days of employment with an employer. For workers receiving gratuities, the minimum wage remained \$2.13 per hour.

Fatal Occupational Injuries, 2009

Note: Dashes (—) indicate data are not available. Because of rounding and classifications not shown, percentages may not add up to 100. All injuries and illnesses reported involved days away from work. (1) Excludes farms with fewer than 11 employees. (2) Data conforming to OSHA definitions for mining operators in coal, metal, and nonmetal mining are provided by the Mine Safety and Health Administration, U.S. Dept. of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal industries. Data for mining include establishments not governed by Mine Safety and Health Administration rules, such as those in oil and gas extraction. (3) Data for employers in railroad transportation are provided by the Federal Railroad Administration, U.S. Dept. of Transportation.

Note: Data refer to the sole or principal job of full-time workers. Excluded are self-employed workers regardless of whether or not their businesses are incorporated. (1) Including members of an employee association similar to a union. (2) Including members of a labor union or employee association similar to a union, and others whose jobs are covered by a union or an employee-association contract.

Work Stoppages (Strikes and Lockouts) in the U.S., 1950-2009

Source: Bureau of Labor Statistics, U.S. Dept. of Labor; involving 1,000 workers or more

Workers Days idle			Workers Days idle			Workers Days idle		
Year	Number ¹	(thous.)	Year	Number ¹	(thous.)	Year	Number ¹	(thous.)

(1) Does not include agricultural employment; from 1985 on, does not include self-employed or unemployed persons. (2) From 1930 to 1980, includes dues-paying members of traditional trade unions, regardless of employment status; after that includes employed only. From 1985 on, includes members of employee associations that engage in collective bargaining with employers. (3) Data reflect revised population controls used in the household survey.

NA = Not available. P = preliminary. (*) = Less than 0.005 quadrillion Btu. **Note:** Some figures have been revised. Some numbers may not add up to totals because of rounding. (1) Incl. waste coal supplied beginning in 1989 and refuse recovery beginning in 2001. (2) Incl. lease condensate. (3) Starting in 1990, pumped storage is removed and expanded coverage of industrial use of hydroelectric power is included. (4) Category known as “wood, waste, and alcohol” for years prior to 2000. Includes wood, waste, and alcohol fuels (ethanol blended into motor gasoline). Ethanol is included in both Petroleum and Biomass categories, but is only counted once in totals. (5) Incl. imports of crude oil for the Strategic Petroleum Reserve, which began in 1977. (6) Small amts. of electricity transmitted across borders with Canada and Mexico. (7) Incl. supplemental gaseous fuels. (8) Petroleum products supplied, incl. natural gas plant liquids and crude oil burned as fuel.

U.S. Energy Flow, 2009

Source: Annual Energy Review 2009, Energy Information Administration (EIA), U.S. Dept. of Energy; in quadrillion Btu¹

Note: Some numbers totals may not add up to totals because of rounding. (1) Preliminary figures. (2) Natural Gas Plant Liquids. (3) Conventional hydroelectric power; wood, waste, and ethanol blended into gasoline; geothermal; solar; and wind power.

Note: Until unleaded gas became available in 1976, leaded was the only type used in automobiles. Average retail prices (in cents per gallon) for selected years preceding those in the table above were as follows: 1950: 27; 1955: 29; 1960: 31; 1965: 31; 1970: 36. Covers 56 urban areas (1974-77), 85 urban areas for 1978 and after. NA = Not applicable. (1) Also includes types of motor gasoline not shown separately. (2) In Sept. 1981, the Bureau of Labor Statistics changed the weights in the calculation of average motor gasoline prices. Starting in Sept. 1981, gasohol is included in average for all types, and unleaded premium is weighted more heavily.

NA = Not reported separately; amounts included in totals. Note: Numbers may not add up to totals because of rounding. Some countries omitted for lack of appreciable reserves. Data for Kuwait and Saudi Arabia include one-half of the reserves in the Neutral Zone between Kuwait and Saudi Arabia. All reserve figures except those for the former USSR and natural gas reserves in Canada are proved reserves. Former USSR and Canadian natural gas figures include amounts understood as proved, and some probable reserves. Totals may include small amounts not listed. (1) The discrepancy in Canada's proven oil reserves is due to the approximately 175 bil barrels contained in Alberta's oil sands, which would require 350 tril cubic feet of natural gas to liberate.

U.S. Crude Oil Imports by Selected Country, 1990-2009

Source: *Petroleum Supply Annual*, Energy Information Administration (EIA), U.S. Dept. of Energy
(in thousands of barrels per day; ranked by 2009 imports)

Although the United States has become increasingly dependent on foreign oil, imports declined dramatically in 2009, especially imports from OPEC nations like Iraq, Nigeria, and Saudi Arabia. Imports from OPEC nations were down by more than a million barrels per day in 2009, reducing total imports by nearly 800,000 barrels per day. OPEC countries, especially in the Persian Gulf region, have a significant production advantage because of the relatively low cost of developing their oil resources. But non-OPEC countries have also increased their oil production. Canada dominated this growth in the early 1970s, the North Sea and Mexico became major producers in the 1980s, and more recent production increases have come from oil supplies in West Africa and the former Soviet Union. Sanctions do not permit the U.S. to import oil from Iran.

MW(e) = Megawatt electricity. — = Not applicable. (1) 1 terawatt-hour [TW(e).h] = 10⁶ megawatt-hour [MW(e).h]. For an average power plant, 1 TW(e).h = 0.39 megatons of coal equivalent (input) and 0.23 megatons of oil equivalent (input). (2) Cumulative total reactor-operating years through Dec. 31, 2009. Total also includes operating experience of shutdown plants for countries not listed here: Italy (81 years) and Kazakhstan (25 years, 10 months).

Total	259	124	177	132	132	28			

NA = Not applicable. **Note:** Revised permit/license procedures eliminate the historical categories shown. According to Senate testimony, the Nuclear Regulatory Commission anticipates 16 or more new “combined license applications” over the next few years—the first of which was submitted Sept. 25, 2007—which may amount to 25 or more new reactor units. (1) Order placed by a utility or government agency for a nuclear steam supply system. (2) Numbers show permits issued in a given period, not extant permits. (3) Licenses granted to conduct testing. (4) Licenses granted for full power operation. (5) Permanently ceased operation. (6) As of the last year of designated period. (7) The ratio of electric energy produced to the amount that could be produced at continuous full power operation.

Renewable Energy Sources

Source: U.S. Department of Energy

Concern over the environmental impact of burning fossil fuels has helped spur interest in alternative fuels that are less polluting. And since the supply of fossil fuels is finite and diminishing, there is interest in “renewable” sources that do not deplete existing supplies. However, renewable energy sources still make up only a small share of U.S. domestic energy production (a little over 10% in 2009). The major reason for this is their relatively higher cost (in some cases two to four times that of power obtained from traditional fuels). The following are the major renewable energy sources available.

Biomass is plant-derived material usable as a renewable energy source, including wood energy crops such as hybrid poplars and willow trees, agricultural crops including soybeans and corn, and animal and other wastes. Biomass is one of the two most common energy sources in the U.S. today along with hydropower. Forms of biomass such as wood can be burned to produce heat and generate electricity. Agricultural crops can be chemically converted into fuels such as ethanol and biodiesel; these are the only known renewable liquid energy sources, and may one day replace petroleum and fossil-fuel produced diesel. But bringing ethanol and biodiesel into wide use would require more energy-efficient methods of production and transportation. Overall, biomass fuels are much cleaner-burning than fossil fuels, though biomass fuels still produce carbon dioxide and other pollutants.

Geothermal energy is generated from heat inside of Earth. This form of energy is both clean and renewable. The technology has caught on in countries with substantial geothermal activity such as Iceland, where it accounted for 54% of primary energy use. In the U.S. the best sources for geothermal power are in the West, where there are many underground lakes of heated water; however, large-scale access would require drilling. A major goal in this field is to find a way to harness energy directly from magma (molten rock material), which has great potential because of its high temperature.

Hydrogen is the third most abundant element on Earth. It does not naturally occur on Earth as a pure gas or liquid, but is always combined with other elements (such as with oxygen to form water or carbon to form methane). For energy use it is produced from hydrocarbons using heat, bacteria or algae through photosynthesis, or by using sunlight or electricity to split water into hydrogen and oxygen. Hydrogen batteries, or fuel cells, are already used by NASA on the space shuttle. In a fuel cell, electrons are released from the hydrogen atoms in a chemical reaction and flow through an external circuit as electricity. The protons then combine with oxygen (and some of the electrons in the electric current) to make heat and water suitable for drinking. Fuel cells do not run down, but work as long as hydrogen is supplied. Some experts think hydrogen will be the power source of the future. However, an infrastructure would need to be created for safe and cost-effective transportation and storage of hydrogen.

Hydropower, or hydroelectric power, is generated by water flowing through turbines. Along with biomass fuels, it is one of the two most common renewable energy sources in the U.S. today. A dam on a river is a common hydropower producer. No harmful greenhouse gases are produced, but the dams needed to generate the power can harm river ecosystems. Researchers are working on turbine technologies that may maximize use of hydropower and reduce adverse environmental effects.

Ocean energy is generated in two ways. Thermal ocean energy uses the heat that the ocean absorbs from the sun to power generators, and sometimes drinkable desalinated water is a by-product. Mechanical ocean energy is generated by the movement of tides and waves through a turbine. In both cases, power generation is not very efficient with current technology. Much more research is needed to make thermal ocean energy generation a reality. Mechanical ocean energy requires large dams or breakwater-type structures called tidal barrages to be built, which could cause harm to coastal ecosystems.

Solar energy is generated using heat and light from the sun. Solar energy is an increasingly common source of electricity. Photovoltaic (PV) solar cells are made of semiconducting materials that can directly convert sunlight to electricity without any harmful waste product. Solar collectors are made more efficient by using arrays of mirrors to concentrate the sun’s rays onto PV panels. Another way of using sunlight is to heat water directly. According to the Dept. of Energy, homes incorporating solar heating designs can save as much as 50% on heating bills. The downside to solar energy is that it depends heavily on a range of factors including location, time of year, and weather.

Wind energy uses wind turbines to produce energy. They are perched on high towers, usually 100 ft or higher, and often placed in large groups (“farms”) to generate electricity for towns and cities. On a much smaller scale, stand-alone turbines are sometimes used by farmers and homeowners to generate supplemental electricity. In the past 20 years, government incentives in the form of tax credits to producers and incentives for homeowners have helped lower the price of wind power by 85%, making it a more feasible option. Some people object to wind farms because of their appearance or the noise the turbines make. Wind power raises few other environmental problems, but the turbines can pose a danger to birds. In addition, because weather is involved, consistent generation is a challenge.

Alternative-Fueled Vehicles in Use in the U.S., by Fuel, 1995-2008

Source: Energy Information Administration (EIA), U.S. Dept. of Energy

Fuel	1995	2000	2005	2006	2007	2008	% change, 2000-08

NA = Not available. (1) The remaining portion of 85-percent methanol and both ethanol fuels is gasoline. (2) In 1997, some vehicle manufacturers began including E85-fueling capability in certain model lines of vehicles. For 2008, the EIA estimated that the number of E85 vehicles that are capable of operating on E85, gasoline, or both, is about 7.1 mil. Many are sold and used as traditional gasoline-powered vehicles. In this table, alternative fueled vehicles (AFVs) in use include only those E85 vehicles believed to be intended for use as AFVs (primarily fleet-operated vehicles). (3) Excludes gasoline-electric and diesel-electric hybrids like the Toyota Prius. (4) Includes minute amounts of other fuels.

CRIME

Measuring Crime

The U.S. Dept. of Justice administers two statistical programs to measure trends in crime in the U.S. Because of differences in focus and methodology, their results are not strictly comparable.

The Federal Bureau of Investigation (FBI) conducts the **Uniform Crime Report (UCR)** program, which aims to provide statistics for law enforcement administration, operation, and management. It collects actual counts on the crimes of homicide, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson as they are reported to law enforcement authorities. Each year, the program releases a preliminary report in the spring, followed by a more detailed, final report in the fall.

The **National Crime Victimization Survey (NCVS)** is conducted annually by the Bureau of Justice Statistics through interviews with members of a nationally representative sample of households about their experiences with crime. The survey complements the UCR by providing alternative and previously unavailable information, including information about the victims of crime and their offenders (e.g., age, sex, ethnicity, victim-offender relationship) and information on crimes not reported to law enforcement. In contrast to the UCR, the NCVS does not cover homicide, arson, commercial crimes, or crimes against children under age 12.

Further explanation of the UCR and NCVS is available at bjs.ojp.usdoj.gov/content/pub/pdf/ntcm.pdf

Uniform Crime Report, 2009

Source: *Crime in the United States, 2009*, Federal Bureau of Investigation, U.S. Dept. of Justice

In 2009, nearly 18,000 city, county, college and university, state, tribal, and federal agencies—representing more than 307 million people—voluntarily participated in the UCR program.

Although crime tends to rise in hard economic times, the number of reported violent crimes dropped 5.3% between 2008 and 2009, marking the third straight year violent crime declined. The number of property crimes reported was also down, by 4.6% from 2008, making it the seventh year in a row property crime reports declined.

Victims of all property crimes, excluding arson, lost an estimated \$15.2 bil in 2009, also down from 2008. Although arson is considered a property crime, it is not included in estimates of totals because of variations in the level of participation by reporting agencies. The FBI estimates that on average, each arson offense did about \$17,411 worth of damages.

Additional highlights from the 2009 report:

- Males accounted for 77% of all murder victims whose gender was known. Men committed 90 percent of the murders in which the offender's gender was known.
- Firearms were known to be used in 67% of all murders.
- Of the 7,650 murder victims whose relation to the offender was known, 24.2% were killed by a family member, and about the same percentage were killed by a stranger. The other half were killed by an acquaintance (e.g., friend, neighbor, employee, romantic partner).
- Robberies were down 8.0 percent from 2008 and 2.0 from 2005. The average loss was \$1,244.
- The majority of property crimes reported were larceny-thefts (68%). Excluding motor vehicle thefts, 27% of all larceny-thefts involved items taken from motor vehicles (except for accessories), 18% were shoplifting, 11% were from buildings, and 3% were of bikes.

National Crime Victimization Survey, 2009

Source: *Criminal Victimization, 2009*, Bureau of Justice Statistics, U.S. Dept. of Justice

Victimizations of U.S. residents age 12 and over continued to decline to historic lows, according to the NCVS estimates for 2009. The violent crime rate—17.1 victimizations per 1,000 persons—was down even from the 2008 estimate of 19.3, while the property crime rate fell to 127 victimizations

per 1,000 households (from 135 in 2008 and 147 in 2007). The biggest declines came in the numbers of rapes or sexual assaults (down 38.7%) and simple theft (down 12.9%). The NCVS does not include figures for murders because published data are based on victim interviews.

Criminal Victimization, 2008-09

Source: *Criminal Victimization, 2009*, Bureau of Justice Statistics, U.S. Dept. of Justice

A crime committed against an individual or single household counts as one **victimization**. Because a personal crime may involve more than one victim, the number of victimizations may be greater than the number of personal crime incidents. In property crimes, the affected household is considered one victim.

Victimization rates measure the frequency with which victimizations occur. Personal crime victimization rates are based on the number of victimizations per 1,000 persons in the total population age 12 and over. Property crime victimization rates are calculated per 1,000 of total households.

Type of crime	Number of victimizations		Victimization rate		Percent change
	2008	2009	2008	2009	
All crimes	21,312,400	20,057,180	NA	NA	NA

NA = Not applicable. **Note:** Details may not add up to totals due to rounding. (1) Excludes murder because the NCVS is based on interviews with victims. (2) Includes male as well as female victims and both heterosexual and homosexual rape. (3) Includes pocket picking, completed purse snatching, and attempted purse snatching.

Crime in the U.S., 1989-2009

Source: *Crime in the United States, 2009*, Federal Bureau of Investigation, U.S. Dept. of Justice

In the FBI's Uniform Crime Reporting (UCR) Program, offenses are classified as **violent crimes** if they involve force or the threat of force: murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. The following offenses are considered **property crimes**: burglary, larceny-theft, motor vehicle theft, and arson. Arson data is excluded from this table because of variations in the level of participation by reporting agencies. That data is presented separately online at www.fbi.gov/ucr/ucr.htm

Year(s)	Population ¹	Violent crime					Property crime			
		All violent crimes	Murder & nonnegligent manslaughter	Forcible rape ²	Robbery	Aggravated assault ³	All property crimes	Burglary	Larceny-theft ⁴	Motor vehicle theft

Note: Figures for 2006-08 have been revised from previous reports.

- (1) U.S. Census Bureau estimates for July 1 of each year except for 1990 and 2000, which show Apr. 1 decennial census counts. (2) Does not include statutory rape (i.e., rape not involving force) and other offenses of a sexual nature. Also does not include sexual attacks on males, which are considered aggravated assaults or sex offenses, depending on circumstances and extent of injuries. (3) Attack upon another with the intent of doing serious bodily harm; usually accompanied by the use of a weapon or other means likely to produce death or great bodily harm. (4) The unlawful taking of another's property not involving force or fraud (e.g., theft of motor vehicle parts, shoplifting). Excludes crimes such as embezzlement and check fraud. (5) The murder and nonnegligent homicides that occurred as a result of the Sept. 11, 2001, terrorist attacks are not included.

Law Enforcement Civilian Employees and Officers, 2009

Source: *Crime in the United States, 2009; Law Enforcement Officers Killed and Assaulted, 2008*; Federal Bureau of Investigation, U.S. Dept. of Justice

As of Oct. 31, 2009, 14,614 city, county, state, college and university, and tribal agencies around the country collectively employed 1,021,456 full-time law enforcement workers. About 69.2% of employees were sworn officers. The FBI's UCR program defines a sworn **law enforcement officer** as a person who ordinarily carries a firearm and badge, has full arrest powers, and is paid from government funds specifically dedicated to law enforcement. Civilians (e.g., clerks, radio dispatchers, correctional officers) made up the remaining 30.8% of law enforcement employees.

Altogether, they provided service to an estimated 289.4 mil people around the country, meaning there were 3.5 full-time law enforcement employees (civilian and sworn officers) and 2.4 sworn officers per 1,000 residents.

California employed the greatest number of full-time law enforcement workers (121,879) of any state. Washington, DC,

had the highest rate, with 8.7 full-time law enforcement employees (and 7.5 sworn officers) for every 1,000 residents in its population.

Females made up 61.0% of all full-time civilian law enforcement employees in the U.S. while males made up 88.3% of the nation's sworn officers.

Nationwide, 41 law enforcement officers were killed in the line of duty in 2008, the latest year for which data is available. Of that number, 10 were involved in arrest situations, 8 were performing traffic stops, 7 were killed during tactical situations, and 6 died while investigating suspicious persons or circumstances. Thirty-five of the 41 officers were killed with firearms. The majority of these firearms (25) were handguns. Another 67 officers died accidentally while performing official duties.

Note: Offense totals are based on all reporting agencies and estimates for unreported areas. Figures may not add up to totals due to rounding. (1) Data for arson, considered a property crime, are not included in this table. (2) Does not include statutory rape (i.e., rape not involving force) and other offenses of a sexual nature. Also does not include sexual attacks on males, which are considered aggravated assaults or sex offenses, depending on circumstances and extent of injuries. (3) Attack upon another with the intent of doing serious bodily harm; usually accompanied by the use of a weapon or other means likely to produce death or great bodily harm. (4) The unlawful taking of another's property not involving force or fraud (e.g., theft of motor vehicle parts, shoplifting). Excludes crimes such as embezzlement and check fraud. (5) Limited data available for Illinois. (6) Illinois and Minnesota—with the exception of Rockford, IL, and Minneapolis and St. Paul, MN—collect data on forcible rape offenses using methodology not consistent with national UCR guidelines. Forcible rape offenses in the two states, with the exception of the previously mentioned cities, have been estimated for inclusion in this table. (7) Includes offenses reported by National Zoological Park Police and Washington Metro Transit Police.

State and Federal Prison Population; Death Penalty, 2008-09

Source: Prison Inmates at Midyear 2009; Capital Punishment, 2008; Bureau of Justice Statistics, U.S. Dept. of Justice

As of June 30, 2009, 1,617,478 prisoners—about two-thirds of the nation’s incarcerated population—were under the jurisdiction, or legal authority, of federal (12.8%) or state (87.2%) correctional authorities. The prison population increased by 0.4% over the preceding 12 months, which is slower than the 1.9% annual average growth recorded between 2000 and 2008. Jails, which are locally operated and typically hold persons awaiting trial or sentencing as well as those sentenced to one year or less, held most of the remaining inmate population (767,620).

As of mid-2009, the incarceration rate in state and federal prisons for those with sentences of more than one year was 504 per 100,000 U.S. residents, down slightly from 509 in 2008, but still up significantly from 478 at year-end 2000. Among inmates held in custody in prisons or jails, black males were incarcerated at 6.7 times the rate of white males. One in 21 black males was incarcerated in June 2009, compared to one in 141 white males. Black males (841,000) outnumbered white males (693,800) and Hispanic males (442,000) among inmates in prisons and jails. An estimated 94,498 non-U.S. citizens were held in state or federal prisons as of June 2009.

In 2008, 37 persons were executed, while another 82 were removed from death row. Of the 3,207 persons under sentence of death at year-end 2008, 98.2% were male; 56.1% were white, and 41.7% were black. The median age of this population was 43 years.

Another 52 people were executed in 2009, nearly half of them (24) by the state of Texas. Alabama was a distant second with 6 executions in 2009.

Note: Excludes jail population unless otherwise noted. (1) Prisoners sentenced to more than one year. Rates are per 100,000 population, based upon census population estimates for July 1, 2009. (2) 2000 population as of Dec. 31. (3) Population based on custody count (number of prisoners held in its facilities) as opposed to jurisdiction count (number of prisoners under its legal authority). Some states are unable to provide both counts. (4) Prisons and jails form one integrated system. Data includes total jail and prison population.

Arrests by Race, 2009

Source: Crime in the United States, 2009, Federal Bureau of Investigation, U.S. Dept. of Justice

Each instance in which a person is arrested, cited, or summoned for an offense is counted as one arrest. The figures below therefore do not represent the number of individuals arrested but the number of times persons were arrested, assuming an individual may be arrested multiple times in one year. Arrest estimates are based on statistics from law enforcement agencies that reported 12 months of arrest data.

		Number of arrests where arrestee was—				% distrib. for offense charged ¹			
				Amer. Indian/ Alaska Native	Asian/ Pacific Islander			Amer. Indian/ Alaska Native	Asian/ Pacific Islander

Note: Rates are based on census population estimates for July 1, 2009. Detailed categories exclude persons who reported two or more races. Hispanics may be of any race but are not included in white and black populations here. (1) Includes American Indians, Alaska natives, Asians, Native Hawaiians, other Pacific Islanders, and persons identifying two or more races. (2) Includes persons under age 18.

Hate Crimes by Offense Type, Bias Motivation, 2008

Source: *Hate Crime Statistics, 2008*, Federal Bureau of Investigation, U.S. Dept. of Justice

Hate crimes are defined as crimes in which victims are chosen because of one or more personal characteristics, such as race, ethnicity, or religion. Congress enacted the Hate Crime Statistics Act of 1990, which led to the collection of hate crime data as part of the FBI's Uniform Crime Report (UCR) program beginning in 1992. Not all agencies that participate in the UCR program submit hate crime data, so the data presented is not representative of the nation as a whole.

Barbara Jane Mackle, 20, abducted **Dec. 17, 1968**, from Atlanta, GA, motel; found unharmed 3 days later, buried in a coffin-like box 18 in. underground, after her father paid \$500,000 ransom. Gary Steven Krist sentenced to life, Ruth Eisenmann-Schier to 7 years.

Virginia Piper, 49, abducted **July 27, 1972**, from her home in suburban Minneapolis; found unharmed near Duluth 2 days later after husband, retired banker, paid \$1 mil ransom, then largest ransom ever reported in U.S.

J. Paul Getty III, 17, grandson of the oil billionaire, disappeared **July 10, 1973**, in Italy. Reported payment of \$2.8 mil ransom not made until after Getty’s ear was sent to a newspaper with a warning that other parts of his body would be mutilated unless ransom was paid. Getty freed **Dec. 15**; 2 men sentenced to prison.

Patricia “Patty” Hearst, 19, taken from her Berkeley, CA, apartment **Feb. 4, 1974**; “Symbionese Liberation Army” captors demanded her father, publisher Randolph Hearst, give millions to area poor. Patricia implicated in a San Francisco bank holdup, **Apr. 15**. The FBI, **Sept. 18, 1975**, captured her and others; they were indicted on various charges. Patricia convicted of bank robbery, Mar. 20, 1976; released from prison under executive clemency, Feb. 1, 1979. In 1978, William and Emily Harris were sentenced to 10 years to life for the kidnapping; both were paroled in 1983.

J. Reginald Murphy, 40, an editor of *Atlanta Constitution* (GA), kidnapped **Feb. 20, 1974**; freed **Feb. 22** after newspaper paid \$700,000 ransom. William A. H. Williams arrested; most of the money recovered.

Jack Teich, Kings Point, NY, steel executive, seized **Nov. 12, 1974**; released **Nov. 19** after payment of \$750,000.

Adam Walsh, 6, abducted from a Hollywood, FL, dept. store, **July 27, 1981**. Severed head found 2 weeks later. John Walsh, Adam’s father, became active in raising awareness about missing children.

Terry Anderson, 37, Middle East bureau chief for Associated Press, in Beirut, Lebanon, by members of Islamic fundamentalist group Hezbollah on **Mar. 16, 1985**. Freed **Dec. 4, 1991**. Anderson had been held hostage along with **William Buckley**, 55, CIA station chief in Beirut who was kidnapped **Mar. 16, 1984**, and died in captivity.

Jaycee Dugard, 11, kidnapped near her home in South Lake Tahoe, CA, **June 10, 1991**; held for 18 years by Nancy and Philip Garrido, who fathered two girls with Dugard during her captivity. Dugard, along with her 11- and 15-year-old daughters, was reunited with her family **Aug. 27, 2009**, after police arrested the Garridos.

Sidney J. Reso, oil company executive, seized **Apr. 29, 1992**; died **May 3**. Arthur D. Seale—former security official at oil company—and his wife, Irene, arrested June 19. Arthur pleaded guilty, sentenced to life in prison; Irene sentenced to 20-year prison term.

Polly Klaas, 12, Petaluma, CA, abducted at knife point, **Oct. 1, 1993**, during a slumber party at her home. Police arrested Richard Allen Davis on **Nov. 30**; he led them to her body, found **Dec. 4** in wooded area of Cloverdale, CA. Davis found guilty June 18, 1996, and sentenced to death Sept. 26.

Marshall I. Wais, 79, owner of 2 San Francisco steel companies, kidnapped **Nov. 19, 1996**, from his San Francisco home. Released unharmed the same day after \$500,000 ransom paid; Thomas William Taylor and Michael K. Robinson arrested same day.

Tionda Z. Bradley, 10, and sister **Diamond Yvette Bradley**, 3, went missing **July 6, 2001**, in Chicago, IL. Note left by Tionda at home stated the 2 girls were going to the store and the playground. Believed kidnapped, case still unsolved.

Daniel Pearl, 38, reporter for *Wall Street Journal*, disappeared **Jan. 23, 2002**, while researching story in Karachi, Pakistan. British-born militant Ahmad Omar Saeed Sheikh **Feb. 14** admitted to organizing the kidnapping and said Pearl was dead. Sheikh and 3 others convicted July 15 of kidnapping and murder by a judge in Hyderabad.

Elizabeth Smart, 14, abducted from her home in Salt Lake City, UT, **June 5, 2002**, allegedly by Brian D. Mitchell, and forced to live with Mitchell and wife Wanda for 9 months in various U.S. cities; found walking down street with captors in Sandy, UT, 15 miles from Smart family home, **Mar. 12, 2003**.

Natalee Holloway, 18, of Birmingham, AL, vanished **May 30, 2005**, on high school graduation trip to Aruba, Netherlands dependency in West Indies. Officials believed she was kidnapped and murdered. Several suspects were detained but later released.

Jill Carroll, 28, freelance journalist, in Baghdad by group called the Revenge Brigade, **Jan. 7, 2006**. She was on assignment for the *Christian Science Monitor* when she was seized. She was released **Mar. 30**; 4 Iraqis arrested in connection with her kidnapping in Aug.

Steve Centanni, 60, a Fox News reporter released **Aug. 26, 2006** (along with a colleague), after being kidnapped and held hostage for 13 days by Palestinian militant group Holy Jihad Brigades. The group had demanded that the U.S. release all Muslims held in its prisons.

Reigh Storrow Mills, 7, abducted **July 27, 2008**, by her father Christian Gerhartsreiter (who used the alias Clark Rockefeller); reunited with her mother **Aug. 2, 2008**, by FBI agents who took Gerhartsreiter into custody.

Felix Batista, 55, who negotiated the release of numerous kidnapping victims in Latin America was abducted in Mexico in early **Dec. 2008**.

Melissa Roxas, 31, a volunteer health worker released **May 24, 2009**, five days after being kidnapped in the Philippines **May 19, 2009**.

David Rohde, 41, a *New York Times* reporter captured by the Taliban in Afghanistan **Nov. 10, 2008**, escaped **June 19, 2009**.

Notable Terrorist Incidents Worldwide Since 1971

Source: U.S. Dept. of State; *Facts On File World News Digest @ Facts.com*; World Almanac research

Selected noteworthy incidents, excluding most assassinations, kidnappings, and military targets. Does not include all incidents in Iraq or Afghanistan, 2001-present; see Chronology of the Year’s Events.

Directors of the Central Intelligence Agency

In 1942, Pres. Franklin D. Roosevelt established the Office of Strategic Services (OSS); it was disbanded in 1945. In 1946, Pres. Harry Truman established the Central Intelligence Group (CIG) to operate under the National Intelligence Authority (NIA). A 1947 law replaced the NIA with the National Security Council and the CIG with the Central Intelligence Agency.

Director	Served	Appointed by President	Director	Served	Appointed by President

Military Units, U.S. Army and Air Force

ARMY UNITS. Squad: In infantry usually 8-16 enlisted personnel under a staff sergeant. **Platoon:** In infantry 2-4 squads under a lieutenant. **Company:** Headquarters section and 3-5 platoons under a captain. (Company-size unit in the artillery is a battery; in the cavalry, a troop.) **Battalion:** Hdqts. and 4-6 companies under a lieutenant colonel. (Battalion-size unit in the cavalry is a squadron.) **Brigade:** Hdqts. and 2-5 battalions under a colonel. (Brigade-size unit in the cavalry and rangers is a regiment; in the special forces, a group.) **Division:** Hdqts. and 3 brigades with artillery, combat support, and combat service support units under a major general. **Corps:** Two or more divisions with corps troops under a lieutenant general. **Army:** Hdqts. and 2 or more corps with operational and support responsibilities under a general.

AIR FORCE UNITS. Flight: Numerically designated flights are the lowest level unit in the Air Force. They are used primarily where there is a need for small mission elements to be incorporated into an organized unit. **Squadron:** The basic unit. Designates specific operational or support capability like mission units in operational commands. **Group:** A flexible unit composed of 2 or more squadrons whose functions may be operational, support, or administrative in nature. **Wing:** A primary group with supporting groups on a distinct mission with significant scope such as combat, flying training, or airlift. **Numbered Air Forces:** Normally an operationally oriented agency, the numbered air force is designed for the control of subordinate units with the same mission and/or geographical location. **Major Command:** A major subdivision of the Air Force with full staff that manages a major segment of the USAF mission. Major Command is composed of 3 or more numbered air forces.

NA = Not available. (1) Represents strength of active Army, including Philippine Scouts (1940-46), ret. Regular Army personnel on extended active duty, and National Guard and Reserve personnel on extended active duty; excl. U.S. Military Academy cadets, contract surgeons, and National Guard and Reserve personnel not on extended active duty. (2) Includes categories not listed, e.g. West Point Cadets. Data for 1940-46 include personnel in the Army Air Forces and its predecessors (Air Service and Air Corps). (3) Includes Army Nurse Corps for all years, Women's Army Corps (1942-78), Medical Specialists Corps (1949 and subsequent years). (4) Act of Congress approved Apr. 27, 1926, directed the appointment as warrant officers of field clerks still in active service. Includes flight officers as follows: 1943, 5,700; 1944, 13,615; 1945, 31,117; 1946, 2,580.

Women in the U.S. Armed Forces

Source: U.S. Dept. of Defense; U.S. Census Bureau; Women In Military Service For America Memorial Foundation

Women in the Army, Navy, Air Force, Marines, and Coast Guard are fully integrated with male personnel. All enlisted jobs were open to women when the draft ended June 30, 1973. Admission to service academies began in 1976. Under rules instituted in 1993, women were allowed to fly combat aircraft and serve aboard warships. By the mid-1990s, 80% of all jobs and more than 90% of all career fields had been opened to women. The first woman achieved the rank of four-star general in 2009. In Apr. 2010, the Navy announced that women would be placed on submarine crews by Jan. 2012. Women remained restricted from service in ground combat units.

(women on active duty as of Sept. 30 in year shown.)

African American Service in U.S. Wars

Source: U.S. Dept. of Defense; U.S. Census Bureau

American Revolution. About 5,000 served in the Continental Army, mostly in integrated units, some in all-black combat units.
Civil War. Some 180,000 served in 163 units of the Union Army’s U.S. Colored Troops, 200,000 worked in service units—10% of the Union Army in all; about 37,000 died, 31,000 wounded.
World War I. 350,000-400,000 served in the armed forces, 100,000 in France. Some 40,000 fought.
World War II. Some 1 mil served in the armed forces—8% of all troops—mostly in Army service units; all-black fighter and bomber AAF units and infantry divisions gave distinguished service.
Korean War. More than 600,000 served in the military; 3,075 lost their lives in combat. By 1954, armed forces were completely desegregated.
Vietnam War. 274,937 served in the armed forces (1965-74)—9.8% of all troops; 7,243 were killed in combat.
Persian Gulf War. About 104,000 served in the Kuwaiti theater—20% of all U.S. troops. 66 died in combat.
Operation Enduring Freedom. 90 military deaths and 417 wounded in Afghanistan and other locations (as of July 31, 2010).
Iraq War. 428 military deaths and 2,681 wounded (as of July 31, 2010).

NA = Not applicable. **Notes:** In 2007, the military pay scale was expanded to 40 years. **Over 30 years**—O-10: 16,939; O-9: 14,946; O-8: 13,219; O-7: 11,668; O-6: 10,248; W-5: 7,984; W-4: 7,047; E-9: 6,436; E-8: 5,336. **Over 34 years**—O-10: 17,786; O-9: 15,693; O-8: 13,550; W-5: 8,383; E-9: 6,758. **Over 38 years**—O-10: 18,675; O-9: 16,478; W-5: 8,803; E-9: 7,097. (1) Basic pay for an O-7 to O-10 is limited by Level II of the Executive Schedule which is \$14,975.10. Basic pay for O-6 and below is limited by Level V of the Executive Schedule which is \$12,141.60. (2) While serving as Chairman, Joint Chief of Staff/Vice Chairman, Joint Chief of Staff, Chief of Navy Operations, Commandant of the Marine Corps, Army/Air Force Chief of Staff, Commander of a unified or specified combatant command, basic pay is \$19,983.60. (See note 1 above). (3) Applicable to O-1 to O-3 with at least 4 years and 1 day of active duty or more than 1460 points as a warrant and/or enlisted member. See Department of Defense Financial Management Regulations for more detailed explanation on who is eligible for this special basic pay rate. (4) For the Master Chief Petty Officer of the Navy, Chief Master Sergeant of the AF, Sergeant Major of the Army or Marine Corps or Senior Enlisted Advisor of the JCS, basic pay is \$7,386.30. Combat Zone Tax Exclusion for O-1 and above is based on this basic pay rate plus Hostile Fire Pay/Imminent Danger Pay which is \$225.00. (5) Applicable to E-1 with 4 months or more of active duty. Basic pay for an E-1 with less than 4 months of active duty is \$1,338.60.

U.S. Veteran Population, 2010

Source: U.S. Dept. of Veterans Affairs
(population projection, in thousands, as of Sept. 30, 2010)

TOTAL VETERANS IN CIVILIAN LIFE¹	22,658.1	Total Korean conflict ³	2,448.5
Total wartime veterans²	16,854.4	Korean conflict with no prior wartime service	2,041.6
Total Gulf War ³	5,725.5	Korean conflict with service in WWII	152.4
Gulf War with no prior wartime service	5,373.1	Total World War II ³	1,981.2
Gulf War with service in Vietnam era	347.0	WWII only	1,761.1
Gulf War, with service in Vietnam and Korea	4.8	Total peacetime veterans⁴	5,803.7
Gulf War with service in Vietnam, Korea, and WWII	0.6	Post Gulf War	11.4
Total Vietnam era ³	7,526.2	Service between Vietnam era and Gulf War only	3,411.3
Vietnam era with no prior wartime service	6,924.8	Service between Korean conflict and Vietnam era only	2,265.6
Vietnam era with service in Korean conflict	181.9	Pre-Korean conflict without service in WWII	115.4
Vietnam era with service in Korea and WWII	67.1		

Note: Figures are for U.S. veterans worldwide. (1) Includes those who served on active duty in Army, Navy, Air Force, Marines, Coast Guard, uniformed Public Health Service and NOAA, and reservists called to federal active duty. Excludes those dishonorably discharged, those whose only active duty was training, and those currently on active duty. (2) Veterans serving in more than one period are counted only once in total. (3) Total includes veterans who also served in previous periods. (4) Veterans with both wartime and peacetime service are counted only as "wartime veterans."

Nations with Largest Armed Forces, by Active-Duty Troop Strength

(1) FY01 and FY02 funds combined because most were obligated in FY02 after the 9/11 attacks at the end of FY01. (2) Foreign aid and diplomacy figures include monies for reconstruction, development and humanitarian aid, embassy operations, counternarcotics, initial training of the Afghan and Iraqi army, foreign military sales credits, and Economic Support Funds. (3) Began in the fall of 2002 with the buildup of troops for the Mar. 2003 invasion of Iraq and continues with counterinsurgency and stability operations. (4) Covering Afghanistan and other ongoing Global War on Terror (GWOT) operations, ranging from the Philippines to Djibouti, that began immediately after the 9/11 attacks. (5) Dept. of Defense funds that rebuilt the Pentagon, provide higher security at U.S. military bases, and other homeland security, including combat air patrol.

Leading Purchasers of U.S. Defense Articles and Services

Source: Congressional Research Service (in current U.S. dollars)

Worldwide Deliveries ¹			
2001-04		2005-08	
1. Egypt	\$5.2 billion	6. Japan	\$2.1 billion

Note: All data are for the calendar year given except for U.S. MAP (Military Assistance Program), IMET (International Military Education, and Training), and Excess Defense Article data, which are included for the particular fiscal year. All amounts given include the values of all categories of weapons, spare parts, construction, all associated services, military assistance, excess defense articles, and training programs. Statistics for foreign countries are based upon estimated selling prices. All foreign data are rounded to the nearest \$100 million.

Personal Salutes and Honors

The U.S. **national salute**, 21 guns, is also the salute to a national flag. U.S. independence is commemorated by the salute to the Union—one gun for each state—fired at noon July 4, at all military posts provided with suitable artillery.

A 21-gun salute on arrival and departure, with 4 ruffles and flourishes, is rendered to the **president** of the United States, to a former president, and to a president-elect. The national anthem or “Hail to the Chief,” as appropriate, is played for the president, and the national anthem for the others. A 21-gun salute on arrival and departure, with 4 ruffles and flourishes, also is rendered to the **sovereign or chief of state of a foreign country** or a member of a reigning royal family, and the national anthem of his or her country is played. The music is considered an inseparable part of the salute and immediately follows the ruffles and flourishes without pause. For the Honors March, generals receive the “General’s March,” admirals receive the “Flag Officer’s March,” and all others receive the 32-bar medley of “The Stars and Stripes Forever.”

GRADE, TITLE, OR OFFICE	SALUTE (IN GUNS)		Ruffles and flourishes	Music
	Arriving	Leaving		
Vice President of U.S.	19	—	4	Hail, Columbia
Speaker of the House.	19	—	4	Honors March
U.S. or foreign ambassador in country to which accredited	19	—	4	Nat. anthem of official
Premier or prime minister	19	—	4	Nat. anthem of official
Secretary of Defense, Army, Navy, or Air Force	19	19	4	Honors March
Other cabinet members, Senate president pro tempore, governor, or chief justice of U.S.	19	—	4	Honors March
Chairman, Joint Chiefs of Staff.	19	19	4	Honors March
Army chief of staff, chief of naval operations, Air Force chief of staff, Marine commandant.	19	19	4	Honors March
General of the Army, general of the Air Force, fleet admiral	19	19	4	Honors March
Generals, admirals	17	17	4	Honors March
Assistant secretaries of Defense, Army, Navy, or Air Force.	17	17	4	Honors March
Chair of a committee of Congress	17	—	4	Honors March

OTHER SALUTES (on arrival only, with Honors March) include 17 guns, with 3 ruffles and flourishes, for U.S. ambassadors returning to the U.S. on official business; 15 guns, with 3 ruffles and flourishes, for U.S. envoys or ministers, foreign envoys or ministers accredited to the U.S., and lieutenant generals or vice admirals; 13 guns, with 2 ruffles and flourishes, for a major general or rear admiral (upper half) and for U.S. ministers resident and ministers resident accredited to the U.S.; 11 guns, with 1 ruffle and flourish, for a brigadier general or rear admiral (lower half) and for U.S. *chargés d’affaires* and like officials accredited to the U.S.; 11 guns, no ruffles and flourishes, for consuls general accredited to the U.S.

U.S. Military Awards
The Medal of Honor

Source: Congressional Medal of Honor Society; Army, U.S. Dept. of Defense

The Medal of Honor is the highest military award for bravery that can be given to any individual in the United States. The first Army Medals were awarded on Mar. 25, 1863; the first Navy Medals went to sailors and Marines on Apr. 3, 1863.

On Dec. 21, 1861, Pres. Abraham Lincoln signed a bill to create the Navy Medal of Honor. Lincoln, on July 14, 1862, approved a resolution providing for the presentation of Medals of Honor to enlisted men of the Army and Voluntary Forces, making it a law. The law was amended on Mar. 3, 1863, to extend its provisions to include officers as well as enlisted men.

The Medal of Honor is awarded in the name of Congress to a person who, while a member of the armed forces, distinguishes himself or herself conspicuously by gallantry and intrepidity at the risk of life above and beyond the call of duty while engaged in an action against any enemy of the United States; while engaged in military operations involving conflict with an opposing foreign force; or while serving with friendly foreign forces engaged in an armed conflict against an opposing armed force in which the United States is not a belligerent party.

The deed performed must have been one of personal bravery or self-sacrifice so conspicuous as to clearly distinguish the individual above his or her comrades and must have involved risk of life. Incontestable proof of the performance of service is required, and each recommendation for award of this decoration is considered on the standard of extraordinary merit.

Prior to World War I, the 2,625 Army Medal of Honor awards up to that time were reviewed to determine which past awards met new stringent criteria. The Army removed 911 names from the list, most of them former members of a volunteer infantry group during the Civil War who had been induced to extend their enlistments when they were promised the medal. However, in 1977 a medal was restored to Dr. Mary Walker, and in 1989 medals were restored to Buffalo Bill Cody and 7 other Indian scouts.

Medals of Honor were awarded posthumously for actions during the Battle of Mogadishu (Somalia), Oct. 3, 1993, to Army Master Sgt. Gary I. Gordon and to Sgt. First Class Randall D. Shughart. Both received the medal for volun-

tarily guarding a helicopter crash site and its downed crew while under heavy enemy fire until relief could arrive.

Seven African American soldiers were awarded Medals of Honor for service in World War II (6 of them posthumously) in Jan. 1997. Previously, no black soldier had received the medal for World War II service; an Army inquiry begun in 1993 concluded that the prevailing political climate and Army practices of the time had prevented proper recognition of heroism on the part of black soldiers in that war. In June 2002, 22 Asian Americans received the award for World War II service.

As of Oct. 1, 2009, four Medals of Honor had been awarded for actions in Operation Iraqi Freedom. On Apr. 4, 2003, Army Sgt. First Class Paul R. Smith was mortally wounded while holding an exposed position, near Baghdad International Airport, against enemy attack. On Apr. 14, 2004, Marine Cpl. Jason L. Dunham was mortally wounded at Karbala when he covered a live grenade with his helmet and body to protect his fellow Marines. On Sept. 29, 2006, Navy Petty Officer Second Class (SEAL) Michael A. Monsoor was mortally wounded at Ar Ramadi when he threw himself onto a grenade, saving the lives of two teammates. The most recent recipient was Army Private First Class Ross A. McGinnis, whose posthumous award was presented June 5, 2008. While manning a machine gun in northern Baghdad on Dec. 4, 2006, an insurgent threw a grenade into his vehicle. He covered the grenade with his body and was mortally wounded while saving his four crew members from serious injury.

Two Medals of Honor had been awarded for actions in Afghanistan. On June 28, 2005, Navy Lt. Michael P. Murphy’s SEAL team came under attack by Taliban fighters. Heavily outnumbered and with all four team members wounded, Lt. Murphy left cover to radio for help and was shot in the back. One of his men survived the attack. On June 21, 2006, Army Sgt. First Class Jared C. Monti and his patrol were ambushed. Monti repeatedly tried to rescue a wounded soldier despite overwhelming gunfire and his men being outnumbered by more than 3 to 1. Monti was killed by a grenade on his third attempt. His heroism inspired his comrades to fend off the enemy.

Other Selected Awards

Source: U.S. Army Institute of Heraldry; Navy Department Awards Web Service; Air Force Personnel Center

Distinguished Service Cross

Established in Congress July 9, 1918, on recommendation of Gen. John J. “Black Jack” Pershing, and awarded for extraordinary heroism not justifying the award of a Medal of Honor. The act or acts of heroism must have been so notable and have involved risk of life so extraordinary as to set the individual apart from his or her comrades.

Silver Star

An earlier version of this award, the Citation Star, was established by Congress on July 19, 1918, and retroactively awarded to soldiers for “gallantry in action,” back to the Spanish-American War. The Silver Star medal replaced the Citation Star in 1932 and is awarded for gallantry in action which, while of a lesser degree than that required for award of the Distinguished Service Cross, must nevertheless have been performed with marked distinction.

Legion of Merit

Established by Congress on July 20, 1942, and awarded to individuals who have distinguished themselves by exceptionally meritorious conduct in the performance of outstanding services. There are different designs depending on the level of command of the award recipient.

Distinguished Flying Cross

Established by Congress July 2, 1926, and awarded for heroism or extraordinary achievement while participating in aerial flight. Awards are made only to recognize single acts of heroism or extraordinary achievement, not sustained operational activities against an armed enemy. Initial awards were given to persons who made record breaking long-distance and endurance flights or who set altitude records. The first DFC was awarded to Cpt. Charles A. Lindbergh on May 31, 1927, and DFCs were awarded retroactively to Orville and Wilbur Wright.

Soldier’s Medal

Established by Congress July 2, 1926, to recognize acts of heroism not involving actual conflict with an enemy. The same degree of heroism is required as for the award of the Distinguished Flying Cross. The performance must have involved personal hazard or danger and the voluntary risk of life under conditions not involving conflict with an armed enemy. Awards are not made solely on the basis of having saved a life.

Bronze Star

Established by Executive Order Feb. 4, 1944, largely to raise the morale of ground troops in WWII, on the recommendation of Gen. George C. Marshall. It is awarded to any person who, while serving in any capacity in or with the U.S. military, distinguishes himself or herself by heroic or meritorious achievement or service, not involving participation in aerial flight.

Purple Heart

The original Purple Heart, designated as the Badge of Military Merit, was established by Gen. George Washington on Aug. 7, 1782. Following the American Revolution, the badge fell into disuse until 1932, the 200th anniversary of Washington’s birth. During WWII, the Order of the Purple Heart was awarded for both wounds received in action and for meritorious service; following the introduction of the Legion of Merit, it was awarded only for combat wounds. Today, the Purple Heart is awarded to any member of an armed force who, while serving with the U.S. Armed Services, has been wounded or killed, or who has died or may hereafter die after being wounded in action against an enemy of the U.S. or in an armed conflict in which the U.S. or friendly foreign forces are engaged; as the result of an act of any hostile foreign force; as a result of an international terrorist attack against the U.S. or a friendly foreign nation; as a result of military operations outside the U.S. as part of a peacekeeping force. Wounds must be inflicted by weapon fire while directly engaged in armed conflict, regardless of the fire causing the wound; or while held as a prisoner of war or while being taken captive.

Air Medal

Authorized by Pres. Roosevelt on May 11, 1942, and awarded for heroism or meritorious achievement while participating in aerial flight. Awards may be made to recognize single acts of merit or heroism, or for meritorious service. Awards are not made to individuals who use air transportation solely for the purpose of moving from point to point in a combat zone.

Army Commendation

Established Dec. 18, 1945, and awarded for heroism, meritorious achievement, or meritorious service. It may also be awarded to a member of the Armed Forces of a friendly foreign nation who distinguishes him or herself by an act of heroism, extraordinary achievement, or meritorious service which has been of mutual benefit to a friendly nation and the United States.

Note: As of Oct. 12, 2010, there have been 1,008 battle deaths, 309 non-hostile deaths, and 8,706 wounded in Op. Enduring Freedom, mostly in Afghanistan and the Persian Gulf area. (1) From the final report of the Provost Marshal General, 1863-66. Authoritative statistics for the Confederate forces are not available. In addition, an estimated 26,000-31,000 Confederate personnel died in Union prisons. (2) Data are for Dec. 1, 1941, through Dec. 31, 1946, when hostilities were officially terminated by presidential proclamation; few battle deaths or wounds not mortal were incurred after Japanese acceptance of Allied peace terms on Aug. 14, 1945. Numbers serving Dec. 1, 1941-Aug. 31, 1945, were: Total—14,903,213; Army—10,420,000; Navy—3,883,520; Marine Corps—599,693. (3) Number serving covers the period Apr. 21-Aug. 13, 1898, while dead and wounded data are for the period May 1-Aug. 31, 1898. Active hostilities ceased on Aug. 13, 1898, but ratifications of the treaty of peace were not exchanged between the U.S. and Spain until Apr. 11, 1899. (4) Includes Army Air Forces battle deaths and wounds not mortal, as well as casualties suffered by American forces in northern Russia to Aug. 25, 1919, and in Siberia to Apr. 1, 1920. Other deaths covered the period Apr. 1, 1917-Dec. 31, 1918. (5) Includes Army Air Forces. (6) Battle deaths and wounds not mortal include casualties incurred in Oct. 1941 due to hostile action. (7) Marine Corps data for Iraq War, World War II, the Spanish-American War, and prior wars represent the number of individuals wounded, whereas all other data in this column represent the total number (incidence) of wounds. (8) As reported by Commissioner of Pensions in his Annual Report for Fiscal Year 1903. (9) As a result of an ongoing Dept. of Defense review of available Korean War casualty record information, updates to previously reported figures for battle deaths and other deaths are reflected in this table. (10) Number serving covers the period Aug. 5, 1964-Jan. 27, 1973 (date of cease-fire). Includes casualties incurred in Mayaguez incident. Wounds not mortal exclude 150,341 persons not requiring hospital care. (11) Estimated. (12) Actually the U.S. Revenue Cutter Services, predecessor to the U.S. Coast Guard. (13) Totals do not include categories for which no data are listed. (14) Military deaths during the invasion phase, which ended Apr. 30, 2003, totaled 115 combat-related and 23 other. (15) Number serving figures for the Iraq War are current as of Mar. 31, 2003, and do not include numbers of troops deployed since then.

U.S. Army, Navy, Air Force, Marine Corps, and Coast Guard Insignia

Army

General of the Armies—Gen. John J. Pershing (1860-1948), the only person to have held this rank while living, was authorized to prescribe his own insignia but never wore in excess of four stars. The rank originally was established posthumously by Congress for George Washington in 1799, and he was promoted to the rank by joint resolution of Congress, approved by Pres. Gerald Ford, Oct. 19, 1976.

General of the Army—Five silver stars fastened together in a circle and the coat of arms of the United States in gold color metal with shield and crest enameled. Reserved for wartime use only.

Rank	Insignia
General of the Army*	Five silver stars
General	Four silver stars
Lieutenant General	Three silver stars
Major General	Two silver stars
Brigadier General	One silver star
Colonel	Silver eagle
Lieutenant Colonel	Silver oak leaf
Major	Gold oak leaf
Captain	Two silver bars
First Lieutenant	One silver bar
Second Lieutenant	One gold bar

Warrant Officers

- Grade Five—Silver bar with enamel black line.
- Grade Four—Silver bar with 4 enamel black squares.
- Grade Three—Silver bar with 3 enamel black squares.
- Grade Two—Silver bar with 2 enamel black squares.
- Grade One—Silver bar with 1 enamel black square.

Noncommissioned Officers

- Sergeant Major of the Army (E-9)—Three chevrons above 3 arcs, with a U.S. Coat of Arms centered on the chevrons, flanked by 2 stars—one star on each side of the eagle. Also wears distinctive red and white shield collar insignia.
- Command Sergeant Major (E-9)—Three chevrons above 3 arcs with a 5-pointed star with a wreath around the star between the chevrons and arcs.
- Sergeant Major (E-9)—Three chevrons above 3 arcs with a 5-pointed star between the chevrons and arcs.
- First Sergeant (E-8)—Three chevrons above 3 arcs with a lozenge between the chevrons and arcs.
- Master Sergeant (E-8)—Three chevrons above 3 arcs.
- Sergeant First Class (E-7)—Three chevrons above 2 arcs.
- Staff Sergeant (E-6)—Three chevrons above 1 arc.
- Sergeant (E-5)—Three chevrons.
- Corporal (E-4)—Two chevrons.

Specialists

- Specialist (E-4)—Eagle device only.

Other Enlisted

- Private First Class (E-3)—One chevron above 1 arc.
- Private (E-2)—One chevron.
- Private (E-1)—None.*

*Rank reserved for wartime use only.

Air Force

Insignia for Air Force officers are identical to those of the Army. Insignia for enlisted personnel are worn on both sleeves and consist of a star and an appropriate number of rockers. Chevrons appear above 5 rockers for the top 3 noncommissioned officer ranks, as follows (in ascending order): Master Sergeant, 1 chevron; Senior Master Sergeant, 2 chevrons; and Chief Master Sergeant, 3 chevrons. The insignia of the Chief Master Sergeant of the Air Force has 3 chevrons and a wreath around the star design. General of the Air Force is reserved for wartime use only.

Navy

The following stripes are worn on the lower sleeves of the Service Dress Blue uniform. They are of gold embroidery.

Rank	Insignia
Fleet Admiral*	1 two inch with 4 one-half inch
Admiral	1 two inch with 3 one-half inch
Vice Admiral	1 two inch with 2 one-half inch
Rear Admiral (upper half)	1 two inch with 1 one-half inch
Rear Admiral (lower half)	1 two inch
Captain	4 one-half inch
Commander	3 one-half inch
Lieutenant Commander	2 one-half inch with 1 one-quarter inch between
Lieutenant	2 one-half inch
Lieutenant (j.g.)	1 one-half inch with one-quarter inch above
Ensign	1 one-half inch
Warrant Officer W-4	½" stripe with 1 break
Warrant Officer W-3	½" stripe with 2 breaks, 2" apart
Warrant Officer W-2	½" stripe with 3 breaks, 2" apart

Enlisted personnel (noncommissioned petty officers)—A rating badge worn on the upper left sleeve, consisting of a spread eagle, appropriate number of chevrons, and centered specialty mark.

*Rank reserved for wartime use only.

Marine Corps

Marine Corps' distinctive cap and collar ornament is the Marine Corps Emblem—a combination of the American eagle, a globe, and an anchor. Marine Corps and Army officer insignia are similar. Marine Corps enlisted insignia, although basically similar to the Army's, feature crossed rifles beneath the chevrons. Marine Corps enlisted rank insignia are as follows:

- Sergeant Major of the Marine Corps (E-9)—Same as Sergeant Major (below) but with Marine Corps emblem in the center with a 5-pointed star on both sides of the emblem.
- Sergeant Major (E-9)—Three chevrons above 4 rockers with a 5-pointed star in the center.
- Master Gunnery Sergeant (E-9)—Three chevrons above 4 rockers with a bursting bomb insignia in the center.
- First Sergeant (E-8)—Three chevrons above 3 rockers with a diamond in the middle.
- Master Sergeant (E-8)—Three chevrons above 3 rockers with crossed rifles in the middle.
- Gunnery Sergeant (E-7)—Three chevrons above 2 rockers with crossed rifles in the middle.
- Staff Sergeant (E-6)—Three chevrons above 1 rocker with crossed rifles in the middle.
- Sergeant (E-5)—Three chevrons above crossed rifles.
- Corporal (E-4)—Two chevrons above crossed rifles.
- Lance Corporal (E-3)—One chevron above crossed rifles.
- Private First Class (E-2)—One chevron.
- Private (E-1)—None.

Coast Guard

Coast Guard insignia follow Navy custom, with certain minor changes such as the officer cap insignia. The Coast Guard shield is worn on both sleeves of officers and on the right sleeve of all enlisted personnel.

Timeline of Major Wars Since 1066

Norman Conquest 1066-71	William I, duke of Normandy, landed on the English coast near Hastings on Sept. 28, 1066, and defeated Harold II, Saxon king of England, at Battle of Hastings Oct. 14. William crowned king Dec. 25 in Westminster Abbey. Most revolts were suppressed by 1071. Conquest linked England's interests with those of the continent and led to its rise as a powerful monarchy.
Crusades 1095-1270/1291	Military expeditions undertaken by Western European Christians usually at the behest of the papacy , to recover Jerusalem and other Biblical places of pilgrimage from Muslim control; in the long term, stimulated trade and flow of ideas between East and West. Pope Urban II called Nov. 27, 1095, for the First Crusade ; Crusaders took Jerusalem on July 15, 1099, massacred inhabitants, and founded four temporary states: Antioch, Edessa, Jerusalem, and Tripoli. The failed Second Crusade was prompted by Muslims' capture of Edessa in 1144. Jerusalem was captured by Ayyubid sultan Saladin on Oct. 2, 1187, launching the Third Crusade , which involved the Holy Roman emperor, Frederick I (Barbarossa); the French king, Philip II (Augustus); and the English king, Richard I (Lion-Heart), but did not lead to a Crusader victory. The Fourth Crusade sacked Constantinople on Apr. 13, 1204. The Fifth Crusade began with capture of Damietta in Egypt (1219) but failed at Cairo. A Sixth Crusade led to the Treaty of Jaffa in 1229, giving Jerusalem to the Crusaders until 1244, when it was taken by the Khwarizmians, launching a Seventh Crusade . The last crusade abruptly ended when its leader, French King Louis IX, died in 1270. The last major Crusader stronghold, Acre (now Akko, Israel), was lost on May 18, 1291.
Hundred Years War 1337-1453	Series of armed conflicts over rival claims to the French throne, broken by a number of truces and peace treaties. Edward III declared self king of France in 1338 and invaded, with victories at Crécy in 1346 and Poitiers in 1356. Treaty of Brétigny signed May 8, 1360, but French king Charles V renewed fighting in 1369. Truce from 1396 until Henry V of England invaded in 1415 and defeated French army at Agincourt , capturing land north of Loire River including Paris. Treaty of Troyes in 1420 made Henry VI heir of both thrones. The siege of French stronghold Orléans, lifted in 1429 with help from Joan of Arc , turned the tide in favor of the French. War ended English claims to France, paved the way for French absolute monarchy.
Wars of the Roses 1455-85	Series of dynastic civil wars in England fought by the rival houses of Lancaster and York for the throne . Richard, third duke of York, in conflict with the Lancastrian King Henry VI , won victories at St. Albans (1455) and Northampton (1460); Richard died at battle of Wakefield on Dec. 30, 1460, before coronation, leaving his son to become King Edward IV. Henry VI imprisoned in tower of London, 1465. Edward died in 1483; his brother became Richard III after usurping throne from Edward V. Henry Tudor defeated Richard III at the Battle of Bosworth Field (1485). As Henry VII, he married Edward's daughter Elizabeth, 1486, finally uniting the houses .
Thirty Years War 1618-48	A series of religious and political conflicts involving most countries of western Europe ; most fighting in Germany, devastating it. Protestants stormed Hapsburg palace in the "Defenestration of Prague" (May 23, 1618). Major conflicts included defeat of King Christian IV of Denmark and Norway by Catholic League (1626); victories by Lutheran King Gustav II Adolph of Sweden at Breitenfeld (1631) and Lützen (1632). France, under cardinal and statesman Richelieu , chief minister of King Louis XIII, declared war on the Hapsburgs in May 1635; defeated Austro-Bavarian army (Aug. 3, 1645), leading to Truce of Ulm. Peace of Westphalia signed at Münster on Oct. 24, 1648, bringing peace by recognizing the rulers' sovereignty within their lands and their right to determine the religious beliefs of their subjects.
English Civil Wars 1638-60	Series of conflicts between followers of King Charles (Cavaliers) and Parliament (Roundheads), over divine right of king versus Parliament's right to control national finances. Presbyterian Scots, allied with Parliament, rioted and in 1640 occupied the northern counties of England. Oliver Cromwell , second in command of Parliament's New Model Army, destroyed the king's army at the Battle of Naseby (June 14, 1645); first civil war ended May 1646 when Charles surrendered to the Scots. Charles later allied with Scots, but was defeated by Cromwell at Preston Aug. 17-19, 1648, and executed Jan. 30, 1649. Parliament abolished monarchy and House of Lords. Cromwell suppressed Irish and Scottish rebellions, was briefly succeeded by son Richard after death (1658); Charles II restored to the throne by "The Long Parliament," May 1660.
War of the Spanish Succession 1701-14	War fought by the Grand Alliance (originally England, Netherlands, Denmark, and Austria; later also Portugal), against coalition of France, Spain, and a number of small Italian and German principalities to preserve balance of power after death of Spanish king Charles II. Opened with invasion of Italy, via Venice, by an Austrian army under Prince Eugène of Savoy in May 1701. French forced to withdraw from Netherlands and Italy in 1706 and finally defeated 1709 in bloodiest battle of the war at the French village of Malplaquet. Treaty of Rastatt and Baden signed in 1714; gave Austria control of Spanish Netherlands and settled peace between Austria and France .
War of the Austrian Succession 1740-48	Conflict over rival claims for the hereditary dominions of the Habsburg family , following death (1740) of Charles VI, Holy Roman emperor and archduke of Austria. An alliance of Bavaria, France, Spain, Sardinia, Prussia, and Saxony fought against Austria, allied with Holland and Great Britain. King Frederick the Great of Prussia captured Silesia from Austria in the First (1740-42) and Second Silesian Wars (1744-45). British king George II defeated French army at Battle of Dettingen am Main (June 27, 1743). French conquered Austrian Netherlands (1745-46). Treaty of Aix-la-Chapelle Oct. 18, 1748, restored most original borders, and Prussia became a significant force .
Seven Years War 1756-63	Worldwide conflicts fought for the control of Germany and for supremacy in colonial N America and India . French defeated British Gen. Edward Braddock on the Monongahela in 1754, leading to formal declaration of French-Indian War , May 1756. Frederick II of Prussia invaded Saxony on Aug. 29, 1756; defeated French at Rossbach (1757), Austrians at Leuthen (1757), Russians at Zorndorf (1758). By 1760, British conquered French Canada. Peter III signed armistice with Prussia, 1762. Treaty of Paris signed Feb. 10, 1763; Peace of Hubertusburg Feb. 15, 1763, between Prussia and Austria. England emerged as leading world naval power .
American Revolution 1775-83	Conflict between Great Britain and 13 British colonies on the eastern seaboard of North America. George Washington took command of the Continental Army, July 2, 1775, and King George III declared colonies traitors on Aug. 23. Independence of colonies declared July 4, 1776 . France recognized the colonies' independence Feb. 6, 1778, followed by Spain on June 21, 1779; both pledged support. French fleet drove British fleet under Adm. Thomas Graves from the Chesapeake Bay on Sept. 5, 1781. French and Americans laid siege to Yorktown Sept. 28-Oct. 19, forcing British Gen. Cornwallis to surrender. Treaty of Paris (Sept. 3, 1783) recognized U.S. independence.
Wars of French Revolution & Napoleonic Wars 1792-1815	Large-scale wars fought between France and two multinational coalitions. France declared war on the Austrian part of the Holy Roman Empire for aiding King Louis XVI, Apr. 20, 1792. Newly created French Republic declared war on monarchs of Britain and Holland, Feb. 1, 1793, and Spain, Mar. 7. Napoleon Bonaparte defeated Austria in N Italy (1796-97), captured Egypt from Britain (1798-99; Battle of the Pyramids, July 21, 1798), and became First Consul after coup d'état of Nov. 9-10, 1799. French Grande Armée later swept through Europe using innovative and aggressive tactics. French navy defeated by British under Adm. Horatio Nelson at Trafalgar (Oct. 21, 1805), but Napoleon defeated Austro-Russian forces at Austerlitz (Dec. 2) and controlled most of Europe except Russia and Great Britain by 1808. France suffered its first major defeat by Austria at Aspern-Essling, May 21-22, 1809. Napoleon invaded Russia , captured Moscow Sept. 14, 1812, but was forced to flee the bitter Russian winter and abandoned Germany after defeat at Leipzig, Oct. 16-19, 1813. Paris captured by Allied armies Mar. 30-31, 1814. Napoleon exiled to Elba May 4 but returned for "Hundred Days" reign, Mar. 20-June 28, 1815; final defeat at Waterloo by British and Prussian troops (June 18). The Bourbon monarchy was restored under Louis XVIII , and Britain, Prussia, Russia, and Austria maintained European peace.

Crimean War 1853-56	Conflict between Russia and a coalition of Great Britain, France, Sardinia, and Turkey for influence over Balkans and the straits between the Black Sea and the Mediterranean. Russia destroyed Turkish fleet at Sinope on Nov. 30, 1853. Britain and France declared war in Mar. 1854 and with Turkish troops defeated Russians at Battle of Alma River on Sept. 20. Lord Lucan of Britain prevented Russia from capturing Balaklava on Oct. 25 ("Charge of the Light Brigade"). Siege of Sevastopol ended when Russia evacuated Sept. 8, 1855. Treaty of Paris signed Mar. 30, 1856; curbed Russian expansion and loosened European power alignments .
American Civil War 1861-65	Conflict between the United States (the Union) and 11 secessionist Southern states, organized as the Confederate States of America. Union garrison at Fort Sumter off Charleston, SC, surrendered to Brig. Gen. Pierre Beauregard (Apr. 12-13, 1861). 22,000 Confederates under Beauregard repelled 35,000 Union troops under Gen. Irvin McDowell along Bull Run stream near Manassas, VA (July 21). The <i>Merrimack</i> (renamed the <i>Virginia</i>) battled the <i>Monitor</i> Mar. 9, 1862. In Battle of Antietam (Sept. 17), some 12,000 Northerners and 12,700 Southerners were killed or wounded. Pres. Abraham Lincoln announced Emancipation Proclamation on Sept. 22. Confederate Gen. Robert E. Lee's forces numbering 75,000 battled 88,000 Union troops under Gen. George Meade at Gettysburg July 1-3, 1863, forcing Lee's army back across the Potomac River. Lee surrendered to Ulysses S. Grant at Appomattox Court House (Apr. 9, 1865). The Union was preserved and slavery abolished.
Franco-Prussian War 1870-71	German states led by Prussia defeated France, seizing Alsace and part of Lorraine. French defeated in several major battles, culminating at Sedan Sept. 1, 1870, when Prussian forces decisively defeated the French army and captured emperor Napoleon III. Prussian king crowned William I, emperor of a unified Germany, Jan. 18, 1871. France surrendered Jan. 28. Final treaty signed May 10; set the stage for later German imperialistic expansion .
Spanish-American War 1898	War waged by the U.S. to liberate Cuba from Spanish rule . A mysterious explosion, blamed on Spain by American newspapers, sank the U.S. battleship <i>Maine</i> in Havana's harbor (Feb. 15, 1898), killing 260. The U.S. called for Spain's withdrawal from Cuba, and Spain declared war (Apr. 24). Rufus Shafter led 17,000 U.S. troops from Daiquirí to Santiago de Cuba, taking San Juan Hill with help of the Rough Riders under Teddy Roosevelt. Santiago de Cuba surrendered July 17. The Treaty of Paris (Dec. 10, 1898) provided for the independence of Cuba ; the cession by Spain to the U.S. of Puerto Rico, Guam, and for a \$20 mil payment, the Philippine Islands .
World War I 1914-18	Local European war that grew into a global war involving 32 nations: the Allies and the Associated Powers—28 nations including Great Britain, France, Russia, Italy, and the U.S.—versus the Central Powers of Germany, Austria-Hungary, Turkey, and Bulgaria. Archduke Francis Ferdinand assassinated at Sarajevo, Bosnia (June 28, 1914). Germany invaded France through Belgium and the Netherlands; advance on Paris halted by the French under Gen. Joseph Jacques Césaire Joffre at the First Battle of the Marne , Sept. 5-12. Germany checked the Russian army at the Battle of Tannenberg, Aug. 26-30. The British suffered 57,470 casualties (19,240 dead) in the opening day of the First Battle of the Somme (July 1-Nov. 18, 1916), first of 12 battles that forced Germany back to the Hindenburg Line. U.S. declared war on Germany Apr. 6, 1917 . Russian involvement ended when Bolshevik party seized power on Nov. 7; signed armistice Dec. 15. German offensive halted by U.S. and French troops at Second Battle of the Marne (July 15-Aug. 5, 1918), the turning point of the war. Allied counteroffensive broke the Hindenburg Line, and an armistice was signed Nov. 11.
World War II 1939-45	Global military conflict stemming from European unrest after World War I and Japan's aggressive expansion into Asia and the Pacific. The War in Europe: The Nazi-Soviet nonaggression pact (Aug. 23, 1939) freed Germany and the Soviet Union to attack Poland in Sept. Britain and France declared war on Germany Sept. 3. German forces raced through Europe (Apr.-June 1940), capturing Paris June 14. Italy declared war on France and Britain June 10; German-Italian campaigns won the Balkans and N Africa by June 1941. U.S. entered war Dec. 1941. Three million Axis troops invaded Russia June 22, 1941, but Russian counterthrusts stopped the German advance (Stalin-grad , Aug. 20, 1942-Feb. 2, 1943), and Allies took N Africa (Nov. 8, 1942-May 13, 1943), Italy (July 10, 1943-May 2, 1945). Normandy invaded on D-Day , June 6, 1944; Paris liberated Aug. 25. Yalta Conference (Feb. 4-11, 1945) to defeat and split Germany into quarters. Adolf Hitler committed suicide Apr. 30. Germany surrendered unconditionally May 7. The War in the Pacific: Japan invaded China (July 7, 1937), joined alliance with Germany and Italy (Sept. 27, 1940) and signed nonaggression pact with Russia (Apr. 13, 1941); attacked Hawaii's Pearl Harbor, Dec. 7, 1941; U.S. declared war on Japan Dec. 8. Battle of Midway (June 4-7, 1942) repulsed the Japanese advance. Marines landed on Guadalcanal Aug. 7. Navy defeated Japanese fleet at Leyte Gulf , Oct. 23-26, 1944. B-29 bombing raids on Japan began in Nov. Marines invaded Iwo Jima (Feb. 19-Mar. 16, 1945) with heavy casualties, then Okinawa (Apr. 1-June 21). U.S. atom bombs dropped on Hiroshima (Aug. 6) and Nagasaki (Aug. 9) and the Soviet invasion of Manchuria (Aug. 8) forced Japan to agree, on Aug. 14, to surrender ; formal surrender on Sept. 2.
Korean War 1950-53	Military struggle fought on the Korean Peninsula between the Democratic Peoples' Republic of Korea (N Korea) and the Republic of Korea (S Korea) that developed into an international war involving China allied with N Korea against the U.S. and other nations under the UN flag. DPRK army crossed the 38th parallel and invaded S Korea (June 25, 1950), entering Seoul (June 26). Amphibious assault launched at Inchon by Gen. Douglas MacArthur (Sept. 15) helped U.S. forces rout DPRK close to the Yalu River by Nov. 24. Chinese counterattack retook Seoul (Jan. 4, 1951), but forced back to the 38th parallel by Apr. 22. Armistice was signed (July 27, 1953) by the UN, DPRK, and China, but not ROK, leaving the peninsula partitioned at 38th parallel .
Vietnam War 1959-75	Struggle primarily in S Vietnam that widened into a war between S Vietnam supported mainly by the U.S. and N Vietnam supported by the USSR and China. Viet Minh, led by Communist leader Ho Chi Minh, formed the Democratic Republic of Vietnam (Sept. 2, 1945). Colonial power France withdrew after fortress at Dien Bien Phu fell (May 8, 1954). Pres. John F. Kennedy pledged U.S. commitment to S Vietnamese independence Dec. 14, 1961. USS <i>Maddox</i> destroyer damaged in Gulf of Tonkin (Aug. 2, 1964) prompted Congress to increase involvement. Regular bombing of N Vietnam began (Feb. 24, 1965) and the first U.S. combat ground-forces arrived (Mar. 6). North Vietnamese Army siege of Khe Sanh (Jan. 21-Apr. 7, 1968) and the "Tet" offensive (Jan. 30) aimed to cause insurrection in the south. My Lai Massacre by U.S. soldiers against civilians (Mar. 16, 1968) created scandal, fueled U.S. disaffection with war. U.S. forces peaked at 543,400 in Apr. 1969. NVA "Easter Offensive" (Mar. 30, 1972) rebuffed, and U.S. responded with aerial bombings in May and Dec. U.S. withdrew after ceasefire, Jan. 1973. NVA offensive captured Saigon, Apr. 30, 1975, and unified Vietnam under Communist rule.
Persian Gulf Wars 1991, 2003	Conflicts fought principally between Iraq and the U.S. concerning Iraq's influence in the Middle East and its development of weapons of mass destruction. First Gulf War: Iraq under dictator Saddam Hussein invaded Kuwait Aug 2, 1990, and annexed it; UN Security Council ordered Iraqi forces to withdraw by Jan. 15, 1991. Beginning Jan. 17, a multinational force (Operation Desert Storm) led by the U.S. bombed military targets in Iraq and Kuwait. A coordinated air-land offensive (Operation Desert Sabre , begun Feb. 24) retook Kuwait City Feb. 26, and permanent ceasefire was signed on Apr. 6. Iraq was ordered to pay reparations to Kuwait, reveal locations of biological and chemical weapons, and eliminate weapons of mass destruction. Second Gulf War: The U.S. and UK mistakenly asserted that Iraq was still producing WMD and posed an imminent threat. The UN passed Resolution 1441, Nov. 8, 2002, warning Iraq of "serious consequences" if it failed to cooperate fully and unconditionally with UN weapons inspectors. Iraq rejected a Mar. 17, 2003, U.S. ultimatum demanding Hussein and his sons leave Iraq; U.S. launched Operation Iraqi Freedom Mar. 19, 2003, with support from UK and other allies, but without full UN Security Council support. Baghdad fell Apr. 9, and major combat operations declared over May 1. Saddam Hussein was captured Dec. 13, but guerrilla opposition to U.S. troops and insurgent violence continued. U.S. combat operations in Iraq formally ended Aug. 31, 2010.

Note: Data based on household interviews of a sample of the civilian noninstitutionalized population. Percents may not add up to 100 because other types of health insurance (e.g., Medicare, military) are not shown, and persons with both private insurance and Medicaid appear in both sections. (1) Includes Medicaid and other public assistance. In 2007, the age-adjusted percent of the population under 65 covered by Medicaid was 11.3%; 1.2% were covered by state-sponsored health plans, and 1.5% were covered by State Children's Health Insurance Program (SCHIP). (2) Includes persons not covered by private insurance, Medicaid or other public assistance, Medicare, or military plans. (3) A change in the questionnaire in 1997 prevents direct comparison with later years. (4) Age adjusted. (5) Changed reporting methods make race percentages before 1999 not strictly comparable with those from 1999 on.

— = Not available. **Note:** Data as of June 30 in 1976-80, Jan. 1 from 1990 onwards. HMOs in Guam included starting in 1994; Puerto Rico, 1998; Guam HMO enrollment was 32,000 in 2003 and Puerto Rico enrollment was 1,726,000 in 2003. Open-ended enrollment in HMO plans, amounting to 7.6 mil on Jan. 1, 2003, included from 1994 onwards. (1) Enrollment may not equal total because some plans did not report these characteristics. (2) This type of HMO contracts with an association of physicians from various settings (a mixture of solo and group practices) to provide health services. (3) Group includes staff, group, and network model types. (4) Enrollment by Medicaid or Medicare beneficiaries, where the Medicaid or Medicare program contracts directly with the HMO to pay the premium. (5) Data for 1990 and later include enrollment in managed-care health insuring organizations.

Drug Use in the General U.S. Population, 2009

Source: Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Dept. of Health and Human Services

According to the Substance Abuse and Mental Health Service Administration’s 2009 annual survey, an estimated 118.7 mil Americans 12 years of age and older (or 47.1% of that population) had used an illicit drug at least once in their lifetimes. Of that number, an estimated 75.8 mil (30.1% of persons 12 or older) had used an illicit drug other than marijuana at least once in their lives. About 15.1% of the 12-and-older population had used an illicit drug in the previous year; 8.7% had used one in the month prior to their

participation in the survey. The rate of current illicit drug use (i.e., with in the past month) in 2009 was 10.8% for men and 6.6% for women. The Substance Abuse and Mental Health Services Administration’s Drug Abuse Warning Network (DAWN) reported 1.9 mil drug abuse or misuse-related visits to hospital emergency departments in 2007. More than half of all visits (52%) involved an illicit drug. Cocaine was a factor in 29% of these. Alcohol in combination with illegal drug use was involved in 13% of emergency visits.

— Data not available. **Note:** Monitoring the Future study excludes high school dropouts (about 3-6% of the class group, according to a 1996 report) and absentees (about 16-17% of 12th graders and about 9-10% of 8th graders). High school dropouts and absentees have higher alcohol usage than those included in the survey. (1) Since 1993 the alcohol question has indicated that a “drink” is defined as “more than a few sips.” (2) Five or more drinks in a row at least once in the prior 2-week period.

Acquired Immune Deficiency Syndrome (AIDS)

Source: Centers for Disease Control and Prevention; www.cdc.gov

AIDS (Acquired Immune Deficiency Syndrome) is caused by the human immunodeficiency virus (HIV). HIV kills or disables crucial immune cells, progressively destroying the body’s ability to fight disease.

HIV is commonly spread through unprotected sexual contact with an infected partner’s semen or vaginal fluids. It is also spread through contact with infected blood. Where modern screening techniques are used, it is rare to contract HIV from transfusion, but it can be contracted when intravenous drug users share syringes and similar equipment with others. A woman can also transmit HIV to her child during pregnancy or delivery or through breastfeeding. With treatment, a woman can reduce her transmission rate from about 25% to less than 2%. There is no evidence HIV can spread through saliva or casual contact such as in the sharing of food utensils, towels and bedding, telephones, or toilet seats.

Some people experience flu-like symptoms a short time after infection with HIV. Even when symptoms are not present, HIV is active in the body, multiplying, infecting, and killing crucial CD4+ T cells, also known as T-lymphocytes or T-helper cells, which signal other immune cells to perform their functions.

The term AIDS applies to the most advanced stages of HIV infection. According to the official case definition issued by the Centers for Disease Control and Prevention (CDC), an HIV-infected person with fewer than 200 CD4+ T cells per cubic millimeter of blood can be said to have AIDS. (Healthy adults usually have 1,000 or more per cubic millimeter.) An HIV-infected person, regardless of T cell count, is diagnosed with AIDS if he or she develops 1 of 26 conditions that typically affect people with advanced HIV. Most of these conditions are opportunistic infections that occur when the immune system is so ravaged by HIV that the body cannot fight off certain bacteria, viruses, and microbes.

Months or years prior to the onset of AIDS, people may experience such symptoms as swollen glands, lack of energy, fevers and sweats, and skin rashes. People diagnosed with AIDS may develop infections of the intestinal tract, lungs, brain, eyes, and other organs and become severely debilitated. They also are prone to developing certain cancers, especially those caused by viruses, such as Kaposi’s sarcoma, cervical cancer, and lymphoma. Children with AIDS may have delayed development or fail to thrive.

HIV is primarily detected by testing a person’s blood for the presence of antibodies (disease-fighting proteins of the immune system) to HIV. In very rare cases, HIV antibodies may take more than six months after exposure to reach detectable levels. But in 97% of infected individuals, the antibodies are detectable in about six weeks. HIV testing may also be performed on oral fluid and urine samples. New rapid HIV tests can provide preliminary results in about 20 minutes.

Patients are typically given a combination of different drugs to prevent the HIV virus from becoming resistant to any single one. While these drugs extend the period of time between HIV infection and the development of serious illness, they do not prevent the spread of the disease to others and can have severe side effects.

The U.S. Food and Drug Administration (FDA) has approved a number of drugs that may slow the growth of HIV in the body and treat AIDS-related infections and cancers. The first group of drugs used to treat HIV—nucleoside analog reverse transcriptase inhibitors (NRTIs)—include the drug zidovudine (commonly known as AZT). Non-nucleoside reverse transcriptase inhibitors (NNRTIs), as well as a third class of drugs, called protease inhibitors, have also been approved for HIV treatment. In 2003, the FDA granted accelerated approval of Fuzeon for use with other anti-HIV drugs. Fuzeon was the first among a new class of medications called fusion inhibitors; drugs in this class interfere with HIV’s entry into cells by hindering the fusion of viral and cellular membranes.

The FDA in July 2006 approved Atripla, the first once-a-day, single-pill drug combination treatment for HIV. The pill combined three previously approved drugs and cost roughly \$1,100 per month in the U.S. The development was regarded as a significant milestone in HIV treatment. FDA officials said complicated drug regimens dissuaded patients from taking their pills as directed. Health experts expect the drug to dramatically improve AIDS treatment in the developing world.

Since there is no vaccine or cure for AIDS, the only protection is to avoid activities that carry a risk. The CDC recommends abstinence (the only certain protection) if a potential partner’s HIV status is unknown, mutual monogamy with an uninfected partner, or correct and consistent use of male latex condoms.

Note: Data are for the 50 states and D.C. and are based on reporting by state and D.C. health departments. (1) Based on cases reported to the CDC from the beginning of the epidemic (1981) through June 30, 2008. (2) Deaths may be due to any cause. (3) Total for all years includes 7,099 persons of unknown race or multiple races. (4) Includes persons formerly classified as "Asian or Pacific Islander," before new racial categories were implemented in 2003. (5) Persons of Hispanic origin may be of any race.

Allergies and Asthma

Source: Asthma and Allergy Foundation of America, www.aafa.org

An estimated one in five Americans suffers from **allergies**. People with allergies have immune systems that react to defend the body against normally harmless substances. Common **allergens**—the substances that may trigger such a response—include plant pollens, dust mites, or animal dander; plants such as poison ivy; certain drugs, such as penicillin; and foods such as eggs, milk, nuts, or seafood.

The **tendency to develop allergies** is usually inherited. While allergies typically manifest in childhood, they can show up at any age. Food allergies and eczema (patches of dry skin) are common allergies among infants. Older children and adults may develop allergic rhinitis, or hay fever, in reaction to an inhaled allergen. Allergic rhinitis symptoms include nasal congestion, runny nose, and sneezing.

People with allergies should avoid contact with an allergen, if feasible. **Medications**, such as antihistamines and nasal steroids, may be used to decrease an allergic reaction. Other effective allergy treatments include decongestants, eye drops, and ointments. There are also treatments aimed at gradually desensitizing a patient to an allergen.

Some allergy sufferers also have **asthma**. Asthma, which can develop at any age, is a chronic inflammation disease affecting the passageways that carry air into and out of the lungs. During what is known as an asthma attack, these inflamed, supersensitive airways tighten and fill with mucus. A person may experience wheezing, difficulty breathing, tightening of the chest, and coughing. Exposure to an allergen can set off an attack. Asthma can become life-threatening if not controlled in its early stages. The following symptoms may be indicative of an **emergency**: the patient shows no improvement minutes after initial treatment; struggles to breathe while hunched over with his or her chest and neck pulled in; has trouble walking or talking; and develops gray or blue lips or fingernails.

Besides common allergens, tobacco smoke, cold air, and pollution can trigger an asthma attack, as can viral infections or physical exercise. An accurate diagnosis by a physician is important. Although there is no cure for asthma or allergies, they can be controlled through lifestyle changes and medications.

Alzheimer's Disease

Source: Alzheimer's Association, www.alz.org

Alzheimer's disease, the most common form of dementia, is a progressive, degenerative brain disease in which nerve cells deteriorate and die. Its first symptoms usually involve impaired memory and confusion about recent events. As the disease advances, it results in greater impairment of memory, thinking, judgment, language, behavior, and physical health.

The **rate of progression** of Alzheimer's varies, ranging from 3 to 20 years. The average length of time from onset of symptoms until death is five years. As they become progressively debilitated, affected individuals grow increasingly susceptible to infections of the lungs, urinary tract, and other organs.

Alzheimer's disease affects an estimated 5.3 mil Americans, striking men and women of all races and ethnicities. Although most people are older than age 65 when diagnosed with Alzheimer's, younger-onset, or early-onset, cases occur in people in their 40s and 50s. An estimated 13% of the U.S. population over age 65 has Alzheimer's.

Diagnosis involves a comprehensive evaluation that may include a complete health history, physical examination, neurological and mental status assessments, and other tests. Skilled health care professionals can generally diagnose Alzheimer's with about 90% accuracy. Depression, drug interactions, nutritional imbalances, and infections such as AIDS, meningitis, and syphilis can cause similar symptoms. Other forms of dementia, such as those associated with stroke, Huntington's disease, Parkinson's disease, frontotemporal dementia, and vascular disease can also appear to be Alzheimer's. Absolute confirmation of diagnosis requires a brain biopsy or autopsy.

Treatments for cognitive and behavioral symptoms are available, but no intervention has yet been developed to prevent Alzheimer's or reverse its course. Some research suggests that risk factors for heart disease, such as high blood pressure,

elevated cholesterol, diabetes, and excess body weight, may increase a person's risk of developing Alzheimer's. Staying physically and mentally active and socially connected may be associated with a lower risk for the disease.

Providing **care** for people with Alzheimer's is physically and psychologically demanding. About 70% of affected individuals live at home, where family or friends tend to them without pay. In the disease's advanced stages, many individuals require long-term residential care. Nearly half of all nursing home residents in the U.S. have Alzheimer's.

The costs of diagnosing, treating, and providing long-term care in this country for Alzheimer's patients are estimated to be \$172 billion in 2010. People with Alzheimer's need a safe, stable environment and a regular daily schedule offering appropriate stimulation. Physical exercise and social interaction are important, as are proper nutrition and adequate pain management. Security is also a consideration, because many people with Alzheimer's tend to wander. An identification bracelet with the person's name, address, and condition may help ensure the safe return of an individual who wanders.

Warning Signs of Alzheimer's Disease

- Forgetting recently learned information or inability to learn new information
- Difficulty with familiar, everyday tasks such as cooking or dressing
- Inability to communicate coherently
- Disorientation to time and place
- Poor or decreased judgment
- Problems with abstract thinking
- Misplacing objects
- Rapid changes in mood or behavior
- Increased irritability, anxiety, depression, confusion, and restlessness
- Prolonged loss of initiative

Arthritis

Source: Arthritis Foundation, www.arthritis.org; Centers for Disease Control and Prevention

The term arthritis refers to more than 100 different diseases that cause pain, stiffness, swelling, and restricted movement in joints. The condition is usually chronic. The CDC estimates that nearly 70 mil adults suffer from arthritis and chronic joint symptoms. Arthritis annually results in 36 mil doctor visits and an estimated 744,000 hospitalizations. The cause for most types of arthritis is unknown; scientists are studying the roles played by genetics, lifestyle, and environment.

Symptoms may develop slowly or suddenly. A visit to the doctor is indicated when pain, stiffness, swelling in a joint, or difficulty in moving a joint persists for more than two weeks. To diagnose arthritis, the doctor records the patient's symptoms and examines his or her joints, looking for any swelling or limited movement. In addition, the doctor checks for other signs often seen with arthritis, such as rashes, mouth sores, or eye involvement. The doctor may test blood, urine, or joint fluid, or take X-rays of the joints.

Of the three most prevalent forms of arthritis, **osteoarthritis** is the most common, affecting approximately 27 mil Americans in 2005. It usually occurs after age 45. In patients with osteoarthritis, also called degenerative arthritis, the protective cartilage of joints is lost and changes occur in the bone, leading to pain and stiffness. It usually occurs in the fingers, knees, feet, and back.

Fibromyalgia, another common arthritis condition, affected about 5 mil Americans in 2005. People suffering

from fibromyalgia experience widespread pain and tenderness in muscles and their attachments to bone. Common symptoms include fatigue, disturbed sleep, stiffness, and psychological distress. More women than men are afflicted with this type of arthritis.

Rheumatoid arthritis, which affected an estimated 1.3 mil in the U.S. in 2005, is one of the most serious and disabling forms of the disease. In this type—which is also more common and more degenerative in women—inflammation of the joints leads to cartilage and bone damage. The areas of the body that can be affected are the hands, wrists, feet, knees, ankles, shoulders, neck, jaw, and elbows.

Other forms of arthritis and related conditions include lupus, gout, ankylosing spondylitis, and scleroderma. Bursitis and tendinitis, which may result from injuring or overusing a joint, are also related.

Medications that relieve pain and swelling, such as analgesics, anti-inflammatory drugs, biologic response modifiers, glucocorticoids, and antirheumatic drugs, can be used to treat arthritis. They also tend to slow the disease process. Most treatment programs call for exercise, use of heat or cold, and joint-protection techniques, such as avoidance of excess stress on the joints, the use of assistive devices, and weight loss and control. In some cases, surgery may help.

Cancer Prevention

Source: American Cancer Society, Inc., www.cancer.org

PRIMARY PREVENTION: Modifiable determinants of cancer risk.

Smoking	The risk of developing lung cancer is about 23 times higher for current male smokers and 13 times higher for current female smokers than for those who have never smoked. Smoking accounts for at least 30% of all U.S. cancer deaths. Tobacco use is responsible for nearly 1 in 5 deaths in the U.S. Smoking is associated with cancer of the lung, mouth, nasal cavities, pharynx, larynx, esophagus, stomach, pancreas, uterine cervix, kidney, bladder, and acute myeloid leukemia.
Nutrition and diet	Risk for colon, breast (among postmenopausal women), kidney, prostate, and endometrial cancers increases for those who are overweight and obese. It's not yet known for certain how diet, nutrition intake, and the amount and distribution of body fat factor into the development of certain cancers. But eating a mostly plant-based diet, with grains and beans and five or more servings of fruits and vegetables each day, and regular physical activity can help one achieve and maintain a healthy weight. That in turn may reduce the risk for many cancers.
Sunlight	Many of the more than 1 million skin cancers diagnosed annually in the U.S. could have been prevented by protection from the sun's rays. Epidemiological evidence shows that sun exposure is a major factor in the development of melanoma and that incidence rates are increasing worldwide.
Alcohol	Heavy drinking, especially when accompanied by cigarette smoking or smokeless tobacco use, increases the risk of cancers of the mouth, larynx, pharynx, esophagus, and liver. Studies have also noted an association between regular alcohol consumption and an increased risk of breast cancer.
Smokeless tobacco	Use of chewing tobacco, snuff, and other tobacco products that are not smoked increases the risk of cancers of the mouth and pharynx. The excess risk of cancer of the cheek and gum may reach nearly 50-fold among long-term snuff users.
Estrogen	Menopausal hormone therapy (MHT, formerly called hormone replacement therapy) without the use of progestin can increase the risk of endometrial cancer. Combining progestin with estrogen MHT use may help minimize that risk. Studies, however, suggest that long-term use (5 years or more) of MHT increases the risk of breast cancer and may exceed the benefits. The benefits and risks of the use of estrogen by menopausal women should be discussed carefully with one's doctor.
Radiation	Excessive exposure to ionizing radiation can increase cancer risk. Medical and dental X-rays are adjusted to deliver the lowest dose possible without sacrificing image quality. Excessive radon exposure in the home may increase lung cancer risk, especially in cigarette smokers.
Environmental hazards	Exposure to various chemicals (including benzene, asbestos, vinyl chloride, arsenic, and aflatoxin) increases risk of various cancers. Risk of lung cancer from asbestos is greatly increased among smokers.

Cancer-Detection Guidelines

SECONDARY PREVENTION: Steps to diagnose a cancer or precursor as early as possible after it has developed.

In addition to indicated screening for cancers of the breast, colon and rectum, prostate, and uterine cervix, a cancer-related checkup should include health counseling and, depending on a person's age and sex, include examinations for cancers of the thyroid, oral cavity, skin, lymph nodes, testes, and ovaries, as well as some nonmalignant diseases. Special tests for certain cancer sites for individuals at average risk are recommended as outlined below:

Breast cancer	Women should start getting annual mammograms beginning at age 40. Women who are at increased risk because of family history, genetic predisposition, or past breast cancer should discuss the benefits and limitations of initiating screening at an earlier age. A clinical breast exam should be part of a periodic health exam—about every three years for women in their 20s and 30s and yearly for women 40 and older. Women should be aware of any changes in their breasts and report these promptly to their health care provider.
Cervical cancer	Women should begin cervical cancer screening about three years after having vaginal intercourse for the first time, but no later than when they are 21 years old. Screening should be done every year with regular Pap tests or every two years using liquid-based Pap tests. Beginning at age 30, women who have had three normal Pap test results in a row may choose to get screened every two to three years. Women who have certain risk factors such as diethylstilbestrol (DES) exposure before birth, HIV infection, or a weakened immune system due to organ transplant, chemotherapy, or chronic steroid use should continue to be screened annually. Another reasonable option for women aged 30 and older is to get screened every three years (but not more frequently) with either the conventional or liquid-based Pap test, plus the HPV DNA test. Women 70 years of age and older who have had three or more normal Pap test results in a row and no abnormal Pap test results in the last 10 years may choose to stop cervical cancer screening. Women with a history of cervical cancer, DES exposure before birth, HIV infection or a weakened immune system should continue to be screened as long as they are in good health. Women who have had a total hysterectomy (removal of the uterus and cervix) may also choose to cease cervical cancer screening, unless the surgery was done to treat cervical cancer or precancer. Women who have had a hysterectomy without removal of the cervix should continue to follow the guidelines above.
Colorectal cancer	Beginning at age 50, both men and women should follow one of these testing schedules: • Yearly fecal occult blood test or flexible sigmoidoscopy every five years; • yearly fecal occult blood test plus flexible sigmoidoscopy every five years; • colonoscopy every 10 years; or • double-contrast barium enema every five years. Note: Persons known to be at increased risk for colorectal cancer (inflammatory bowel disease, personal or family history, etc.) need to begin screening at an earlier age and may need more frequent screening.
Endometrial cancer	For women at high risk of hereditary nonpolyposis colon cancer (HNPCC), annual screening including an endometrial biopsy should commence at age 35.
Prostate cancer	The prostate-specific antigen (PSA) test with or without a digital rectal examination should be offered annually to men who are aged 50 and older who have a 10-year life expectancy. Men at high risk, such as African-American men and men with one or more first-degree family members (father, brother, or son) diagnosed with prostate cancer at an early age, should start getting tested at age 45. For both men at average risk and high risk, information should be provided about what is known and not known about the benefits and limitations of early detection and treatment of prostate cancer so that an informed decision about testing can be made.
Skin cancer	Adults should practice skin self-exams regularly. Suspicious lesions and moles should be evaluated promptly by a physician.

Estimated New U.S. Cancer Cases and Deaths for Leading Sites, 2010

Source: Cancer Facts & Figures 2010, American Cancer Society, Inc.

The following estimates exclude basal and squamous cell skin cancers and in situ carcinomas (i.e., noninvasive cancers), except urinary bladder. In 2010, an estimated 54,010 new cases of carcinoma in situ of the breast and 46,770 cases of melanoma in situ are expected to be diagnosed. More than 2 mil cases of basal cell and squamous cell cancer were treated in 2006. They are highly curable forms of skin cancer and do not need to be reported to cancer registries.

Breast Cancer

Source: American Cancer Society, Inc., www.cancer.org

In 2010, an estimated 207,090 women and 1,970 men in the U.S. will be newly diagnosed with breast cancer, and about 39,840 women and 390 men will die from it. Currently, an estimated 2.4 mil women are living with a history of breast cancer, the second biggest cause of cancer death for women in the U.S. (lung cancer ranks first). But mortality rates have been declining, especially among younger women, probably because of earlier detection and improved treatment.

The risk for breast cancer increases with age. It is higher for women with a personal or family history of cancer, a long menstrual history (menstrual periods that started early and ended later in life), recent use of birth control pills, long-term use of postmenopausal estrogen replacement therapy, and who have no children or had no live birth until age 30 or older. Other risk factors include alcohol consumption and obesity. Inherited mutations such as in the BRCA1 and BRCA2 genes greatly increase risk, but these probably account for 5% to

10% of all breast cancers. By far the majority of women who develop breast cancer have no family history of it.

Breast cancer often **manifests** first as an abnormality on a mammogram X-ray. Physical symptoms that show up later, which may be detectable by a woman or her doctor, include a breast lump and, less commonly, breast thickening, swelling, distortion, or tenderness; skin irritation or dimpling; or pain, scaliness, or retraction of the nipple. Breast pain is more commonly associated with benign (i.e., noncancerous) conditions.

Studies show that **early detection** increases survival and treatment options (See “Cancer Prevention,” p. 158). Although most detected breast lumps are noncancerous, any suspicious lump should be biopsied.

Treatment for breast cancer may involve lumpectomy (local removal of a tumor), mastectomy (surgical removal of the breast), radiation therapy, chemotherapy, hormone therapy, or immunotherapy. For women with early-stage breast cancer, long-term survival rates following lumpectomy plus radiation therapy are similar to survival rates after a mastectomy.

Prostate Cancer

Source: Prostate Cancer Foundation, www.pcf.org; American Cancer Society, Inc., www.cancer.org

The **prostate** is a male gland located between the bladder and scrotum that secretes seminal fluid. Prostate cancer is the most common non-skin cancer in the U.S., and the second-most common cause, after lung cancer, of cancer deaths in American men. In 2010, an estimated 217,730 men will be diagnosed with prostate cancer, and about 32,050 will die from the disease. It was estimated that in 2006, 2.2 mil men with a history of prostate cancer were alive, making up nearly half of all male cancer survivors in the U.S.

The exact **cause** of prostate cancer is unknown. The most identifiable risk factors are age, family history, and race. About half of all prostate cancers are diagnosed in men over the age of 68, and the chances of developing the disease rise dramatically with age. Men with a single first-degree relative with a history of prostate cancer are twice to three times as likely to develop the disease, and those with two or more first-degree relatives are three to five times as likely to get it. African-American men are much more likely to develop prostate cancer than non-Hispanic white men and are twice as likely to die from it. The cause for this disparity remains unknown; both socioeconomic and biologic differences are likely involved.

Usually, the disease has no **symptoms** in its early stages. If symptoms arise, they may include a need to urinate frequently; difficulty starting urination; weak or interrupted flow; pain during urination; difficulty having an erection; painful ejaculation; blood in urine or semen; and frequent pain or stiffness in the lower back, hips, or upper thighs.

The American Cancer Society recommends that once they reach 50, men showing no symptoms and with no family history of prostate cancer speak with their health care provider about the benefits and risks of being screened through a prostate specific antigen (**PSA**) **blood test** or **digital rectal exam (DRE)**. African-American men or those with a family history of the disease should be aware of their screening options beginning at age 40 or 45. Men under 40 seldom get prostate cancer.

Prostate cancer **treatment** may include surgery, radiation, hormone deprivation therapy, chemotherapy, or some combination. If caught early on, while tumor cells are localized within the prostate, the five-year relative survival rate approaches 100%.

Skin Cancer

Source: American Cancer Society, Inc., www.cancer.org

Skin cancer is generally divided into two main classes, **nonmelanomas** and **melanomas**, both types affecting different types of skin cells. Melanoma develops in skin cells called melanocytes, which produce melanin, a pigment that gives skin a tan or brown color and helps to protect the deeper layers of skin from the harmful effects of the sun. Melanoma is the most dangerous type of skin cancer because it can easily spread to other parts of the body.

Although skin cancer is the most common type of cancer diagnosed in the U.S., melanoma only accounts for about 4% of all skin cancers. The American Cancer Society estimates that in 2010, 68,130 new cases of melanoma will be diagnosed in the U.S., and about 11,790 people will die from skin cancer.

The exact causes of melanoma are unclear, but there are several **risk factors** that have been associated with the disease:

- Overexposure to UV light (sunlight)
- Presence of moles; moles themselves are not harmful but are associated with an increased risk for skin cancer.
- Family history
- Use of immune suppression drugs
- Age; melanoma is more likely to occur in older people.
- Gender; men get melanoma more often than women.
- Past history of melanoma
- Xeroderma pigmentosum (XP), a rare, genetic condition in which people are less able to repair damage caused by sunlight.

Melanomas generally look like abnormal moles on the surface of the skin. Normal moles are most often an evenly colored brown, tan, or black spot on the skin that can be flat or raised. They normally have a distinct border that separates

them from normal skin cells. Moles can be present at birth, form over time, or even disappear. Abnormal moles differ from regular skin cells and may be a sign of skin cancer. An irregular mole should be examined as soon as possible. Irregular moles generally have the following characteristics:

- Asymmetry—one half of the mole does not match the other half.
- Irregular border—the edge of the mole is jagged; no distinct divide between the mole and regular skin.
- Color—not uniform; there may be shades of tan, brown, black, and sometimes patches of red, blue, or white.
- Diameter—moles wider than ¼ inch are abnormal (however, melanomas can be smaller).

If a melanoma is suspected, the doctor will perform a biopsy using cells extracted from the suspected cancer or by removing the whole mass and examining it. If a melanoma is found, doctors will often check to see if the cancer has spread to other parts of the body. This is called **staging** and is represented by Roman numerals I through IV (1-4). The lower the number, the less the cancer has spread. This will determine what course of treatment is necessary.

If caught early, melanoma is highly curable. The five-year survival rates for the various stages are as follows:

- | | |
|--------------|-----|
| • All stages | 90% |
| • Local | 98% |
| • Regional | 62% |
| • Distant | 15% |

Treatment may include simple removal of the melanoma; amputation if the cancer is found on a finger or toe; or treatment involving chemotherapy, immunotherapy, or radiation if the melanoma has spread to other parts of the body.

Depression

Source: National Institute of Mental Health, National Institutes of Health, U.S. Dept. of Health and Human Services

Depression is a serious illness that affects thoughts, feelings, and the ability to function in everyday life. It strikes all age groups, and often goes unrecognized or is inadequately treated. The National Institute of Mental Health (NIMH) estimates that about 20.9 mil American adults age 18 and older suffer from depression or some other mood or depressive disorder in any given year; more than 16% of all Americans will have had depression at some point in life. Young people are at particular risk; in a one-year period, three times as many persons with depression were 18 to 29 years old as were 60 or older.

Nearly twice as many women as men suffer from a depressive illness in a given year. Although conventional wisdom holds that depression is most closely associated with menopause, the childbearing years, followed by the years prior to menopause, are marked by the highest rates of depression. The influence of hormones on depression in women has been an active area of NIMH research.

In a given year, 1-5% of people age 65 and older living in the community (i.e., residing outside of institutions) suffer from major depression. Depression frequently occurs with other physical illnesses including heart disease, stroke, cancer, and diabetes. It is not a normal part of aging.

Available **treatments** can alleviate symptoms, and with awareness growing, more people with depression are seeking help. But many depressed people—and those around them—still fail to realize that they have an illness or could benefit from medical help.

Symptoms and Types of Depression

- Persistent sad mood
- Loss of interest or pleasure in activities once enjoyed, including sex
- Significant changes in appetite or body weight
- Difficulty sleeping or oversleeping
- Lethargy or agitation
- Loss of energy
- Feelings of worthlessness or inappropriate guilt
- Difficulty thinking or concentrating
- Recurrent thoughts of death or suicide

A diagnosis of **major depressive disorder** (or **unipolar major depression**) is made if an individual reports experiencing five or more of these symptoms in the same two-week period.

Bipolar disorder (or **manic-depressive illness**) is characterized by episodes of major depression alternating with periods of mania, when a person experiences a persistent, abnormally elevated mood or irritability, accompanied by feelings of inflated self-esteem, less need for sleep, increased

talkativeness, racing thoughts, distractibility, agitation, and excessive involvement in pleasurable activities that have a high potential for painful consequences. While it shares some of the features of major depression, bipolar disorder is a distinct illness.

Dysthymic disorder (or **dysthymia**), a less severe yet more chronic form of depression, is diagnosed when a depressed mood persists for at least two years in adults (one year in children or adolescents) and is accompanied by at least two other depressive symptoms. Many people with dysthymic disorder also experience major depressive episodes.

In contrast to normal experiences of sadness, depression is extreme and persistent and can interfere significantly with an individual's ability to function. A study sponsored by the World Health Organization and the World Bank found unipolar major depression to be the leading cause of disability in the U.S. and worldwide.

Treatments for Depression

A variety of **medicines** are used to treat depression. These drugs influence the functioning of certain neurotransmitters in the brain, primarily serotonin and norepinephrine, known as monoamines. Older drugs—tricyclic antidepressants (TCAs) and monoamine oxidase inhibitors (MAOIs)—affect the functioning of both of these neurotransmitters. But they can have strong side effects or, in the case of MAOIs, require dietary restrictions. Newer medications, such as selective serotonin reuptake inhibitors (SSRIs), have fewer side effects. All of these medications can be effective, but some people respond to one type and not another.

NIMH research has shown that certain types of **psychotherapy**, particularly cognitive-behavioral therapy (CBT) and interpersonal therapy (IPT), can help relieve depression. CBT helps patients change the negative thinking and behaving patterns often associated with depression. IPT focuses patients on working through personal relationships that may contribute to depression. Studies of adults have shown that a combination of psychotherapy and antidepressant medication is most effective in treating moderate-to-severe depression.

Electroconvulsive therapy (ECT) has been found effective in treating some cases of severe depression, particularly those that have not responded to other forms of treatment. ECT involves producing a seizure in the brain of a patient under general anesthesia by applying electrical stimulation through electrodes placed on the scalp. Memory loss and other cognitive problems, though common side effects, are typically short-lived.

Diabetes

Source: American Diabetes Association, www.diabetes.org; Centers for Disease Control and Prevention

Diabetes is a chronic disease in which the body does not produce or properly use the hormone **insulin**. Insulin is needed to convert sugar, starches, and other foods into energy. Both genetics and environment appear to play roles in the onset of diabetes. This disease, which has no cure, is the sixth leading cause of death by disease in the U.S. According to death certificate data, 72,449 people in the U.S. died as a result of diabetes in 2006. In 2007, an estimated 23.6 mil Americans had diabetes, 5.7 mil of whom were undiagnosed.

The American Diabetes Association recommends the following guidelines for **diagnosing** diabetes: lowering the acceptable level of blood sugar in a fasting glucose test from 140 mg of glucose/deciliter of blood to 126 mg/deciliter; testing all adults 45 years of age and older, and then every three years if results are normal; and testing high-risk individuals starting at a younger age more frequently.

The American Diabetes Association supports studies proving that detection at an earlier stage and modest lifestyle changes, such as eating better and exercising more, will help prevent or delay complications.

There are two major types of diabetes:

Type 1 (formerly known as insulin dependent, or juvenile diabetes). The body produces very little or no insulin; the disease most often begins in childhood or early adulthood. People with type 1 diabetes must take daily insulin injections to stay alive.

Type 2 (formerly known as non-insulin dependent, or adult-onset diabetes). The body does not produce enough or cannot properly use insulin. It is the most common form of the disease (90%-95% of diabetes cases in people over age 20) and often begins later in life.

Pre-Diabetes

Among U.S. adults 40-74 years of age, 57 mil (40.1% of the total population) have **pre-diabetes**, the state that occurs when a person’s blood glucose levels are higher than normal but not high enough for a diagnosis of diabetes. One study indicated that about 11% of people with pre-diabetes developed type 2 diabetes each year during the average three-year study follow-up period. Other studies showed that most people with pre-diabetes develop type 2 diabetes within 10 years.

Complications from Diabetes

People often have diabetes many years before it is diagnosed. During that time, serious complications may develop. Potential complications include the following:

Blindness. Diabetes is the leading cause of new cases of blindness in people ages 20-74. Each year, 12,000 to 24,000 people lose their eyesight because of diabetes.

Kidney disease. 10% to 21% of all people with diabetes develop kidney disease. In 2005, a total of 46,739 people in the U.S. and Puerto Rico initiated treatment for end-stage renal disease (kidney failure) because of diabetes.

Amputations. Diabetes is the most frequent cause for nontraumatic lower limb amputations. The risk of a leg amputation is 15 to 40 times greater for a person with diabetes than for the average American. In 2004, approximately 71,000 lower-limb amputations were performed as a result of complications brought on by diabetes.

Heart disease and stroke. People with diabetes are two to four times more likely to have heart disease. They are also two to four times more likely to suffer a stroke.

Warning Signs of Diabetes

Type 1 Diabetes (usually occur suddenly):

- frequent urination
- unusual weight loss
- unusual thirst
- extreme fatigue
- extreme hunger
- irritability

Type 2 Diabetes (occur less suddenly):

- any type 1 symptoms
- tingling/numbness in hands or feet
- frequent infections
- recurring skin, gum, or bladder infections
- blurred vision
- cuts/bruises slow to heal

Eating Disorders

Source: National Institute of Mental Health, National Institutes of Health, U.S. Dept. of Health and Human Services

Eating disorders involve serious disturbances in eating behavior, usually in the forms of extreme and unhealthy reduction of food intake or severe overeating. They are not due to a failure of will; rather, they are real and treatable medical illnesses in which certain behavior patterns get out of control. The **main types** are anorexia nervosa, bulimia nervosa, and binge-eating disorder (technically categorized with “eating disorders not otherwise identified”). These disorders usually develop in adolescence or early adulthood and often occur with other illnesses such as depression, substance abuse, and anxiety disorders. They are much more common among females; only about 5% to 15% of anorexia or bulimia patients and 35% of binge eaters are male.

If not treated, eating disorders can lead to serious complications, including heart conditions and kidney failure, which may result in death.

Anorexia nervosa affects an estimated 0.9% of all females. Symptoms include resistance to maintaining weight at minimally healthy levels, intense fear of gaining weight, exaggerated importance of body weight or shape in one’s self image, and infrequent or absent menstrual periods. Anorexics see themselves as overweight even when they are dangerously thin. In response, they avoid food and take other extreme measures to lose weight, such as exercising compulsively or purging by means of vomiting or laxatives and enemas. While some anorexics fully recover after a single episode, others may relapse frequently or experience chronic deterioration.

Bulimia nervosa affects an estimated 1.5% of females. It is characterized by recurrent uncontrolled binge-eating episodes followed by what is believed to be compensatory behavior to prevent weight gain, such as self-induced vomiting, exercising excessively, or fasting. Persons with bulimia can weigh within the normal range for their age and height, but they still fear gaining weight and are intensely dissatisfied with their bodies. They often perform their behaviors in secret, feeling shame when they binge and relief when they purge.

Binge-eating disorder, which is not officially approved as a psychiatric diagnosis, affects an estimated 2% to 3.5% of males and females in the U.S. As with bulimia, a binge-eating disorder involves episodes of excessive eating during which the sufferer may feel a complete lack of control. But individuals with this disorder do not compensate by purging, exercising, or fasting. Many are thus overweight, and the shame they feel can lead to further bingeing.

Eating disorder sufferers may not admit they are ill. Early diagnosis and a comprehensive **treatment** program are essential to recovery. Some patients may need immediate hospitalization. For anorexia, treatment usually follows three established steps: weight restoration, usually in an inpatient hospital setting; treatment of any accompanying psychological disturbances, including the use of medications; and achieving long-term remission or recovery by reducing or eliminating negative thoughts and behaviors.

Heart and Blood Vessel Disease

Source: American Heart Association, www.heart.org; National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention; National Heart, Blood, and Lung Institute, National Institutes of Health, U.S. Dept. of Health and Human Services

Warning Signs of Heart Attack

- Chest discomfort. Most heart attacks involve discomfort in the center of the chest that lasts more than a few minutes or that goes away and then returns. It can feel like uncomfortable pressure, squeezing, fullness, or pain.
- Discomfort in other areas of the upper body. Symptoms can include pain or discomfort in one or both arms, the back, neck, jaw, or stomach.
- Shortness of breath. This feeling may occur with or without chest discomfort.
- Other signs may include breaking out in a cold sweat, nausea, or lightheadedness.
- The American Heart Association advises immediate action at onset of symptoms, as more than half of heart attack victims die within an hour of symptoms first manifesting. Call 9-1-1. Get to a hospital right away.

Warning Signs of Stroke

- Sudden numbness or weakness of the face, arm or leg, especially on one side of the body.
- Sudden confusion, trouble speaking or understanding.
- Sudden trouble seeing in one or both eyes.
- Sudden trouble walking, dizziness, loss of balance or coordination.
- Sudden severe headache with no known cause.
- Prompt treatment of a stroke can be a major factor in controlling the effects. If you have one or more stroke symptoms that last more than a few minutes, call 9-1-1 or the emergency medical service number immediately so an ambulance, ideally one with advanced life support, can be sent for you quickly.

Major Modifiable Risk Factors

High blood pressure: High blood pressure, or hypertension, increases the risk of stroke, heart attack, kidney failure, and heart failure. It affects men and women of all races, ethnic origins, and ages. Obesity, physical inactivity, and an unhealthy diet can contribute to this **often symptomless** disease. Individuals should have a blood pressure reading at least once every two years or more often if advised by a physician.

A blood pressure reading is really two measurements, with one value written above the other, such as 122/78 mmHg. The upper number (systolic pressure) represents the amount of pressure in the blood vessels when the heart contracts (beats) and pushes blood through the circulatory system. The lower number (diastolic pressure) represents the pressure in the blood vessels between beats, when the heart is resting. According to recent National Institutes of Health (NIH) guidelines, a blood pressure reading below 120/80 is considered normal, while readings from 120/80 to 139/89 are considered prehypertension.

High blood pressure is divided into two stages:

Stage 1 is 140-159 (systolic) over 90-99 (diastolic);

Stage 2 is 160+ (systolic) over 100+ (diastolic).

The diagnosis can be based on either the systolic or the diastolic reading.

High blood pressure usually cannot be cured, but it can be controlled in a variety of ways, including lifestyle modifications and medication. Treatment always should be at the direction and under the supervision of a physician. The treatment goal for patients with hypertension is blood pressure below 140/90. Individuals with hypertension and diabetes or chronic kidney disease should aim for blood pressure lower than 130/80.

High blood cholesterol: Cholesterol is a waxy fat-like substance found in all cells of the body. It is produced by the body and also comes in some foods. The body needs some cholesterol, but excess levels increase the risk of heart disease. High cholesterol in itself **usually does not cause symptoms**, so many people are unaware that they have a problem.

There are two major kinds of cholesterol: LDL (low-density lipoprotein), often called “bad” cholesterol, leads to narrowing of the arteries. HDL (high-density lipoprotein), known as “good” cholesterol, helps reduce that risk.

NIH guidelines classify total cholesterol levels (determined by a blood test) of less than 200 mg/dl as desirable, 200-239 as borderline high, and 240 and higher as high. About 37 mil Americans have a cholesterol level of 240 mg/dl or higher. LDL levels of less than 100 are considered optimal, 130-159 as borderline high, 160-189 as high, and 190 and higher as very high. For HDL, levels of 60 mg/dl and higher are considered protective against heart disease, while levels under 40 mg/dl are considered a risk factor.

As with high blood pressure, high blood cholesterol can be controlled by lifestyle changes and medication and should be treated by a physician.

Triglycerides, another form of fat in the blood, can also raise the risk of heart disease. Levels that are borderline high (150-199) or high (200 or more) may need treatment.

Diabetes: Diabetes is a major risk factor for heart disease; at least 65% of people with diabetes mellitus die of some form of heart or blood vessel disease. See also “Diabetes” on pp. 161-62.

Smoking: Cigarette smokers are two to four times more likely to develop coronary heart disease (CHD). Smoking is also associated with the risk of sudden cardiac death.

Obesity: Using a body mass index (BMI) of 25 and higher for overweight and 30 and higher for obesity, an estimated 142 mil Americans age 20 and over could be considered overweight or obese. Of these, more than 67 mil are obese. See also “Weight Guidelines for Adults” on p. 169.

Physical inactivity: A sedentary lifestyle is a risk factor for CHD. The risk increase is comparable to that observed for high blood cholesterol, high blood pressure, or cigarette smoking.

Women and Cardiovascular Disease

The American Heart Association reports that diseases of the heart and stroke, respectively, are the number one and number three killers of women over the age of 25. (Cancer is the second leading cause.) More than one in four women died of some form of cardiovascular disease in 2006. Because heart disease was long viewed as a “man’s” disease, many of the major cardiovascular studies were conducted only on men. Recent attention has been directed toward understanding the influence of gender on cardiovascular disease risk and prevention, but important gaps in knowledge remain.

Women often present some of the same classic symptoms of heart attack as men, such as chest pain that spreads to the shoulders and arms. But women may more often report atypical chest pain or complain of abdominal pain, difficulty breathing (dyspnea), and nausea. Another problem in diagnosis is that women tend to have heart attacks later in life than men, so symptoms may be masked by other age-related diseases such as arthritis or osteoporosis. Even certain diagnostic tests and procedures such as the exercise stress test may not be as accurate in women, with the result that the disease process leading to heart attack or stroke may not be detected early on, with potentially serious consequences.

Irritable Bowel Syndrome

Source: National Institute of Diabetes and Digestive and Kidney Diseases, National Institutes of Health

Irritable Bowel Syndrome (IBS)—a functional disorder, not a disease, in the large intestine—is one of the most common disorders diagnosed by physicians. Nearly one in five Americans has IBS symptoms, and it accounts for more than 1 out of every 10 doctor visits in the U.S. IBS occurs more frequently in women than in men, and it usually begins before the age of 35 for about 50% of those affected. Though IBS causes discomfort and may even be painful, it does not damage the bowel.

Many people are uncomfortable discussing IBS because of its embarrassing symptoms. They may include the following:

- bloating
- gas
- diarrhea
- constipation
- abdominal pain or cramping
- mucus in the stool
- feeling as if one has not finished a bowel movement

For most people, IBS is a chronic condition, and there will likely be times when the symptoms may worsen or

disappear altogether only to reappear in the future. Most complications are derived from the symptoms, such as hemorrhoids, which may form as a result of diarrhea and constipation. People with chronic IBS may also go through periods of depression because of the constant discomfort and the symptoms’ interference in work and personal relationships.

The specific causes for IBS are unknown. The walls of the intestines are lined with layers of muscle that contract and relax in a coordinated manner as they move food through the digestive system. When a person has IBS, the contractions cause food to either speed up or slow down as it moves through the bowel, subsequently causing gas, bloating, diarrhea, or constipation. Some researchers believe that people who suffer from IBS have a colon that is particularly sensitive to certain foods. Milk products, alcohol, caffeine, carbonated drinks, chocolate, and fatty foods in particular can trigger IBS symptoms. Another common factor is a low tolerance for stretching of the large intestine. Women tend to

Malaria

(*Plasmodium* parasite) Infectious disease known from as early as 2700 BCE. Virtually eradicated in developed countries; still a major killer in tropical regions. **Transmission:** bite from infected mosquito. **Symptoms:** high fever, shaking chills, heavy sweating, headache, fatigue, enlarged spleen. If left untreated, organ damage and death. **Treatment:** antimalarial drugs, including chloroquine, for treatment and prevention. **Est. annual cases:** 1,255 in the U.S. in 2008; worldwide, an estimated 243 mil cases, 863,000 deaths, most young children in sub-Saharan Africa.

Measles

(*Rubeola* virus) Once-common viral infection; today almost nonexistent in U.S. and Canada. **Transmission:** airborne transmission by infected persons. **Symptoms:** itchy and raised rash, sore throat, cough, pink eye, high fever; in rare cases, encephalitis, seizures, permanent deafness, death. **Vaccine:** highly effective. **Treatment:** no specific treatment; symptoms relieved with bed rest, acetaminophen, humidified air. **Annual U.S. cases:** 140 in 2008.

Mumps

(Mumps virus) Acute and contagious viral infection. **Transmission:** direct contact with mucus or saliva of infected persons. **Symptoms:** painful, visible swelling of the salivary or parotid glands in the face. Chills, headache, fever, painful swallowing. In some cases, inflammation of testes, pancreas, ovaries. In severe cases, brain swelling and symptoms ranging from nausea and drowsiness to seizures and permanent deafness. **Vaccine:** MMR vaccine is effective. **Treatment:** no specific treatment; symptoms may be relieved by applying ice or heat to swollen glands. **Annual U.S. cases:** 454 in 2008.

Peptic ulcer

(Most from *Helicobacter pylori* [*H. pylori*] bacteria; also overuse of aspirin or other anti-inflammatory drugs) Weakening of the stomach's protective mucous coating, allowing stomach acid and bacteria to irritate stomach lining. **Transmission:** *H. pylori* may be transmitted through food and water. **Symptoms:** indigestion; bloating; dull, transient abdominal pain or discomfort; nausea; vomiting. **Treatment:** antibiotics, acid-suppressing drugs. **Est. annual U.S. cases:** about 20% of the population under 40 years of age and half of those over 60 may be infected with *H. pylori*. An estimated 500,000 to 850,000 develop peptic ulcers each year.

Pertussis or Whooping cough

(*Bordetella pertussis* or *B. parapertussis*) Upper respiratory bacterial infection. **Transmission:** airborne transmission by infected persons; highly contagious. **Symptoms:** initially, mild cold-like symptoms, fever, diarrhea, difficulty breathing; later, violent coughing with characteristic "whooping" heard when patient tries to breathe between coughs, vomiting. In severe cases, apnea, pneumonia, seizures, encephalopathy. **Vaccine:** available as part of combination vaccine that also prevents diphtheria and tetanus. **Treatment:** antibiotics in early cases; otherwise, disease must run its course. **Annual U.S. cases:** 13,278 in 2008.

Salmonella or Salmonellosis

(*Salmonella enteritidis*) Bacterial infection. **Transmission:** eating foods contaminated by feces carrying the bacteria or undercooked meats or raw eggs contaminated by bacteria. Contact with feces of infected animal or pet. **Symptoms:** fever, diarrhea, abdominal cramps 12 to 72

hours after infection. **Treatment:** no standard treatment. Runs its course in four to seven days; antibiotics in severe cases. **Annual U.S. cases:** 51,040 lab-confirmed cases in 2008.

Shigellosis

(Four species of *Shigella*: *boydii*, *dysenteriae*, *flexneri*, and *sonnei*) Bacterial infection and a form of dysentery, an intestinal disease. **Transmission:** consuming food contaminated by infected feces or vegetables grown in fields containing contaminated sewage. Swimming in contaminated water. **Symptoms:** watery or bloody diarrhea one to four days after infection, high fever, vomiting, painful bowel movements, severe diarrhea. In extreme cases, seizures in children, intestinal perforation. **Treatment:** mild infection allowed to run its course; replacement of fluids and salts lost through excessive diarrhea. Antibiotics in severe cases. Although severe diarrhea is symptomatic, antidiarrheal medicines may make illness worse. **Annual U.S. cases:** 22,625 in 2008.

Syphilis

(*Treponema pallidum*) Bacterial infection known since ancient times that spread rampantly throughout Europe in the Middle Ages. **Transmission:** sexually transmitted. **Symptoms:** primary stage: painless sore, called a chancre, where bacteria enters the body; usually heals in 3 to 12 weeks with or without treatment. Without treatment, disease enters secondary stage: skin rash as chancre is healing or weeks after it's healed. Without treatment, enters tertiary stage: mouth sores, fever, fatigue, loss of appetite, weight loss, hair loss, jaundice, syphilitic meningitis, aortal aneurysms, lesions, damage to nervous system, heart, and eyes. Most infected do not progress beyond primary or secondary stage. **Treatment:** curable with antibiotics (mostly penicillin). **Annual U.S. cases:** 46,277 total in 2008; 13,500 primary and secondary.

Tetanus or Lockjaw

(*Clostridium tetani*) Bacterial infection. **Transmission:** bacteria, found in soil, enters body through broken skin. **Symptoms:** muscle stiffness and spasms or "locking" of muscles of the jaw, neck, and limbs. **Vaccine:** four forms of immunization. **Treatment:** tetanus immune globulin to fight infection; with treatment, less than 10% of cases are fatal. **Est. annual U.S. cases:** approximately 100 per year, most due to lack of immunization.

Tuberculosis

(*Mycobacterium tuberculosis*) Bacterial infection that primarily affects the lungs. **Transmission:** airborne transmission by persons with active TB infection. **Symptoms:** weight loss, fever, cough with discharge (sometimes with bloody sputum), night sweats, growing shortness of breath over time, chest pains. **Vaccine/treatment:** BCG (Bacille Calmette Guerin) vaccine only effective in protecting young children and used where TB is prevalent. Not recommended by health experts for use in the U.S. because of the low risk of infection and its variable effectiveness. **Annual U.S. cases:** 12,904 in 2008.

Yellow fever

(Yellow fever virus, in *flavivirus* group) Viral infection that has caused large epidemics in South America, the Caribbean, and Africa. **Transmission:** bite from mosquitoes carrying the virus. **Symptoms:** headaches, muscle aches, fever, jaundice (yellowing skin), nausea and vomiting, kidney failure, severe generalized pain; in severe cases, shock, coma, and death. **Vaccine:** available, safe and effective. **Treatment:** symptoms treated until disease runs its course. **Est. annual cases:** 0 in the U.S.; 200,000 new cases, 30,000 deaths worldwide.

Food Guide Pyramid

In 2005, the U.S. Dept. of Agriculture issued a revised food guide pyramid called MyPyramid, along with new dietary guidelines for Americans. The new pyramid represents the latest findings in health and nutrition, with a focus on reducing calorie consumption and increasing physical activity. More specifically, the revised system factors in weight, age, gender, and physical activity in putting together a nutrition plan and distinguishes between necessary and unnecessary types of fats and sugars. In addition, the system allows for variation and personalization according to an individual's caloric needs. The guidelines below are general guidelines for better health and nutrition. To get a personalized nutrition and exercise assessment and for dietary recommendations, visit MyPyramid.gov.

Dietary Guidelines for Americans: Key Recommendations

- Choose nutrient-dense foods and beverages among the basic food groups while limiting the intake of foods with saturated and trans fats, cholesterol, added sugars, salt, and alcohol.
- To maintain a healthy body weight, balance calories consumed with calories expended.
- To prevent gradual weight gain over time, make small decreases in consumed calories and increase physical activity.
- Engage in regular physical activity.
- Keep fit through cardiovascular conditioning, stretching exercises for flexibility, and resistance exercises or calisthenics for muscle strength and endurance.
- Eat a sufficient amount of fruits and vegetables each day.
- Choose from all five vegetable subgroups: dark greens, orange, legumes, starchy vegetables, and other vegetables.
- Consume 3 cups per day of fat-free or low-fat milk or equivalent milk products.
- Consume less than 10% of calories from saturated fatty acids and less than 300 mg a day of cholesterol; keep trans fatty acid consumption as low as possible.
- Keep total fat intake between 20%-35% of calories, with most fats coming from sources of polyunsaturated and monounsaturated fatty acids such as fish, nuts, and vegetable oils.
- Choose lean, low-fat, or fat-free meat, poultry, dry beans, and milk or milk products.
- Eat fiber-rich fruits, vegetables, and whole grains.
- Consume less than 2,300 mg (approx. 1 tsp of salt) of sodium per day.
- Eat potassium-rich foods, such as fruits and vegetables.
- If you drink alcoholic beverages, do so in moderation: up to one drink per day for women and up to two drinks per day for men.

Food Ingredients

Protein

Proteins, composed of amino acids, are essential to good nutrition. They build, maintain, and repair the body. Best sources: eggs, milk, fish, meat, poultry, soybeans, nuts. High-quality proteins such as eggs, meat, or fish supply all eight amino acids needed in a diet. Plant foods—whole grain breads and cereals, rice, oats, soybeans, other beans, split peas, and nuts—can be combined to meet protein needs as well.

Fats

Fats provide energy by furnishing calories to the body. They also contain vitamins A, D, E, and K. They are the most concentrated source of energy in a diet. Best sources of polyunsaturated and monounsaturated fats: margarine, vegetable/plant oils, nuts. Concentrated sources of saturated fats: meats, cheeses, butter, cream, egg yolks, lard.

Carbohydrates

Carbohydrates provide energy to the body by supplying immediate calories. The carbohydrate group includes sugars, starches, fiber, and starchy vegetables. Best sources: grains, legumes, potatoes, vegetables, fruits.

Fiber

The portion of plant foods that our bodies cannot digest is known as fiber. There are two basic types: insoluble ("roughage") and soluble. Insoluble fibers help move food materials through the digestive tract; soluble fibers tend to slow them down. Both types absorb water, thus preventing and treating constipation by softening and increasing the bulk of the undigested food components passing through the digestive tract. Soluble fibers may also be helpful in reducing blood cholesterol levels. Best sources: beans, bran, fruits, whole grains, vegetables.

Water

Water dissolves and transports other nutrients throughout the body, aiding in the processes of digestion, absorption, circulation, and excretion. It helps regulate body temperature.

Vitamins

Vitamin A—promotes good eyesight; helps keep skin and mucous membranes resistant to infection. Best sources: liver, sweet potatoes, carrots, kale, cantaloupe, turnip greens, collard greens, broccoli, fortified milk.

Vitamin B₁ (thiamine)—prevents beriberi. Essential to carbohydrate metabolism and nervous system health. Best sources: pork, enriched cereals, grains, soybeans, nuts.

Vitamin B₂ (riboflavin)—protects the skin, mouth, eyes, eyelids, and mucous membranes. Essential to protein and energy metabolism. Best sources: milk, meat, poultry, cheese, broccoli, spinach.

Vitamin B₆ (pyridoxine)—important in the regulation of the central nervous system and in protein metabolism. Best sources: whole grains, meats, fish, poultry, nuts, brewers' yeast.

Vitamin B₁₂ (cobalamin)—needed to form red blood cells. Best sources: meat, fish, poultry, eggs, dairy products.

Niacin—maintains health of skin, the tongue, and the digestive system. Best sources: poultry, peanuts, fish, enriched flour, bread.

Folic acid (folacin)—required for normal blood cell formation, growth, and reproduction and for important chemical reactions in body cells. Best sources: yeast, orange juice, green leafy vegetables, wheat germ, asparagus, broccoli, nuts.

Other B vitamins—biotin, pantothenic acid.

Vitamin C (ascorbic acid)—maintains collagen, a protein necessary for the formation of skin, ligaments, and bones. Helps heal wounds and mend fractures. Aids in resisting some types of viral and bacterial infections. Best sources: citrus fruits and juices, cantaloupe, broccoli, Brussels sprouts, potatoes and sweet potatoes, tomatoes, cabbage.

Vitamin D—important for bone development. Best sources: sunlight, fortified milk and milk products, fish-liver oils, egg yolks.

Vitamin E (tocopherol)—helps protect red blood cells. Best sources: vegetable oils, wheat germ, whole grains, eggs, peanuts, margarine, green leafy vegetables.

Vitamin K—necessary for formation of prothrombin, which helps blood to clot. Also made by intestinal bacteria. Best dietary sources: green leafy vegetables, tomatoes.

Minerals

Calcium—works with phosphorus to build and maintain bones and teeth. Best sources: milk and milk products, cheese, blackstrap molasses, some types of tofu.

Phosphorus—performs more functions than any other mineral and plays a part in nearly every chemical reaction in the body. Best sources: cheese, milk, meats, poultry, fish, tofu.

Iron—necessary for the formation of myoglobin, which is a reservoir of oxygen for muscle tissue, and hemoglobin, which transports oxygen within blood. Best sources: lean meats, beans, green leafy vegetables, shellfish, enriched breads and cereals, whole grains.

Other minerals—chromium, cobalt, copper, fluorine, iodine, magnesium, manganese, molybdenum, potassium, selenium, sodium, sulfur, zinc.

Understanding Food Label Claims

Source: Center for Food Safety and Applied Nutrition, Food and Drug Admin., U.S. Dept. of Health and Human Services

The federal Nutrition Labeling and Education Act of 1990 provides that manufacturers can make certain claims on processed food labels only if they meet the definitions specified here:

Sugar

Sugar free: less than 0.5 g per serving
No added sugar; Without added sugar; No sugar added: No sugars added during processing or packing, including ingredients that contain sugars (e.g., fruit juices, apple-sauce, or dried fruit).
Processing does not increase sugar content above the amount naturally in the ingredients. (A functionally insignificant increase in sugars is acceptable from processes used for purposes other than increasing sugar content.)
Food for which it substitutes normally contains added sugars.
Reduced sugar: at least 25% less sugar than reference food

Fat

Fat free: less than 0.5 g of fat per serving
Saturated fat free: less than 0.5 g of saturated fat per serving, and the level of trans fatty acids does not exceed 1% of total fat
Low fat: 3 g or less per serving and, if the serving is 30 g or less or 2 tbs or less, per 50 g of the food
Low saturated fat: 1 g or less per serving and not more than 15% of calories from saturated fatty acids
Reduced fat; Less fat: at least 25% less per serving than reference food

Fiber

High fiber: 5 g or more per serving (must also meet low-fat definition or state level of total fat)
Good source of fiber: 2.5 g to 4.9 g per serving
More fiber; Added fiber: at least 2.5 g more per serving than reference food

Sodium

Sodium free: less than 5 mg per serving
Low sodium: 140 mg or less per serving and, if the serving is 30 g or less or 2 tbs or less, per 50 g of the food
Very low sodium: 35 mg or less per serving and, if the serving is 30 g or less or 2 tbs or less, per 50 g of the food
Reduced sodium; Less sodium: at least 25% less per serving than reference food

Calories

Low calorie: 40 calories or less per serving; if the serving is 30 g or less or 2 tbs or less, 40 calories or less per 50 g of food
Calorie free: under 5 calories per serving
Reduced calories; Fewer calories: at least 25% fewer calories than reference food

Cholesterol

Cholesterol free: less than 2 mg of cholesterol and 2 g or less of saturated fat per serving
Low cholesterol: 20 mg or less and 2 g or less of saturated fat per serving and, if the serving is 30 g or less or 2 tbs or less, per 50 g of the food
Reduced cholesterol; Less cholesterol: at least 25% less than reference food

Other Food Label Claims

Source: Food Safety and Inspection Service, Agricultural Marketing Service, U.S. Dept. of Agriculture

The FDA allows food producers and marketers to use language on their packaging that advertises the health benefits and production methods of their products. Products marked *certified* have been formally evaluated for class, grade, or other quality characteristics by the U.S. Dept. of Agriculture’s (USDA) Food Safety and Inspection Service. Below are some common packaging terms and their meanings.

Organic: Produced by farmers who use environmentally friendly methods to raise their crops or animals. Before a product can be labeled organic, the farm where the food is grown must pass a special inspection by a USDA official. Organic foods must be produced without conventional pesticides; fertilizers made with synthetic ingredients or sewage sludge; bioengineering; or ionizing radiation.

The official *USDA organic* label may appear on vegetables, fruit, packages of meat, cartons of milk, eggs, cheese, and other single-ingredient foods. Foods with more than one ingredient can place the official seal on their packaging if at least 95% of the ingredients are organic. Products with at least 70% organic ingredients may advertise prominently on the front of the package that the item contains organic ingredients. Products with less than 70% organic ingredients may not make any organic claims on the front of the package but may list organic ingredients on the side panel. Foods that contain 100% organic ingredients may advertise that fact on the front of the packaging along with the organic seal.

Natural: A minimally-processed product that does not contain any artificial ingredient or added color. The label

must explain the specific use of the term *natural* with regard to the product, such as “no added colorings,” “no artificial ingredients,” or “minimally processed.”

Free range or free roaming: The product comes from an animal that was given access to the outdoors for an unspecified amount of time each day. Animals raised in slaughterhouses are not considered free range. Free range products do not necessarily mean healthier or more disease-free.

Halal and Zabiah Halal: Produced in federally inspected meat packing plants and handled in accordance with Islamic law and under Islamic authority.

Kosher: Meat and poultry products prepared under Rabbinical supervision.

Minimal processing: Produced using traditional physical processes that do not fundamentally alter the raw products in order to make food edible, to preserve it, or to make it safe for human consumption. Includes smoking, roasting, freezing, drying, and fermenting. Applies mostly to meat and poultry.

No hormones: Hormones are not allowed in raising hogs or poultry, so those products may not make this claim. If sufficient documentation is provided to the USDA proving that hormones were not used, this term may appear on packages of beef.

No antibiotics: Claim may be made on a package (red meat and poultry) if sufficient documentation is provided to the USDA showing that the animals were raised without being administered antibiotics.

Note: For healthy breastfed infants, the AI is the mean intake. The AI for other life stage and gender groups is believed to cover needs of all individuals in the group, but lack of data or uncertainty in the data prevent being able to specify with confidence the percentage of individuals covered by this intake. (1) As retinol activity equivalents (RAEs). (2) In the absence of adequate exposure to sunlight. (3) As niacin equivalents (NEs). (4) As dietary folate equivalents (DFEs). (5) Although AIs have been set for choline, there are few data to assess whether a dietary supply of choline is needed at all stages of the life cycle. (6) Because 10%-30% of older people may malabsorb food-bound B₁₂, it is advisable for those older than 50 years to meet their RDA mainly by consuming foods fortified with B₁₂ or a supplement containing B₁₂. (7) In view of evidence linking folate intake with neural tube defects in the fetus, it is recommended that all women capable of becoming pregnant consume 400 mg from supplements or fortified foods in addition to intake of food folate from a varied diet. (8) It is assumed that women will continue consuming 400 mg from supplements or fortified food until their pregnancy is confirmed and they enter prenatal care, which ordinarily occurs after the end of the periconceptional period—the critical time for formation of the neural tube.

Dietary Requirements

The Food and Nutrition Board of the National Academy of Sciences’ Institute of Medicine, in reports published between 1997 and 2005, established **Dietary Reference Intakes (DRIs)**. DRIs establish daily consumption values for vitamins and elements (often called minerals) that aim to optimize health, not just guard against nutritional deficiencies, at all stages of life.

There are four DRI categories. The **Recommended Dietary Allowance (RDA)** gives intake values that meet the nutrient requirements of almost all (97%-98%) healthy individuals in a specified group. The **Estimated Average Requirement (EAR)** specifies the intake amounts meeting the estimated nutrient need of half the individuals in a

specified group. **Adequate Intake (AI)** values are given when there’s inadequate scientific evidence to calculate an EAR. For healthy breastfed infants, the AI is the mean intake; for other life stage groups, the AI is thought to cover the needs of all group individuals, but lack of data or uncertainty in the data prevents the percentage of individuals covered from being specified with confidence. The **Tolerable Upper Intake Level (UL)** designates the maximum intake amount that is unlikely to pose a risk of adverse health effects in almost all healthy individuals in a group. RDAs and AIs may both be used as individual intake goals.

Weight Guidelines for Adults

Source: *Dietary Guidelines for Americans, 2005*, U.S. Dept. of Agriculture; National Center for Health Statistics, CDC

Guidelines on identification, evaluation, and treatment of overweight and obesity in adults were released in June 1998 by the National Heart, Lung, and Blood Institute (NHLBI), in cooperation with the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK). The guidelines, based on research into risk factors contributing to heart disease, stroke, and other conditions, define overweight and obesity in terms of **body mass index (BMI)**. BMI is based on a person’s weight and height and is strongly correlated with total body fat content. A BMI of 25-29 is said to indicate **overweight**; a BMI of 30 or higher indicates **obesity**. Weight reduction is advised for persons with a BMI of 25 or higher. Factors such as a large waist circumference, high blood pressure or cholesterol, and family medical history may increase a person’s risk of developing an obesity-related disease.

The National Center for Health Statistics estimates more than 1/3 of adults in the U.S. are obese. Over the last two decades, the prevalence of overweight children has doubled, and among adolescents, it has tripled. In 2008, about 16.9% of children and adolescents between the ages of 2 and 19 were obese. A high prevalence of overweight and obesity is a public health concern because excess body fat has been associated with type 2 diabetes, hypertension, dyslipidemia, cardiovascular disease, stroke, gall bladder disease, respiratory dysfunction, gout, osteoarthritis, and certain kinds of cancers.

The table below shows the BMI for certain heights and weights. For weight reduction tips, contact the Weight-control Information Network, 1 WIN Way, Bethesda, MD 20892-3665. (877) 946-4627. win.niddk.nih.gov

(1) The BMI numbers apply to both men and women. Some very muscular people may have a high BMI without health risks.

Estimated Calorie Requirements¹

Estimated amounts of calories, rounded to the nearest 200, needed to maintain energy balance by sex, for various age groups and levels of physical activity.

	Female			Male		
	Age (years)	Sedentary ²	Moderately ³ active	Age (years)	Sedentary ²	Moderately ³ active
Child	2-3	1,000	1,000-1,400	4-8	1,400	1,400-1,600
Female	4-8	1,200	1,400-1,600	9-13	1,800	1,800-2,200
	9-13	1,600	1,600-2,000	14-18	2,200	2,400-2,800
	14-18	1,800	2,000	19-30	2,400	2,600-2,800
	19-30	2,000	2,000-2,200	31-50	2,200	2,400-2,600
	31-50	1,800	2,000	51+	2,000	2,200-2,400
	51+	1,600	1,800			

(1) Based on median height and weight for children and adolescents up to 18 years of age and a Body Mass Index (BMI) of 21.5 for adult females and 22.5 for adult males. (2) Engaging only in minimal activities associated with ordinary day-to-day life. (3) Includes physical activity equivalent to walking 1.5 to 3 miles per day at 3-4 mph. (4) Includes physical activity equivalent to walking more than 3 miles per day at 3-4 mph.

Calories Used During Physical Activity

Source: Center for Nutrition Policy and Promotion, U.S. Dept. of Agriculture

Amounts of calories burned during physical activities are estimates for a 154-pound person. The more an individual weighs, the more calories he or she will burn up with the same degree of exercise.

Moderate physical activities	In 1 hour	In 30 mins.	Vigorous physical activities	In 1 hour	In 30 mins.
Hiking	370	185	Running/jogging (5 miles per hour)	590	295
Light gardening/yard work	330	165	Bicycling (more than 10 miles per hour)	590	295
Dancing	330	165	Swimming (slow freestyle laps)	510	255
Golf (walking and carrying clubs).	330	165	Aerobics	480	240
Bicycling (less than 10 miles per hour) . .	290	145	Walking (4½ miles per hour)	460	230
Walking (3 ½ miles per hour)	280	140	Heavy yard work (e.g., chopping wood)	440	220
Weight training (general light workout) . .	220	110	Weight lifting (vigorous effort)	440	220
Stretching	180	90	Basketball (vigorous)	440	220

Finding Your Target Heart Rate

Source: Carole Casten, EdD, *Aerobics Today*; Peg Jordan, RN, Aerobics and Fitness Assn. of America

The target heart rate is the rate of heartbeats a person should aim for during aerobic exercise (e.g., running, cycling, or cross-country skiing) to get the full benefit for cardiovascular conditioning.

First, determine the intensity level at which one would like to exercise. Someone who's led a sedentary lifestyle may want to begin an exercise regimen at the 60% level and work up to the 70% level. Athletes and highly fit individuals must work at an 85% or higher level to receive benefits. Second, calculate the target heart rate. One common way is by using the American College of Sports Medicine Method.

An individual should subtract his or her age from 220, then multiply that number by the desired intensity level of the workout. Divide the answer by 6 for a 10-second pulse count. (The 10-second pulse count is useful for checking whether the target heart rate is being achieved during the workout. One can easily check one's pulse—on the inside of the wrist or side of the neck—by counting the number of beats in 10 seconds.)

For example, a 20-year-old wishing to exercise at 70% intensity would do the following calculations to figure out his or her target heart rate:

Maximum heart rate	220 – 20 = 200
Target heart rate	200 × 0.70 = 140
10-second pulse count	140/6 = 23.33

To work out at 70% intensity, this 20-year-old would strive for a target heart rate of 140 beats per minute, or a 10-second pulse count of 23.

To obtain cardiovascular fitness benefits from aerobic exercise, an individual should participate in an aerobic activity at least three to five times a week for 20-30 minutes each session. Cardiac patients and very sedentary individuals can obtain benefits with shorter periods (15-20 minutes per session). Generally, training changes occur within four to six weeks, but they can occur in as little as two weeks.

Overweight, Obesity, and Healthy Weight in the U.S., 1960-2008¹

Source: National Health and Nutrition Examination Survey (NHANES), National Center for Health Statistics, CDC

Weight status by sex	1960-62	1971-74	1976-80	1988-94	1999-2002	2001-04	2005-08

Female ³	54.1	54.3	53.7	45.1	35.6	36.2	35.2

Note: Percents do not add up to 100 because persons with BMIs of less than 18.5 are not included in these figures. Height was measured without shoes; two pounds were deducted from 1960-62 data to allow for weight of clothing. (1) In persons 20-74 years of age, age-adjusted to 2000 standard population group. Data based on measured height and weight of a sample of the civilian noninstitutionalized population. (2) With a body mass index (BMI) greater than or equal to 25.0. (3) Not including pregnant women. (4) With a body mass index (BMI) greater than or equal to 30.0 (5) With a BMI greater than or equal to 18.5 and less than 25.0. See table on p. 169 to calculate BMI.

Basic First Aid

Source: Courtesy of the American National Red Cross; www.redcross.org. All rights reserved in all countries.

Note: This information is not intended to be a substitute for formal training. It is recommended that you contact your local American Red Cross chapter to sign up for a First Aid/CPR/AED course.

In an emergency, it is important to get medical assistance as soon as possible, but knowing what to do until a doctor or other trained person gets to the scene can save a life, especially in cases of severe bleeding, choking, poisoning, and shock.

People with special medical problems, such as diabetes, cardiovascular disease, epilepsy, or allergies, are urged to wear some sort of emblem identifying the problem as a safeguard against receiving medication that might be harmful or even fatal. Emblems may be obtained from Medic Alert Foundation, 2323 Colorado Ave., Turlock, CA 95382; (888) 633-4298; www.medicalert.org.

Animal bite: Call 9-1-1 or the local emergency number if the wound is bleeding seriously or if you suspect the animal might have rabies. Control any bleeding. Wash minor wounds with soap under running water and apply triple antibiotic ointment and a dressing. When possible, proper authorities should test the animal for rabies.

Asphyxiation: Call 9-1-1 or the local emergency number. Give care for any life-threatening conditions.

Bleeding: Use a barrier between your hand and the wound to help prevent infection. Cover wound with a sterile compress. Apply direct pressure until bleeding stops. Cover compress with a bandage. Call 9-1-1 or the local emergency number if bleeding is severe.

Burn: Check for life-threatening conditions. If the burn is mild, with skin unbroken and no blisters, flush with cold running water until pain subsides. Apply a loose, sterile dry dressing to prevent infection. If the burn is severe, call 9-1-1 or the local emergency number. Care for shock (see below). Keep the person from getting chilled or overheated until advanced medical assistance arrives. Do not try to clean a severe burn or break blisters.

Chemical in eye: Call 9-1-1 or the local emergency number. Turn the person's head to the side so that the affected eye is lower than the unaffected eye. Continuously flush the injured eye with water.

Choking: See **First aid for choking** below.

Convulsions (seizures): Remove nearby objects that might cause injury. Protect the person's head by placing a thin folded towel or item of clothing under it. If there is fluid in the person's mouth, roll him or her on one side so that the fluid may drain from the mouth. Do not place anything between the person's teeth. Stay with the person until he or she is fully conscious. If convulsions do not stop, get medical attention immediately.

Cut (minor): Use a clean barrier between your hand and the wound to prevent infection. Apply direct pressure for a few minutes to control any bleeding. Wash the wound thoroughly with soap and water and apply triple antibiotic ointment or cream. Cover the wound with a sterile compress and a bandage or use an adhesive bandage.

Fainting: If the person feels faint, lower him or her to the ground. Lay the person down on his or her back. If possible, elevate the person's legs 8 to 12 inches. Care for any life-threatening conditions. Loosen any restrictive clothing and check for any signs of injury. Call 9-1-1 or the local emergency number.

Foreign object in eye: If an object is embedded in someone's eye, do not remove it. If not embedded, try to remove the object by having the person blink several times. If the object doesn't come out, gently flush the eye with water. Do not rub the eye. If the object still doesn't come out, the person should receive professional medical attention.

Frostbite: Handle the frostbitten area gently. Do not rub. If there is no danger of the affected area refreezing, soak it in warm water (not warmer than 105°F). Do not allow the frostbitten area to touch the side of the water container. Keep the frostbitten part in the water until normal color returns and it feels warm. Loosely bandage the area with dry, sterile dressings. If fingers or toes are frostbitten, put sterile gauze between them. Call 9-1-1 or seek emergency help as soon as possible.

Heat stroke and heat exhaustion: Remove the person from the heat. Loosen any tight clothing. Fan the person and apply cool, wet cloths to the skin. If the person is conscious, have him or her slowly drink some cool water. Call 9-1-1 if the person's condition does not improve or if you suspect heat stroke.

Heart attack and stroke: See pp. 162-63.

Hypothermia: Call 9-1-1 or the local emergency number. Move person to a warm place. Remove wet clothing and dry the person, if necessary. Warm the person gradually by wrapping him or her in warm blankets or clothing. Apply heat pads or other heat sources if available but do not apply directly to the body. If the person is alert, give him or her warm, non-alcoholic and decaffeinated liquids to drink.

Loss of limb: Call 9-1-1 or the local emergency number and care for any life-threatening conditions. If a limb is severed, it is important to properly protect the limb so that it can possibly be reattached. After the victim is cared for, the limb should be wrapped in sterile gauze or clean material and placed in a clean plastic bag or other suitable container. Pack ice around the limb on the outside of the bag or container to keep the limb cold. Be sure the limb is taken to the hospital with the person.

Poisoning: Care for any life-threatening conditions. Call the National Poison Control Center (800-222-1222), 9-1-1, or the local emergency number and follow their directions. Do not give the person any food or drink or induce vomiting unless specified to do so by medical professionals.

Shock (injury-related): Monitor breathing and consciousness. Have the person lie down and keep him or her as comfortable as possible. Elevate his or her legs 8 to 12 inches unless you suspect a head, neck, or back injury or broken hip or leg bones. Do not attempt to move the person if spinal injury is suspected. Maintain normal body temperature. If the weather is cold or damp, place blankets or extra clothing over and under the person; if the weather is hot, provide shade.

Snakebite: Call 9-1-1 or the local emergency number. Wash the injury. Keep the area still and at a lower level than the heart. Keep the person calm. If professional medical help cannot get to the person within 30 minutes, consider using a snakebite kit if available. Care for a bite from an elapid snake, such as a coral snake, is the same except you should apply an elastic roller bandage after washing the wound.

Sprains and fractures: Apply ice to reduce swelling and pain. Do not try to straighten or move broken limbs. Apply a splint to immobilize the injured area only if you have to move or transport the person to seek medical attention, and it does not cause more pain. If you suspect a serious injury, call 9-1-1 or the local emergency number.

Sting from insect: If possible, remove the stinger by scraping it away with your finger or a plastic card (like a credit card) or using tweezers. If you use tweezers, grasp the stinger, not the venom sac. Wash the area with soap and water. Cover it to keep it clean. Apply a cold pack to reduce pain and swelling. Call 9-1-1 or the local emergency number immediately if the wound does not stop swelling, the person collapses, or he or she is known to be allergic to the sting.

Unconsciousness: Call 9-1-1 or the local emergency number immediately. Care for any life-threatening conditions. If the person shows signs of life (movement and breathing), place him or her in the recovery position (i.e., lying on a side with head supported, so that the airway is open). Do not move the person if a spinal injury is suspected.

First Aid for Choking

The recommended first aid for a conscious choking victim who is unable to speak, cough, or breathe, is to deliver a series of five blows to the back and five thrusts to the abdomen. Have another person call 9-1-1 or the local emergency number. Obtain consent from the victim to treat him or her. Lean the victim forward and apply five blows to his or her back with the heel of your hand. Then stand or kneel behind the victim and wrap your arms around his or her waist. Make a fist with one hand and place the thumb side against the middle of the person's abdomen, just above the navel and well below the lower tip of the breastbone. Grasp your fist in your other hand and quickly thrust upwards into the abdomen five times. Continue back blows and abdominal thrusts until the object is dislodged, and the person can breathe or cough forcefully, or the person loses consciousness.

VITAL STATISTICS

Recent Trends in Vital Statistics

Source: National Center for Health Statistics (NCHS), U.S. Dept. of Health and Human Services

Births

An estimated 4,136,000 babies were born in the U.S. in 2009, a decrease from 4,247,000 in 2008. The birth rate decreased to 13.5 per 1,000 total population, a new record low. The fertility rate (number of live births per 1,000 women aged 15-44 years) decreased to an estimated 66.8 for 2009, down from the 2008 rate of 68.4.

Deaths

The number of deaths during 2009 was estimated at 2,426,000 according to provisional data, down from 2,453,000 in 2008. The death rate in 2009 decreased to 7.9 deaths per 1,000 population, down from 8.1 in 2008. The infant death rate was 6.3 deaths under 1 year per 1,000 live births in 2009, down from 6.5 in 2008.

Natural Increase

As a result of natural increase (the excess of births over deaths), an estimated 1,710,000 persons were added to the population in 2009. The rate fell to 5.6 per 1,000 population, down from 5.8 in 2008.

Marriages

An estimated 2,077,000 marriages were performed in 2009, compared to 2,157,000 in 2008. The provisional marriage rate for 2009 (6.8 per 1,000 population) was down from the 2008 rate of 7.1.

Divorces

The divorce rate went down slightly from 3.5 per 1,000 population in 2008 to 3.4 per 1,000 population in 2009, according to provisional data. Data are incomplete however. The NCHS does not include divorce data for California, Georgia, Hawaii, Indiana, Louisiana, and Minnesota.

P = Provisional data. **Note:** Statistics cover only events occurring within the U.S. and exclude fetal deaths. Rates per 1,000 population; enumerated as of Apr. 1 for census years; estimated as of July 1 for all other years. Beginning 1970, statistics exclude births and deaths occurring among nonresidents of the U.S. Data include revisions. Birth and death rates for years in the 1990s revised on basis of the 2000 Census.

Marriage and Divorce Rates, 1920-2009

Source: National Center for Health Statistics (NCHS), U.S. Dept. of Health and Human Services

(Divorce rates for 2006-09 were calculated excluding data and populations from the nonreporting states California, Georgia, Hawaii, Indiana, Louisiana, and Minnesota. Some data are provisional.)

The U.S. marriage rate dipped during the Depression and peaked sharply just after World War II; the trend after that has been more gradual. The divorce rate generally rose from the 1920s through 1981, when it peaked at 5.3 per 1,000 population, before declining somewhat. The graph below shows marriage and divorce rates since 1920.

	All ages combined ³				
	Fresh embryos	Frozen embryos			
Donor eggs					
Number of transfers	10,321	5,633			
Average number of embryos transferred	2.2	2.3			
Percentage of transfers resulting in live births ²	55.1%	31.9%			

Note: 89% (430 of 483) of ART clinics in the U.S. submitted data in 2007. A total of 142,435 cycles were reported. There were 43,412 live-birth deliveries resulting from ART cycles started in 2007. There were 57,569 infants born as a result of ART cycles performed in 2007. (1) Clinic-specific outcome rates are unreliable for women older than 44 undergoing ART cycles using fresh or frozen embryos with nondonor eggs. (2) A multiple-infant birth is counted as one live birth. (3) All ages (including ages over 44) are reported together because previous data show that patient age does not materially affect success with donor eggs.

Numbers of Multiple Births in the U.S., 1990-2007

Source: National Center for Health Statistics (NCHS), U.S. Dept. of Health and Human Services

The general upward trend in multiple births reflects greater numbers of births to older women and increased use of fertility drugs.

(1) Data from 36 reporting areas; excludes three states (CA, LA, and NH) that did not report data and 13 states/areas (AZ, CT, DC, FL, IL, MA, NE, NV, NM, RI, UT, WA, and WY) for which race by age either was not reported or was reported as unknown for more than 15% of women. (2) Data from 33 reporting areas; excludes three states (CA, LA, and NH) that did not report data and 16 states/areas (AZ, AR, CT, DC, FL, IL, MD, MA, NE, NV, NM, NY [excluding New York City], RI, UT, WA, and WY) for which race by marital status either was not reported or was reported as unknown for more than 15% of women.

Sexual Behavior in the U.S.

Source: National Center for Health Statistics (NCHS), U.S. Dept. of Health and Human Services

Data released by the National Center for Health Statistics in 2005 show that about 90% of U.S. men and women 18-44 years of age think of themselves as heterosexual; 2.3% of men and 1.3% of women as homosexual; and 1.8% of men and 2.8% of women as bisexual. However, 6.2% of men 18-44 years of age reported ever having had sex with another male as of 2002 (up from 2.3% in 1991), and 11.5% of women reported ever having had a sexual experience with another woman (up from 4.1% in 1992). Ten percent of males age 15-44 had never had sex with a female, but this percentage varied greatly with age: more than half (52%) of males age 15-17 had never had sex with a female, but only 1.8% of males age 40-44 had not done so.

Percentages were slightly lower for women, with only 8.4% of females age 15-44 having never had sex with a male, with specific percentages ranging from 50.2% for females age 15-17 to only 1.3% for females age 40-44. Among men age 15-44 who had sex with at least one partner in the previous year, 39% reported using a condom in their most recent sexual encounter (24% of married men and 65% of never-married men). Among women, only 22% reported using a condom (13% of married and 42% of never-married women). Condom use was also more frequent among younger men and women: in the 15-19 age group, 66% of males and 44% of females used a condom in their most recent sexual encounter.

U.S. Fires, 2009

Source: National Fire Protection Assn.

Fires

- Public fire departments responded to 1,348,500 fires in 2009, a 7.1% decrease from 2008. Every 23 seconds, a fire department responds to a fire somewhere in the United States.
- There were 480,500 structure fires in 2009, a decrease of 6.7% from 2008. 75% of them (362,500 fires) occurred in homes.
- Fires in vehicles dropped 7.2% from the previous year, totaling 219,000 in 2009.
- There were 649,000 fires in outside properties, a decrease of 7.4% from 2008.

Civilian deaths

- There were an estimated 3,010 civilian fire deaths in 2009. This was a 9.3% decrease from the year before.
- The number of civilian fire deaths that occurred in home structure fires decreased 6.9% to 2,565, and fires in the home caused 85% of all fire deaths.
- Fires caused an average of one civilian death every 175 minutes.

Civilian injuries

- There were an estimated 17,050 civilian fire injuries reported in 2009, a 2.1% increase over 2008. Nationwide, a civilian was injured in a fire every 31 minutes.

- Home structure fires were the site of 12,650 civilian fire injuries in 2009, and non-home structure fires accounted for 2,090 civilian injuries.

Property damage

- Direct property damage from fires amounted to an estimated \$12.5 bil in 2009, a decrease of 19.4% from 2008. Structure fires accounted for \$10.8 bil of property damage.
- Property loss associated with home fires came to \$7.6 bil for 2009.

Intentionally set fires

- There were an estimated 26,500 intentionally set structure fires in 2009, a decrease of 13.1% from 2008.
- Intentionally set structure fires are believed to have resulted in 170 civilian deaths in 2009, a significant decrease of 46.0% from the year before. Property damage from intentionally set structure fires totaled \$684 mil, a decrease of 21.0% from the 2008 figure.
- The number of intentionally set vehicle fires in 2009 was 15,000, a decrease of 14.3% from the previous year. Intentionally set vehicle fires caused an estimated \$108 mil in property damage, a decrease of 22.3% from 2008.

U.S. Motor Vehicle Accidents, 2008

Source: National Safety Council; Natl. Highway Traffic Safety Admin.

An estimated 39,000 people in the U.S. were killed in motor vehicle accidents in 2008, according to preliminary figures from the National Safety Council, down 10% from the total for 2007. Although the number of drivers (208.1 mil) increased in 2008, vehicle miles driven (2.9 tril) and the death rate per 100 mil vehicle miles decreased 6% to 1.33.

Motor vehicle deaths per 10,000 registered vehicles dropped from 1.69 in 2007 to 1.51 in 2008, and were down from 2.02 in 1998, a decrease of 25% over 10 years. This rate has declined in most years since the introduction of the automobile. The rate of fatalities per 100,000 population declined 20% between 1998 and 2008, and 10% between 2007 and 2008.

The split between male and female licensed drivers was basically 50-50. Male drivers were involved in about 5.8 mil accidents, whereas female drivers were in 4.3 mil. Male drivers were also involved in 75% of fatal accidents, about 36,881, compared with 12,568 accidents involving female drivers.

In 2008, 11,773 traffic fatalities, or 32%, involved an intoxicated (blood alcohol concentration of 0.08 or greater) driver or

motorcycle operator, a decline of 9.7% from 2007. In cases where a driver or nonoccupant drank at all, traffic fatalities totaled 13,846 people, or 37%. Driving under the influence of alcohol or drugs factored in about 14% of all traffic accidents.

Seat belt use was 84% in 2009. In 2008, safety belts and child restraints saved an estimated 13,494 lives. Another 2,546 lives were saved by frontal air bags. Women used safety belts (86%) more often than men (81%). The least likely safety belt users were rural drivers (79%) and drivers of pickup trucks (74%).

	Deaths	Injuries
All motor vehicle accidents	39,000	2,100,000
Collision between motor vehicles	15,100	1,530,000
Collision with fixed object.	12,600	330,000
Pedestrian accidents	5,600	75,000
Noncollision accidents (e.g., rollovers).	4,500	100,000
Collision with pedal cycle.	900	59,000
Collision with railroad train.	200	1,000
Other (mostly collisions with animals)	100	5,000

Note: NSC numbers are rounded. NHTSA intoxication data is final.

Improper Driving Reported in Accidents, 2000-08

Source: National Safety Council

Type	Percentage of fatal accidents			Percentage of injury accidents			Percentage of all accidents		
	2008	2004	2000	2008	2004	2000	2008	2004	2000
Improper driving	58.7%	66.0%	61.6%	59.9%	67.1%	60.3%	57.6%	61.0%	57.8%
Speed too fast or unsafe	15.7	17.6	23.7	10.6	13.7	16.3	10.6	12.5	13.6
Right of way	10.2	13.1	18.6	15.6	19.1	19.9	12.9	15.7	20.1
Failed to yield	6.8	9.0	10.1	11.2	14.6	15.0	9.6	12.0	12.7
Disregarded signal	1.5	2.1	4.6	2.5	1.8	3.6	1.8	1.2	5.3
Passed stop sign.	1.9	1.9	3.8	1.9	3.6	1.3	1.5	2.5	2.2
Drove left of center.	5.9	7.3	8.2	1.1	1.7	1.1	1.0	1.3	1.0
Improper overtaking	1.0	1.3	0.9	0.5	0.9	0.6	0.8	0.9	0.9
Made improper turn	2.9	3.9	0.7	3.1	4.6	2.0	3.4	4.6	2.4
Followed too closely	0.7	0.8	0.5	7.2	7.2	4.3	6.8	8.0	5.7
Other improper driving	22.3	22.0	9.0	21.8	19.9	16.1	22.1	18.0	14.1
No improper driving stated	41.3	34.0	38.4	40.1	32.9	39.7	42.4	39.0	42.2

Note: Based on reports from state traffic authorities. When a driver was under the influence of alcohol or drugs, the accident was considered a result of the driver's physical condition—not a driving error. For this reason, accidents in which the driver was reported to be under the influence are included under "no improper driving stated."

Risk Behaviors in High School Students, 2009

Sitting Bull, c.1831-90, (Nat. Am.) Sioux leader in Battle of Little Bighorn against George A. Custer, 1876.

Alfred E. Smith, 1873-1944, (U.S.) NY Democratic governor; first Roman Catholic to run for president.

Margaret Chase Smith, 1897-1995, (U.S.) congresswoman, senator (ME); 1st woman elected to both houses of Congress.

Jan C. Smuts, 1870-1950, (S. Africa) statesman, philosopher, soldier, prime min.

Paul Henri Spaak, 1899-1972, (Belg.) statesman, socialist leader.

Joseph Stalin, 1879-1953, (USSR) Soviet dictator, 1924-53; instituted forced collectivization, massive purges, and labor camps, causing millions of deaths.

Edwin M. Stanton, 1814-69, (U.S.) sec. of war, 1862-68.

Alexander Stephens, 1812-1883, (U.S.) vice pres. of the Confederacy.

Edward R. Stettinius Jr., 1900-49, (U.S.) industrialist; sec. of state who coordinated aid to WWII allies.

Adlai E. Stevenson, 1900-65, (U.S.) Democratic leader, diplomat, governor (IL), presidential candidate.

Henry L. Stimson, 1867-1950, (U.S.) statesman; served in 5 administrations, foreign policy adviser in 1930s and 1940s.

Carl Stokes, 1927-96, (U.S.) first black mayor of a major American city (Cleveland), 1967-72.

Suharto, 1921-2008, (Indon.) former longtime Indonesian ruler.

Sukarno, 1901-70, (Indon.) dictatorial first pres. of the Indonesian republic.

Sun Yat-sen, 1866-1925, (China) revolutionary; leader of Kuomintang, regarded as the father of modern China.

Robert A. Taft, 1889-1953, (U.S.) conservative Senate leader; called "Mr. Republican."

Charles de Talleyrand, 1754-1838, (Fr.) statesman, diplomat; the major force of the Congress of Vienna of 1814-15.

U Thant, 1909-74, (Burma) statesman, UN sec.-general.

Norman M. Thomas, 1884-1968, (U.S.) social reformer; 6 times Socialist party presidential candidate.

Josip Broz Tito, 1892-1980, (Yug.) pres. of Yugoslavia from 1953; WWII guerrilla chief, postwar rival of Stalin.

Palmiro Togliatti, 1893-1964, (It.) major Italian Communist leader.

Hideki Tojo, 1885-1948, (Jpn.) statesman, soldier; prime min. during most of WWII.

François Toussaint L'Ouverture, c.1744-1803, (Haiti) patriot, martyr; thwarted French colonial aims.

Leon Trotsky, 1879-1940, (Russ.) revolutionary; founded Red Army, expelled from party in conflict with Stalin; assassinated.

Pierre Elliott Trudeau, 1919-2000, (Can.) longtime liberal prime minister of Canada, 1968-79, 1980-84; achieved native Canadian constitution.

Rafael L. Trujillo Molina, 1891-1961, (Dom.) dictator of Dominican Republic, 1930-61; assassinated.

Moïse K. Tshombe, 1919-69, (Congo) pres. of secessionist Katanga prov., prem. of Congo.

William M. Tweed, 1823-78, (U.S.) political boss of Tammany Hall, New York City's Democratic political machine.

Walter Ulbricht, 1893-1973, (Ger.) Communist leader of German Democratic Republic.

Arthur H. Vandenberg, 1884-1951, (U.S.) senator (R, MI); proponent of bipartisan anti-Communist foreign policy.

Eleutherios Venizelos, 1864-1936, (Gr.) most prominent Greek statesman of early 20th cent.

Hendrik F. Verwoerd, 1901-66, (S. Africa) prime min.; rigorously applied apartheid policy despite protest.

Kurt Waldheim, 1918-2007, (Austria) UN sec.-gen, Austrian pres.

George Wallace, 1919-98, (U.S.) former segregationist governor of Alabama, pres. candidate.

Robert Walpole, 1676-1745, (Br.) statesman; generally considered Britain's first prime min.

Harold Washington, 1922-87, (U.S.) first black mayor of Chicago.

Robert C. Weaver, 1907-97, (U.S.) first African American appointed to cabinet; sec. of Housing and Urban Development.

Daniel Webster, 1782-1852, (U.S.) orator, politician; advocate of business interests during Jacksonian agrarianism.

Caspar Weinberger, 1917-2006, (U.S.) business exec., former defense sec., other cabinet posts.

Chaim Weizmann, 1874-1952, (Russ.-Isr.) Zionist leader, scientist; first Israeli pres.

Wendell L. Willkie, 1892-1944, (U.S.) Republican who tried to unseat Franklin D. Roosevelt when he ran for his 3rd term.

Harold Wilson, 1916-95, (Br.) Labour party leader; prime min., 1964-70, 1974-76.

Boris Yeltsin, 1931-2007, (USSR-Russia) first freely elected president of post-Soviet Russia.

Coleman A. Young, 1918-97, (U.S.) first African-American mayor of Detroit, 1974-93.

Emiliano Zapata, c.1879-1919, (Mex.) revolutionary; major influence on modern Mexico.

Todor Zhivkov, 1911-98, (Bulg.) Communist ruler of Bulgaria from 1954 until ousted in a 1989 coup.

Zhou Enlai, 1898-1976, (China) diplomat, prime min.; a leading figure of the Chinese Communist party.

Scientists of the Past

Revised by Peter Barker, Prof. and Chair, Dept. of the History of Science, Univ. of Oklahoma.

For pre-modern scientists, see also Philosophers and Religious Figures of the Past and Historical Figures chapters.

Albertus Magnus, c.1200-1280, (Ger.) theologian, philosopher; helped found medieval study of natural science.

Alhazen (Ibn al-Haytham), c. 965-c.1040, mathematician, astronomer, optical theorist.

Andre-Marie Ampère, 1775-1836, (Fr.) mathematician, chemist; founder of electrodynamics.

John V. Atanasoff, 1903-95, (U.S.) physicist; co-invented Atanasoff-Berry Computer (1939-41).

Amedeo Avogadro, 1776-1856, (It.) chemist, physicist; proposed that equal volumes of gas contain equal numbers of molecules, permitting determination of molecular weights.

John Bardeen, 1908-91, (U.S.) double Nobel laureate in physics (transistor, 1956; superconductivity, 1972).

A. H. Becquerel, 1852-1908, (Fr.) physicist; discovered radioactivity in uranium (1896).

Alexander Graham Bell, 1847-1922, (U.S.) inventor; first to patent and commercially exploit the telephone (1876).

Daniel Bernoulli, 1700-82, (Switz.) mathematician; developed fluid dynamics and kinetic theory of gases.

Clifford Berry, 1918-63, (U.S.) collaborated with Atanasoff on the ABC computer (1939-41).

Jöns Jakob Berzelius, 1779-1848, (Swed.) chemist; developed modern chemical symbols and formulas.

Henry Bessemer, 1813-98, (Br.) engineer; invented Bessemer steel-making process.

Hans Bethe, 1906-2005, (Ger.-U.S.) physicist; won Nobel Prize in 1967 for describing how stars generate energy.

Bruno Bettelheim, 1903-90, (Austria-U.S.) psychoanalyst; studied disturbed children; *Uses of Enchantment* (1976).

Louis Blériot, 1872-1936, (Fr.) engineer; monoplane pioneer, first Channel flight (1909).

Franz Boas, 1858-1942, (Ger.-U.S.) founded modern anthropology; studied Pacific Coast tribes.

Niels Bohr, 1885-1962, (Den.) atomic and nuclear physicist; founded quantum mechanics.

Norman Borlaug, 1914-2009, (U.S.) plant pathologist and geneticist; father of "green" (agricultural) revolution.

Max Born, 1882-1970, (Ger.) atomic and nuclear physicist; helped develop quantum mechanics.

Satyendranath Bose, 1894-1974, (India) physicist; forerunner of modern quantum theory for integral-spin particles.

Louis de Broglie, 1892-1987, (Fr.) physicist; proposed quantum wave-particle duality.

Robert Bunsen, 1811-99, (Ger.) chemist; pioneered spectroscopic analysis; discovered rubidium, caesium.

Luther Burbank, 1849-1926, (U.S.) naturalist; developed plant breeding into a modern science.

Vannevar Bush, 1890-1974, (U.S.) electrical engineer; developed differential analyzer, an early analogue computer; headed WWII Office of Scientific Res. and Dev.

Marvin Camras, 1916-95, (U.S.) inventor, electrical engineer; invented magnetic tape recording.

Alexis Carrel, 1873-1944, (Fr.) surgeon, biologist; developed methods of suturing blood vessels, transplanting organs.

Rachel Carson, 1907-64, (U.S.) marine biologist, environmentalist; *Silent Spring* (1962).

James Chadwick, 1891-1974, (Br.) physicist; discovered the neutron (1932); led Brit. Manhattan Project group in U.S.

Albert Claude, 1898-1983, (Belg.-U.S.) a founder of modern cell biology; determined role of mitochondria.

Nicolaus Copernicus, 1473-1543, (Pol.) first modern astronomer to propose Sun as center of the planets' motions.

Jacques Yves Cousteau, 1910-97, (Fr.) oceanographer; co-inventor, with Gagnan, of the Aqualung (1943).

Seymour Cray, 1925-96, (U.S.) computer industry pioneer; developed supercomputers.

Francis Crick, 1916-2004, (Br.) biophysicist; co-discoverer of genetic code; shared 1962 Nobel Prize.

Marie, 1867-1934, (Pol.-Fr.) and **Pierre Curie**, 1859-1906, (Fr.) physical chemists; pioneer investigators of radioactivity; discovered radium and polonium (1898).

Gottlieb Daimler, 1834-1900, (Ger.) engineer, inventor; pioneer automobile manufacturer.

John Dalton, 1766-1844, (Br.) chemist, physicist; formulated atomic theory, made first table of atomic weights.

Charles Darwin, 1809-82, (Br.) naturalist; established theory of organic evolution; *Origin of Species* (1859).

Lee De Forest, 1873-1961, (U.S.) inventor of triode; pioneer in wireless telegraphy, sound pictures, television.

Pierre-Gilles de Gennes, 1932-2007, (Fr.) physicist whose research furthered the development of liquid-crystal-display (LCD) technology; awarded Nobel Prize for Physics, 1991.

Max Delbruck, 1906-81, (Ger.-U.S.) founded molecular biology.

Rudolf Diesel, 1858-1913, (Ger.) mechanical engineer; patented Diesel engine (1892).

Theodosius Dobzhansky, 1900-75, (Russ.-U.S.) biologist; reconciled genetics and natural selection.

Christian Doppler, 1803-53, (Austria) physicist; showed change in wave frequency caused by motion of source, now known as Doppler effect.

J. Presper Eckert Jr., 1919-95, (U.S.) co-inventor, with Mauchly, of the ENIAC computer (1943-45).

Thomas A. Edison, 1847-1931, (U.S.) inventor; held more than 1,000 patents, including incandescent electric lamp.

Paul Ehrlich, 1854-1915, (Ger.) medical researcher in immunology and bacteriology; pioneered antitoxin production.

Albert Einstein, 1879-1955, (Ger.-U.S.) theoretical physicist; founded relativity theory.

John F. Enders, 1897-1985, (U.S.) virologist; helped discover vaccines against polio, measles, mumps and chicken pox.

Erik Erikson, 1902-94, (U.S.) psychoanalyst, author; theory of developmental stages of life; *Childhood and Society* (1950).

Leonhard Euler, 1707-83, (Switz.) mathematician, physicist; pioneer of calculus, revived ideas of Fermat.

Gabriel Fahrenheit, 1686-1736, (Ger.) physicist; improved thermometers and introduced Fahrenheit temperature scale.

Michael Faraday, 1791-1867, (Br.) chemist, physicist; discovered electrical induction and invented dynamo (1831).

Philo T. Farnsworth, 1906-71, (U.S.) inventor; built first television system (San Francisco, 1928).

Pierre de Fermat, 1601-65, (Fr.) mathematician; founded modern theory of numbers.

Enrico Fermi, 1901-54, (It.-U.S.) nuclear physicist; demonstrated first controlled chain reaction (Chicago, 1942).

Richard Feynman, 1918-88, (U.S.) theoretical physicist, author; founder of Quantum Electrodynamics (QED).

Alexander Fleming, 1881-1955, (Br.) bacteriologist; discovered penicillin (1928).

Jean B. J. Fourier, 1768-1830, (Fr.) introduced Fourier Series, method of analysis in math and physics.

Sigmund Freud, 1856-1939, (Austria) psychiatrist; founder of psychoanalysis; *Interpretation of Dreams* (1901).

Erich Fromm, 1900-80, (U.S.) psychoanalyst; *Man for Himself* (1947).

Galileo Galilei, 1564-1642, (It.) physicist; used telescope to vindicate Copernicus, founded modern science of motion.

Carl Friedrich Gauss, 1777-1855, (Ger.) math. physicist; completed work of Fermat and Euler in number theory.

Josiah W. Gibbs, 1839-1903, (U.S.) theoretical physicist, chemist; founded chemical thermodynamics.

Robert H. Goddard, 1882-1945, (U.S.) physicist; invented liquid fuel rocket (1926).

George W. Goethals, 1858-1928, (U.S.) chief engineer who completed Panama Canal (1907-14).

William C. Gorgas, 1854-1920, (U.S.) physician; pioneer in prevention of yellow fever and malaria.

Stephen Jay Gould, 1941-2002, (U.S.) paleontologist, evolutionary biologist, writer.

Ernest Haeckel, 1834-1919, (Ger.) zoologist, evolutionist; early Darwinist, introduced concept of "ecology."

Otto Hahn, 1879-1968, (Ger.) chemist; with Meitner discovered nuclear fission (1938).

Edmund Halley, 1656-1742, (Br.) astronomer; predicted return of 1682 comet ("Halley's Comet") in 1759.

William Harvey, 1578-1657, (Br.) physician, anatomist; discovered circulation of the blood (1628).

Werner Heisenberg, 1901-76, (Ger.) physicist; developed matrix mechanics and uncertainty principle (1927).

Hermann von Helmholtz, 1821-94, (Ger.) physicist, physiologist; formulated principle of conservation of energy.

William Herschel, 1738-1822, (Ger.-Br.) astronomer; discovered Uranus (1781).

Heinrich Hertz, 1857-94, (Ger.) physicist; discovered radio waves and photoelectric effect (1886-87).

David Hilbert, 1862-1943, (Ger.) mathematician; contributed to algebra, calculus, and foundational studies (formalism).

Albert Hofmann, 1906-2008, (U.S.) father of LSD.

Edwin P. Hubble, 1889-1953, (U.S.) astronomer; discovered observational evidence of expanding universe.

Alexander von Humboldt, 1769-1859, (Ger.) naturalist, author; explored S. America, created ecology.

Edward Jenner, 1749-1823, (Br.) physician; pioneered vaccination, introduced term "virus."

James Joule, 1818-89, (Br.) physicist; found relation between heat and mechanical energy (conservation of energy).

Carl Jung, 1875-1961, (Switz.) psychiatrist; founder of analytical psychology.

Ernest Everett Just, 1883-1941, (U.S.) marine biologist; studied egg development; *Biology of Cell Surfaces* (1941).

Johannes Kepler, 1571-1630, (Ger.) astronomer; discovered laws of planetary motion.

Al-Khawarizmi, early 9th cent., (Arab.) mathematician; regarded as founder of algebra.

Robert Koch, 1843-1910, (Ger.) bacteriologist; isolated bacterial causes of tuberculosis and other diseases.

Georges Köhler, 1946-95, (Ger.) immunologist; with Cesar Milstein, developed monoclonal antibody technique.

Willem Kolff, 1911-2009, (Neth.-U.S.) physician, biomedical engineer; developed first practical kidney dialysis machine; considered the "father of artificial organs."

Jacques Lacan, 1901-81, (Fr.) influential psychoanalyst.

Joseph Lagrange, 1736-1813, (Fr.) geometer, astronomer; showed that gravity of Earth and Moon cancel, creating stable points in space around them.

Jean B. Lamarck, 1744-1829, (Fr.) naturalist; forerunner of Darwin in evolutionary theory.

Pierre Simon de Laplace, 1749-1827, (Fr.) astronomer, physicist; proposed nebular origin for solar system.

Lewis H. Latimer, 1848-1928, (U.S.) African American scientist; associate of Edison; supervised installation of first electric street lighting in New York City.

Antoine Lavoisier, 1743-94, (Fr.) a founder of modern chemistry.

Ernest O. Lawrence, 1901-58, (U.S.) physicist; invented the cyclotron.

Louis, 1903-72, and **Mary Leakey**, 1913-96, (Br.) early hominid paleoanthropologists; discovered remains in Africa.

Anton van Leeuwenhoek, 1632-1723, (Neth.) founder of microscopy.

Jerome Lejeune, 1927-94, (Fr.) geneticist; discovered chromosomal cause of Down syndrome (1959).

Claude Levi-Strauss, 1908-2009, (Belg.-Fr.) cultural anthropologist, sociologist, philosopher.

Kurt Lewin, 1890-1947, (Ger.-U.S.) social psychologist; studied human motivation and group dynamics.

Justus von Liebig, 1803-73, (Ger.) founded quantitative organic chemistry.

Joseph Lister, 1827-1912, (Br.) physician; pioneered antiseptic surgery.

Hendrik Lorentz, 1853-1928, (Neth.) physicist; developed electron theory of matter, contrib. to relativity theory.

Konrad Lorenz, 1903-89, (Austria) ethologist; pioneer in study of animal behavior.

Percival Lowell, 1855-1916, (U.S.) astronomer; predicted the existence of Pluto.

Louis, 1864-1948, and **Auguste Lumière**, 1862-1954, (Fr.) invented cinematograph, made first motion picture (1895).

Theodore H. Maiman, 1927-2007, (U.S.) physicist; invented the first workable laser, which he displayed in 1960.

Guglielmo Marconi, 1874-1937, (It.) physicist; developed wireless telegraphy.

John W. Mauchly, 1907-80, (U.S.) co-inventor, with Eckert, of computer ENIAC (1943-45).

James Clerk Maxwell, 1831-79, (Br.) physicist; unified electricity and magnetism, electromagnetic theory of light.

Maria Goeppert Mayer, 1906-72, (Ger.-U.S.) physicist; developed shell model of atomic nuclei.

Barbara McClintock, 1902-92, (U.S.) geneticist; showed that some genetic elements are mobile.

Lise Meitner, 1878-1968, (Austria) co-discoverer, with Hahn, of nuclear fission (1938).

Gregor J. Mendel, 1822-84, (Austria) botanist, monk; his experiments became the foundation of modern genetics.

Dmitri Mendeleyev, 1834-1907, (Russ.) chemist; established Periodic Table of the Elements.

Bruce R. Merrifield, 1921-2006, (U.S.) chemist; discovered how to synthesize proteins quickly and efficiently.

Franz Mesmer, 1734-1815, (Ger.) physician; introduced hypnotherapy.

Albert A. Michelson, 1852-1931, (U.S.) physicist; invented interferometer.

Robert A. Millikan, 1868-1953, (U.S.) physicist; measured electronic charge.

Thomas Hunt Morgan, 1866-1945, (U.S.) geneticist, embryologist; established role of chromosomes in heredity.

Isaac Newton, 1642-1727, (Br.) natural philosopher; discovered laws of gravitation, motion; with Leibniz, founded calculus.

Robert N. Noyce, 1927-90, (U.S.) invented microchip.

J. Robert Oppenheimer, 1904-67, (U.S.) physicist; scientific director of Manhattan Project.

Wilhelm Ostwald, 1853-1932, (Ger.) chemist, philosopher; main founder of modern physical chemistry.

Louis Pasteur, 1822-95, (Fr.) chemist; showed that germs cause disease and fermentation; originated pasteurization.

Linus C. Pauling, 1901-94, (U.S.) chemist; studied chemical bonds; campaigned for nuclear disarmament.

Jean Piaget, 1896-1980, (Switz.) psychologist; four-stage theory of intellectual development in children.

Max Planck, 1858-1947, (Ger.) physicist; introduced quantum hypothesis (1900).

Jules Henri Poincaré, 1854-1912, (Fr.) mathematician; founded algebraic topology, many other discoveries.

Walter S. Reed, 1851-1902, (U.S.) Army physician; proved mosquitoes transmit yellow fever.

Theodor Reik, 1888-1969, (Austria-U.S.) psychoanalyst; major Freudian disciple.

Bernhard Riemann, 1826-66, (Ger.) mathematician; developed non-Euclidean geometry used by Einstein.

Norbert Rillieux, 1806-94, (U.S.) African American inventor of a vacuum pan evaporator (1846); revolutionized sugar-refining industry.

Wilhelm Roentgen, 1845-1923, (Ger.) physicist; discovered X-rays (1895).

Carl Rogers, 1902-87, (U.S.) psychotherapist, author; originated nondirective therapy.

Ernest Rutherford, 1871-1937, (Br.) physicist; pioneer investigator of radioactivity, identified the atomic nucleus.

Albert B. Sabin, 1906-93, (Russ.-U.S.) developed oral polio live-virus vaccine.

Carl Sagan, 1934-96, (U.S.) astronomer, author.

Jonas Salk, 1914-95, (U.S.) developed first successful polio vaccine, widely used in U.S. after 1955.

Giovanni Schiaparelli, 1835-1910, (It.) astronomer; reported canals on Mars.

Erwin Schrödinger, 1887-1961, (Austria) physicist; developed wave equation for quantum systems.

Glenn T. Seaborg, 1912-99, (U.S.) chemist; Nobel Prize winner (1951); codiscoverer of plutonium.

Harlow Shapley, 1885-1972, (U.S.) astronomer; mapped galactic clusters and position of Sun in our own galaxy.

Norman E. Shumway, 1923-2006, (U.S.) surgeon; performed world's first successful heart-lung transplant.

B. F. Skinner, 1904-90, (U.S.) psychologist; leading advocate of behaviorism.

Richard E. Smalley, 1943-2005, (U.S.) chemist; with three other scientists, discovered buckminsterfullerenes, a previously unknown class of carbon molecules.

Roger W. Sperry, 1913-94, (U.S.) neurobiologist; established different functions of right and left sides of brain.

Benjamin Spock, 1903-98, (U.S.) pediatrician, child care expert; *Common Sense Book of Baby and Child Care*.

Charles P. Steinmetz, 1865-1923, (Ger.-U.S.) electrical engineer; developed basic ideas on alternating current.

Ernst Stuhlinger, 1913-2008, (Ger.) rocket scientist; electric propulsion for NASA in early space age.

Leo Szilard, 1898-1964, (Hung.-U.S.) physicist; helped on Manhattan Project, later opposed nuclear weapons.

Edward Teller, 1908-2003, (Hung.-U.S.) physicist; aided on Manhattan Project, had key role in development of H-bomb.

Nikola Tesla, 1856-1943, (Serb.-U.S.) invented electrical devices including a.c. dynamos, transformers, and motors.

William Thomson (Lord Kelvin), 1824-1907, (Br.) physicist; aided in success of transatlantic telegraph cable (1865); proposed Kelvin absolute temperature scale.

Alan Turing, 1912-54, (Br.) mathematician; helped develop basis for computers.

James Van Allen, 1914-2006, (U.S.) physicist; discovered the presence of radiation belts around Earth (Van Allen belts).

Rudolf Virchow, 1821-1902, (Ger.) pathologist; pioneered the modern theory that diseases affect the body through cells.

Alessandro Volta, 1745-1827, (It.) physicist; electricity pioneer.

Werner von Braun, 1912-77, (Ger.-U.S.) developed rockets for warfare and space exploration.

John Von Neumann, 1903-57, (Hung.-U.S.) mathematician; originated game theory; basic design for modern computers.

Alfred Russell Wallace, 1823-1913, (Br.) naturalist; proposed concept of evolution independently of Darwin.

John B. Watson, 1878-1958, (U.S.) psychologist; a founder of behaviorism.

James E. Watt, 1736-1819, (Br.) mechanical engineer, inventor; invented modern steam engine (1765).

Alfred L. Wegener, 1880-1930, (Ger.) meteorologist, geophysicist; postulated continental drift.

Norbert Wiener, 1894-1964, (U.S.) mathematician; founder of cybernetics.

Daniel Hale Williams, 1858-1931, (U.S.) African American surgeon; performed one of first two open-heart operations (1893).

Sewall Wright, 1889-1988, (U.S.) evolutionary theorist; helped found population genetics.

Wilhelm Wundt, 1832-1920, (Ger.) founder of experimental psychology.

Qian Xuesen (Tsieng Hsue-shen), 1911-2009, (China) rocket scientist, father of China's space program.

Ferdinand von Zeppelin, 1838-1917, (Ger.) soldier, aeronaut, airship designer.

Social Reformers, Activists, and Humanitarians of the Past

Ralph David Abernathy, 1926-90, (U.S.) black civil rights activist; pres., 1968, Southern Christian Leadership Conf.

Jane Addams, 1860-1935, (U.S.) cofounder of Hull House; won Nobel Peace Prize, 1931.

Susan B. Anthony, 1820-1906, (U.S.) a leader in temperance, anti-slavery, and woman suffrage movements.

Thomas Barnardo, 1845-1905, (Br.) social reformer; pioneer in care of destitute children.

Clara Barton, 1821-1912, (U.S.) organized American Red Cross.

Daisy Bates, 1914-99, (U.S.) black civil rights leader who fought for school integration; leading advocate for the "Little Rock 9" during Arkansas desegregation crisis in 1957.

Henry Ward Beecher, 1813-87, (U.S.) clergyman, abolitionist.

Peter Benenson, 1921-2005, (Br.) activist; founded Amnesty International, 1961.

Mary McLeod Bethune, 1875-1955, (U.S.) black educator, civil rights activist; adviser to FDR and Truman; founder, pres., Bethune-Cookman College.

Amelia Bloomer, 1818-94, (U.S.) suffragette, social reformer.

William Booth, 1829-1912, (Br.) founded Salvation Army.

John Brown, 1800-59, (U.S.) abolitionist who led murder of 5 pro-slavery men; hanged.

Frances Xavier (Mother) Cabrini, 1850-1917, (It.-U.S.) Italian-born nun; founded charitable institutions; first American canonized as a saint, 1946.

Stokely Carmichael (Kwame Toure), 1941-98, (U.S.) black power activist; major proponent of Pan-Africanism; prime min. Black Panthers.

Carrie Chapman Catt, 1859-1947, (U.S.) suffragette.

Cesar Chavez, 1927-93, (U.S.) labor leader; helped establish United Farm Workers of America.

Eldridge Cleaver, 1935-98, (U.S.) revolutionary social critic; former minister of information for Black Panthers; *Soul on Ice*.

Clarence Darrow, 1857-1938, (U.S.) lawyer; defender of underdog, opponent of capital punishment.

Ossie Davis, 1917-2005, (U.S.) black civil rights activist, actor, director.

Dorothy Day, 1897-1980, (U.S.) founder of Catholic Worker movement.

Émile Zola, 1840-1902, (Fr.) novelist. *Nana*, *Thérèse Raquin*.

Poets Laureate

There is no record of the origin of the office of Poet Laureate of England. Henry III (1216-72) reportedly had a Versificator Regis, or King's Poet, paid 100 shillings per year. Other poets said to have filled the role include Geoffrey Chaucer (d 1400), Edmund Spenser (d 1599), Ben Jonson (d 1637), and Sir William d'Avenant (d 1668). The first official English poet laureate was John Dryden, appointed 1668, for life (as was customary). Then came Thomas Shadwell, in 1689; Nahum Tate, 1692; Nicholas Rowe, 1715; Rev. Laurence Eusden, 1718; Colley Cibber, 1730; William Whitehead, 1757; Rev. Thomas Warton, 1785; Henry James Pye, 1790; Robert Southey, 1813; William Wordsworth, 1843; Alfred, Lord Tennyson, 1850; Alfred Austin, 1896; Robert Bridges, 1913; John Masefield, 1930; C. Day Lewis, 1968; Sir John Betjeman, 1972; Ted Hughes, 1984; Andrew Motion, 1999; Carol Ann Duffy, 2009.

In the U.S., appointment is by the Librarian of Congress and is not for life: Robert Penn Warren, appointed 1986; Richard Wilbur, 1987; Howard Nemerov, 1988; Mark Strand, 1990; Joseph Brodsky, 1991; Mona Van Duyn, 1992; Rita Dove, 1993; Robert Hass, 1995; Robert Pinsky, 1997; Stanley Kunitz, 2000; Billy Collins, 2001; Louise Glück, 2003; Ted Kooser, 2004; Donald Hall, 2006; Charles Simic, 2007; Kay Ryan, 2008; W. S. Merwin, 2010.

Composers of Classical and Avant Garde Music

John Adams, b 1947, (U.S.) *Nixon in China*, *The Death of Klinghoffer*.

*Includes collector's, limited, legendary, and bundle (guitar) editions.

Film and TV Content Ratings

The Motion Picture Association of America (MPAA) began rating movies in 1968. The system was heavily revised in 1984 and again in 1990. The MPAA, National Cable Television Association, and National Association of Broadcasters developed and revised the TV ratings system in 1997, in accordance with the Telecommunications Act of 1996; it was implemented in Oct. 1997.

Film Ratings

G: General Audience. All ages admitted. Does not contain themes, language, nudity, sex, or violence that the MPAA ratings board believes would offend parents whose younger children see the film. Does not necessarily denote a “certificate of approval” nor “children’s” movie. No nudity, sex scenes, or drug use depicted.

PG: Parental Guidance Suggested. Some material may not be suited for children. The MPAA ratings board recommends that parents determine whether the content of the film is appropriate for their children. The film may contain more mature themes, some profanity, violence, or brief nudity. No drug use depicted.

PG-13: Parents Strongly Cautioned. Some material may be inappropriate for children under 13. The MPAA urges more strongly that parents vet the movie to see if its content is appropriate for their children. Any movie depicting drug use or more than brief nudity is automatically rated at least PG-13. Violence is permitted, though it is generally not both realistic or extreme and persistent violence. The single use of one sexually-derived expletive rates a PG-13; more than one use requires at least an R rating.

R: Restricted. Under 17 requires accompanying parent or adult guardian. Movies given R ratings contain some adult material, defined as adult themes or activity, hard language, intense or persistent violence, sexually-oriented nudity, or drug abuse.

NC-17: No One 17 and Under Admitted. The ratings board considers NC-17 films those that most parents would consider too adult for children under 17. An NC-17 rating does not mean the film is obscene or pornographic. The rating can be based on violence, sex, aberrational behavior, drug abuse, or any other element that most parents would consider too adult for children.

TV Ratings

Y: All Children. Program designed to be acceptable for children of all ages. Its themes and elements are designed for a very young audience.

Y7: Directed to Older Children. Program designed for children ages 7 and older, and more appropriate for those who have the skills to distinguish between make-believe and reality. May include mild fantasy/comedic violence. Programs with more than mild fantasy violence are denoted with FV.

G: General Audience. Program not necessarily designed for children, but most parents would find it suitable for all ages. Little or no violence, no strong language, and little or no sexual dialogue or situations.

PG: Parental Guidance Suggested. Program might contain material that parents would consider inappropriate for children, such as an adult theme or one or more of the following: suggestive dialogue (D), infrequent coarse language (L), some sexual situations (S), or moderate violence (V).

TV-14: Parents Strongly Cautioned. Program contains material that many parents would consider inappropriate for children under 14, such as one or more of the following: intensely suggestive dialogue (D), strong coarse language (L), intense sexual situations (S), or intense violence.

TV-MA: Mature Audience Only. Program specifically designed for adults and may be unsuitable for children under 17. Contains one or more of the following: crude indecent language (L), explicit sexual activity (S), or graphic violence (V).

Notable U.S. Museums

This unofficial list of some of the largest (by budget) museums in the U.S. was compiled with the assistance of the American Association of Museums, a national association representing the concerns of the museum community. Association members also include zoos, aquariums, arboretums, botanical gardens, and planetariums, but these are not included in *The World Almanac* listing.

Most Challenged Books, 2009

Source: Office for Intellectual Freedom, American Library Association (ALA)

A challenge is a formal, written complaint filed with a library or school requesting that materials be removed because of content or appropriateness. From 2001-09, 4,312 challenges were reported to the ALA: 1,413 challenges due to “sexually explicit” material; 1,125 for “offensive language”; 897 for material deemed “unsuited to age group”; 514 for “violence”; 344 challenges for “homosexuality”; 269 for “religious viewpoints”; and 109 for being “anti-family.” Approximately 34% of challenges were to material in classrooms; 33% in school libraries; 23% in public libraries. ALA estimates that for every challenge it received, 4-5 were not reported.

Rank	Title, author	Common reasons given for challenge
1.	<i>TTYL; TTFN; and L8R, G8R</i> ; by Lauren Myracle	Nudity, sexually explicit, offensive language, unsuited to age group, drugs
2.	<i>And Tango Makes Three</i> , by Peter Parnell and Justin Richardson	Homosexuality
3.	<i>The Perks of Being a Wallflower</i> , by Stephen Chbosky	Homosexuality, sexually explicit, anti-family, offensive language, religious viewpoint, unsuited to age group, drugs, suicide
4.	<i>To Kill a Mockingbird</i> , by Harper Lee	Racism, offensive language, unsuited to age group
5.	<i>Twilight</i> (series), by Stephenie Meyer	Sexually explicit, religious viewpoint, unsuited to age group
6.	<i>Catcher in the Rye</i> , by J. D. Salinger	Sexually explicit, offensive language, unsuited to age group
7.	<i>My Sister's Keeper</i> , by Jodi Picoult	Sexism, homosexuality, sexually explicit, offensive language, religious viewpoint, unsuited to age group, drugs, suicide, violence
8.	<i>The Earth, My Butt, and Other Big, Round Things</i> , by Carolyn Mackler	Sexually explicit, offensive language, unsuited to age group
9.	<i>The Color Purple</i> , Alice Walker	Sexually explicit, offensive language, unsuited to age group
10.	<i>The Chocolate War</i> , by Robert Cormier	Nudity, sexually explicit, offensive language, unsuited to age group

Multi-Platinum and Platinum Awards for Recorded Music and Music Videos, 2009-10

Source: Recording Industry Assn. of America

To achieve platinum status, an **album** must reach minimum total sales of 1 mil units in LPs, CDs, and digital with a manufacturer’s dollar volume of at least \$2 mil based on one-third of the suggested retail list price for each record, CD, or digital copy sold. To achieve multi-platinum status, an album must reach minimum total sales of at least 2 mil units in LPs, CDs, and digital with a manufacturer’s dollar volume of at least \$4 mil based on one-third of the list price.

Singles must sell 1 mil units to achieve a platinum award and 2 mil to achieve a multi-platinum award. **Digital singles** are certified at the same levels; the digital sales award was first created in 2004. In 1999, the Diamond Award, honoring sales of 10 mil or more copies of an album or single, was introduced. EP singles count as 2 units. Double-CD sets count as 2 units. **Music videos** (long form) must sell 100,000 units to qualify for a platinum award, more than 200,000 units for a multi-platinum award. As of July 2006, master **ringtones**—the original recording and not synthesized versions of songs—could be awarded gold (500,000 downloads), platinum (1 mil), and multi-platinum (2 mil+) status.

Awards listed here are for albums and digital singles (released Sept. 2008-Aug. 2010) and for music videos (released at any time) that were certified Sept. 2009-Aug. 2010. Number in parentheses = number of millions sold. V = Various artists. Alphabetized by artist name.

Albums, Multi-Platinum

Beatles in Stereo boxed set,
The Beatles (3)
The E.N.D., The Black Eyed Peas (2)
My Christmas, Andrea Bocelli (2)
I Dreamed a Dream, Susan Boyle (4)

Favorite Prime-Time Television Programs, 2009-10

Source: Nielsen Media Research

Data are for regularly scheduled network programs in 2009-10; ranked by average audience percentage. Ratings, or average audience percentages, are estimates of the percentage of all TV-owning households that are watching a particular program. Audience share percentages are estimates of the percentage of those watching TV that are tuned into a particular program.

All-Time Highest-Rated Television Programs

Source: Nielsen Media Research, Jan. 1961-Aug. 2010

Estimates exclude unsponsored or joint network telecasts (e.g., presidential addresses) and programs under 30 minutes long. Ranked by rating (percentage of TV-owning households tuned in to the program). Average audience is number of TV-owning households tuned in.

Rank	Program	Telecast date	Network	Rating (%)	Avg. audience (thous.)
1.	M*A*S*H (last episode)	2/28/83	CBS	60.2%	50,150
2.	Dallas (Who Shot J.R.?)	11/21/80	CBS	53.3	41,470
3.	Roots-Pt. 8	1/30/77	ABC	51.1	36,380
4.	Super Bowl XVI	1/24/82	CBS	49.1	40,020
5.	Super Bowl XVII	1/30/83	NBC	48.6	40,480
6.	XVII Winter Olympics (Women's figure skating)	2/23/94	CBS	48.5	45,690
7.	Super Bowl XX	1/26/86	NBC	48.3	41,490
8.	Gone With the Wind-Pt. 1	11/7/76	NBC	47.7	33,960
9.	Gone With the Wind-Pt. 2	11/8/76	NBC	47.4	33,750
10.	Super Bowl XII	1/15/78	CBS	47.2	34,410
11.	Super Bowl XIII	1/21/79	NBC	47.1	35,090
12.	Bob Hope Christmas Show	1/15/70	NBC	46.6	27,260
13.	Super Bowl XIX	1/20/85	ABC	46.4	39,390

25.	Super Bowl XLIV	2/7/10	CBS	45.2	51,873

AWARDS — MEDALS — PRIZES

Alfred B. Nobel Prizes, 1901-2010

Alfred B. Nobel (1833-96) bequeathed \$9 mil, the interest on which was to be distributed yearly to those judged to have most benefited humankind in chemistry, literature, promotion of peace, physics, and physiology or medicine. Prizes were first awarded in 1901. The 1st prize in economics was awarded in 1969, funded by Sweden's central bank. Each prize is now worth 10 mil Swedish krona (about \$1.5 mil). If year is omitted, no award was given. The Royal Swedish Academy selects prize winners for chemistry, economics, and physics; the Nobel Assembly at Karolinska Institutet, physiology or medicine; the Swedish Academy, literature; and the Norwegian Nobel Committee, the peace prize. The 2010 Nobel Prizes were announced Oct. 4-11.

Nobel Prizes, 2010

Chemistry: Richard F. Heck, U.S., and Ei-ichi Negishi, Jpn.-U.S., and Akira Suzuki, Jpn., shared the prize for their independent work developing techniques for organic synthesis using the metal palladium as a catalyst. Their work had practical applications in the manufacture of pharmaceuticals, fungicides, sunscreens, and light-emitting diodes (LEDs).

Economics: Peter A. Diamond and Dale T. Mortensen, U.S., and Christopher A. Pissarides, Cyprus-UK, shared the prize "for their analysis of markets with search frictions." Their work in particular examined the labor market and how employment is affected by regulation and economic policy.

Literature: Peruvian Mario Vargas Llosa was awarded the prize "for his cartography of structures of power and his trenchant images of the individual's resistance, revolt, and defeat." Vargas Llosa, whose novels illuminate politics and culture, was the first South American writer to win the prize since 1982.

Peace: Chinese dissident Liu Xiaobo was recognized for his long, non-violent campaign for human rights. Liu, a literary critic and democracy advocate currently serving an 11-year sentence on subversion charges, is one of three to have been awarded the prize while incarcerated by his own government.

Physics: Andre Geim, Russia-Neth., and Konstantin Novoselov, Russia-UK, shared the prize for their experiments with graphene, an ultra-strong, ultra-thin form of carbon. Graphene conducts heat better than any other known material; it also conducts electricity better than most known materials.

Physiology or Medicine: British physiologist Robert G. Edwards was awarded the prize for work developing in vitro fertilization (IVF), a procedure for treating infertility. Edwards worked with Patrick Steptoe, a physician who died in 1988, to develop the technique, which has been instrumental in an estimated 4 mil live births since 1978.

Pulitzer Prizes in Journalism, Letters, and Music, 1917-2010

Endowed by Joseph Pulitzer (1847-1911), publisher of the *New York World*, in a bequest to Columbia Univ. and awarded annually, in years shown, for work published the previous year. Prizes are now \$10,000 in each category, except Public Service (in Journalism), for which a medal is given. The prize board began considering submissions from online-only publications in 2009. For letters and music, prizes in past years are listed; if a year is omitted, no award was given that year.

Pulitzer Prizes in Journalism, 2010

Public Service: *Bristol Herald Courier* (VA), for Daniel Gilbert's exposé of natural-gas royalties mismanagement that spurred action by state lawmakers.

Breaking News Reporting: *Seattle Times* staff, for coverage of the shooting deaths of 4 police officers and ensuing 40-hour manhunt.

Investigative Reporting: Barbara Laker and Wendy Ruderman, *Philadelphia Daily News*, for exposing a rogue police narcotics squad; and Sheri Fink, *ProPublica* (with *NY Times Magazine*), for chronicling decisions made by exhausted doctors in Hurricane Katrina's aftermath.

Explanatory Reporting: Michael Moss and *NY Times* staff, for stories on contaminated meat and food safety issues.

Local Reporting: Raquel Rutledge, *Milwaukee Journal Sentinel*, for reports on fraud and abuse in a taxpayer-subsidized child care system.

National Reporting: Matt Richtel and *NY Times* staff, for work exposing the dangers of operating cell phones and other devices while driving.

International Reporting: Anthony Shadid, *Washington Post*, for reports on Iraq's future and the U.S. departure.

Feature Writing: Gene Weingarten, *Washington Post*, for haunting story about parents who accidentally kill their children by forgetting them in cars.

Commentary: Kathleen Parker, *Washington Post*, for perceptive, witty columns on political and moral issues.

Criticism: Sarah Kaufman, *Washington Post*, for imaginative dance criticism.

Editorial Writing: Tod Robberson, Colleen McCain Nelson, and William McKenzie, *Dallas Morning News*, for editorials deploring the social and economic disparity in their city.

Editorial Cartooning: Mark Fiore (self-syndicated), for animated cartoons appearing on SFGate.com, the *San Francisco Chronicle* web site.

Breaking News Photography: Mary Chind, *Des Moines Register*, for photograph of a person in a makeshift harness trying to save a woman trapped in water beneath a dam.

Feature Photography: Craig F. Walker, *Denver Post*, for portraits of a teenager transitioning from high-school student to soldier.

Pulitzer Prizes in Letters, 1917-2010

Man Booker Prize for Fiction, 1969-2009

The Booker Prize for fiction, established in 1968, is awarded annually in October for what is judged the best full-length novel written in English by a citizen of the UK, the Commonwealth, or the Irish Republic. In 2002 sponsorship of the award was taken over by Man Group PLC, the name was changed to the Man Booker Prize, and the amount was increased from £20,000 to £50,000.

Year	Author, book	Year	Author, book
1969	P. H. Newby, <i>Something to Answer For</i>	1990	A. S. Byatt, <i>Possession</i>

National Book Awards, 1950-2009

The National Book Awards (known as American Book Awards 1980-86) are administered by the National Book Foundation and have been given annually in the years shown, since 1950. The prizes, each valued at \$10,000, are awarded to U.S. citizens for works published in the U.S. In some years, multiple awards were given for nonfiction in various categories; in such cases, the history and biography (if any) or biography winner is listed. Selected additional awards in nonfiction are listed in footnotes.

Other National Book Awards, 2009: Poetry: Keith Waldrop, *Transcendental Studies: A Trilogy*. Young People's Literature: Phillip Hoose, *Claudette Colvin: Twice Toward Justice*. Distinguished Contribution to American Letters: Gore Vidal. Literarian Award for Outstanding Service to the American Literary Community: Dave Eggers.

Grand jury prize: *Winter's Bone*, Debra Granik (drama); *Restrepo*, Sebastien Junger & Tim Hetherington (doc.)
World cinema grand jury prize: *Animal Kingdom*, David Michôd, Australia (drama); *Det röde kapel [The Red Chapel]*, Mads Brügger, Denmark (doc.)
Audience award: *happythankyoumoreplease*, Josh Radnor (drama); *Waiting for Superman*, Davis Guggenheim (doc.)
World cinema audience award: *Contracorriente*, Javier Fuentes-León, Peru/Colombia/Fr./Ger. (drama); *Waste Land*, Lucy Walker, Brazil/UK (doc.)
Directing: Eric Mendelsohn, *3 Backyards*; Leon Gast, *Smash His Camera* (doc.)
World cinema directing award: Juan Carlos Valdivia, *Zona sur [Southern District]*, Bolivia (drama); Christian Frei, *Space Tourists*, Switzerland (doc.)
Waldo Salt screenwriting award: Debra Granik & Anne Rosellini, *Winter's Bone*
World Cinema screenwriting award: Juan Carlos Valdivia, *Zona sur [Southern District]*
Documentary editing: Penelope Falk, *Joan Rivers: A Piece of Work*
World cinema doc. editing: Joëlle Alexis, *A Film Unfinished*, Germany/Israel
Cinematography: Zak Mulligan, *Obselidia* (drama); Kirsten Johnson, Laura Poitras, *The Oath* (doc.)
World cinema cinematography: Mariano Cohn & Gastón Duprat, *El hombre de al lado [The Man Next Door]*, Argentina (drama); Kate McCullough & Michael Lavelle, *His & Hers*, Ireland (doc.)
Special jury prize: Mark Ruffalo, *Sympathy for Delicious (drama)*; Josh Fox, *Gasland* (doc.)
World cinema special jury prize: Tatiana Maslany, *Grown Up Movie Star*, Canada (breakout performance); Rob Lemkin & Thet Sambath, *Enemies of the People*, UK/Cambodia
Alfred P. Sloan feature film prize: Diane Bell, *Obselidia*
Short filmmaking jury prize: *Drunk History*
International short filmmaking jury prize: *The Six Dollar Fifty Man*, New Zealand

Toronto International Film Festival

Prize of the international critics (FIPRESCI Prize) for discovery: *Beautiful Boy*, Shawn Ku
FIPRESCI prize for special presentations: *L'Amour Fou*, Pierre Thoretton
Cadillac people's choice award: *The King's Speech*, Tom Hooper
Cadillac people's choice award (documentary): *Force of Nature: The David Suzuki Movie*, Sturla Gunnarsson
Cadillac people's choice award (midnight madness): *Stake Land*, Jim Mickle
Best Canadian short film: *Les Fleurs de l'âge*, Vincent Biron
Best Canadian first feature film: *The High Cost of Living*, Deborah Chow

Rock video: "Kings and Queens," 30 Seconds to Mars
Pop video: "Bad Romance," Lady Gaga
Art direction: "Dog Days Are Over," Florence + the Machine
Choreography: "Bad Romance," Lady Gaga
Cinematography: "Empire State of Mind," Jay-Z & Alicia Keys
Direction: "Bad Romance," Lady Gaga
Editing: "Bad Romance," Lady Gaga
Special effects: "Uprising," Muse

Vocal group: Lady Antebellum
New artist: Luke Bryan
New solo vocalist: Luke Bryan
New vocal duo: Joey + Rory
New duo/group: Gloriana
Video of the year: "White Liar," Miranda Lambert
Triple crown award: Carrie Underwood
Crystal milestone award: Taylor Swift, Jennifer Nettles
Humanitarian award: Montgomery Gentry

Grammy Awards

Source: National Academy of Recording Arts & Sciences
2009 Grammy Awards are for albums released Oct. 1, 2008-Sept. 30, 2009, and were presented in Feb. 2010.

Selected Grammy Awards for 2009

Record of the year (single): "Use Somebody," Kings Of Leon
Album of the year: *Fearless*, Taylor Swift
Song of the year: "Single Ladies (Put A Ring On It)," Beyoncé
New artist: Zac Brown Band
Pop vocal perf., female: "Halo," Beyoncé
Pop vocal perf., male: "Make It Mine," Jason Mraz
Pop vocal perf., duo/group: "I Gotta Feeling," The Black Eyed Peas
Pop vocal perf., collaboration: "Lucky," Jason Mraz & Colbie Caillat
Pop vocal album: *The E.N.D.*, The Black Eyed Peas
Dance recording: "Poker Face," Lady Gaga
Dance/electronic album: *The Fame*, Lady Gaga
Rock vocal perf., solo: "Working On A Dream," Bruce Springsteen
Rock vocal perf., duo/group: "Use Somebody," Kings Of Leon
Hard rock perf.: "War Machine," AC/DC
Rock song: "Use Somebody," Kings Of Leon
Rock album: *21st Century Breakdown*, Green Day
Alternative album: *Wolfgang Amadeus Phoenix*, Phoenix
R&B vocal perf., female: "Single Ladies (Put A Ring On It)," Beyoncé
R&B vocal perf., male: "Pretty Wings," Maxwell
R&B vocal perf., duo/group: "Blame It," Jamie Foxx & T-Pain

R&B song: "Single Ladies (Put A Ring On It)," Beyoncé (w/m by Harrell, Knowles, Nash, Stewart)
R&B album: *Blacksummers' Night*, Maxwell
R&B album, contemporary: *I Am... Sasha Fierce*, Beyoncé
Rap perf., solo: "D.O.A. (Death Of Auto-Tune)," Jay-Z
Rap perf., duo/group: "Crack A Bottle," Eminem, Dr. Dre, & 50 Cent
Rap song: "Run This Town," Jay-Z, Rihanna, & Kanye West
Rap album: *Relapse*, Eminem
Country vocal perf., female: "White Horse," Taylor Swift
Country vocal perf., male: "Sweet Thing," Keith Urban
Country vocal perf., duo/group: "I Run To You," Lady Antebellum
Country song: "White Horse," Taylor Swift
Country album: *Fearless*, Taylor Swift
Comedy album: *A Colbert Christmas: The Greatest Gift Of All!*, Stephen Colbert
Soundtrack album, compilation: *Slumdog Millionaire*, various artists
Soundtrack album, score: *Up*, Michael Giacchino
Song, motion picture/TV: "Jai Ho," w/m by Gulzar, A.R. Rahman, & Tanvi Shah, *Slumdog Millionaire*
Music video, short form: "Boom Boom Pow," The Black Eyed Peas
Music video, long form: *The Beatles Love—All Together Now*, various artists

Grammy Awards for 1958-2009

Record of the Year (single)	Year	Album of the Year
Domenico Modugno, "Nel Blu Dipinto Di Blu (Volare)"	1958	Henry Mancini, <i>The Music From Peter Gunn</i>
Bobby Darin, "Mack the Knife"	1959	Frank Sinatra, <i>Come Dance With Me</i>
Percy Faith, "Theme From a Summer Place"	1960	Bob Newhart, <i>Button Down Mind</i>
Henry Mancini, "Moon River"	1961	Judy Garland, <i>Judy at Carnegie Hall</i>
Tony Bennett, "I Left My Heart in San Francisco"	1962	Vaughn Meader, <i>The First Family</i>
Henry Mancini, "The Days of Wine and Roses"	1963	Barbra Streisand, <i>The Barbra Streisand Album</i>
Stan Getz, Astrud Gilberto, "The Girl From Ipanema"	1964	Stan Getz, João Gilberto, <i>Getz/Gilberto</i>
Herb Alpert, "A Taste of Honey"	1965	Frank Sinatra, <i>September of My Years</i>
Frank Sinatra, "Strangers in the Night"	1966	Frank Sinatra, <i>A Man and His Music</i>
5th Dimension, "Up, Up and Away"	1967	The Beatles, <i>Sgt. Pepper's Lonely Hearts Club Band</i>
Simon and Garfunkel, "Mrs. Robinson"	1968	Glen Campbell, <i>By the Time I Get to Phoenix</i>
5th Dimension, "Aquarius/Let the Sunshine In"	1969	Blood, Sweat & Tears, <i>Blood, Sweat & Tears</i>
Simon and Garfunkel, "Bridge Over Troubled Water"	1970	Simon and Garfunkel, <i>Bridge Over Troubled Water</i>
Carole King, "It's Too Late"	1971	Carole King, <i>Tapestry</i>
Roberta Flack, "The First Time Ever I Saw Your Face"	1972	George Harrison and friends, <i>The Concert for Bangla Desh</i>
Roberta Flack, "Killing Me Softly With His Song"	1973	Stevie Wonder, <i>Innervisions</i>
Olivia Newton-John, "I Honestly Love You"	1974	Stevie Wonder, <i>Fulfillingness' First Finale</i>
Captain & Tennille, "Love Will Keep Us Together"	1975	Paul Simon, <i>Still Crazy After All These Years</i>
George Benson, "This Masquerade"	1976	Stevie Wonder, <i>Songs in the Key of Life</i>
Eagles, "Hotel California"	1977	Fleetwood Mac, <i>Rumours</i>
Billy Joel, "Just the Way You Are"	1978	Bee Gees, <i>Saturday Night Fever</i>
The Doobie Brothers, "What a Fool Believes"	1979	Billy Joel, <i>52nd Street</i>
Christopher Cross, "Sailing"	1980	Christopher Cross, <i>Christopher Cross</i>
Kim Carnes, "Bette Davis Eyes"	1981	John Lennon, Yoko Ono, <i>Double Fantasy</i>
Toto, "Rosanna"	1982	Toto, <i>Toto IV</i>
Michael Jackson, "Beat It"	1983	Michael Jackson, <i>Thriller</i>
Tina Turner, "What's Love Got to Do With It"	1984	Lionel Richie, <i>Can't Slow Down</i>
USA for Africa, "We Are the World"	1985	Phil Collins, <i>No Jacket Required</i>
Steve Winwood, "Higher Love"	1986	Paul Simon, <i>Graceland</i>
Paul Simon, "Graceland"	1987	U2, <i>The Joshua Tree</i>
Bobby McFerrin, "Don't Worry, Be Happy"	1988	George Michael, <i>Faith</i>
Bette Midler, "Wind Beneath My Wings"	1989	Bonnie Raitt, <i>Nick of Time</i>
Phil Collins, "Another Day in Paradise"	1990	Quincy Jones, <i>Back on the Block</i>
Natalie Cole, with Nat "King" Cole, "Unforgettable"	1991	Natalie Cole, with Nat "King" Cole, <i>Unforgettable</i>
Eric Clapton, "Tears in Heaven"	1992	Eric Clapton, <i>Unplugged</i>
Whitney Houston, "I Will Always Love You"	1993	Whitney Houston, <i>The Bodyguard</i>
Sheryl Crow, "All I Wanna Do"	1994	Tony Bennett, <i>MTV Unplugged</i>
Seal, "Kiss From a Rose"	1995	Alanis Morissette, <i>Jagged Little Pill</i>
Eric Clapton, "Change the World"	1996	Celine Dion, <i>Falling Into You</i>
Shawn Colvin, "Sunny Came Home"	1997	Bob Dylan, <i>Time Out of Mind</i>
Celine Dion, "My Heart Will Go On"	1998	Lauryn Hill, <i>The Miseducation of Lauryn Hill</i>
Santana featuring Rob Thomas, "Smooth"	1999	Santana, <i>Supernatural</i>
U2, "Beautiful Day"	2000	Steely Dan, <i>Two Against Nature</i>
U2, "Walk On"	2001	Various Artists, <i>O Brother, Where Art Thou?</i>
Norah Jones, "Don't Know Why"	2002	Norah Jones, <i>Come Away With Me</i>
Coldplay, "Clocks"	2003	OutKast, <i>Speakerboxxx/The Love Below</i>
Ray Charles & Norah Jones, "Here We Go Again"	2004	Ray Charles & Various Artists, <i>Genius Loves Company</i>
Green Day, "Boulevard of Broken Dreams"	2005	U2, <i>How to Dismantle an Atomic Bomb</i>
Dixie Chicks, "Not Ready to Make Nice"	2006	Dixie Chicks, <i>Taking the Long Way</i>
Amy Winehouse, "Rehab"	2007	Herbie Hancock, <i>River: The Joni Letters</i>
Robert Plant & Alison Krauss, "Please Read the Letter"	2008	Robert Plant & Alison Krauss, <i>Raising Sand</i>
Kings Of Leon, "Use Somebody"	2009	Taylor Swift, <i>Fearless</i>

SCIENCE AND TECHNOLOGY

Science and Technology News 2010

The following were some of the more newsworthy developments in science and technology in the past year. (See also Astronomy, Computers and Telecommunications, and the Chronology of the Year's Events.)

A New Member of the Human Family

The skeleton of an early human-like primate is leading scientists to revise conventional wisdom about human evolution. A study published in *Science* on Oct. 2, 2009, investigated the skeleton of Ardi, an *Ardipithecus ramidus* who lived 4.4 million years ago (MYA) in what were then verdant African forests. She is the earliest skeleton yet studied in detail on the human branch of the primate tree, which split off from other apes about 6 MYA.

Before discovering Ardi, scientists had conjectured that our early ancestors looked and acted a bit like modern chimpanzees. But Ardi's skeleton suggests that, in many ways, she was close to humans. She could probably walk upright on four human-like little toes and a chimp-like thumb toe. And with her free hands, she could catch prey, root out food, and even use tools. But, like chimps, Ardi had long, flexible fingers designed for climbing trees—even though once she got into them, she would have moved around on the palms of her hands. This was a surprise to evolutionary biologists, for a common theory prior to her discovery was that humans evolved to walk upright upon leaving the forests for open savannas. Yet Ardi's skeleton would indicate that humans' ancestors began to walk even while still spending time in trees.

Dr. Frankenstein, I Presume?

Scientists have created a DNA strand that is able to govern the life and reproduction of a single-celled organism, according to an article published in the May 21, 2010, issue of *Science*—an achievement being billed as the first example of synthetic life. A cell's genome—the arrangement of its DNA—governs many of its life processes. For this project, J. Craig Venter's team used a computer to create a genome based on that of *Mycoplasma mycoides*, a single-celled bacteria. To *Mycoplasma*'s genome, they added their own watermark by weaving in names, e-mail addresses, and even a literary quotation. Researchers used a machine that constructs DNA strands to make this computer-generated genome physical, and they injected it into the cell body of a different kind of bacterium. True to the teams' predictions, this new bacterial cell acted and replicated like *Mycoplasma mycoides*, marking the first time that scientists had built a working DNA sequence.

Besides showcasing the powers of cutting-edge biotechnology, this project may have practical implications for health and environmental technology, researchers say. In the future, it may be possible to design and build genomes that grow vaccines more economically or create new fuel sources.

Meet the Parents

Somewhere in a cave in the Middle East, between 80 and 45 thousand years ago (KYA), a human and a Neanderthal got together and had a baby. At least, that's what a comparison of Neanderthal and human genomes suggests.

Neanderthals and humans split from a common ancestor about 400 KYA. Neanderthals evolved outside of Africa, while humans remained in Africa, leaving later and eventually supplanting Neanderthals. Researchers have long debated whether they interbred, and even if they could interbreed. A new study, published in the May 7, 2010, issue of *Science*, offers genetic evidence that they did. Researchers led by Svante Pääbo compared areas of human and Neanderthal genomes that have changed relatively recently. In particular, they investigated whether any of the genetic mutations that exist in non-African humans but not in Africans might also be found in Neanderthals—if they were, it would indicate that the two hominids swapped genes after humans left Africa. And indeed, results showed they had. Researchers identified 12 parts of the genome that differed between non-Africans and Africans; Neanderthal and human genomes matched in 10 of these 12 regions.

A Marginalized Organ Gets Its Day

You've probably learned that the appendix is a vestigial organ, one that served a purpose in our evolutionary past but is now useless—and given that around 250,000 Americans get

their appendix taken out every year without any obvious consequences, this would seem right.

But over the years, researchers have found indications that the appendix does *something*. It contains lymphatic tissue, suggesting a relation to the immune system, and it contains bacteria that aid digestion. Now, in a study published in the Oct. 2009 *Journal of Evolutionary Biology*, evolutionary biologists report learning that the appendix evolved at least twice in mammals—a good sign that it's there for a reason. Many mammals have appendices, the researchers learned, including lemurs, rabbits, and possums. The organ probably first emerged about 90 million years ago in ancestors of primates and rodents, and then evolved a second time in the ancestors of marsupials. The researchers also found that bullfrogs, although they don't have an appendix, have a place in the intestine that stores bacteria as well.

Why would it be useful for the digestive system to store bacteria? Diarrhea can be common in unclean environments (such as most of nature), and it leads the body to expunge all the intestine's bacteria, good and bad. The appendix may offer a reservoir of bacteria to replenish the intestine. Ironically, our own hypersanitized society may undercut the appendix's function—the bacteria stored there, having no place to go, can turn infectious and result in higher rates of appendicitis.

Dinosaurs of a Feather, in Living Color

What did dinosaurs look like? Two papers released in 2010 offer color portraits of a few feathered dinosaurs. In the popular imagination, dinosaurs don't have feathers. But looked at evolutionarily, it isn't so surprising that some did—paleontologists and evolutionary biologists theorize that birds evolved from dinosaurs. The first clue that feathers may have appeared somewhere on the evolutionary path from dinosaur to bird came in the 1990s, when scientists discovered fossils of primitive birds and birdlike dinosaurs that had impressions of feathers and bristles that were possibly proto-feathers. In 2008, Jakob Vinther and colleagues realized that microscopic particles in the feather impressions were residues of pigments that gave feathers color, offering a technique for learning the color of dinosaurs. Two teams, one led by Vinther and the other by Mike Benton, took advantage of this. Benton's team, publishing in *Nature* on Jan. 27, 2010, offered portraits of two animals. *Sinosauropteryx*, a small dinosaur, had alternating white and reddish-brown rings of proto-feathers along its tail and a crest of reddish-brown proto-feathers on its head. An early bird, *Confuciusornis*, showed off white, black, and reddish-brown feathers. Benton's team, for its part, focused on one animal, the *Anchiornis*, a chicken-sized dinosaur. *Anchiornis* wasn't able to fly, suggesting that it used its plumage either in mating rituals or to scare off predators, but it was covered in gray feathers, with limbs of black-and-white feathers and a reddish-brown plume—a bit like a modern woodpecker.

What's in the Moon

There may be more water on the lunar surface than we had realized, according to data from two unmanned missions to the moon, one by a probe sent by India's space agency and the other by NASA. Both analyzed data using spectrometry—a technique that identifies the molecular composition of matter by analyzing the spectrum of light reflected—and published the results in papers in the Sept. 24, 2009, issue of *Science*. The Indian mission's analysis of the spectrum of reflected light produced startling results: contrary to previous analyses, water is present across the moon, although how much water there is and what form it takes is unclear. NASA's mission focused not on the surface but on deep, cold craters in the moon. In one of these they found quite a bit of water—100 kg (around 220 pounds). NASA scientists gained this information in dramatic fashion, by crashing a used-up rocket into a crater and analyzing the composition of the resulting plume of debris. The presence of lunar water, scientists hope, will allow them to better understand the moon's geologic history and, someday, may make it easier to establish a station on the moon.

Science Glossary

This glossary covers some concepts that come up frequently in the news, in biology, chemistry, geology, and physics. See also Astronomy, Computers and Telecommunications, Environment, Health, Meteorology, Weights and Measures.

Biology

Note: For classification terms such as *kingdom*, *phylum*, etc., see p. 298.

Amino acid: one of about 20 similar small molecules that are the building blocks of proteins.

Antibiotic: a substance produced by or derived from a bacterium, fungus, or other organism that battles bacterial infections and diseases, by killing bacteria or halting their growth.

Autoimmunity: a condition in which an individual's immune system reacts against his or her own tissues; leads to diseases such as lupus, diabetes, inflammatory bowel disease, and rheumatoid arthritis.

Bacteriophage or phage: a virus that infects, or lyses, bacteria.

Bacterium (plural, bacteria): one of a large, varied class of microscopic and simple, single-celled organisms; bacteria live almost everywhere—some forms cause disease, while others are useful in digestion and other natural processes.

Biodiversity: richness of variety of life-forms—both plant and animal—in a given environment.

Cell: the smallest unit of life capable of living independently, or with other cells; usually bounded by a membrane. May include a nucleus and other specialized parts.

Cholesterol: a fatty substance in animal tissues. It is produced by the liver in humans; is found in foods such as butter, eggs, and meat; and is an essential body constituent.

Chromosome: one of the rod-like structures in cell nuclei that carry genetic material (DNA).

Cloning: the process of copying a particular piece of DNA to allow it to be sequenced, studied, or used in some other way; can also refer to producing a genetic copy of an organism.

DNA (deoxyribonucleic acid): the chemical substance that carries genetic information, which determines the form and functioning of all living things.

Ecosystem: an interdependent community of living organisms and their climatic and geographical habitat.

Enzyme: a protein that promotes a particular chemical reaction in the body.

Estrogen: one of a group of hormones that promote development of female secondary sex characteristics and the growth and health of the female reproductive system; males also produce small amounts of estrogen.

Eukaryote: single- or multi-celled organisms whose cells have distinct nuclei.

Evolution: the process of gradual change that may occur as a species adapts to its environment; natural selection is the process by which evolution occurs.

Gene: a portion of a DNA molecule that provides the blueprint for the assembly of a protein.

Gene pool: the collection and total diversity of genes in an interbreeding population.

Gene therapy: a treatment in which scientists try to implant functioning genes into a person's cells so the genes can produce proteins that the person lacks or that help the person fight disease.

Genetic sequencing: the process of determining the order of subunits within a gene or the order of all an organism's genes.

Genome: the complete set of an organism's genetic material.

Hormone: a substance secreted in one part of an organism that regulates the functioning of other tissues or organs.

Meiosis: the process of cell division that results in gametes (sperm or egg cells), all of which contain half the number of chromosomes as their precursor.

Metabolism: the sum total of the body's chemical processes providing energy for vital functions and enabling new material to be synthesized.

Mitosis: the process by which a cell divides its nucleus and other cell materials into two duplicate daughter cells with the same DNA.

Neuron: a nerve cell, of the type found in the brain or spinal cord, that sends electrical and chemical messages to other cells.

Nucleus (plural, nuclei): the center of an atom; or the portion of a cell that contains genetic material and regulates growth and metabolism.

Organism: a living entity, capable of growth, metabolism, and usually reproduction.

Phenotype: the observable properties and characteristics of an organism arising at least in part from its genetic makeup.

Pheromone: a chemical secreted by an animal to influence the behavior of other members of its species.

Placebo effect: a phenomenon in which patients show improvements even though they have taken a medically inactive substance, called a placebo.

Prokaryote: a single-celled organism that does not have a distinct nucleus, such as bacteria and blue-green algae.

Protein: a complex molecule made up of one or more chains of amino acids; essential to the structure and function of all cells.

RNA (ribonucleic acid): a complex molecule similar to the genetic material DNA but usually single-stranded; several forms of RNA translate the genetic code of DNA and use that code to assemble proteins for structural and biological functions in the body.

Species: a population of organisms that breed with each other in nature and produce fertile offspring; other definitions of species exist to accommodate the diversity of life on Earth.

Stem cell: a cell that can give rise to other types of cells; for instance, bone marrow stem cells divide and produce different types of blood cells.

Steroid: type of hormone that freely enters cells (other hormones bind to cell surfaces). Different varieties can suppress immune response or influence stress reaction, blood pressure, or sexual development; includes testosterone- and estrogen-related compounds.

Testosterone: a hormone that stimulates the development and maintenance of male sexual characteristics and the production of sperm; women also produce small amounts of testosterone.

Virus: a microscopic, often disease-causing, organism made of genetic material surrounded by a protein shell; can only reproduce inside a living cell.

Chemistry

Acid: a class of compound that contrasts with bases. Acids taste sour, turn litmus red/pink, and often produce hydrogen gas in contact with some metals. Acids donate protons (hydrogen atoms minus the electron) in chemical reactions.

Base: a substance that yields hydroxyl ions (OH⁻) when dissolved in water; any of a class of compounds whose aqueous solutions taste bitter, feel slippery, turn litmus blue, and react with acids to form salts; also known as **alkaline**.

Carbon fiber: an extremely strong, thin fiber made by pyrolyzing (decomposing by heat) synthetic fibers, such as rayon, until charred; used to make high-strength composites.

Chlorofluorocarbon (CFC): one of a group of industrial chemicals that contain chlorine, fluorine, and carbon and have been found to damage Earth's ozone layer.

Element: a substance that cannot be chemically decomposed into simpler substances; the atoms of an element all have the same number of protons and electrons.

Isotope: an atom of a chemical element with the same number of protons in its nucleus as other atoms of that element, but with a different number of neutrons.

Molecule: the basic unit of a chemical compound, composed of two or more atoms bound together.

Noble gases or inert gases: a group of gases including helium, neon, argon, krypton, xenon, and radon that are not reactive except in rare and limited instances.

Osmosis: the transfer of a fluid across a semipermeable membrane, usually from an area of higher concentration to one of lower concentration.

Phase: any of the possible states of matter—solid, liquid, gas, or plasma—that change according to temperature and pressure.

Polymer: a huge molecule containing hundreds or thousands of smaller molecules arranged in repeating units.

Salt: a neutral compound produced by the reaction of an acid and a base.

Geology

Fault, tectonic: a crack or break in Earth's crust, often due to the slippage of tectonic plates past or over one another; usually geologically unstable.

Igneous: a type of rock formed by solidification from a molten state, especially from molten magma.

Magma: hot liquid rock material under Earth's crust, from which igneous rock is formed by cooling.

Metamorphic: in geology, the name given to sedimentary rocks or minerals that have recrystallized under the influence of heat and pressure since their original deposition.

Physics

Absolute zero: the theoretical temperature at which all motion within a molecule stops, corresponding to -273.15°C (-459.67°F).

Antimatter: matter that consists of antiparticles, such as antiprotons, that have an opposite charge from normal particles; when matter meets antimatter, both are destroyed, and their combined mass is converted to energy. Antimatter is created in certain radioactive decay processes but appears to be present in only small amounts in the universe.

Atom: the basic unit of a chemical element.

Atomic mass: the total mass of an atom of a given element; atoms of the same element with different atomic masses (different numbers of neutrons, not protons) are called **isotopes**.

Atomic number: the number of protons in an atom of a given element of the periodic table; the characteristic that sets atoms of different elements apart.

Axion: a hypothetical subatomic particle with low mass and energy that is thought to exist because of the properties of the strong nuclear force.

Bose-Einstein condensate (BEC): a "super-atom" comprising thousands of atoms super-cooled to within a few hundred millionths of a degree of absolute zero and thus condensed into the lowest energy state; atoms bound in the BEC behave synchronously, giving the BEC wavelike properties.

Boson: force-carrying particles including photons, gluons, and the W and Z particles; one of the two primary categories of particles in the Standard Model, the other being fermions.

Dark energy: a mysterious, undefined energy leading to a repulsive force pervading all of space-time; proposed by cosmologists as counteracting gravity and accelerating the expansion of the universe; predicted to make up 65% of the universe's composition.

Dark matter: hypothetical, invisible matter that some scientists believe makes up 90% of the matter in the universe; its existence was proposed to account for otherwise inexplicable gravitational forces observed in space.

Doppler effect: a change in the frequency of sound, light, or radio waves caused by the motion of the source emitting the waves or the motion of the person or instrument perceiving the waves.

Electron: negatively charged particle that is the least massive electrically charged fundamental particle; the most common charged lepton in the Standard Model.

Energy: capacity to perform work. Energy can take various forms, such as potential energy, kinetic energy, and chemical energy.

Entropy: a measure of disorder in a system.

Fermion: any one of a number of matter particles including electrons, protons, neutrons, and quarks; one of the two primary categories of particles in the Standard Model, the other being bosons.

Field: the effects of forces (gravitational, electric, etc.) are visualized and described mathematically by physicists in terms of fields, which show the strength and direction of a force at a given position.

Fission: a nuclear reaction that occurs when the nuclei of large, unstable atoms break apart, releasing large amounts of energy.

Fluorescence: luminescence that is caused by the absorption of radiation at one wavelength followed by an immediate re-radiation, usually at a different wavelength, that stops almost immediately when the radiation stops.

Force: In classical physics, a force is something that causes acceleration in a body and can be thought of as a push or pull.

Fusion: a nuclear reaction occurring when atomic nuclei collide at high temperatures and combine to form one heavier atomic nucleus, releasing enormous energy in the process.

Gravity: an attractive force between any 2 objects or particles, proportional to the mass (or energy) of the objects; strength of the force decreases with greater distance; the only fundamental force still unaccounted for by the Standard Model.

Half-life: the time it takes for half of a given amount of a radioactive element to decay.

Pangaea: a single supercontinent that scientists believe broke apart about 170 mil years ago to form the current continents.

Plate tectonics: theory that Earth's crust is made up of many separate rigid plates of rock that float on top of hot semi-liquid rock.

Sedimentary: a type of rock formed by the buildup of material at the bottoms of bodies of water.

Hertz (Hz): a measure of frequency, or how many times a given event occurs per second; applied to sound waves, electrical current, microchip clock speeds.

Laser: light consisting of a cascade of photons all having the same wavelength; stands for Light Amplification by Stimulated Emission of Radiation.

Light-emitting diode (LED): a semiconductor that emits light when an electrical current is passed through it. The color of the light depends on the material used in making the diode.

Neutrino: a tiny fundamental particle with no electrical charge and very small mass that moves very quickly through the universe; comes in three varieties, or flavors, called electron, muon, and tau.

Neutron: a neutral particle found in the nuclei of atoms.

Particle accelerator: a large machine with a long tunnel in which atoms smash into each other at high speeds; physicists use these machines to study subatomic particles.

Phosphorescence: luminescence that is caused by the absorption of radiation at one wavelength followed by a delayed re-radiation, usually at a different wavelength, that continues for at least a hundredth of a second after the radiation stops.

Photon: the elementary unit, or quantum, of light or electromagnetic radiation having no mass or electrical charge; one of the fundamental force-carrying particles, or bosons, described by the Standard Model.

Plasma: a high-energy state of matter different from solid, liquid, or gas in which atomic nuclei and the electrons orbiting them separate from each other.

Proton: a positively charged subatomic particle found in the nuclei of atoms.

Quantum: a natural unit of some physically measurable property, such as energy or electrical charge.

Quark: a fermion and a fundamental matter particle that makes up neutrons and protons, forming atomic nuclei; there are 6 different "flavors" of quarks grouped in pairs; up and down, charm and strange, top and bottom.

Radiation: energy emitted as rays or particles; radiation includes heat, light, ultraviolet rays, gamma rays, X-rays, cosmic rays, alpha particles, beta particles, and the protons, neutrons, and electrons of radioactive atoms.

Relativity, general theory of: a theory of space-time proposed by Albert Einstein in 1915; gravitational and other forces are transmitted through the effects of the curvature of space-time.

Relativity, special theory of: Einstein's theory of space and time: all laws of physics are valid in all uniformly moving frames of reference, and the speed of light in a vacuum is always the same, so long as the source and the observer are moving uniformly (not accelerating).

Standard Model: prevailing theory of the interaction of subatomic particles; matter particles are fermions: either leptons or quarks; force-carrying particles are bosons: either gluons, W or Z bosons, or photons; successfully explains three of the four elementary forces acting on particles (strong, weak, electromagnetic) but thus far has not incorporated gravity.

String theory: a theory that seeks to unify quantum mechanics and general relativity, positing that the basic constituents of matter can best be understood not as point objects but as tiny closed loops, or "strings."

Subatomic particle: one of the small particles, such as electrons, neutrons, and protons, which make up an atom.

Superconductivity: the property of certain materials, usually metals and chemically complex ceramics, to conduct electricity without resistance, generally at very cold temperatures.

Thermodynamics: the branch of physics that describes how energy, heat, and temperature flow in physical systems.

Ultraviolet radiation: a form of light, invisible to the human eye, that has a shorter wavelength and greater energy than visible light but a longer wavelength and less energy than X-rays.

Virtual particle: subatomic particles that rapidly pop into and out of existence and can exert real forces; usually occur in particle-antiparticle pairs and are rapidly annihilated.

Mohs Scale of Hardness

Hardness is the ability of a solid substance to resist abrasion or deformation on the surface. Soft minerals scratch easier than hard ones. For example, a diamond will scratch graphite because the graphite is softer. In 1812, German mineralogist Frederich Mohs (1773-1839) created the arbitrary scale shown below to measure relative hardness using ten minerals that were readily available at that time. The numbers in the Mohs scale are arranged in order of increasing hardness. A mineral's hardness is obtained by determining which mineral in the Mohs scale will scratch the specimen.

Mohs Scale		Selected items and their relative hardness	
1. Talc	6. Orthoclase feldspar	2.5	Fingernails
2. Gypsum	7. Quartz	2.5-3	Gold, silver
3. Calcite	8. Topaz	3	Copper penny
4. Fluorite	9. Corundum	4-4.5	Platinum
5. Apatite	10. Diamond	4-5	Iron
		5.5	Knife blade
		6-7	Glass
		6.5	Iron pyrite
		7+	Hardened steel file

Chemical Elements, Atomic Numbers, Year Discovered

See Periodic Table of the Elements on page 290 for atomic weights.

Note: 118 elements are listed here; only 112 have been independently confirmed. The most recent of these, element 112 (with a mass number of 270), was reported by S. Hoffman et al. in 1996 and was approved by the International Union of Pure and Applied Chemistry (IUPAC) in June 2009. The discoverers proposed the name Copernicium with a symbol of Cn, in honor of the astronomer Nicolaus Copernicus; the name was made official on Feb. 19, 2010, the 537th anniversary of Copernicus's birth. (*) Indicates element whose existence has been reported or hypothesized, but not yet confirmed. Between 1999 and 2006, observation of many isotopes of elements 113-118 have been reported in refereed journals. These reports all await confirmation and are shown in italics in the periodic table. (1) The name Dubnium (Db) has been approved by IUPAC for element 105, but the name Hahnium (Ha) is used in most of the scientific literature before 1998 and is still sometimes used in the U.S. (2) Formerly Columbium.

Basic Laws of Physics

Isaac Newton's Laws of Motion

1. An object in motion moves at a constant velocity in a straight line unless acted upon by a force. Likewise, an object at rest will stay at rest—a property known as inertia.

2. The acceleration of an object is proportional to the force acting on it and inversely proportional to the mass of an object.

Force (F) equals mass (m) times acceleration (a):

$$F = ma$$

3. For every action, there is an equal and opposite reaction. For example, a force of 1 ton pushing down on an object requires an equal force pushing upward on the object in order for it to stay in place.

Law of Gravity

In common usage, gravity refers to the gravitational force between planets and objects on or near them. But in scientific parlance, gravitation represents one of four basic forces controlling the interactions of matter. The others are strong and weak nuclear forces and electromagnetic force. The gravitational force (F) between objects is proportional to the product of their masses (m_1 and m_2) and inversely proportional to the square of the distance (d) between them. G represents the gravitational constant in Newton's law of gravity, a fixed ratio of approximately 6.67390×10^{-11} newton m^2/kg^2 .

The basic law of gravity is:

$$F = G \frac{m_1 m_2}{d^2}$$

Earth's gravitational force is considered to pull objects toward it at a constant acceleration of $g = 9.8 \text{ m/s}^2$. This allows calculation of the velocity (v) of an object with an initial velocity of v_0 in free fall at a given point in time (t), and calculation of the distance (d) of an object from Earth at any given time, with any given initial velocity (v_0) and any known initial height (a) via the following equations:

$$v = v_0 - gt$$

$$d = -1/2gt^2 + v_0t + a$$

Assuming that height is measured in feet and speeds in feet per second, the maximum height (H) reached by an object with a positive v_0 is expressed as:

$$H = a + \frac{v_0^2}{64}$$

Several physical aspects of the Earth slightly distort its gravitational force. Gravity is lessened by the centrifugal force of the Earth's rotation. At the poles, where centrifugal force is absent, acceleration due to gravity is greater.

Also, the further an object is from Earth's center, the smaller the gravitational force. Gravity is weaker on a mountaintop than at sea level.

Conservation Laws

In physics, laws of conservation state that in a closed system, where neither mass nor energy is added or subtracted, certain measurable quantities remain constant.

Conservation of Mass: Mass is neither created nor destroyed within a closed system except when converted to energy.

Conservation of Momentum: All moving objects have momentum, and in a closed system, total momentum is always conserved. Linear momentum is the product of the mass of an object and its velocity. In the following equation, M and V represent the initial total mass and velocity of objects within a closed system. After a collision between those objects, the mass and velocity of individual objects may change (for example, one object could break into smaller pieces, each traveling at a different velocity) but the product of the total mass and velocity in the system after the collision (mv) will remain the same.

$$MV = mv$$

Any object moving in a circle has another kind of momentum—angular momentum. This is because circular motion requires acceleration toward the center of the circle. The amount of acceleration depends on the speed of the object and the square of the radius of the circle. (Angular momentum

is the product of this speed, the mass of the object and the square of the radius.)

Conservation of Energy: The total amount of energy in a closed system will not change except when converted to mass.

Conservation of Mass-Energy: Einstein's special theory of relativity states that mass and energy are related. Because they can be converted into one another, mass and energy alone cannot be conserved. But the total amount of mass and energy together must be conserved. This is reflected in the following equation where m is mass, E is energy, and c is the speed of light in a vacuum (which is constant):

$$E = mc^2$$

Relativistic mass can describe how mass increases with velocity. The following equation—where m is the mass of a moving object, m_0 is the object's mass when not moving, v is its velocity in relation to a stationary observer, and c is the speed of light—shows the relationship:

$$m = \frac{m_0}{\sqrt{1 - \frac{v^2}{c^2}}}$$

The theory that no object can travel faster than the speed of light is based in this equation. As an object approaches c , so much energy is converted to mass that it no longer accelerates.

Laws of Thermodynamics

1. Heat is a form of energy. Within a closed system energy must be conserved except in nuclear reactions or other extreme conditions. It is neither created nor destroyed.

2. Within a self-sustaining system, heat can never go from an area of low temperature to an area of high temperature, for this would require added energy. Without added energy, disorder, or entropy, can only increase.

3. Absolute zero cannot be attained by any procedure in a finite number of steps. Although it can be approached asymptotically, it can never be reached.

Laws of Current Electricity

Electric current generally represents the flow of electrons through a conductor. The rate at which electrons flow can be measured in amperes, defined as the number of electrons (measured in a unit called the coulomb, equal to about 6.24 quintillion or 6.24×10^{18} electrons) moving past a particular point every second. One ampere is equal to 1 coulomb of charge passing each second. Like water, electrons tend to move from areas of high pressure to low pressure. The difference between these two "pressures" is known as potential difference and is measured in volts.

Certain substances, such as copper and carbon, allow electric currents to pass more readily than others—that is, they have greater conductivity. Resistance to conductivity is measured in ohms.

Ohm's Law: Electric current is directly proportional to the potential difference and inversely proportional to the total resistance of the circuit. I is electric current (measured in amperes), V is the potential difference (measured in volts), and R is resistance (measured in ohms):

$$I = \frac{V}{R}$$

Law of Electric Power: Electric power (P), measured in watts, represents the rate at which electricity is converted into some other form of energy (such as light, in the case of a light bulb). P is the product of current and potential difference:

$$P = IV$$

Two Basic Laws of Quantum Physics

1. **Heisenberg's uncertainty principle:** Certain pairs of observable quantities like energy and time or position and momentum cannot be measured with complete accuracy simultaneously. Also known as the indeterminacy principle.

2. **Pauli's exclusion principle:** Two electrons in an atom cannot simultaneously occupy the same quantum or energy state. This has since been shown to be true for many subatomic particles.

Breaking the Sound Barrier; Speed of Sound

The prefix **Mach** is used to describe supersonic speed. It was named for Ernst Mach (1838-1916), a Czech-born Austrian physicist. Mach may be defined as the ratio of the velocity of an object to the velocity of sound in a particular medium. A plane moving at the speed of sound moves at Mach 1. At twice the speed of sound, it moves at Mach 2.

When a plane passes the sound barrier—flying faster than sound travels—listeners in the area hear thunderclaps, although the pilot of the plane does not.

Sound is produced by vibrations of an object and is transmitted by the alternating increase and decrease in pressure radiating outward through a material medium of molecules, like waves spreading out on a pond after a rock has been tossed in.

Light; Colors of the Spectrum

Light, a form of electromagnetic radiation similar to radiant heat, radio waves, and X-rays, is emitted from a source in straight lines and spreads out over larger areas as it travels; light per unit area diminishes in proportion to the square of the distance.

The English mathematician and physicist Sir Isaac Newton (1642-1727) described light as an **emission of particles**; the Dutch astronomer, mathematician, and physicist Christiaan Huygens (1629-95) developed the theory that light travels in a **wave motion**. It is now believed that these 2 theories are essentially complementary, and the development of quantum theory has led to results where light acts like a series of particles in some experiments and like a wave in others.

The **speed of light** was first measured in a laboratory experiment by the French physicist Armand Hippolyte Louis Fizeau (1819-96). Today the speed of light is known very precisely as 299,792.458 km per sec (or 186,282.396 mi per sec) in a vacuum; in water the speed of light is about 25% less, and in glass, 33% less.

The **frequency of sound** is determined by the number of times the vibrating waves undulate per second and is measured in cycles per second. The slower the cycle of waves, the lower the frequency. As the frequency increases, the sound becomes higher in pitch. The human ear is sensitive to frequencies between 20 and 20,000 vibrations per second, although this range varies among individuals.

Intensity, or loudness, is the strength of the pressure of these radiating waves and is measured in decibels. (See *Weights and Measures*.)

The **speed of sound** is generally defined as 1,088 feet per second at sea level at 32° F. It varies in other temperatures and media. Sound travels faster in water than in air and even faster in iron and steel.

Color sensations are produced through the excitation of the retina of the eye by light vibrating at different frequencies. The different colors of the spectrum may be produced by viewing a light beam that is refracted by passage through a prism, which breaks the light into its wavelengths.

Customarily, the **primary colors** are taken to be the 6 monochromatic colors that occupy relatively large areas of the spectrum: red, orange, yellow, green, blue, and violet. However, scientists disagree about how many and what primary colors to recognize. The color sensation of **black** is due to complete lack of stimulation of the retina, that of **white** to complete stimulation.

Infrared and ultraviolet rays, below the red (long) end of the spectrum and above the violet (short) end of the spectrum, respectively, are invisible to the naked eye. Heat is the principal effect of infrared rays, and chemical action that of ultraviolet rays.

Discoveries and Innovations: Chemistry, Physics, Biology, Medicine

Vitamin A	1913	McCollum, Davis	U.S.
Vitamin B	1916	McCollum	U.S.
Vitamin C	1928	Szent-Gyorgyi, King	Hungarian U.S.
Vitamin D	1922	McCollum	U.S.
Vitamin K	1935	Dam, Doisy	U.S.
Xerography	1938	Carlson	U.S.
X-ray	1895	Roentgen	German

Inventions

Invention	Date	Inventor(s)	Nationality
Adding machine	1642	Pascal	French
Adding machine	1885	Burroughs	U.S.
Aerosol spray	1926	Rotheim	Norwegian
Airbag	1952	Hetrick	U.S.
Air brake	1868	Westinghouse	U.S.
Air conditioning	1902	Carrier	U.S.
Air pump	1654	Guericke	German
Airplane, automatic pilot	1912	Sperry	U.S.
Airplane, experimental	1896	Langley	U.S.
Airplane, hydro	1911	Curtiss	U.S.
Airplane jet engine	1939	Ohain	German
Airplane with motor	1903	Wright Bros.	U.S.
Airship	1852	Giffard	French
Arc welder	1919	Thomson	U.S.
Aspartame	1965	Schlatter	U.S.
Autogyro	1920	de la Cierva	Spanish
Automobile, differential gear	1885	Benz	German
Automobile, electric	1892	Morrison	U.S.
Automobile, exp'mtl	1864	Marcus	Austrian
Automobile, gasoline	1889	Daimler	German
Automobile, gasline	1892	Duryea	U.S.
Automobile magneto	1897	Bosch	German
Automobile muffler	1904	Pope	U.S.
Automobile self-starter	1911	Kettering	U.S.
Bakelite	1907	Baekeland	Belg., U.S.
Balloon	1783	Montgolfier	French
Barometer	1643	Torricelli	Italian
Bicycle, modern	1885	Starley	English
Bifocal lens	1780	Franklin	U.S.
Bottle machine	1895	Owens	U.S.
Braille printing	1829	Braille	French
Bubble gum	1928	Diemer	U.S.
Burner, gas	1855	Bunsen	German
Calculating machine	1833	Babbage	English
Calculator, electronic pocket	1972	Merryman, Van Tassel	U.S.
Camera, digital	1977	Lloyd, Sasson	U.S.
Camera, Kodak	1888	Eastman, Walker	U.S.

Invention	Date	Inventor(s)	Nationality
Camera, Polaroid Land	1948	Land	U.S.
Car coupler	1873	Janney	U.S.
Carburetor, gasoline	1893	Maybach	German
Carding machine	1797	Whittemore	U.S.
Carpet sweeper	1876	Bissell	U.S.
Cash register	1879	Ritty	U.S.
Cassette, audio	1963	Philips Co.	Dutch
Cassette, videotape	1969	Sony	Japanese
Cathode-ray tube	1897	Braun	German
CAT, or CT, scan	1973	Hounsfield	English
Cellophane	1908	Brandenberger	Swiss
Celluloid	1870	Hyatt	U.S.
Cement, Portland	1824	Aspdin	English
Chronometer	1735	Harrison	English
Circuit breaker	1925	Hilliard	U.S.
Circuit, integrated	1959	Kilby, Noyce, Texas Instr.	U.S.
Clock, pendulum	1657	Huygens	Dutch
Coaxial cable system	1929	Affel, Espensched	U.S.
Coffemaker, automatic drip	1963	Bunn Corp.	U.S.
Compressed air rock drill	1871	Ingersoll	U.S.
Comptometer	1887	Felt	U.S.
Computer, automatic sequence	1944	Aiken, et al.	U.S.
Computer, electronic	1942	Atanasoff, Berry	U.S.
Computer, laptop	1987	Sinclair	English
Computer, mini	1960	Digital Corp.	U.S.
Condenser microphone (telephone)	1916	Wente	U.S.
Contact lens, corneal	1948	Tuohy	U.S.
Contraceptive, oral	1954	Pincus, Rock	U.S.
Corn, hybrid	1917	Jones	U.S.
Cotton gin	1793	Whitney	U.S.
Cream separator	1878	DeLaval	Swedish
Cultivator, disc	1878	Mallon	U.S.
Cystoscope	1878	Nitze	German
Diapers, disposable	1950	Donovan	U.S.
Diesel engine	1895	Diesel	German

Tank, military	1914	Swinton	English				
Tape recorder, magnetic	1899	Poulsen	Danish				

(1) While Alexander Graham Bell has traditionally been credited with invention of the telephone, which he patented, Antonio Meucci developed a working model before Bell. (2) Al Gross held a number of important early patents in the field of wireless communication; other people were also involved in the development of practical cordless telephones.

Top 20 Corporations Receiving U.S. Patents in 2009

NA = Not applicable. **Note:** Excludes patents for which design classification could not be determined.

Geologic Time Scale

Our understanding of Earth's ancient history is largely a result of geoscientists' study of climate, rock strata, ice samples, mineral deposits, and fossils from around the world; clues to the planet's origin have also been found through the study of extraterrestrial bodies. Geologists divide Earth's history into the following units (MYA = million years ago):

PRECAMBRIAN TIME (4,600-542 MYA)

HADEAN EON (4,600-3,800 MYA) Earth has no continents, oceans, or life; surface conditions are defined by intense volcanic activity and widespread meteorite impact. Oldest known minerals and rocks, many of meteoric origin, date to this era.

ARCHEAN EON (3,800-2,500 MYA) Earth's surface cools and water vapor in atmosphere condenses to form early oceans, which define small protocontinents; the first single-celled organisms, primarily bacteria, appear in these oceans.

PROTEROZOIC EON (2,500-542 MYA) Protocontinents merge into larger landmasses as Earth's crust continues to shift. Atmospheric oxygen levels increase, and first known multicellular life (a form of algae) appears. Later, soft-bodied marine animals emerge.

PHANEROZOIC EON

Paleozoic Era (542-251 MYA)

Cambrian Period (542-488 MYA) Collisions between Earth's plates create a supercontinent of the southern hemisphere known as Gondwanaland. Seas experience an explosion of invertebrate animal life, including thousands of species of trilobites; there is no life on land.

Ordovician Period (488-443 MYA) Gondwanaland extends from South Pole to tropic regions; northern hemisphere is mostly open ocean. Average global temperatures are warmer than present era. First primitive land plants, early ancestors of starfish and mollusks, and first known vertebrates (armored, jawless fishes) appear. The period ends in extinction of a majority of species, possibly a result of a global drop in sea level due to glaciation.

Silurian Period (443-416 MYA) South Pole remains covered by supercontinent, but precursors of present-day N America, Europe, and Asia coalesce around the equator and middle latitudes. Appearance of first known vascular land plants, first freshwater fish, first jawed fish, first coral reefs, and first air-breathing animals (*eurypterids*, a scorpion-like creature).

Devonian Period (416-359 MYA) Collisions between Gondwanaland and ancestral landmasses of N America and Eurasia produce mountains visible today as northern Appalachians. Newly-formed ozone layer offers protection from sun's rays, allowing first air-breathing spiders and mites to appear on dry land; emergence of first jawed fish, fish with fins and scales, and first amphibians.

Carboniferous Period (359-299 MYA) Precursors of modern N America and Northern Europe lie in tropical latitudes north of the Equator; warm and humid conditions there facilitate spread of lush forests and peat swamps that later form most of the world's coal and limestone. Later period sees emergence of first true conifers, *lepidodendrales* ("scale trees") as tall as 100 ft, and first true reptiles.

Permian Period (299-251 MYA) All major landmasses collide to form the supercontinent Pangaea, surrounded by the world ocean Panthalassa. Gradual warming throughout the Permian allows for initial flourishing of species—including dinosaur precursors (up to 10 ft in length) and marine species in shallow inland seas—but later precipitates mass extinction of as much as 95% of all species.

Mesozoic Era (251-65.5 MYA)

Triassic Period (251-199 MYA) Pangaea separates into supercontinents of Laurasia and Gondwana; subtropical conditions extend as far north as present-day Wyoming and New England. Emergence of *ichthyosaurs* and *plesiosaurs* (large marine reptiles), several species of dinosaurs (up to 15 ft long), first true mammals, and first insects to undergo metamorphosis from larva to pupa to adult.

Jurassic Period (199-145 MYA) North American continent drifts westward, opening Gulf of Mexico; rift forms between South America and Africa. Warm, moist climate contributes to flourishing of coral reefs and temperate and subtropical forests. Appearance of first angiosperms (flowering plants), *pterosaurs* (winged reptiles), earliest known bird (*Archaeopteryx*), and huge dinosaurs such as the carnivorous *Allosaurus* and herbivorous *Apatosaurus*.

Cretaceous Period (145-65.5 MYA) African continental plate drifts north, creating roots of European Alps; gap between

S America and Africa broadens; western movement of N America drives formation of Sierra Nevada and Rocky Mountains, turning the western interior of continent into a vast swamp. Later, sea levels rise and cover about one-third of Earth's present land area; global climate is warm and mild. The period ends in a mass extinction of plant and animal species (including dinosaurs), possibly caused by volcanic activity or impact of one or more asteroids or comet fragments.

Cenozoic Era (65.5 MYA-present)

Paleogene Period (65.5-23 MYA)

- **Paleocene Epoch** (65.5-55.8 MYA) Australia separates from Antarctica; N America and Greenland spread apart. Mammalian life predominates, including early marsupials, insectivores, creodonts (carnivorous ancestors to both cats and dogs), and primitive hoofed mammals.
- **Eocene Epoch** (55.8-33.9 MYA) Australia drifts farther from Antarctica; the Indian subcontinent becomes welded to Asia, and tectonic forces drive the upheaval of the Alpine-Himalayan system. Climate in N America and Europe is subtropical and moist, with temperate forests as far north as Greenland and Siberia. Ancestors of modern horses, rhinoceroses, camels, bats, primates, and squirrel-like rodents emerge; earliest known marine mammals appear in later Eocene.
- **Oligocene Epoch** (33.9-23 MYA) San Andreas fault develops between N American and Pacific plates. Mammalian species continue to diversify, producing the first elephants, modern horses, and multiple rodent, camel, and rhinoceros-like species, as well as first known species of great ape. Long-term cooling trend begins that would later cause Pleistocene ice ages.

Neogene Period (23 MYA-present)

- **Miocene Epoch** (23-5.3 MYA) Crustal plate collisions continue to drive uplift of Alps, Himalayas, and Cordilleran Ranges in Americas; eroded sediment is deposited in shallow marine basins, forming reservoirs for oil fields of California, Romania, and Caspian Sea. Ocean currents prevent Antarctica from receiving warmer waters, fostering growth of Antarctic ice sheet; northern forests become grassy prairies. Elephants give rise to first mastodons, and large apes related to the orangutan live in Asia and southern Europe; oldest hominid fossils from Africa date to this epoch.
- **Pliocene Epoch** (5.3-1.8 MYA) Alps continue to rise in Europe, and subduction of the Pacific tectonic plate elevates the Sierra Nevada and volcanic Cascade Range. Climate becomes cooler and drier, driving formation of permanent Arctic ice cap. Rapid primate evolution produces *Australopithecus*, earliest direct ancestor of *Homo sapiens*.
- **Pleistocene Epoch** (1.8 MYA-11,800 years ago) Glacier ice covers as much as 25% or more of Earth's land surface, carving numerous present-day features including the Great Lakes; increased rainfall in lower latitudes allows plant and animal life to flourish in northern and eastern Africa. Late Pleistocene brings worldwide extinction of many large mammals, including the mastodon, saber-toothed tiger, and ground sloth.
- **Holocene Epoch** (11,800 years ago to the present) Melting ice caused sea levels to rise 100 ft or more in early Holocene, covering large areas of land and extending continental shelf of North America. Humans proliferate, and civilization begins.

Classification

Source: Funk & Wagnalls New Encyclopedia

In biology, classification is the identification, naming, and grouping of organisms into a formal system. The 2 fields that are most directly concerned with classification are taxonomy and systematics. Although the 2 disciplines overlap considerably, taxonomy is more concerned with nomenclature (naming) and with constructing hierarchical systems, and systematics with uncovering evolutionary relationships. Two kingdoms of living forms, Plantae and Animalia, have been recognized since Aristotle established the first taxonomy in the 4th century BCE. In addition, there are the following 3 kingdoms: Protista (one-celled organisms), Monera (bacteria and blue-green algae; also known as kingdom Procaryotae), and Fungi. The 7 basic categories of classification (from most general to most specific) are kingdom, phylum (or division), class, order, family, genus, and species. Below are 2 examples:

ZOOLOGICAL HIERARCHY

Kingdom	Phylum	Class	Order	Family	Genus	Species name	Common name
Animalia	Chordata	Mammalia	Primates	Hominidae	Homo	Homo sapiens	Human

BOTANICAL HIERARCHY

Kingdom	Division*	Class	Order	Family	Genus	Species name	Common name
Plantae	Magnoliophyta	Magnoliopsida	Magnoliales	Magnoliaceae	Magnolia	M. virginiana	Sweet Bay

*In botany, the division is generally used in place of the phylum.

Gestation, Longevity, and Incubation of Selected Animals

Information reviewed by Ronald M. Nowak, author of *Walker's Mammals of the World* (6th ed., Johns Hopkins University Press, 1999). Average longevity figures supplied by Ronald T. Reuther. These apply to animals in captivity; the potential life span of animals is rarely attained in nature. Figures on gestation and incubation are averages based on estimates.

Animal	Gestation (days)	Average longevity (yrs.)	Maximum longevity (yrs.-mos.)	Animal	Gestation (days)	Average longevity (yrs.)	Maximum longevity (yrs.-mos.)
Ass	365	12	47	Leopard	98	12	23

Major Venomous Animals

Snakes

- Asian pit viper**—2 ft to 5 ft long; throughout Asia; reactions and mortality vary, but most bites cause tissue damage, and mortality is generally low.
- Australian brown snake**—4 ft to 7 ft long; very slow onset of cardiac or respiratory distress; moderate mortality, but because death can be sudden and unexpected, it is the most dangerous of the Australian snakes; antivenom.
- Barba Amarilla or fer-de-lance**—up to 7 ft long; from tropical Mexico to Brazil; severe tissue damage common; moderate mortality; antivenom.
- Black mamba**—up to 14 ft long, fast-moving; S and central Africa; rapid onset of dizziness, difficulty breathing, erratic heart-beat; mortality high, nears 100% without antivenom.
- Boomslang**—less than 6 ft long; African savannahs; rapid onset of nausea and dizziness, often followed by slight recovery and then sudden death from internal hemorrhaging; bites rare, mortality high; antivenom.
- Bushmaster**—up to 12 ft long; wet tropical forests of Central and S America; few bites occur, but mortality rate is high.

- Common, or Asian, cobra**—4 ft to 8 ft long; throughout southern Asia; considerable tissue damage, sometimes paralysis; mortality probably not more than 10%; antivenom.
- Copperhead**—less than 4 ft long; from New England to Texas; pain and swelling; very seldom fatal; antivenom seldom needed.
- Coral snake**—2 ft to 5 ft long; in Americas south of Canada; bite may be painless; slow onset of paralysis, impaired breathing; mortalities rare, but high without antivenom and mechanical respiration.
- Cottonmouth water moccasin**—up to 5 ft long; wetlands of southern U.S. from Virginia to Texas; rapid onset of severe pain, swelling; mortality low, but tissue destruction can be extensive; antivenom.
- Death adder**—less than 3 ft long; Australia; rapid onset of faintness, cardiac and respiratory distress; at least 50% mortality without antivenom.
- Desert horned viper**—up to 2 ft long; dry areas of Africa and western Asia; swelling and tissue damage; low mortality; antivenom.
- European viper**—1 ft to 3 ft long; throughout Europe; bleeding and tissue damage; mortality low; antivenom.

Gaboon viper—more than 6 ft long, fat, 2-in. fangs; south of the Sahara; massive tissue damage, internal bleeding; few recorded bites.

King cobra—up to 16 ft long; throughout southern Asia; rapid swelling, dizziness, loss of consciousness, difficulty breathing, erratic heartbeat; mortality varies sharply with amount of venom involved, but most bites involve nonfatal amounts; antivenom.

Krait—up to 5 ft long; SE Asia; rapid onset of sleepiness, numbness; up to 50% mortality even with use of antivenom.

Puff adder—up to 5 ft long, fat; south of the Sahara, throughout the Middle East; rapid large swelling, great pain, dizziness; moderate mortality, often from internal bleeding; antivenom.

Rattlesnake—2 ft to 6 ft long; throughout W Hemisphere; rapid onset of severe pain, swelling; mortality low, but amputation of affected digits is sometimes necessary; antivenom. Mojave rattler may produce temporary paralysis.

Ringhals, or spitting, cobra—5 ft to 7 ft long; southern Africa; squirts venom through holes in front of fangs as a defense; venom is severely irritating, can cause blindness.

Russell's viper or tic-polonga—more than 5 ft long; throughout Asia; internal bleeding; bite reports common; moderate mortality rate; antivenom.

Saw-scaled, or carpet, viper—up to 2 ft long; dry areas from India to Africa; severe bleeding, fever; high mortality, causes more human fatalities than any other snake; antivenom.

Sea snakes—3 ft to 10 ft long; throughout Pacific, Indian oceans except NE Pacific; almost painless bite; variety of muscle pain, paralysis; mortality rate low, many bites not envenomed; some antivenoms.

Sharp-nosed pit viper or one hundred pace snake—up to 5 ft long; S Vietnam, Taiwan, and China; the most toxic of Asian pit vipers; very rapid onset of swelling and tissue damage, internal bleeding; moderate mortality; antivenom.

Taipan—up to 11 ft long; Australia and New Guinea; rapid paralysis with severe breathing difficulty; mortality nears 100% without antivenom.

Tiger snake—2 ft to 6 ft long; S Australia; pain, numbness, mental disturbances with rapid paralysis; may be deadliest of all land snakes, but antivenom is quite effective.

Yellow, or cape, cobra—7 ft long; southern Africa; most toxic venom of any cobra; rapid onset of swelling, breathing and cardiac difficulties; mortality is high without treatment; antivenom.

Note: Not all bites by venomous snakes are actually envenomed. Any animal bite, however, carries the danger of tetanus, and anyone suffering a venomous snake bite should seek medical attention. Antivenoms do not cure; they are only an aid in the treatment of bites. Mortality rates above are for envenomed bites; low mortality, c. 2% or less; moderate, 2-5%; high, 5-15%.

Lizards

Gila monster—up to 24 in. long, with heavy body and tail; in high desert in SW U.S. and N Mexico; immediate severe pain and transient low blood pressure; no recent mortality.

Mexican beaded lizard—similar to Gila monster; Mexican west coast; reaction and mortality rate similar to Gila monster.

Insects

Ants, bees, wasps, hornets, etc—global distribution; usual reaction is piercing pain in area of sting; not directly fatal, except in cases of massive multiple stings, though many people suffer allergic reactions—swelling and rashes—and a few may die within minutes from severe sensitivity to the venom (anaphylactic shock).

Spiders, scorpions

Atrax or funnel web, spider—several varieties, often large; Australia; slow onset of breathing, circulation difficulties; low mortality; antivenom.

Black widow—small, round-bodied with red hourglass marking; the widow and its relatives are found in tropical and temperate zones; severe musculoskeletal pain, weakness, breathing difficulty, convulsions; may be more serious in small children; low mortality; antivenom. The **redback** spider of Australia has the hourglass marking on its back, rather than on its front, but is otherwise identical to the black widow.

Brown recluse, or fiddleback, spider—small, oblong body; throughout U.S.; pain with later ulceration, which may last months, at place of bite; in severe cases fever, nausea, and stomach cramps; very low mortality.

Scorpion—crablike body with stinger in tail, various sizes; many varieties throughout tropical and subtropical areas; symptoms may include severe pain spreading from the wound, numbness, severe agitation, cramps; severe reaction may include respiratory failure; low mortality, usually in children; antivenoms.

Tarantula—large, hairy spider found around the world; the American tarantula, and probably all other tarantulas, are harmless to humans, though their bite may cause some pain and swelling.

Sea life

Cone-shell—mollusk in small, beautiful shell; S Pacific and Indian oceans; shoots barbs into victims; paralysis; low mortality.

Octopus—global distribution, usually in warm waters; rapid onset of paralysis with breathing difficulty; all varieties produce venom, but only a few can cause death.

Portuguese man-of-war—jellyfish-like, with tentacles up to 100 ft long; in most warm water areas; immediate severe pain; not directly fatal, though shock may cause death in rare cases.

Sea wasp—jellyfish, with tentacles up to 30 ft long; S Pacific; very rapid onset of circulatory problems; high mortality because of speed of toxic reaction; antivenom.

Stingray—several varieties of differing sizes; tropical and temperate seas and some fresh water; severe pain, rapid onset of nausea, vomiting, breathing difficulties; wound area may ulcerate, gangrene may appear; seldom fatal.

Stonefish—brownish fish that lies motionless on bottom of shallow waters; throughout S Pacific and Indian oceans; extraordinary pain, rapid paralysis; low mortality; antivenom available, amount determined by number of puncture wounds; warm water relieves pain.

Speeds of Selected Animals

Source: Natural History magazine. © American Museum of Natural History

Animal	mph	Animal	mph	Animal	mph
Cheetah	70	Mongolian wild ass	40	Human	27.89
Pronghorn antelope	61	Greyhound	39.35	Elephant	25
Wildebeest	50	Whippet	35.50	Black mamba snake	20
Lion	50	Rabbit (domestic)	35	Six-lined race runner (lizard) . . .	18
Thomson's gazelle	50	Mule deer	35	Wild turkey	15
Quarterhorse	47.5	Jackal	35	Squirrel	12
Elk	45	Reindeer	32	Pig (domestic)	11

Trees of the U.S.

Source: American Forests, Washington, DC

Approximately 826 native and naturalized species of trees are grown in the U.S. The oldest living tree in the U.S. is believed to be a bristlecone pine tree in California named Methuselah, estimated to be 4,700 years old. The world's largest known living tree, the General Sherman giant sequoia in California, weighs more than 6,167 tons—as much as 41 blue whales or 740 elephants. Listed here are the 10 largest National Champion trees according to American Forests, as of June 9, 2010.

10 Largest National Champion Trees

Blue gum eucalyptus	586	141	126	759	Petrolia, CA

Note: American Forests uses a point system to determine the largest trees. The following calculation is used to determine a tree's total points: trunk circumference (in inches) + height (in feet) + ¼ average crown spread (in feet) = total points.

ENVIRONMENT

U.S. Greenhouse Gas Emissions from Human Activities, 1990-2008

Source: U.S. Environmental Protection Agency

Gas and major source(s)	1990	1995	2000	2005	2006	2007	2008	% change, 2000-08
Carbon dioxide (CO ₂)	5,100.8	5,427.3	5,977.2	6,108.4	6,017.2	6,120.2	5,921.2	-0.9%
Fossil fuel combustion	4,735.7	5,029.5	5,593.4	5,753.3	5,652.8	5,757.0	5,572.8	-0.4
Methane (CH ₄)	613.4	613.2	586.0	553.2	568.2	569.2	567.6	-3.1
Landfills	149.3	144.1	120.7	125.6	127.1	126.5	126.3	4.6
Enteric fermentation ¹	132.4	143.7	136.8	136.7	139.0	141.2	140.8	2.9
Natural gas systems	129.5	132.6	130.7	103.6	103.1	99.5	96.4	-26.2
Coal mining	84.1	67.1	60.4	56.9	58.3	58.1	67.6	11.9
Nitrous oxide (N ₂ O)	322.3	342.5	345.5	328.3	329.5	327.7	318.2	-7.9
Agricultural soil management	203.5	205.9	210.1	215.8	211.2	211.0	215.9	2.8
Hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF ₆)	90.3	105.7	135.8	143.3	144.8	151.0	149.7	10.3
Total U.S. emissions	6,126.8	6,488.8	7,044.5	7,133.2	7,059.9	7,168.1	6,956.8	-1.2
Net U.S. emissions²	5,217.3	5,646.0	6,380.2	6,182.8	6,100.7	6,212.7	6,016.4	-5.7

Note: Emissions given in terms of equivalent emissions of carbon dioxide (CO₂), using units of teragrams of carbon dioxide equivalents (Tg CO₂ Eq.). (1) Digestive process of ruminant animals, such as cattle and sheep, producing methane as a by-product. (2) Total emissions minus carbon dioxide absorbed by forests or other means.

U.S. Carbon Dioxide Emissions from Fossil Fuel Combustion, 1990-2008

Source: U.S. Environmental Protection Agency; in teragrams of carbon dioxide equivalents (Tg CO₂ Eq.)

The concept of Global Warming Potential (GWP) was developed by the Intergovernmental Panel on Climate Change (IPCC) to compare the ability of each greenhouse gas to trap heat in the atmosphere relative to another gas. Carbon dioxide (CO₂) from fossil fuel combustion is the largest source of U.S. greenhouse gas emissions, accounting for approximately 79% of GWP weighted emissions since 1990.

Top 15 Nations Producing Carbon Dioxide Emissions, 1980-2008

Air Pollution in Selected World Cities

Source: World Development Indicators 2010, The World Bank

Particulate matter in the following table refers to smoke, soot, dust, and liquid droplets from combustion that are in the air—specifically, to particulates less than 10 microns in diameter capable of reaching deep into the respiratory tract. The level of particulates, an important indicator of air quality, is significantly affected by the state of technology and pollution controls. Particulate pollution causes an estimated 500,000 premature deaths each year. **Sulfur dioxide** is a pollutant formed when fossil fuels containing sulfur are burned. **Nitrogen dioxide** is a poisonous, pungent gas formed when nitric oxide combines with hydrocarbons and sunlight, producing a photochemical reaction. Nitrogen oxides are emitted by bacteria, nitrogenous fertilizers, aerobic decomposition of organic matter, biomass combustion, and, especially, burning fuel for vehicles and industrial activities. Emissions of sulfur dioxide and nitrogen oxides lead to **acid rain**.

Data in the following table are average concentrations based on reports from urban monitoring sites, measured in micrograms per cubic meter (mpcm); the figures give a general indication of air quality, but results should be interpreted with caution. World Health Organization standards for acceptable air quality are annual mean concentrations of 20 mpcm for particulate matter less than 10 microns in diameter and 40 mpcm for nitrogen dioxide and daily mean concentrations of 20 mpcm for sulfur dioxide.

Renewable Water Resources, 2008

Source: Food and Agriculture Organization, United Nations

Globally, water supplies are abundant, but they are unevenly distributed among and within countries. In some areas, water withdrawals are so high, relative to supply, that surface water supplies are shrinking, and groundwater reserves are being de-pleted faster than they can be replenished by precipitation. The U.S. (including Alaska and Hawaii) has a total of 2,818 cubic kilometers (cubic km) of internal renewable water resources, an actual total (which takes into account incoming water flow from outside the country) of 3,069 cubic km, and 9,847 cubic meters (cubic m) per capita. Totals for all countries are 43,002 cubic km of internal resources, 54,337 cubic km of actual resources, and 6,380 cubic m per capita.

These numbers, and those in the tables below, were published by the Food and Agriculture Organization in 2008; the tables draw upon studies done over a number of years and use 2007 population data. Numbers represent each given country’s internal resources.

Countries With Greatest Water Resources, 2008

Country	Cubic meters per capita	Total cubic km
French Guiana	609,091	134.0
Iceland	539,683	170.0
Guyana	315,858	241.0
Suriname	236,893	88.0
Congo, Republic of	230,152	222.0
Papua New Guinea	121,788	801.0
Bhutan	113,537	78.0
Gabon	113,260	164.0
Solomon Islands	87,476	44.7
Canada	87,255	2,850.0

Countries With Lowest Water Resources, 2008

Country	Cubic meters per capita	Total cubic km
Kuwait	6.9	0.0
United Arab Emirates . . .	33.4	0.2
Qatar	45.3	0.1
Bahamas	59.2	0.0
Yemen	91.6	2.1
Saudi Arabia	95.2	2.4
Libya	95.3	0.6
Maldives	98.4	0.0
Malta	124.1	0.1
Singapore	130.0	0.6

Selected Endangered Animal Species

Source: Fish and Wildlife Service, U.S. Dept. of the Interior

Common name	Scientific name	Range
Albatross, Amsterdam	Diomedea amsterdamensis	Amsterdam Island, Indian Ocean
Antelope, giant sable	Hippotragus niger variiani	Angola
Armadillo, giant	Pridontes maximus	Venezuela, Guyana to Argentina
Babirusa	Babyrousa babyrussa	Indonesia
Bandicoot, desert	Perameles eremiana	Australia
Bat, gray	Myotis grisescens	Central, southeastern U.S.
Bear, Mexican grizzly	Ursus arctos	Mexico
Bison, wood	Bison bison athabascaae	Canada, northwestern U.S.
Bobcat, Mexican	Lynx rufus escuinapae	Central Mexico
Caiman, black	Melanosuchus niger	Amazon basin
Camel, Bactrian	Camelus bactrianus	Mongolia, China
Caribou, woodland	Rangifer tarandus caribou	Canada, northwestern U.S.

Common name	Scientific name	Range
Cheetah	Acinonyx jubatus	Africa to India
Chimpanzee, pygmy	Pan paniscus	Dem. Rep. of the Congo
Condor, California	Gymnogyps californianus	U.S. (AZ, CA, OR), Mexico (Baja California)
Crane, whooping	Grus americana	Canada, Mexico, U.S. (Rocky Mts. to Carolinas)
Crocodile, American	Crocodylus acutus	Mexico, Caribbean Sea, Central and S America
Deer, Columbian white-tailed	Odocoileus virginianus leucurus	U.S. (OR, WA)
Dolphin, Chinese river	Lipotes vexillifer	China
Dugong	Dugong dugon	East Africa to southern Japan
Elephant, Asian	Elephas maximus	South central and southeastern Asia
Fox, northern swift	Vulpes velox hebes	U.S. (northern plains), Canada
Frog, mountain yellow-legged	Rana muscosa	Western U.S. (CA, NV)
Gorilla	Gorilla gorilla	Central and W Africa
Hartebeest, Tora	Alcelaphus buselaphus tora	Egypt, Ethiopia, Sudan
Hawk, Hawaiian	Buteo solitarius	U.S. (HI)
Hyena, brown	Parahyaena brunnea	Southern Africa
Impala, black-faced	Aepyceros melampus petersi	Angola, Namibia
Kangaroo, Tasmanian forester	Macropus giganteus tasmaniensis	Australia (Tasmania)
Leopard	Panthera pardus	Africa and Asia
Lion, Asiatic	Panthera leo persica	Turkey to India
Manatee, West Indian	Trichechus manatus	Southeastern U.S., Caribbean Sea, Mexico
Monkey, spider	Ateles geoffroyi frontatus	Costa Rica, Nicaragua
Ocelot	Leopardus pardalis	U.S. (AZ, TX) to Central and S America
Orangutan	Pongo pygmaeus	Borneo, Sumatra
Ostrich, West African	Struthio camelus spatzi	W Sahara
Otter, marine	Lontra felina	Peru south to Straits of Magellan
Panda, giant	Ailuropoda melanoleuca	China
Panther, Florida	Puma concolor coryi	U.S. (LA and AR to SC and FL)
Parakeet, golden	Aratinga guarouba	Brazil
Parrot, imperial	Amazona imperialis	West Indies (Dominica)
Penguin, Galapagos	Spheniscus mendiculus	Ecuador (Galapagos Islands)
Puma, eastern	Puma concolor cougar	Eastern N America (presumed extinct in wild)
Python, Indian	Python molurus molurus	Sri Lanka, India
Rat-kangaroo, brush-tailed	Bettongia penicillata	Australia
Rhinoceros, black	Diceros bicornis	Sub-Saharan Africa
Rhinoceros, northern white	Ceratotherium simum cottoni	Dem. Rep. of the Congo, Sudan, Uganda, Central African Rep.
Salamander, Chinese giant	Andrias davidianus	Western China
Sea-lion, Steller	Eumetopias jubatus	Alaska, Russia
Squirrel, Carolina northern flying	Glaucomys sabrinus coloratus	U.S. (NC, TN)
Tiger	Panthera tigris	Asia
Tortoise, Galapagos	Geochelone nigra	Ecuador (Galapagos Islands)
Whale, gray	Eschrichtius robustus	N Pacific Ocean
Whale, humpback	Megaptera novaeangliae	All major oceans
Wolf, red	Canis rufus	U.S. (FL, NC, SC)
Woodpecker, ivory-billed	Campephilus principalis	South central and southeastern U.S., Cuba
Yak, wild	Bos mutus	China (Tibet), India
Zebra, mountain	Equus zebra zebra	South Africa

List of Endangered and Threatened Species, 2010

Source: Fish and Wildlife Service, U.S. Dept. of the Interior; as of Aug. 2010

Group	Endangered		Threatened		Total species ¹	U.S. species with recovery plans
	U.S.	Foreign	U.S.	Foreign

Grand total	1,061	532	315	47	1,955	1,141

(1) Some species are classified as both endangered and threatened. The table tallies these dual status species only once, as endangered. The dual status species, all tallied as endangered, are (U.S.) California tiger salamander, chinook salmon, chum salmon, coho salmon, gray wolf, green sea turtle, grizzly bear, piping plover, roseate tern, sockeye salmon, steelhead, Steller sea-lion; (non-U.S.) argali, chimpanzee, dugong, leopard, saltwater crocodile.

METEOROLOGY

National Weather Service Watches and Warnings

Source: National Weather Service, National Oceanic and Atmospheric Admin. (NOAA), U.S. Dept. of Commerce; *Glossary of Meteorology*, American Meteorological Society

The **National Weather Service** issues watches, warnings, and advisories for specific geographic areas to alert people to the possibility or imminent arrival of severe weather. A severe thunderstorm or tornado watch is issued when a severe convective storm, covering a relatively small geographic area or moving in a narrow path, is sufficiently intense to threaten life and property. Excessive localized convective rains are not classified as severe storms but are often the product of severe local storms. Such rainfall may result in phenomena, such as flash floods, that threaten life and property. Lightning occurs with all thunderstorms and, along with flash floods, is a leading cause of storm deaths and injuries.

Cyclone: atmospheric circulation of winds rotating counterclockwise in the Northern Hemisphere and clockwise in the Southern Hemisphere. Tornadoes, hurricanes, and the lows shown on weather maps are all examples of cyclones. Cyclones are usually accompanied by precipitation or stormy weather.

Severe thunderstorm: thunderstorm (any local atmospheric disturbance) that produces a tornado, winds more than 50 knots (58 mph), and/or hail at least $\frac{3}{4}$ inch in diameter. A **severe thunderstorm watch** indicates a severe thunderstorm is likely to develop within a 4- to 8-hr period. A **severe thunderstorm warning** indicates a severe thunderstorm has been sighted by radar or reported by a spotter.

Tornado: violent rotating column of air that extends from the base of a thunderstorm to the ground. On a local scale, it is the most destructive of all atmospheric phenomena. Tornado paths range from a few feet to more than 100 mi long (avg. 5 mi) and from a few feet to more than 1 mi in diameter (avg. 220 yds). The average forward speed is 30 mph, and wind speeds can reach to more than 200 mph.

Subtropical storm: cyclone that develops over subtropical waters (20-40° lat.) with 1-min. sustained surface winds of 34 knots (39 mph) or more. It may form over warm or cold water and can develop into a tropical storm or hurricane.

Tropical storm: cyclone that develops over tropical waters (23.5° N-23.5° S lat.) with 1-min. sustained surface winds between 34 and 63 knots (39-73 mph). A **tropical storm watch** is issued when tropical storm conditions pose a threat to specified coastal areas within 36 hours. A **tropical storm warning** is issued when such conditions are expected in a specified coastal area within 24 hours.

Hurricane: tropical cyclone having 1-min. sustained surface winds of 64 knots (74 mph) or more. (West of the international date line, north of the equator, such storms are known as **typhoons**.) The hurricane-force winds form a circle or oval, sometimes as wide as 300 mi in diameter. In the lower latitudes, hurricanes usually move W or NW at 10-15 mph. When the center approaches 25° to 30° N lat., the direction of motion often changes to the NE, with

increased forward speed. In the Atlantic, hurricane season is June 1-Nov. 30. Hurricane season is May 15-Nov. 30 in the eastern Pacific. A **hurricane warning** is issued when a hurricane is forecast for an area within 24 hours.

Winter storm and blizzard: A **winter storm watch** is issued when there is a potential for heavy snow or significant ice accumulations, usually at least 24-36 hours in advance. A **winter storm warning** is issued when a winter storm is producing or is forecast to produce heavy snow or significant ice accumulations. A **blizzard warning** is issued for winter storm conditions where winds are 35 mph or more and there is sufficient falling and/or blowing snow to frequently reduce visibility to less than $\frac{1}{4}$ mi for at least 3 hours.

Floods take many forms. **River flooding:** occurs when rains, sometimes coupled with melting snow, quickly fill river basins with an excess of water. Torrential rains from decaying hurricanes or tropical systems are also a major cause. **Coastal flooding:** tropical storm and hurricane winds or intense offshore low pressure systems can drive ocean water inland. Coastal floods can also be produced by sea waves called **tsunamis**, sometimes referred to as tidal waves, produced by earthquakes or volcanic activity. **Flash flooding:** usually due to copious amounts of rain falling in a short time, flash flooding typically occurs within 6 hours of a rain event. Ice can also cause flash flooding. When ice accumulates at natural or artificial obstructions, it can stop the flow of water. The resulting buildup of water can lead to flooding upstream. If the jam suddenly gives way, a flash flood can occur downstream.

Flash floods account for the majority of flood deaths in the U.S. and are the leading cause of deaths associated with thunderstorms. Urbanization significantly increases runoff because less rain is absorbed by the terrain, making flash flooding in urban areas extremely dangerous. Streets can become swift-moving rivers, and basements can fill with water.

A **(flash) flood watch** indicates flooding or flash flooding is possible within a designated area. A **(flash) flood warning** indicates flooding is in progress, imminent, or highly likely.

National Weather Service Marine Warnings and Advisories

Primary sources of dissemination are commercial radio, TV, U.S. Coast Guard radio stations, and NOAA VHF-FM broadcasts. NOAA broadcasts on a group of frequencies, the most common being 162.40 to 162.55 MHz. These broadcasts can usually be received within 25 nautical mi of the transmission site.

Small craft advisory: alerts mariners to sustained weather and/or sea conditions, present or forecast, potentially hazardous to small boats, including winds 20-33 knots (23-38 mph) and/or dangerous wave conditions. The advisory is also issued when sea or lake ice exists that could be hazardous to small boats. Criteria vary depending on region and type of marine environment.

Special marine warning: indicates potentially hazardous weather conditions, usually of short duration (2 hours or less) and producing wind speeds of 34 knots (39 mph) or more, not adequately covered by existing marine warnings.

Gale warning: indicates winds of 34-47 knots (39-54 mph) not directly associated with a tropical storm are forecast for the area.

Tropical storm warning: indicates that winds 34-63 knots (39-73 mph) associated with a tropical storm are forecast to occur within 24 hours.

Storm warning: indicates winds 48-63 knots (55-73 mph) not directly associated with a tropical storm are forecast for the area.

Hurricane warning: indicates that winds 64 knots (74 mph) or greater associated with a hurricane are forecast for the area within 24 hours.

Monthly Normal Mean Temperatures, Normal Precipitation, U.S. Cities

Source: National Climatic Data Center, NESDIS, NOAA, U.S. Dept. of Commerce

Normals are averages covering a 30-year period. The temperature and precipitation normals given here are based on records for 1971-2000. Temperatures listed below represent means of the normal daily maximum and normal daily minimum temperatures for each month. For stations that did not have continuous records from the same site for the entire 30 years, the means have been adjusted to the record at the present site. (*) = city station. Other figures are for airport stations. T = Temperature in Fahrenheit; P = Precipitation in inches.

Normal High and Low Temperatures, Precipitation, U.S. Cities

Source: National Climatic Data Center, NESDIS, NOAA, U.S. Dept. of Commerce

The normal temperatures and precipitation data given here are based on records for the period 1971-2000. The extreme temperatures are based on records from the time of each station's installation. (*) = city station. Other figures are for airport stations.

Mean annual snowfall (in.): Based on climate normals 1971-2000: Boston, MA, 41.8; Sault Ste. Marie, MI, 132.6; Albany, NY, 62.7; Burlington, VT, 83.1; Lander, WY, 102.9; Anchorage, AK, 69.5.

Wettest spot: Mount Waialeale, HI, on the island of Kauai, is the rainiest place in the world. It has an average annual rainfall of 460 in.

Temperature extremes: A temperature of 136°F observed at El Azizia (Al Aziziyah), near Tripoli, Libya, on Sept. 13, 1922, is generally accepted as the world's highest temperature recorded under standard conditions. The record high in the U.S. was 134°F in Death Valley, CA, July 10, 1913. The world record low of −129°F was recorded at the Soviet station of Vostok in Antarctica on July 21, 1983. The record low in the U.S. was −80°F at Prospect Creek, AK, Jan. 23, 1971.

Hurricane and Tornado Classifications

Source: National Weather Service, NOAA, U.S. Dept. of Commerce

The Saffir-Simpson Hurricane Wind Scale rates a hurricane’s intensity from 1 to 5. The scale, updated in early 2010, provides examples of the type of damage and impacts associated with winds of the indicated intensity. The Fujita (or F) Scale was created by T. Theodore Fujita in 1971, to classify tornadoes. The Enhanced Fujita Scale, an update to the original, was implemented in the U.S. in Feb. 2007. It uses 3-second gusts estimated at the point of damage based on a judgment of 8 levels of damage to 28 indicators.

Saffir-Simpson Wind Scale (Hurricanes)			Enhanced Fujita Scale (Tornadoes)	
Category	Winds ¹	Summary of damage	Rank	3-sec. gust
1	74-95 mph	Very dangerous winds will produce some damage.	EF-0	65-85 mph
2	96-110 mph	Extremely dangerous winds will cause extensive damage.	EF-1	86-110 mph
3	111-130 mph	Devastating damage will occur.	EF-2	111-135 mph
4	131-155 mph	Catastrophic damage will occur.	EF-3	136-165 mph
5	Over 155 mph	Catastrophic damage will occur.	EF-4	166-200 mph
(1) 1-minute sustained winds.			EF-5	Over 200 mph

Tropical Cyclone Names in 2011

Source: National Weather Service, NOAA, U.S. Dept. of Commerce

Atlantic: Arlene, Bret, Cindy, Don, Emily, Franklin, Gert, Harvey, Irene, Jose, Katia, Lee, Maria, Nate, Ophelia, Philippe, Rina, Sean, Tammy, Vince, and Whitney. If there are more than 21 named Atlantic storms in one season, remaining storms take names from the Greek alphabet, starting with Alpha.

Eastern North Pacific: Adrian, Beatriz, Calvin, Dora, Eugene, Fernanda, Greg, Hilary, Irwin, Jova, Kenneth, Lidia, Max, Norma, Otis, Pilar, Ramon, Selma, Todd, Veronica, Wiley, Xina, York, Zelda.

World Temperature and Precipitation

Source: World Meteorological Organization

Average daily maximum and minimum temperatures and annual precipitation based on records for the period 1961-90. Records of extreme temperatures include all available years of data for a given location and are usually for a longer period. Surface elevations are supplied by the WMO and may differ from figures in other sections of *The World Almanac*. NA = Not available.
